U.S. proposals for Iraqi Foreign Minister Tareq Aziz to meet with Mr. Bush in Washington and U.S. Secretary of State James Baker to meet with Iraqi President Saddam Hussein in Bagdhad are currently stonewalled over Bagdhad's suggestion that Mr. Baker visited Iraq on January 13, just two days before a U.N. authorization for the use of force against Iraq becomes effective.

Mr. Carter, in his Newswek essay, said that if war were to be averted, "some of the goals of both sides have to be considered."

He said Iraq would have to withdraw from Kuwait and allow the emirate's ousted government to return to power.

But concessions also had to be made by the United States and other members of the U.S.-led "coalition," he said.

For instance, Mr. Carter said it may be necessary to hold an international conference to discuss the situation in Israel's occupied territories, although he rejected Mr. Hussein's call for that conference to be linked with the Gulf conflict.

Other positive moves that could be made by Washington and its allies, suggested Mr. Carter, include a forgiveness of Iraq's external debt and a long-term land-lease to give Iraq direct access to the Gulf.

MOSCOW (DEC. 9) - Some 3,000 people staged a peaceful demonstration in downtown Moscow on Sunday to mark international human rights day, the official Soviet news agency Tass reported.

The protestors, some carrying portraits of Soviet Nobel Peace Prize winner Andrei Sakharov, who died last December 14, gathered near the Kremlin before marching to KGB headquarters in Moscow, where they held a brief religious service to honor the victims of Stalin.

Tass said that the protest did not attract the 100,000 people expected by the organizers, several democratic organizations in the Soviet capital.

MEXICO CITY (DEC. 10) - A consortium including a French company and a U.S. partner has won the right to take over Mexico's telephone system, the Finance Ministry said Sunday.

The ministry announced that the winning bid for the right to privatize Mexico's telephones came from a group comprising Carso of Mexico, France Cable and Radio (France Telecom) and Southwestern Bell of the United States.

The Mexican telephone system has a payroll of 67,000 and private analysts have said it is worth about eight billion dollars.

MOSCOW (DEC. 9) EFE - Several people were injured Sunday in an explosion at a chemical factory in the central Siberian town of Tomsk, the Soviet news agency TASS reported.

TASS, which did not specify the number of casualties, said the blast occurred around midday (0500 GMT) when workers switched on a unit which produces ethylene.

Sunday's explosion, the causes of which were not yet clear, is the second so far this year in the factory, according to the news agency.

BOGOTA (DEC. 9) EFE - The Army Sunday shot dead at least three leftist guerrillas who were trying to prevent Colombians from voting in elections for a constitutional assembly, an official said.

Clara Elsa Villalba de Sandoval, governor of the northeastern province of Santander where the clash took place, said that National Liberation Army (ELN) rebels had set up a roadblock on a highway to seize identification documents from passers-by, thereby stopping them from voting.

Troops stationed nearby killed at least three of the rebels while several more guerrillas managed to escape, she said.

The Defense Ministry said the incident was +isolated+, as people throughout

the nation went to the polls +in total calm+ to elect a 70-member National Constituent Assembly which will rewrite the 1886 constitution.

The pro-Cuban ELN and the Colombian Revolutionary Armed Forces -- the country's two main left-wing guerrilla groups -- have criticized the elections but Sunday issued a joint statement saying they were prepared to enter into dialogue with the Assembly on the new constitution.

GUATEMALA CITY (DEC. 9) EFE - The tortured body of a Guatemalan human rights leader was found Sunday along a highway outside the capital, a spokesman for the dead man's rights organization said.

The Mutual Support Group (GAM) spokesman said residents from the nearby town of Villa Caneles found the mutilated body of Oscar Agusto Miranda, 29, on a stretch of highway 18.5 km outside the capital.

Agusto Miranda was abducted Thursday from his home by unknown assailants.

He was a leading member of GAM, a self-help group set up by the families of some 40,000 people who are missing or believed killed by security forces under previous military governments.

Several government officials have accused GAM of having links to leftist rebels.

Some 100,000 people have died in three decades of political violence in Guatemala. Some of the victims were GAM members, but most were peasants, labor activists and leftists killed by the Army in counter-insurgency operations.

Last week, 14 civilians were shot dead when troops opened fire on a crowd of people, mostly indigenous Indians, as they approached the Army barracks in the town of Santiago Atitlan, 120 km west of the capital.

On Thursday, the Defense Ministry said that two soldiers would be tried as instigators of the massacre.

#90343u0044 12/09/1990 ~United Press International

ATLANTIC CITY, NJ (DEC. 9) UPI - Mike Tyson brutalized Alex Stewart from the opening punch and decked him three times Saturday night before the referee ended the rampage at 2:27 of the first round.

With the drive to punish that terrorized opponents until he lost the title last February, Tyson dropped Stewart for the third time with a left hook that was enough for referee Frank Cappuccino.

Tyson had entered the ring with a good sweat and the menace in his eyes that was trademark of his reign. His second punch sent Stewart to the canvas and the message was sent.

Stewart was up at the count of ''4'' and Tyson delivered a right to the body. The former champion slipped and actually was down for a second before bouncing up to knock down Stewart for the second time with a chopping right.

Stewart barely made it up at ''9'' and while Tyson had answered all the questions, the only one that remained for Stewart was if he could survive the round.

Tyson, 39-1 with 34 KOS, was a 9 1/2 to 1 favorite in Las Vegas, Nev.

Stewart, 26-2 with 26 knockouts, suffered his second loss in four fights since going 24-0 with 24 knockouts to start his professional career.

In his only other fight against an opponent of stature, Stewart lost to current champion Evander Holyfield in eight rounds Nov. 4, 1989.

Tyson, in his second bout since losing the title to James ''Buster'' Douglas, had fought one round since then. In June, he knocked out Henry Tillman in the first round, then was scheduled to fight Stewart Sept. 22. However, during sparring 23 days before the planned fight, he was cut badly and needed 48 stitches to close the gash over his right eye.

So impressed was Tyson with Dr. Ira Trocki's work, he used him as the cut man for this fight.

Tyson also in the past year sustained injury to his left eye, during the Douglas loss, but Saturday, he looked on the way back to rebuilding a reputation for striking fear in opponents.

The youngest heavyweight champion in history, Tyson won his first title in 1986 at age 20, less than 20 months after turning professional. He unified the titles in 1987, becoming the first undisputed champion since Muhammad Ali.

Among his nine successful title defenses was Tyson's 91-second knockout of Michael Spinks that perpetuated Tyson's aura of invincibility.

He lost the title as the biggest favorite in heavyweight history with Douglas's 10th-round knockout Feb. 11, 1990 in Tokyo.

Tyson gave away five inches in height and eight in reach while weighing 217 3-4 - his ideal fighting weight. Stewart weighed 218.

Tyson earned about $5 million for the last bout in his longtime deal with Home Boxing Office and Stewart made $535,000.

#90343u0084 12/09/1990 ~United Press International

WARSAW (DEC. 9) UPI - Poland voted Sunday for its first popularly elected president, with Solidarity leader Lech Walesa favored over emigre Canadian businessman Stanislaw Tyminski following a bitter campaign.

Polls opened at 6 a.m. and were to close at 8 p.m. for some 27.5 million eligible voters. Some 22,500 polling stations were set up around the country.

The German polling firm INFAS, which has monitored most elections in Eastern Europe's newly emerging democracies in the past two years, was monitoring 300 of the polling stations and was expected to announce its projections shortly after the voting ended.

The election, whose first stage took place Nov. 25, was the first wholly free balloting in Poland since before World War II. The June 1989 parliamentary elections that put Solidarity into office were only partially free.

Walesa, whose backers helped force an early presidential election to replace the former communist leader, Gen. Wojciech Jaruzelski, is the heavy favorite in the election following revelations that Tyminski has links with former communist VIPs and with the former secret police.

The final poll released before the election showed Walesa with 73 percent support compared to 16 percent for Tyminski, with 11 percent undecided. That compared with 58 percent for Walesa and 30 percent for Tyminski the previous week.

But the survey firm, OBOP, cautioned that some of those surveyed may have been afraid to show their support publicly for Tyminski.

Tyminski, an expatriate businessman from Canada and Peru, burst onto the political scene in mid-November as one of six candidates who won the support of 100,000 voters to run for president.

He edged out Prime Minister Tadeusz Mazowiecki for second place on Nov. 25 to earn the right to challenge the favorite, Walesa.

(DEC. 9) UPI - President Bush is spending the night at the White House after returning from a South American tour that took him to five nations. Bush will go to church in the morning... and is expected to confer with aides and continue monitoring events in the Persian Gulf before attending an evening

christmas celebration. Bush returned to Washington still talking tough about Iraq, saying war remains an option as long as Iraqi troops remain in Kuwait.

The State Department says its embassy in Baghdad has chartered a plane to fly Americans from the Iraqi capital and Kuwait to Frankfurt, Germany, Sunday. But the department says it's still waiting for an Iraqi response on when the nearly one-thousand Americans held by Iraq can leave. A spokesman for former Texas Governor John Connally says Connally flew out of Baghdad Saturday with about 30 Americans.

The shuttle Columbia may be coming home early due to a clogged line that has left the astronauts unable to flush a tank holding waste water into space. Flight controllers told the crew they may be looking at a Monday landing. However, if work to find additional storage space for the shuttle's waste water is successful, the astronauts may get in a full-duration 10-day flight.

Moscow's deputy mayor says foreign economic help will be needed ''at least until spring'' to held cities dealing with shortages of food and other supplies. But the official says while the nation does need help it is NOT Ethiopia and the capital is NOT on the verge of famine. Official Soviet television Saturday night called the nation's distribution system ''paralyzed.''

BELGRADE, Yugoslavia (DEC. 9) UPI - Voters in the republics of Serbia and Montenegro cast ballots Sunday in elections that will determine the fate of Yugoslavia's last surviving communist regimes.

The republics' first multi-party polls in 45 years will have a major impact on Yugoslavia's constitutional crisis, which has fueled fears of a civil war or preemptive action by the conservative Marxist-led army to preserve the multi-ethnic nation of 23 million against the strains of resurging nationalism.

Attention was focused almost exclusively on Serbia, the largest of the six Yugoslav republics, where 6.86 million people were eligible to chose between 32 candidates for president and 1,705 hopefuls for the 250-seat unicameral assembly.

A boycott was expected by voters of the 1.7 million-strong ethnic Albanian majority of Serbia's restive Kosovo Province.

Forty-four parties were involved in the contests, the major contenders being the ruling communists, running under the new name of the Socialist Party of Serbia, the right-wing nationalist Serbian Renewal Movement and the right-center Democratic Party.

Montenegro, many of whose 600,000 people claim to be Serbs, was electing a new president, four vice presidents and a 125-member unicameral assembly.

Some 389,155 people were eligible to chose between the ruling hard- line Communist Party, the nationalist Popular Party, and the Alliance of Reformist Forces, formed by federal Prime Minister Ante Markovic to promote his program of Western-style reforms.

Twelve hours of polling opened at 7 a.m. First results from Serbia were expected by midday Monday, while preliminary returns in Montenegro were due Tuesday.

In both republics, runoffs will be held Dec. 23 in races in which no candidate wins 51 percent of the ballots.

Serbia's communists, under President Slobodan Milosevic, were given the advantage because of their total grip on the republic's print and broadcast media, which for the past three years have waged an intense pro-government propaganda campaign.

In addition, the regime remains in complete control of the economy and bureaucracy and has been fanning Serbian nationalism to compensate for a loss of popularity fueled by the defeats of communist governments in other Yugoslav

republics earlier this year and across Eastern Europe in 1989.

Opposition leaders have reiterated fears that the communists would rig the elections, and canceled a boycott only after Milosevic agreed to given their representatives seats on the commissions that will count the ballots.

The boycott in Kosovo was called by the main ethnic Albanian party to protest against the dissolution of the provincial government and elimination of virtually all autonomy under a new Serbian constitution enacted by the communists in September.

Ethnic Albanians, claiming discrimination by Serbia, are demanding that Kosovo be made Yugoslavia's seventh republic. Serbs, of whom there are only 200,000 in Kosovo and 8.5 million in the rest of Yugoslavia, cherish the province as the ''cradle'' of their state, culture and Orthodox faith.

The outcome of the elections will determine Serbia's stand in a crisis over the future shape of Yugoslavia ignited by the breakup in January of the national communist organization that seized power at the end of World War II.

Nationalist parties elected in multi-party polls last spring in Croatia and Slovenia, fearing domination of the federation by majority Serbs, are threatening to secede unless Yugoslavia adopts a new constitution transforming the country into a confederation of independent states linked by trade.

Milosevic has refused to negotiate on the issue, saying he will accept confederation only if Serbia's borders are enlarged to include Serbian enclaves now in other republics, a demand regarded as a certain formula for civil war. The Montenegrin communists side with Milosevic.

The military also opposes confederation and has indicated that it would use force to preserve the federation forged in 1945 and the socialist system.

Serbia's main opposition leaders say they would negotiate with Croatia and Slovenia on finding a solution to the dispute.

In addition to Slovenia and Croatia, nationalist parties won the largest shares of seats in multi-party polls held in Macedonia and Bosnia-Hercegovina. Federal parliamentary elections have been delayed until at least next spring because of the constitutional crisis.

JOHANNESBURG, South Africa (DEC. 9) UPI - Authorities have allowed 25 senior African National Congress members to enter South Africa after detaining the group at an airport upon their return from exile, an ANC official said Sunday.

Following appeals by ANC Deputy President Nelson Mandela to government officials in Pretoria, authorities at Johannesburg's Jan Smuts airport permitted the group to pass through customs late Saturday, said Yusuf Saloojee international department administrative secretary for the ANC.

The 25 arrived Friday and Saturday and were held in a transit lounge ''most certainly against their wishes and against the spirit of an agreement we had with the government ... . These people were detained,'' Saloojee said.

Airport and government officials had no comment.

The group consisted mainly of ANC representatives to the movement's missions abroad, and they were returning to attend the ANC's consultative conference in Johannesburg, due to begin in mid-December.

Saloojee said the government had ''tacitly agreed to let these 25 return for our consultative conference,'' which will discuss and review policy.

The government in August consented to a phased return of an estimated 25,000 political exiles following two rounds of preliminary talks with the ANC that

by Aug. 6 cleared the way to full-blown power-sharing negotiations on ending 42 years of white minority rule.

But ANC officials have since demanded that exiles be allowed to return at will citing especially the need for large-scale representation at the December conference.

Pretoria has stood by the agreements on a gradual return, and has also required all returning exiles to sign statements detailing any politically motivated activities for which they might require indemnity from prosecution.

#90343u0168 12/09/1990 ~United Press International

JOHANNESBURG, South Africa (DEC. 9) UPI - Attackers killed one policeman and injured four in black townships overnight during countrywide politically motivated violence, police said Sunday.

A surge of black internecine strife around midnight Saturday also killed at least six people in the troubled township of Thokoza, east of Johannesburg, a police spokesman said.

Unknown assailants hacked to death a constable in Cape Town's township of Khayelitsha, gunmen fired on a police foot patrol in Natal province's

Chesterville township and three other policemen were wounded.

A similar attack near Natal's Umkomaas left one officer injured, police said in their daily report on South Africa's political strife.

They said police fatally shot one suspected attacker after the Umkomaas incident and wounded another.

The spokesman said a patrol in Thokoza found the bodies of the six people after they had been hacked, stabbed or shot to death in factional violence.

Thokoza was a major flashpoint during South Africa's worst outbreak of urban faction fighting, over six weeks to mid-September, when battles between predominantly Xhosa supporters of the African National Congress and Zulus of the Inkatha Freedom Party killed up to 800 people.

#90343u0174 12/09/1990 ~United Press International

(DEC. 9) UPI - A jetliner carrying about two dozen American hostages landed in Texas early Sunday, returning the latest group of Western captives to freedom three days after Iraqi President Saddam Hussein decided to relinquish his human shields.

A privately owned Boeing 707 landed at Ellington Field on the outskirts of Houston about 4:30 a.m. CST following an overnight flight from Baghdad and Shannon, Ireland. A few hundred cheering spectators and relatives gathered at the former Air Force Base to greet the early morning hostage flight.

Former Texas Gov. John Connally, who began unauthorized negotiations with Baghdad before Saddam decided to free the hostages, left Iraq Saturday with as many as 30 Americans and one Briton, officials said.

President Bush said Saturday that Saddam's decision to release his remaining Western hostages might make it easier to go to war against Iraq.

At the same time, Saddam's proposed Jan. 12 date for meetings in Baghdad with Secretary of State James Baker, just three days before the U.N. deadline for Iraq to withdraw its troops from Kuwait, was rejected by the White House.

''The 12th is unacceptable,'' said White House press secretary Marlin Fitzwater. He said the administration preferred that Baker and Saddam get together in late December or early January.

Bush, in Caracas Saturday at the end of a South American tour, said Iraq's decision this week to release all of the estimated 6,000 Japanese and Westerners still in Iraq and Kuwait did not decrease the chances of war.

''When you don't have Americans there and if force is required, that's just one less worry I've got,'' Bush, commander in chief of some 230,000 U.S. troops in the Persian Gulf region, said at a news conference.

''I want a peaceful solution,'' he said. ''I don't feel we are closer to a peaceful solution. And the reason I don't is that Saddam Hussein keeps insisting that Kuwait is a province of Iraq and he will not get out of Kuwait.''

Bush said the release of the hostages, who had been held as shields against attack, ''makes it no more difficult at all'' to convince other countries it might be necessary to take action against Iraq.

''This facilitates the difficult decisions that might lie ahead,'' he said.

An Iraqi official in Cairo, Egypt who asked not to be identified, condemned Bush's statements, telling United Press International they proved ''there is a premeditated intention to launch an aggression against Iraq.''

The official Iraqi News Agency announced Saturday that Saddam was proposing that his foreign envoy, Tariq Aziz, meet with Bush in Washington on Dec. 17 and that Baker meet with Saddam in Baghdad on Jan. 12.

On Nov. 30, Bush proposed the high-level talks as a final chance to avoid war. The United States subsequently recommended that Baker and Saddam get together Dec. 20, 21 or 22, or Jan. 3.

Fitzwater said, ''We've asked them to pick one of those four dates. We think it (the meeting) should be closer to the Aziz meeting. We want them closer together.''

#90343u0175 12/09/1990 ~United Press International

DUBAI, United Arab Emirates (DEC. 9) UPI - The United Arab Emirates, which with Saudi Arabia is hosting U.S.-led allied troops to deter Iraqi aggression after the invasion of Kuwait, called Sunday for a long-term strategy if oil-rich Persian Gulf states are to survive.

U.A.E. Minister of State for Foreign Affairs Sheikh Hamdan bin Zayed al Nahyan told a seminar in Abu Dhabi on the Persian Gulf crisis that without a strategy there could be no future for the small, almost defenseless states.

''There is no future for those who do not think about (the) future,'' the U.A.E. news agency WAM quoted Sheikh Hamdan as saying.

''We should consider how to positively adapt ourselves to these changes,'' he said, adding the gulf was not ''only a region for the present but for the

future.''

He was apparently referring to the situation after settlement of the gulf crisis, triggered by Iraq's Aug. 2 invasion of Kuwait. Iraq's decision to free all foreign hostages has increased optimism in gulf Arab states that Iraqi leader Saddam Hussein will eventually withdraw from Kuwait.

But a number of gulf area officials at an Organization of Arab Petroleum Exporting Countries meeting in Cairo, Egypt told United Press International that they were concerned about the security of their countries should Iraqi withdraw from Kuwait with its armies intact.

''Of course there will have to be coordination among gulf states, and especially the six members of the Gulf Cooperation Council, on how best to plan our future defense and other needs,'' one official said.

Gulf Arabs are wary about a U.S. suggestion that they join a military pact with U.S. participation, which some Arabs might see as allowing Washington to keep a permanent military presence in the gulf. President Bush has already assured Soviet leader Mikhail Gorbachev that U.S. troops will not stay in the gulf longer than necessary.

#90343u0191 12/09/1990 ~United Press International

JERUSALEM (DEC. 9) UPI - About 1 million Palestinians marked the third anniversary of their uprising against Israeli occupation under curfew Sunday and soldiers killed one Arab during one of the few clashes in the Gaza Strip, Palestinian and military sources said.

A general strike called to commemorate the Palestinian uprising shut down the rest of the Gaza Strip, West Bank and East Jerusalem. The military reinforced its presence along main roads and soldiers were under orders to ''act quickly and forcefully'' to prevent violence, Army Radio reported.

''The intifada is a popular revolution that came to prove to Israel and the world that the Palestinians totally reject all kinds of occupation and one day they will have their state,'' said Awni Neman, a 50-year-old Gaza City businessman.

''The intifada will continue as strong as it is until those (U.N.) resolutions will be completely applied,'' Neman said, referring to resolutions calling for Israeli withdrawal from the territories it captured during the 1967 Israeli-Arab war.

Yitzhak Rabin, defense minister during the first two years of the uprising, said he believed Israeli force alone was not the solution to the uprising and Israel must face the fact that co-existence with the Palestinians can only

come out of a separation that ensures Israeli security, Israel Radio reported.

The military clamped curfews on most of the Gaza Strip and many West Bank Palestinian communities and refugee camps Friday in advance of the uprising anniversary Sunday. The curfews also were imposed to prevent violence Saturday which marked two months since Israeli police killed at least 17 Palestinians on the Temple Mount, Islam's holiest site and site of the Jewish Temple.

About 1 million of the estimated 1.7 million Palestinians living in the occupied territories were under curfew. Streets in the Gaza Strip were nearly deserted, except for a few scattered Palestinians walking to health clinics or men sitting on sidestreets sipping tea.

If word of an Israeli patrol came around the neighborhoods, people quickly moved inside.

''After three years of the intifada - and today it is marking the beginning of the fourth - it will continue strong, comprehensive and well-organized to prove the unity of the Palestinians inside and in the diaspora,'' said Rashad abu Khaled, 33, as he sat on a low stool outside his home in Gaza.

In the Gaza village of Bani Suhaila, a 27-year-old Palestinian was shot during a confrontation with Israeli soldiers, Palestinian and military sources said. Mohammed al Madani, whose 20-year-old brother was killed in February, was shot in the thigh and died after severe bleeding, the sources said.

Military sources said al Madani was killed as he tried to strangle a soldier and steal his weapon. But Palestinian sources said al Madani was arrested because he broke the curfew and was shot when he tried to escape from Israeli forces who were beating him.

Since the start of the uprising, the military reported more than 620 Palestinians were killed by Israeli soldiers and an estimated 300 Palestinians were killed by other Palestinians because they were suspected of collaboration or immoral behavior.

The Israeli human rights organization, B'Tselem, places the figure of Palestinians killed by security forces and Israeli civilians at 750.

More than 20 Israeli soldiers and civilians were killed in the occupied territories during the three-year uprising, military statistics show. B'Tselem reports another 21 Israeli civilians and three tourists killed in uprising-related violence within Israel's pre-1967 borders.

The uprising erupted Dec. 9, 1987, after four Palestinians were killed in a traffic accident in Gaza involving an Israeli. Rumors spread the accident was intentional, sparking widespread rioting in the Gaza Strip that spread to the West Bank and East Jerusalem.

In a commentary, Israeli journalist Ron Ben-Yishai compared the uprising to the disease AIDS eating away ''at the natural immunity of the state of Israel, its components of power and the motivation of its citizens.''

''A political solution is urgently needed,'' Ben-Yishai wrote. ''Such a solution will be found in the end, either willingly or by force. The question is how much blood will be spilled on the way and what price will the state of the Jews have to pay in a few years time for what it could receive in the near future for next to nothing.''

#90343u0195 12/09/1990 ~United Press International

BOYNTON BEACH, Fla. (DEC. 9) UPI - Detectives said a Florida man's family confessed they had shot him to death because he was a miserable, grouchy man who spent most of his time lying on the couch watching television.

Police call it ''the couch potato murder.''

''It's in a category all it's own,'' said Boynton Beach Police Lt. Dale Hammack. ''It's definitely bizarre.''

Mary Grieco, 48, her 15-year-old daughter Ann, and the daughter's sometime boyfriend, Melvin Steele, 19, are charged with conspiracy and first-degree murder in the death of Joe Grieco, 52. They are being held in the Palm Beach County jail pending a March trial.

According to documents made public last week by the Palm Beach County State Attorney's Office, the family was under pressure from mounting debts.

Joe and Mary Grieco did maintenance work at a hotel and took odd jobs, struggling to make payments on their two-bedroom, $60,000 house.

Ann Grieco said her father was depressed and cranky all the time.

''He'd come home from work and all he'd do is lay on the couch and watch TV. That's all he did. Like, he never did anything,'' she said. ''I didn't really want him dead. I just wanted him to stop being miserable.''

Ann Grieco said her parents could not afford a divorce. As the debts grew, Ann and Mary Grieco decided killing Joe Grieco would ease their burden, police said.

''I wanted to do it, but I didn't want to do it,'' Mary Grieco told police. ''Like I said, he was a miserable bastard, but he had his good points too.''

Police said they failed several times before finally succeeding in killing Joe Grieco.

They spiked his chicken dinner with LSD and put cocaine in his wine, trying to prompt a heart attack. But the drugs only made him laugh, they said.

They searched for poisonous mushrooms and discussed planting explosives in his car, the transcripts said.

''We tried everything that we thought of,'' Ann said. Finally, she said, ''We all decided that (shooting) would probably be the best.''

Ann had been telling her friends she wanted her father dead, according to the documents. Another teen introduced her to a 15-year-old who gave her and Steele a stolen .32-caliber semi-automatic pistol, the documents said. Police did not charge the unidentified 15-year-old.

Ann Grieco and Steele bought bullets for the gun, tested it on her bedroom pillow and found it satisfactory, police said.

For a month, the three tried repeatedly to shoot Joe Grieco, but chickened out police said. On the night of Aug. 9, they succeeded, police said.

According to transcripts of statements the trio gave police, Mary Grieco

crawled into bed with her snoring husband, clutching the pistol, and shot him in the left temple.

Detectives said the suspects then put the gun in Joe Grieco's left hand, called 911 and told police he had committed suicide. The Palm Beach County Medical Examiner's Office investigated, the death was ruled a suicide and Grieco's body was cremated.

But police grew suspicious when they learned Grieco was right-handed. They also found it strange that he had gone to bed and apparently taken a nap before committing suicide.

Word eventually got around that Steele was bragging to friends about the killing. Detectives strapped a hidden tape recorder on one of his friends and recorded Steele as he discussed the death.

On Aug. 27, police brought the three in for statements, then arrested them. Prosecutors are seeking the death penalty.

#90343u0208 12/09/1990 ~United Press International

LONDON (DEC. 9) UPI - Iraq appears to be redrawing Kuwait's border by putting up a barbed wire fence around part of the oil-rich state, a sign that Saddam Hussein may be planning a partial withdrawal, a British newspaper said Sunday.

The Observer newspaper said Iraq has constructed a barbed wire barrier with apparent customs and immigration posts around the southern tip of an oilfield which extends across the border into northern Kuwait.

Iraq, which invaded Kuwait on Aug. 2, reportedly intends to keep part of the disputed oilfield and two strategic Persian Gulf islands which it has long sought in order to give it better access to the gulf, the newspaper said.

Iraq also will keep the equipment taken from Kuwait as ''reparations'' for what Iraq has maintained was Kuwait's ''economic warfare.'' Prior to the invasion, Iraq accused Kuwait of depressing the price of oil by overproduction.

The newspaper said Arab governments are expecting Iraq to withdraw in late January, but said the new frontier could mean an earlier retreat.

Ali al-Sabah, an official in the Kuwaiti embassy in Washington, said his exiled government in Saudi Arabia had received reports of the barbed-wire fence, the Observer reported.

While President Bush and the exiled emir of Kuwait have publicly maintained that Iraq must restore Kuwait's pre-invasion borders, the Observer said territorial concessions were possible.

''Even if Kuwait balked (over the new border), the U.S. isn't going to go to war over a couple of islands,'' an unnamed State Department official told the newspaper.

The Sunday Times newspaper, quoting senior Middle Eastern sources as predicting Iraq would pull out of Kuwait and declare victory over the United States. It said Saddam's Ba'athist Party was preparing a propaganda campaign for the Iraqi people, claiming Saddam had stood up to the world's superpowers.

The newspaper said the retreat was regarded as a ''nightmare scenario'' by moderate Arab governments, because it would allow Iraq to keep its military advantage, posing a threat to the region and driving up oil prices.

#90343u0210 12/09/1990 ~United Press International

WASHINGTON (DEC. 9) UPI - National Security Adviser Brent Scowcroft said Sunday that Iraq is ''still playing games'' in setting the date for direct talks with the United States.

Scowcroft, appearing on NBC's ''Meet the Press,'' said the United States offered the Iraqis the option of four dates for Secretary of State James Baker's trip to Baghdad, ranging from Dec. 20 to Jan. 3.

But he said the Iraqis came back with a proposal of a later date for the Baker trip, Jan. 12, only three days before the expiration of the period after which United Nations Resolution 687 authorizes the use of force against Iraq if it hasn't pulled out of Kuwait.

Scowcroft said, ''To me what it shows is they're still playing games, they're still manipulating, that they're not serious.''

Scowcroft said that Jan. 12 date is too late to be accepted by the U. S. government.

But Iraq's permanent representative to the United Nations, Abdul Amir Anbari, said on the same program, ''This will be resolved. It is a marginal issue, technical.'' If the Jan. 12 date is not acceptable to the United States, he said, ''No problem.''

Scowcroft said, ''I'm not confident it will be worked out.''

In the talks proposed by President Bush on Nov. 30, Iraqi Foreign Minister Tariq Aziz would come to Washington on or about Dec. 17, and then Baker would make the return trip sometime before Jan. 15.

The national security adviser said that the U.S. strategy is to convince

President Saddam Hussein ''that he can't play games, he has to get out of Kuwait.''

Even when that happens, Scowcroft said, the U.S. concerns will not disappear. He said the United States continues to be concerned about the actual or potential presence in Iraq of ''weapons of mass destruction'' - chemical, biological and possibly nuclear.

The ideal solution to that problem, he continued, would be some sort of international inspection and control of those weapons in Iraq's arsenal.

Anbari said he has the impression that ''things are moving in the right direction'' with the contacts between Washington and Baghdad leading to possible negotiations.

However, Bush and Baker have repeatedly said that the secretary of state is not going to Baghdad to negotiate but merely to emphasize face- to-face that the only solution for the crisis in the Persian Gulf must start with the unconditional, total withdrawal of Iraqi forces from Kuwait.

#90343u0274 12/09/1990 ~United Press International

(DEC. 9) UPI - The message, as delivered by Shaquille O'Neal, is very clear.

Opposing college basketball teams do not want to get O'Neal fired up because when he is, the Louisiana State team becomes a lot better than it already is.

O'Neal, a 7-foot-1 sophomore, scored a career-high 29 points, grabbed 14 rebounds and blocked six shots Saturday to lead the 17th-rated Tigers to a 92-82 victory over No. 2 and previously unbeaten Arizona.

Arizona was one of two ranked teams that lost Saturday, with No. 22 Kansas falling 88-71 at Kentucky. Elsewhere, No. 1 Nevada-Las Vegas routed Nevada 131-81 while third-ranked Arkansas was a 95-82 winner at Missouri. No. 4 Syracuse and No. 7 Indiana each won their own tournaments, with the Orangemen topping North Carolina-Charlotte 113-99 and the Hoosiers improving to 34-0 in Indiana Classic play with a 91-64 decision over San Diego.

Elsewhere in the Top 10, fifth-rated Duke stopped Michigan 75-68; No. 6 Georgetown overcame a cold shooting night for a 53-47 triumph over Rice; UCLA, tied with Indiana for the No. 7 rating, dropped Notre Dame 99-91; and No. 9 Ohio State stayed unbeaten with a 112-54 victory over Chicago State. No. 10 North Carolina did not play Saturday.

In Baton Rouge, where LSU is always tough anyway, O'Neal said he decided before the game he wanted to be the factor against Arizona.

''I tried to dominate the game,'' O'Neal said. ''I went out and played hard. I got into foul trouble, as usual, but we played hard and we won.''

Arizona, 7-1, did not let the Shaquille Show completely dominate. The Wildcats were within 83-82 with less than a minute to play but LSU was able to score the game's final nine points.

O'Neal had a big weekend as LSU mauled Division III Chapman College 101-68 on Friday night. The center had 18 points, 16 rebounds and six blocked shots in just 20 minutes of playing time.

Fouls kept his playing time down Saturday, too, but O'Neal made his 28 minutes on the court count. In 48 minutes of playing time in a span of less than 24 hours, O'Neal accounted for 47 points, 30 rebounds and 12 blocked shots.

LSU is 4-1, with the only loss a 93-91 setback against Villanova, and two victories over rated teams (No. 22 Texas and Arizona). But Coach Dale Brown isn't about to say his team's season is complete.

--- AROUND THE COLLEGE SCENE ---

In other games involving ranked teams: No. 12 Georgia beat Mercer 117-50; Pittsburgh and Oklahoma, tied for 13th, each won with the Panthers topping West Virginia 96-87 and the Sooners running up a 141- 105 rout of Virginia Commonwealth. St. John's protected its No. 18 standing by beating BYU 67-62 in the Cougar Classic title game while 19th-ranked Michigan State beat Detroit 83-61 and 20th-rated Georgia Tech topped Fordham 92-72.

South Carolina, tied with Kansas at No. 22, was a 87-63 winner over Temple while No. 24 Texas won the Longhorn Classic with a 116-70 rout of Pan American. East Tennessee State, rated 25th, improved to 6-1 by beating James Madison 68-65.

At Reno, Nev., UNLV set a school record with 21 three-point goals. Travis Bice had six three-point goals and was one of five Runnin' Rebels to score at least 18 points. UNLV turned a 3-point game into a romp with a 34-10 run over the final nine minutes of the first half. Larry Johnson led the Rebels with 21 points.

At Columbia, Mo., Todd Day scored 26 points, including 6 consecutive Arkansas points to break a second-half tie and lift the 7-1 Razorbacks past Missouri. The Tigers' Jamal Coleman tied the score at 67-67 with a three-pointer with 10:12 to play but Day made consecutive 3-point shots and Lee Mayberry had a basket to restore the Razorbacks' 6-point lead less than a minute later. The loss ended Missouri's record 34-game home- court winning streak and dropped the Tigers to 3-2.

At Syracuse, N.Y., Dave Johnson scored 27 points, including 20 in the second half, to power Syracuse in the title game of the Carrier Classic. The victory gave Syracuse, 7-0, its 12th championship in 14 Carrier Classics, and Coach Jim Boeheim 350 career victories in record time. Syracuse's Billy Owens had 24 points, 16 rebounds and seven assists and was voted the tournament's Most Valuable Player.

At Durham, N.C., Grant Hill scored 19 points and fellow freshman Antonio Lang recorded six blocked shots leading Duke past Michigan. The win was the 61st consecutive triumph for the 6-2 Blue Devils at Cameron Indoor Stadium against non-ACC opponents. The Wolverines, 3-1, were led by Demetrius Calip with 23 points and Eric Riley with 17 points before fouling out.

At Houston, Lamont Morgan scored nine points in the second half in helping the Georgetown Hoyas, 5-0, overcome a cold-shooting night and hold off Rice. Rice held a three-point lead over Georgetown at 37-34 with 11 minutes remaining before the Hoyas built an 11-point lead.

At Los Angeles, Don MacLean moved into 12th place on the UCLA scoring list after scoring 30 points and helping the Bruins improve to 6-0 for the first time in eight seasons. UCLA was in control throughout, with MacLean's spinning 5-foot jumper shot from the lane igniting a 9-2 run midway through the first half. Notre Dame fell to 2-6 by losing a sixth consecutive game for the first time since the 1971-72 season.

At Bloomington, Ind., Calbert Cheaney scored 25 points and Indiana remained undefeated in the Indiana Classic with its 34th consecutive Classic win and 17th tournament title. Cheaney was named tournament Most Valuable Player and joined teammates Jamal Meeks, Pat Graham and Greg Graham on the all-tournament team. Pat Holbert, who led San Diego with 27 points, completed the honor squad. The Hoosiers are 7-1.

At Columbus, Ohio, Perry Carter scored 20 of his 24 points in the first half in leading the Ohio State Buckeyes over winless Chicago State. It was the fourth consecutive lopsided win for the Buckeyes, who have scored at least 111 points in all four victories.

At Lexington, Ky., Sean Woods scored a career-high 25 points to help keep the Kentucky Wildcats undefeated with a vengeful victory over Kansas. The Jayhawks pasted Kentucky 150-95 last season. The Wildcats, 4-0, turned a tight 63-62 game into a comfortable victory as Jamal Mashburn scored seven points in a 19-0 run. Kansas is 3-2.

#90343u0339 12/09/1990 ~United Press International

GOWERS CORNER, Fla. (DEC. 9) UPI - Police academy cadets from the Tampa Bay area completed their final exam during the weekend by capturing a dangerous prisoner - an ill-tempered, 7-foot alligator.

Gater roping is a handy skill for Florida police officers and has been included in the police academy curriculum for years.

''And you thought New York was dangerous,'' joked one cadet, as the group completed the exercise Saturday in a wooded area behind the east campus of Pasco-Hernando Community College.

Capt. James Doxey of the U.S. Game and Fresh Water Fish Commission instructed the aspiring officers.

Alligators have razor-sharp teeth, tails that can knock over a grown man, and crushing jaw power equal to 2,000 pounds per square inch, Doxey cautioned.

''If you get your gun hand too close to those teeth, he could could end your career today,'' Doxey warned.

Dividing into teams, two cadets roped the gator's head while two others tried to rope its tail, ''just like a good old cowboy,'' Doxey said.

Next, one student held its mouth shut while another wrapped electrical tape around the jaw.

''Y'all be real careful when you're taping so that you don't tape your partner to him,'' Doxey warned.

The alligator made vicious swings with its tail at a couple of the cadets and tried to roll over several times to loosen another cadet's hold on the rope around its head.

But all 19 cadets from Pasco, Pinellas and Hillsborough counties successfully tied the gator, qualifying them for graduation Monday.

The alligator's future did not appear as bright. The police academy uses only commercial alligators for the classes and, like the others, this one eventually will be skinned, Doxey said.

In 13 years of teaching gator capturing techniques, Doxey said he has never seen anyone injured except himself. About five years ago, an alligator cut his hand with one of its teeth, he said.

Once, however, a cadet killed an alligator when he pulled its head too far back and snapped its spine, he said.

(DEC. 9) UPI - One of the worst snow storms in memory is paralyzing parts of Britain. Birmingham airport has closed and traffic was delayed at London's two largest airports, Heathrow and Gatwick. Winds of 60 miles an hour knocked down power lines, leaving at least a quarter of a Million houses without electricity. British Rail said links between London and many northern cities were cut off.

The first foreign hostages freed under Iraq's new order have left. 41 Japanese headed home on a chartered flight. Former Texas Governor John Connally flew out of Baghdad with about 30 Americans. Britain has broadcast word to its citizens who are hiding in Kuwait to come out and prepare to leave. An estimated six-thousand westerners and Japanese are held in Iraq and Kuwait.

The Soviet news agency Tass says next month's summit between Mikhail Gorbachev and President Bush may be postponed because of the Persian Gulf crisis. They are scheduled to meet in Moscow. High-level meetings between the United States and Iraq may not allow time to prepare for the summit. Secretary of State Baker and Soviet Foreign Minister Eduard Shevardnadze meet this week in Houston to discuss the summit.

Polish voters are electing a president in a runoff election today. Pre-election polls show Lech Walesa is a heavy favorite over Stanislaw Tyminski. Walesa is one of the founders of Solidarity. Tyminski recently returned to Poland from Canada where he was a successful businessman. This is the first time since before World War Two that Polish citizens have picked a leader in a free election.

Actress Joan Bennett is dead at age 80. Bennett's husband, David Wilde, says she died Friday in her home in Scarsdale, New York, of cardiac arrest. Bennett played blonde ingenues in the 1930s. As she matured, producer Walter Wanger, her second husband, changed her into an earthy brunette for the 1939 melodrama ''Trade Winds.''

The shuttle Columbia flight may end tomorrow, a day early, because of bad plumbing. A clogged line has prevented the seven astronauts from flushing a tank holding waste water from the toilet. Groound controllers emphasized the problem presents no danger to the crew. The astronauts are continuing with their around-the-clock astronomical observations.

Hundreds of John Lennon fans gathered yesterday at his star on the Hollywood Walk of Fame. Lennon was shot to death 10 years ago yesterday. Fans ranging from teens to middle aged sang songs, read poems and left flowers. A similar vigil was held in Strawberry Fields memorial garden in Central Park in Manhattan. Lennon was killed outside the apartment building where he lived near Central Park.

#90343u0387 12/09/1990 ~United Press International
(DEC. 9) UPI - TODAY'S PEOPLE:

MOTHERLY CHIEF WON'T QUIT: Houston Police Chief Elizabeth Watson has soundly denied rumors she will resign following the birth of her third child. Watson plans to work until it is time for her to deliver the baby, which is due next week. ''I'm not going anywhere, especially not now, with another mouth to feed '' Watson said. An assistant chief will act as police chief while Watson is on maternity leave.

NON-POLITICAL KENNEDY: If you look quickly, you'll see Christopher Kennedy Lawford as the federal agent grilling Sean Connery in the new spy thriller film, ''Russia House,'' based on the John LeCarre best- seller. Lawford is following in the footsteps of his father, Peter Lawford, as an actor. Asked if there were any actors in the political family tree of his mother, Pat Kennedy Lawford, he replied: ''There are a lot of performers but I'm the only one on stage.''

NO TIME FOR TESH: John Tesh says the pressures of a dual career led to his separation from his wife of eight years. Tesh, the co-host of ''Entertainment Tonight,'' also is an accomplished jazz guitarist. ''What was happening was, with the work I was doing, at both ends I wasn't saving enough time for a relationship and it just evaporated,'' he said. ''It's a very tough thing to go through.'' But Tesh still has intentions of starting a family. ''I want to settle down and have a big old five-bedroom house with kids,'' he said. ''I think I'm getting close to adulthood now as I approach 40, so maybe I might as well start acting like one.''

SHOOT AND SEW: Basketball star Michael Jordan says there's more to clothes than just wearing them - he can make them, too. ''I took home ec,'' Jordan says in People magazine. ''I made a shirt and I can hem and cut out patterns.

I can do all that stuff.'' Jordan won't be doing the sewing but he has been involved in picking out fabrics and designs for the new line of evening wear he has coming out in February.

GLIMPSES: Donald Trump showed his expertise on marital affairs at a weekend dinner in Atlantic City, N.J. The occasion was the presentation of a boxer of the year award to Sugar Ray Leonard in memory of Mark Etess, a Trump executive who died in a helicopter crash last year. After lashing out at reporters and promoting his Taj Mahal Casino, Trump praised Etess's marriage to his wife, Lauren, by saying, ''They had one of the truly great marriages - and I'm an expert on this'' ... Talk show hostess Sally Jessy Raphael headed to Pearl Buck's house in Perkasie, Pa., Sunday to pickup the 1990 Pearl S. Buck Woman's Award. The award is presented annually to a woman who has distinguished herself through her career, family and humanitarian efforts. Raphael, who has a large family of biological, adopted and unofficial foster children, joins previous winners Beverly Sills, Erma Bombeck, Pearl Bailey, Helen Hayes and Jean Stapleton.

WASHINGTON (DEC. 9) UPI - An American soldier serving in Saudi Arabia was killed Sunday when the tractor-trailer truck he was driving overturned, pinning him in the cab of the vehicle.

It was the 52nd fatal casualty in Operation Desert Shield.

Maj. Martin Compton, a spokesman for the U.S. Central Command, said that accident occurred during a routine water supply training mission in Saudi Arabia.

He said the soldier was pronounced dead on the scene. The identification of the victim is being withheld until the next of kin are notified, he said.

The cause of the accident is being investigated, he said.

#90343u0413 12/09/1990 ~United Press International

(DEC. 9) UPI - President Bush returned to Washington last night from a five-nation tour of South America. He is expected to meet with his aides today to discuss the Persian Gulf situation. Bush says Saddam Hussein's promised freedom for foreign hostages does NOT decrease the chance of war. In fact, it ''facilitates'' the possible decision to use force to drive Iraqi troops out of Kuwait. He said- ''When you don't have Americans there and if force is required, that's just one less worry I've got.''

Iraq and the United States can NOT agree on when Secretary of State James Baker should meet Iraqi President Saddam Hussein. Iraq's news agency says Saddam wants Baker in Baghdad on January 12th... three days before a U-N deadline for Iraq to withdraw from Kuwait. The White House rejected the date. It asked for a meeting in late December or earlier in January.

The future of Yugoslavia's last communist regimes will be determined in elections today in the republics of Serbia and Montenegro. Almost all the attention is on Serbia, largest of Yugoslavia's republics. There are 32 candidates for president and 17-hundred candidates for the 250 seats in the assembly. These are the first multi-party elections for Serbia and Montenegro in 45 years.

Six police were killed near Barcelona, Spain, when a car loaded with explosives blew up as they drove by. Basque separatists are believed responsible. The police were on their way to crowd control duty at a soccer stadium. In addition to the six dead, nine other people were injured. In June, Basque terrorists said they would stage attacks until the Olympics and World's Fair in 1992.

Rhythm-and-blues singer Delecta ''Dee'' Clark is dead at the age of 52. Clark was found dead of an apparent heart attack in his hotel room in Atlanta. He wrote several hits- including ''Nobody But You'' and ''Hey, Little Girl in the High School Sweater.'' But his biggest hit was ''Raindrops'' which hit number two on the charts in 1961.

Movie director Martin Ritt died yesterday in a Santa Monica, California, hospital after suffering a heart attack. The hospital said he was 76, but other sources put his age at 70. Ritt specialized in both tender and tough portrayals of the human condition. His films included ''Hud,'' ''Sounder,'' and ''Norma Rae.''

The spaceprobe Galileo flew close to Earth yesterday, but it will be back in two years. Yesterday's flight, bringing Galileo 594 miels above the Atlantic Ocean, used Earth's gravity to increase the spacecraft's speed to 78-thousand-860 miles an hour. This will put it into an orbit around the sun. In October 1991 it will pass the asteroid Gaspra and return to Earth on Decmeber 8th, 1992. This flyby will put it on course for a 1995 encounter with Jupiter.

-30- 2954

#90343u0445 12/09/1990 ~United Press International

(DEC. 9) UPI - About two doezn Americans who were hostages in Iraq flew into Houston, Texas, this morning. Former Texas Governor John Connally began negotiations for their release before Iraq decided to free all hostages.

Secretary of State James Baker and Soviet Foreign Minister Eduard Shevardnadze will discuss a treaty to limit strategic nuclear weapons. They will meet tomorrow and Tuesday in Houston.

Ground controllers are trying to find a way to store more waste water aboard the shuttle Columbia. Otherwise the flight may have to end tomorrow, a day early. The astronauts are UNable to flush the tank holding waste water from the toilet.

The spaceship Galileo made a flyby of Earth yesterday. This will adjust its flight. In two years, it will return so Earth's gravity will fling it toward Jupiter.

Dallas voters have rejected a measure to enlarge minority representation on City Council. The plan was the result of a U-S court ruling that the old method of electing the council is UNconstitutional.

The African National Congress says 25 members who were detained at an airport have been admitted into South Africa. They were in exile and returned to South Africa for an A-N-C conference.

A car bomb believed planted by Basque separatists has killed six police near Barcelona, Spain. Basques have vowed to stage terrorist attacks until the Olympic games in 1992.

-30- 1552

#90343u0479 12/09/1990 ~United Press International

(DEC. 9) UPI - About two dozen American hostages have flown home from Iraq. A jetliner landed in Houston, Texas, this morning after an overnight flight. Their freedom was arranged by former Texas Governor John Connally who began negotiations Iraq before Saddam Hussein decided to free all hostages. Several hundred spectators and relatives who gathered at Ellington Field, a former Air Force Base, cheered when the plane arrived.

Secretary of State James Baker and Soviet Foreign Minister Eduard Shevardnadze meet in Houston tomorrow and Tuesday to discuss a treaty limiting strategic nuclear weapons. U-S officials say the two nations are close to an agreement. But they're NOT so close they are predicting the meetings will result in a final treaty. One official says the big remaining problem is defining the exact process for verifying the treaty is followed.

Plumbers don't make space calls. The seven shuttle Columbia astronauts are uncomfortable because a clogged line makes it impossible for them to flush the tank holding waste water from their toilet. They can't fix it. The problem may mean they will have to land tomorrow- a day early. They have also had computer problems which have been solved. They have been making around-the-clock astronomical observations.

Dallas voters have turned down a voting plan designed to increase minority representation on the City Council. The ''14-one'' plan lost by just 369 votes out of 90-thousand. It was a result of a U-S court ruling that the current method of electing city council members is unconstitutional. 14-one would have set up 14 districts each sending one member to City Council. The mayor would have been elected at large.

The African National Congress says South Africa has admitted 25 exiled A-N-C members who were detained at a Johannesburg airport. A-N-C leader Nelson Mandela had appealed to the government to admit them. Most of the members are representatives in A-N-C missions abroad and were returning to South Africa for a conference of the black organization.

Moscow's deputy mayor says his city and some other industrial cities in Russia will need foreign economic help at least until spring. Deputy Mayor Sergei Stankevich says he does NOT expect a dramatic improvement in getting food soon. Soviet food shortages are blamed on the slow transition to a market economy and an antiquated transportation system.

The Immigration and Naturalization Service is considering a plan to charge people who drive or walk into the United States from Mexico and Canada. People who fly into the United States already are charged five dollars. The U-S Chamber of Commerce says the plan is bad for business. A spokeswoman said- ''We view immigration as being very beneficial to U- S employment and the U-S economy.''

-30- 2975

#90343u0482 12/09/1990 ~United Press International

WITH U.S. MARINES, Eastern Saudi Arabia (DEC. 9) UPI - When the sun goes down on the Arabian desert, Lance Cpl. Robert Redwine can see in the darkness with the thermal sight on his TOW anti-tank missile launcher - a device that lets him stalk and kill enemy tanks at night.

''It's just as easy as day, even easier because they'll stand out better,'' Redwine said. ''There is nowhere to hide from a TOW system. There's just nowhere to run. Once we get a good view on them ... they're history, that's all there is.''

The use of thermal sights, night vision goggles, Starlight rifle scopes and other high-tech electronic devices has given U.S. forces deployed as part of Operation Desert Shield command of the night. Many officers and soldiers believe if it comes to a war with Baghdad, U.S. forces will maneuver and fight at night when they have an overwhelming advantage over Iraqi troops.

''The thing that's unique to this deployment is the great employment of night fighting capacity,'' said Lt. Gen. Charles Horner, the head of Central Command

air forces. For American pilots, that means an infrared navigation and targeting device known as LANTIRN, which allows them to fly and bomb accurately at night.

''We have a good opportunity to do what we do at night. The night doesn't bother us,'' said Col. Tom Bliss, the AWACS deployed wing commander, whose planes keep a constant watch on Iraqi air movement. ''Iraqis have more of a tendency to fly in daylight hours. The flight activity tends to be limited at night.''

''We have a tremendous capability to control the night,'' said Lt. Gen. John Yeosock, the head of Central Command army forces.

''Before, at night, maybe you had an exchange of artillery,'' he added, but now ground troops are able to maneuver and fight at night.

''It's a tremendous enhancer when it comes to the ability to maintain tempo,'' Yeosock said.

Helicopter pilots can move troops in and out of hot spots wearing night vision goggles, which take existing light sources and amplify them several thousand times. Individual soldiers can aim and fire their weapons using Starlight scopes - devices which work on a similar principle.

Sophisticated M1 and M1A1 tanks, Bradley fighting vehicles and HMMWVs (pronounced Hum-vees) - the vehicle that replaced the Jeep - can maneuver using the night goggles, giving American ground forces the ability to attack and fight under the cover of darkness.

''We can see, we can maneuver, we can shoot and the enemy doesn't have nearly that capacity,'' said Lt. Col. Bill Chamberlain, who leads the 197th Mechanized Infantry. ''The advantage at night, in an offensive operation, is that if you're on the receiving end and you can't see, what a scary thing.''

He said his mechanized infantry, which includes an attached tank unit, conducted about half of its training at night. The armored personnel carriers that act as scouts are able to identify anti-tank trenches using the night vision goggles so that engineers can breach the obstacles.

Chamberlain said another advantage of night warfare was the psychological effect it would have on enemy units to hear the roar of tanks and armored personnel carriers moving through the darkness and to be unable to detect their exact location.

''Noise travels at night, but it's distorted. It's very difficult to pick up a direction,'' he said. ''These guys came rolling back in about a week or so ago and I swore they were going to drive right into my tent. I got out of the tent to look to make sure the tank company wasn't trying to do me in and they were

300 meters away.''

Although high-tech electronic devices have opened up the night to warfare, they are not flawless and seem to increase what military philosopher Carl von Clausewitz called the ''friction'' of battle - the tendency for things to go wrong despite best laid plans.

Tank units become confused and temporarily lost in the darkness, which happens even during the day in the featureless desert. The Navstar electronic navigation system, which allows troops to locate their position by fixing on satellites, doesn't work unless it can touch bases with three satellites.

During periods when soldiers cannot reach three satellites with the Navstar devices, which have been dubbed Sluggers, they often are reduced to checking odometer readings and compasses in an effort to locate their position.

''They're OK if you start with a known position on a map. They're accurate to within 10 feet,'' said Lt. Col. Dennis Hardy, who commands a tank squadron in the 3rd Armored Cavalry Regiment. ''The only problem is if you're a tank commander and you have nine tanks and 12 Bradleys and there's only one Slugger ... it isn't simple keeping everybody together. At night everybody tends to stray.''

#90343u0548 12/09/1990 ~United Press International

SOWETO, South Africa (DEC. 9) UPI - The radical anti-apartheid Pan Africanist Congress Sunday effectively rejected an invitation from the government to join talks aimed at ending white minority rule.

Newly elected PAC President Clarence Makwetu said in the closing speech of the movement's first national conference in South Africa since 1960, ''The PAC will not negotiate with (President Frederik) de Klerk's regime unless negotiations are preceded by elections for a constituent assembly'' - a condition Pretoria rejects.

Cheered loudly by the estimated 800 delegates to the three-day conference, in the nation's largest township of Soweto, Makwetu also said the PAC - known for its slogan ''One settler, one bullet'' - remained commmited to the ''struggle for liberation on all fronts, including the armed struggle.''

He said de Klerk had ''failed'' to create a climate conducive for negotiations and attacked the more popular African National Congress, the PAC's rival, for holding preliminary talks with the government. ''ANC has chosen to ... add to white domination in our country,'' he said.

Pretoria has repeatedly rejected calls from the PAC for a constituent assembly saying any new government for a post-apartheid South Africa has to be

discussed during preliminary negotiations.

Two rounds of talks between the government and the ANC had by early August cleared the way to full-blown power-sharing negotiations. The ANC suspended its 29-year armed struggle against white rule Aug. 6, and de Klerk later that month invited the PAC to join the talks process.

But the ANC concession prompted PAC officials to label ANC Deputy President Nelson Mandela a ''sell-out.'' The black consciousness PAC shuns white membership and regards the ANC as too flexible and vacillating.

Makwetu, elected president at the conference in the place of Zephania Mothopeng, who died in October, said the PAC was required by its followers ''to place ourselves for the final push to crush white domination.''

He said, ''Sanctions, disinvestment and the cultural boycott should be intensified'' until the government agreed to abolish its apartheid policies, introduced in 1948.

Makwetu had told the opening day of the conference, the second in South Africa since ANC hard-liners broke away from that movement to form the PAC in 1959, that de Klerk's 10 months of racial reforms fell short of PAC demands.

The reforms - which include the legalization in February of the ANC and PAC after 30 years, the release of leading political prisoners, the scrapping of certain discriminatory legislation and a promise to scrap the rest - were ''not what we've been fighting for,'' Makwetu said.

He said the PAC would be satisfied only when Pretoria acceded to ''the right to universal ... suffrage'' and one-person, one-vote, leading to a constituent body.

The government, apparently attempting to win over the PAC, had granted temporary immunity from prosecution to 14 senior exiled members to attend the conference.

A delegate from Transvaal province, Sipho Lungu, said such ''small, little gestures mean just about nothing,'' adding, ''It has always been up to the PAC since our first conference in 1959, to keep up the battle.''

#90343u0555 12/09/1990 ~United Press International

(DEC. 9) UPI - About two dozen American hostages are back on U-S soil, the latest group of Western captives freed by Iraqi President Saddam Hussein. A privately owned jetliner carrying the hostages landed in Houston early today following an overnight flight from Baghdad and Shannon, Ireland. A few hundred cheering spectators and relatives gathered at Ellington Field, a former Air

Force Base, to greet the flight.

In Baghdad, the Iraqi newspaper Baath warned President Bush today NOT to attack Iraq. The paper, the organ of Iraq's ruling Baathist Arab Socialist Party, says the United States will face more than 45-thousand American casualties, the destruction of Israel and soaring oil prices if it attacks Iraq.

NASA officials say the Columbia astronauts might have to end their trouble-plagued astronomy flight one day early because of a plumbing problem. Officials say a clogged line is keeping the crew memebers from flushing a tank holding waste water from the ship's toilet. Flight controllers told the astronauts yesterday that the mission would last at least nine days, which would result in a landing tomorrow. But they say if work to find additional storage space for the shuttle's waste water is successful, the astronauts could get in a full-duration 10-day flight.

A Japanese cosmonaut-journalist is preparing for his return to Earth tomorrow. Toyohiro Akiyama is the first Japanese and first journalist in space. Akiyama has battled dizziness and space sickness to make daily broadcasts from the Mir station during his six days in space. He will return along with two Soviet cosmonauts on a Soyuz T-M- 10 space capsule. The two Soviets have been on the space station for four months.

In Detroit, there's word today that pilots have reported that distractions and poor runway markings sometimes cause aborted takeoffs and other miscues at Detroit Metropoitan Airport. The Detroit New and Free Press newspaper based its story on reports filed by pilots with the Aviation Safety Reporting System. The paper says the pilots' names and other details are edited out of the reports to encourage reporting. According to the paper, A-S-R-S data shows there were nearly two- thousand so-called ''runway incursions'' at U-S airports during an 18- month period that ended last June, including 24 at the Detroit airport.

A Texas reporter spent the weekend in jail after she was found in contempt of court because she would not answer questions in a capital murder case. Corpus Christi Caller-Times reporter Libby Averyt was put behind bars after the Texas Criminal Court of Appeals late Friday refused a request by the newspaper's lawyer to free her on bond. State District Judge Eric Brown, who had performed Averyt's marriage ceremony only a month earlier, had the reporter handcuffed and jailed for refusing to answer questions about her interview with a capital murder suspect.

#90343u0558 12/09/1990 ~United Press International

WASHINGTON (DEC. 9) UPI - Israeli Prime Minister Yitzhak Shamir Sunday rejected any participation in an international conference on the Palestinian

issue, and expressed confidence that the United States would also oppose it.

Shamir said he is also going to ask the United States to give the Soviet Union a Most Favored Nation tariff in light of the Soviet economic need and the eased Soviet conditions for Jewish immigration to Israel.

In an appearance on the CBS program ''Face the Nation,'' Shamir foreshadowed the position he will take in talks this week in Washington with President Bush and Secretary of State James Baker.

Shamir said of the U.N.-sponsored international conference on the Middle East, ''This is not the way to get peace. You have to go through a process of negotiation, with both parties having to agree. An international conference would only try to impose a solution.''

In an earlier appearance on ABC's ''This Week with David Brinkley,'' Baker said the United States is working hard at the United Nations to head off an international conference on the Palestinian issue now because it would imply a linkage between the settlement of the Persian Gulf crisis with negotiations on the future of the Israeli-occupied West Bank and Gaza Strip.

Baker, however, reiterated that an international conference on the Middle East properly structured and at a suitable time, might be useful.

Shamir said, ''We have long experience that if we keep to our just position, it will prevail. We want peace but an international conference is the way to escape peace.''

Israel, he said, ''will not be part of such a deal.''

Shamir said, ''There could be some difference in views'' with the United States, but he added that he didn't think the United States was pulling away from its current position.

The Israelis have adamantly opposed such a conference because they believe it would lead to a ganging-up on Israel without dealing with the underlying issues in the Arab-Israeli disputes.

However, earlier this year Shamir backed away from his own plan for opening Israeli-Palestinian talks about local elections when it appeared that the Palestinian Arabs were about to accept the face-to-face meetings.

That led to a chill in U.S.-Israeli relations because Baker had made a major commitment in pushing for the plan's acceptance.

Shamir is expected to ask for further U.S. financial assistance to help in the settlement of some 150,000 Soviet Jews who have been permitted to come to Israel. The United States has already granted a $400 million loan guarantee

for new Israeli housing for the new arrivals.

Shamir said, ''We are very grateful'' for the Soviet emigration decision and he said that he will urge the U.S. government, in view of the Soviet action, to grant Most Favored Nation tariff treatment ''because it would help them (the Soviets).''

Under the Jackson-Vanik act, the Soviet Union was excluded from the preferential tariff treatment because of its former restriction on free emigration for Soviet minorities.

#90343u0603 12/09/1990 ~United Press International

(DEC. 9) UPI - A few hundred cheering spectators and relatives greeted about two dozen American hostages upon their arrival in Houston, Texas, early today from Iraq. The hostages are the latest group of Western captives returning to freedom three days after Iraqi President Saddam Hussein decided to relinquish his human shields. Officials say former Texas Governor John Connally left Iraq yesterday with as many as 30 Americans and one Briton.

In another development, the United States today called on all its citizens in Iraqi-occupied Kuwait to gather at the Kuwaiti airport to board a plane for Baghdad and then freedom in Frankfurt, Germany. The government-run Voice of America broadcast the message. It was especially aimed at Americans who have remained in hiding since Iraq invaded Kuwait on August 2nd.

Soviet Foreign Minister Eduard Shevardnadze flew to the United States today for three days of talks on the Persian Gulf crisis and a superpower summit. Shevardnadze is expected to meet with Secretary of State Baker in Houston tomorrow and Tuesday. And he's to meet with President Bush on Wednesday in Washington, where they'll work out the final details of a treaty to cut strategic arms by 50 percent. The accord would be the key note of the Moscow summit between President Bush and Soviet leader Gorbachev.

Iran said today that the death sentence against British author Salman Rushdie still stands. Tehran radio reports Iran's Islamic Guidance Minister says the death edict issued by the late Iranian leader Ayatollah Khomeini against Rushdie for writing the novel ''The Satanic Verses'' is- quote- ''NOT capable of being reversed.'' Many Moslems believe the novel insulted Islam.

The Soviet news agency Tass reports that an explosion rocked a petrochemical plant in the Siberian city of Tomsk today. Tass says there are injuries, but it gave NO further details. The news agency says the blast ocurred around midday at the plant that manufactures ethylene.

It's day 10 in jury deliberations for a New York panel trying to decide the fate of two youths on trial for raping and beating a woman jogger in Central

Park. During yesterday's deliberations, jurors studied a videotaped confession of one of of the youths. 18-year-old Kharey Wise and 16-year-old Kevin Richardson were among some 30 youths who roamed the park in a violent crime spree on the night of April 19th. 1989. Police say the pack attacked nine victims including a 30-year-old investment banker who was gang raped and beaten into a coma.

#90343u0712 12/09/1990 ~United Press International

(DEC. 9) UPI - About 20 American hostages returned to the United States today after being freed by Iraq. The jetliner carrying the hostages landed in Houston following an overnight flight from Baghdad. A few hundred cheering spectators and relatives gathered to welcome them home.

Secretary of State Baker says he's willing to go to Baghdad any day between December 20th and January 3rd for direct talks on the Persian Gulf crisis. But Baker says this is a new proposal that has NOT yet been sent to the Iraqis.

Baker also accused Iraqi President Saddam Hussein of ''playing games'' by suggesting January 12th as the date for the talks. That's only three days before the U-N deadline authorizing the use of force. Baker says it shows Saddam ''is not serious.''

Soviet Foreign Minister Eduard Shevardnadze left Moscow today heading for Houston for talks on the gulf crisis and the dates of a superpower summit. The Soviet news agency Tass says the January date for the summit may have to be changed because of the gulf crisis.

About one-Million Palestinians today marked the third anniversary of their uprising against Israeli occupation under curfew. And a general strike called to commemorate the uprising shut down the rest of the Gaza Strip, West Bank and East Jerusalem.

Two key republics in Yugoslavia held multi-party elections today. The balloting in Serbia and Montenegro will determine the fate of the nation's last surviving communist regimes. It's the republics' first democratic polls in 45 years.

Voters in Poland went to the polls today for their first directly elected president. Solidarity union leader Lech Walesa is favored over emigre Canadian businessman Stanislaw Tyminski in a runoff election that follows a bitter campaign.

#90343u0784 12/09/1990 ~United Press International

(DEC. 9) UPI - A jetliner carrying American hostages from Iraq landed in

Houston, Texas, early today. The Americans are the latest group of Western captives to return home to freedom three days after Iraqi President Saddam Hussein decided to relinquish his human shields. Former Texas Governor John Connally says he met with Saddam and the Iraqi leader said he wanted peace and not a war with the United States.

President Bush is back on the job at the White House today after returning last night from a five-nation Latin American swing. Bush has a busy schedule ahead of him this week, including a parade of high-ranking foreign visitors in the Oval Office. While he was away, Iraq's Saddam Hussein announced that all the Western hostages would be released before Christmas. But Bush says that doesn't mean the Persian Gulf crisis is ''any closer'' to being peacefully settled. He warns that with the Americans home and safe- quote- ''that's just one less worry that I've got.''

A British newspaper reports that Iraq appears to be redrawing Kuwait's border. The paper says Iraq has put up a barbed wire barrier with apparent customs and immigration posts around the southern tip of an oilfield which extends across the border into northern Kuwait. The paper says the move is a sign that Saddam Hussein may be planning a partial withdrawal... and intends to keep part of the disputed oilfield and two strategic gulf islands.

Soviet news reports say railway sidings are packed with unloaded food, while Moscow officials appeal for foreign food aid. The Communist newspaper Pravda says some 20-thousand containers and 300 railway wagons stand unloaded at the city's freight yards. The paper says more than 100 wagons contain meat sent from abroad. It says the precious cargo has been sitting at one rail siding since November 25th while store shelves remain empty.

Police in Boynton Beach, Florida, are reporting a bizarre slaying in what they've termed ''the couch potato murder.'' Detectives say the family of a 52-year-old man confessed they shot him to death because he was a miserable, grouchy man who spent most of his time lying on the couch watching t-v. Authorities have charged Mary Grieco, her 15-year- old daughter Ann, and the daughter's boyfriend, Melvin Steele, with conspiracy and first-degree murder in the death of Joe Grieco. They are being held in the Palm Beach County jail pending a March trial.

#90343u0868 12/09/1990 ~United Press International

(DEC. 9) UPI - Another casualty today in Operation Desert Shield. The U-S Central Command says an American soldier was killed when the tractor-trailer truck he was driving overturned, pinning him in the cab of the vehicle. The accident occurred during a routine water supply training mission in Saudi Arabia. It's the 52nd fatality in Operation Desert Shield.

Former Texas Governor John Connally returned home today with a planeload of

U-S hostages from Iraq. A private jet carrying the hostages on a freedom flight from Baghdad landed in Houston amid the cheers and tears of their families. It's the first batch of Americans to arrive in the United States since Iraq ordered the release of all foreigners in Iraq and Kuwait.

OPEC oil ministers will gather in Vienna this week just to show that the 13-nation cartel still exists despite Iraq's invasion of Kuwait. Past meetings of the Organization of Petroleum Exporting Countries to limit output and boost oil prices have held world center stage. But the invasion and a U-N embargo of Iraqi and Kuwaiti oil exports have made a shambles of OPEC's oil quota system.

The space shuttle Columbia may be coming home early. NASA officials say unless they can fix a plumbing problem aboard the spacecraft, the astronauts may have to end their 10-day glitch-plagued astronomy flight one day early. That means the Columbia crew would glide back to Earth tomorrow instead of Tuesday.

The last of Yugoslavia's six republics are holding their first democratic elections in 45 years. Voters in Serbia and Montenegro are casting ballots in multi-party elections that will determine the fate of the nation's last surviving communist regimes. Serbian opposition parties are protesting alleged irregularities.

Palestinian sources report Israeli soldiers shot and wounded at least 10 Arabs in the occupied West Bank... and soldiers shot to death one Arab in the occupied Gaze Strip. The clashes erupted in the territories as one-Million Palestinians marked the third anniversary of their uprising against Israeli dominance.

#90343u0869 12/09/1990 ~United Press International

LOS ANGELES (DEC. 10) UPI - The average price of gasoline nationwide remained virtually unchanged from three weeks ago with a hike in the federal gas tax offsetting a decrease in wholesale prices, an industry analyst said Sunday.

The Dec. 7 Lundberg Survey of 13,500 service stations across the nation found the average retail price for a gallon of gasoline was $1. 460. That compares with $1.459 on Nov. 16.

The current price reflects a new nickel a gallon federal gas task that went into effect Dec. 1, said Trilby Lundberg, publisher of the survey.

''It looks like a wash (with the tax) because wholesale gasoline prices were falling as refiners were passing on lower crude oil buying prices to wholesalers,'' Lundberg said.

Crude oil prices are now correcting themselves downward following a panic rise after the invasion of Kuwait interrupted supplies and triggered fears of mass

worldwide oil shortages, he said.

Since the Aug. 2 invasion by Iraq, pump prices have risen an average 28.35 cents. A July 20 Lundberg Survey found the overall national average of $1.17.

The Dec. 7 Lundberg Survey found regular unleaded gasoline at self- service stations was an average $1.352. Premium unleaded was $1.510 and regular leaded $1.328.

At full-service stations, regular unleaded sold for an average $1.575 and premium unleaded for $1.713. Regular leaded was $1.532.

#90343u1072 12/09/1990 ~United Press International

(DEC. 9) UPI - A U-S-chartered Iraqi airliner left Baghdad today with nearly 175 Americans. Baghdad Radio says the plane headed for Germany. The departure came just hours after a smaller group of freed American hostages touched down in Texas to cries of joy from their families.

The London Observer newspaper says Iraq is redrawing the Kuwaiti border. The paper says Baghdad has constructed a barbed wire fence around part of the oil-rich state... a sign that Saddam Hussein may be planning a partial withdrawal.

In Moscow, the communist newspaper Pravda reports some 20-thousand containers and 300 railway wagons stand loaded with food at the city's freight yards... while store shelves remain empty and Soviet officials appeal for foreign food aid.

Pravda says the required foodstuffs are right under officials' noses if they only knew how to get them unpacked and delivered. It says cargo- moving agencies haul away only a fifth of the food because there is a shortage of trucks and drivers.

Israeli Prime Minister Yitzhak Shamir says Israel won't take part in an international conference on the Palestinian issue. Shamir told television interviewers that such a conference is ''NOT the way to get peace.''

In South Africa, the radical anti-apartheid Pan Africanist Congress has effectively rejected a government invitation to join talks aimed at ending white minority rule. The group says it won't negotiate with Pretoria unless elections for a constituent assembly are held first.

32 young American students were named today to study at Oxford University in England as Rhodes scholars for 1991. The students are from 23 colleges and universities in 26 states and include a poet, an AIDS researcher, a Baptist minister and a teacher.

-30- 1923
#90343u1141 12/09/1990 ~United Press International
(DEC. 9) UPI - The State Department says a U-S-chartered Iraqi airliner carrying about 300 former hostages, about 175 of them Americans, left Baghdad for Frankfurt, Germany today. The Americans will stay overnight in Germany and then return to Washington, D-C, tomorrow.

A spokesman says a second U-S-chartered plane is to depart Baghdad with more Americans on Tuesday. But the official declined to predict when several hundred others would also be freed. The airlift occurred just hours after another flight carrying former U-S hostages from Iraq arrived in Texas.

An American soldier was killed today during routine training in Operation Desert Shield in Saudi Arabia. Military officials say the soldier was trucking large quantities of water to thirsty desert troops when his tractor-trailer overturned. His name was NOT immediately released.

In a separate incident, three military police officers were injured when their desert rover ran off the road and turned over. Officials say they are still trying to piece together what happened. The injured soldiers were flown to the U-S Navy hospital ship Mercy.

NASA officials say bad weather could force the shuttle Columbia to land early. Mission control in Houston say a front of high winds and rain moving toward the desert landing site in California could force the shuttle to return tomorrow instead of Tuesday as planned.

The New York jury deliberating the fate of two teen-agers in the brutal rape of a Central Park jogger today questioned police treatment of one defendant between his videotaped confessions. The question pleased the defense, which maintains the defendant was tricked into making incriminating statements.

-30- 1857
#90343u1323 12/09/1990 ~United Press International
(DEC. 9) UPI - One planeload of American hostages from Iraq has landed in the United States and another is on its way. The State Department says a U-S-chartered Iraqi airliner carrying about 300 former hostages, including 175 Americans, left Baghdad for Frankfurt, Germany, today... and will return to the Washington, D-C, area tomorrow. Earlier today, 31 other Americans arrived in Houston from Baghdad aboard a privately-owned Boeing 707. Former Texas Governor John Connally helped arrange their release.

Secretary of State Baker and Soviet Foreign Minister Eduard Shevardnadze arrived in Houston, Texas, today for talks on the Persian Gulf crisis and a superpower summit. The two diplomats will huddle tomorrow and Tuesday in their

third meeting in two years. The Soviet news agency Tass says Shevardnadze and Baker- quote- ''will examine regional problems, above all the gulf crisis.'' Moscow has backed the U-S goal of compelling Iraq to leave Kuwait.

NASA says flight controllers are considering ordering the shuttle Columbia home tomorrow, one day earlier than planned because of possible bad weather. Officials say forecasts call for high winds and rain in the Mojave Desert area for Tuesday's scheduled nighttime touchdown. Officials say a decision will be made early tomorrow on whether to order the astronauts to land early.

An Israeli soldier was killed and two others wounded in the West Bank today when homemade bombs exploded as an army patrol passed the entrance to the Civil Administration offices in Bethlehem. The military clamped a curfew on the area after the blasts. The explosions came just hours after an Arab was slain during clashes in the Gaza Strip on the third anniversary of the Palestinian uprising.

President Bush, just back from a six-day South American tour, apparently has run out of gas. The go-go president had planned to attend a Christmas show in Washington tonight, but after an afternoon of tennis a White House spokesman said Bush is simply tuckered out and will spend a quiet evening at home. The president faces a busy week ahead, hosting a parade of high-ranking foreign visitors in the Oval Office- including Israel's prime minister and the Soviet foreign minister.

-30- 2397

#90343u1445 12/09/1990 ~United Press International

(DEC. 9) UPI - An estimated 175 Americans will spend the night in Germany before returning to the United States tomorrow... ending their stint as hostages held by Iraq. The State Department says a second U-S-chartered plane will depart Baghdad with more Americans on Tuesday. But the spokesman is NOT predicting when several hundred other Americans in Iraq and Kuwait will be freed.

The Persian Gulf crisis is NOT just taking a heavy toll on the nation's military... it's causing a fiscal crunch among American television networks struggling to cover the story. A published report says networks are cutting back to fund the coverage... with C-B-S trimming the staff of established shows such as ''60 Minutes. ''

Election officials are busy counting the vote from Poland's first popular presidential battle, with official results expected tomorrow. But computer projections based on exit polls show that Lech Walesa won the election, with the Solidarity leader expected to take nearly 75 percent of today's vote. Walesa told about five- thousand cheering supporters in Gdansk- quote- ''I want to be your biggest servant, NOT your president.''

Federal officials say a polar bear killed a man walking with his girlfriend in a remote northwest Alaska village- the first such attack in recent memory. The bear dragged the man's body away and a search party followed a trail of blood and tracks for about an hour until they found the bear sleeping by the partially-eaten body. The bear was shot and killed... and biologists will examine the animal's body to see if it was a hungry bear going after prey or if something was wrong with the bear.

An industry analyst says a decrease in wholesale gasoline prices is NOT translating into lower prices at the gas pumps. Trilby Lundberg says a hike in the federal gas tax offset the price cut... leaving the average price of gas nationwide virtually unchanged from three weeks ago. The December 7th Lundberg Survey of service stations across the nation found the average retail price for a gallon of gasoline was one- dollar 46 cents.

-30- 2255

#90343u1772 12/09/1990 ~United Press International

(DEC. 9) UPI - The exodus of foreigners from Iraq included Americans today, with a jetliner carrying 31 Americans landing today in Texas. The 31 included men held hostage or trapped in Iraq and Kuwait, along with relatives who flew overseas to be with them. Later, a plane carrying about 175 Americans arrived in Germany from Baghdad. The former hostages will spend the night in Frankfort before flying to the United States tomorrow.

A London newspaper says Iraq appears to be redrawing the Iraqi-Kuwaiti border by putting up barbed wire around the northern part of Kuwait. The paper says Iraq built the barrier complete with apparent customs and immigration posts- a sign Iraq may be planning a partial withdrawal.

The man who led Poland's Solidarity trade union in a decadelong battle that ended communist rule is looking at a new title. Computer projections based on exit polls show Lech Walesa won today's presidential election. Walesa told a cheering crowd in Gdansk that he wants to be their ''servant'' NOT their president.

The Israeli military imposed curfews on much of the occupied territories on the third anniversary of the Palestinian uprising. Despite the crackdown, an Israeli soldier died as two bombs exploded in Bethlehem and an Arab was slain in a clash with soldiers in the Gaza Strip. Israeli army statistics estimate the cost of maintaining Israeli troops in the territories during the uprising has cost approximately 750-Million dollars.

New York City's already littered sidewalks may soon be covered by uncollected trash. Private sanitation workers who pick up 40 percent of the city's trash went on strike today, rejecting a new contract offered by about 250-thousand city businesses. The rejected offer featured a pay freeze until June.

#90344b0018 12/10/1990 ~Business Wire

SAN DIEGO (DEC. 10) BUSINESS WIRE - Vista Biologicals, a San-Diego-based producer of animal cells for use in research and in the manufacture of pharmaceuticals, has agreed, in principal, to sell a large portion of Vista's assets to UniSyn Fibertec Corp., according to Stan Yakatan, president of UniSyn.

The combination of the Vista and UniSyn technologies will result in the creation of a cell production facility with capabilities which are presently unavailable anywhere in the biotech or pharmaceutical industries, Yakatan said.

A key part of the agreement, according to Yakatan, is that Vista's president, Dr. Robert Fleischaker, will become head of research and development at UniSyn. ''Dr. Fleischaker brings with him much more than a complementary technology. Taking advantage of his well-known scientific prowess is an important part of our growth plans,'' Yakatan said.

The agreement between UniSyn and Vista is subject to approval of the board of directors of both companies.

Yakatan said that the principal assets to be purchased involve the equipment, know-how and other aspects surrounding Vista's stir tank and fermentation technology for the production of animal cells. The Vista technology will be consolidated into the new Good Manufacturing Practices (GMP) compliant Contract Manufacturing Facility currently being constructed by UniSyn near Rancho Bernardo.

With the acquisition of the Vista assets, the new UniSyn GMP facility will be able to culture cells using either UniSyn's proprietary scaleable hollow fiber methods or Vista's stir tank and perfusion fermentation processes, Yakatan said.

UniSyn Fibertec is sole owner and manufacturer of the only scaleable hollow fiber technology for the production of mammalian cells. UniSyn is a leading provider of instruments, devices, and consumables to the biotechnology and pharmaceutical industries.

UniSyn also provides the Profile(TM) contract production service for the manufacture of cells. The Profile(TM) business will be a key element of the new UniSyn GMP facility.

UniSyn Fibertec is a majority-owned subsidiary of Synbiotics Corp. (NASDAQ:SBIO).

CAMARILLO, CA (DEC. 10) BUSINESS WIRE - Vitesse Semiconductor Corp. and Tamarack Microelectronics Inc. announced Monday that Tamarack has been named as the sole authorized distributor and design center for Vitesse in Taiwan in the Republic of China and Hong Kong.

Tamarack will serve as a distributor and will be working with customers to help them implement their designs in Vitesse GaAs gate arrays and standard cell products.

Vitesse Semiconductor was founded in 1984 to develop, manufacture, and market cost-effective digital gallium arsenide circuits for the high-performance electronics marketplace. The company has focused its efforts to date on the development of high-performance GaAs ICs incorporating proven silicon manufacturing techniques in the wafer fabrication process.

Its product family of GaAs ICs available to commercial and military customers includes gate arrays, standard cells, RAMs, telecommunications, networking and logic products. Vitesse is the leading supplier of digital GaAs integrated circuits. The company has headquarters in Camarillo, 40 miles north of Los Angeles.

Tamarack Microelectronics is the leading manufacturers representative and design service for integrated circuits in Taiwan and Hong Kong. Founded in 1987, Tamarack excels in engineering services for system, discrete, integrated circuit and other manufacturing services. Tamarack specializes in PC related ASICs, LAN modules and chips and mixed Analog-Digital applications.

REDWOOD CITY, CALIF. (DEC. 10) BUSINESS WIRE - DHL, the leading international air express service, Monday announced it had concluded a share transaction with Japan Airlines, Deutsche Lufthansa AG and the Japanese trading company, Nissho Iwai, which was first announced in May of this year.

Japan Airlines and Lufthansa now each own a 5 percent interest in DHL International Ltd. and Nissho Iwai, a 2.5 percent interest, with options to purchase up to 25 percent each for Japan Airlines and Lufthansa and 7.5 percent for Nissho Iwai within 18 months.

The new partners have also taken between them a 2.5 percent stake in DHL Corporation of the United States, with the possibility of increased participation in the future.

Patrick Foley, chairman, president and chief executive officer of DHL Corp., said, ''This new relationship is the first global cargo transport link-up in the 'triad' of North America, Europe and Asia where international trade is growing at up to 30 percent per year. This alliance will provide DHL with additional capacity and greater flexibility in the services we offer to keep pace with market growth and to meet the changing needs of our customer base.''

DHL carries more than 40 million international shipments a year for its customers, which include virtually all multi-national companies in the fields of high-tech, finance, transportation, automotive and manufacturing, among others.

The DHL network has 25,000 employees and 1,350 service centers in 188 countries. With a customer base numbering more than 1 million, the entire DHL network's revenues will exceed $1.9 billion in 1990.

The DHL Worldwide Express network is comprised of DHL Corp., which, through its wholly owned subsidiary, DHL Airways Inc., provides all services in the United States and its territories and DHL International, which operates in all other areas of the world. DHL Corp.'s headquarters is in Redwood City and DHL International's is in Brussels, Belgium.

ENGLEWOOD, COLO (DEC. 10) BUSINESS WIRE - Intercontinental Enterprises Inc. (NASDAQ:ENTI, listed as ''IntEnt'' each Monday in the Wall Street Journal under NASDAQ Weekly Bid and Ask Quotations) and Blazo Corp. (NASDAQ pink sheets: BLAC) announced jointly Monday the signing of a letter of intent for the exchange of stock.

Under this agreement, Intercontinental will acquire 100 percent of the common stock of Vision Television Network Inc. held by Blazo, in exchange for 50 million shares of its common stock.

Pursuant to the agreement, Intercontinental will exchange additional shares of its common stock or cash to purchase all of the partnership units of a general partnership that exists outside of Blazo Corp.

Vision's unaudited revenues for the fiscal year ended Aug. 31, 1990, were approximately $16 million. Based on Vision's projections for the fiscal year ended Aug. 31, 1991, the acquisition would add approximately $30 million in revenues and up to $10 million in net earnings to Intercontinental's consolidated financial statements for 1991.

Vision is engaged in the business of television barter, and controls a film and television library of over 6,000 titles which it exchanges with television stations and cable systems for unused advertising time.

This ''time bank'' is then used by Vision's retail marketing division to advertise various products and services on a ''direct response'' basis. The acquisition strengthens the marketing support for Intercontinental's existing foreign and domestic operations.

Intercontinental's holdings in China make Vision a natural acquisition for the company. Intercontinental has been looking for a marketing organization to become the marketing arm for various products that can be manufactured in China.

Kenneth Jackson, president and chief executive officer of Blazo Corp., stated that he ''believes that the deal is a good one for all concerned. It will give Vision a broader base to expand its operation and will give the shareholders of Blazo a substantial position in an international company that promises opportunities in the foreign marketplace.''

The agreement is subject to shareholder approval of Intercontinental and Blazo shareholders.

SINGAPORE (DEC. 10) BUSINESS WIRE - Bank of America has named Suresh K. Ahuja a regional treasurer in the bank's Asia Division, a senior vice president.

"Suresh's capabilities and depth of experience have brought success and profitability to our complex and important treasury activities," Executive Vice President John V. Rindlaub, head of the Asia Division, said.

"He has 18 years of experience in money markets and trading activities in all major currencies. He has worked in the United States, London, Caracas, and Singapore, and proven himself an excellent manager of both treasury activities and of trading personnel."

Ahuja, 45, joined Bank of America in 1972 as a financial analyst in San Francisco. In 1972, he entered the bank's international market risk training program, later working in positions of increasing responsibility in San Francisco, London, and Caracas.

In 1978, he was named vice president-foreign exchange and monetary officer for the bank's Latin America and Caribbean Division, based in Caracas. He was named that division's liability manager in 1981, and its Treasurer the following year.

In 1988, Ahuja assumed his responsibilities as Asia Division's Southern Asia Regional Treasurer. Based in Singapore, he manages the bank's Asia Currency Unit and Singapore trading unit and supervises trading activities in Malaysia, Indonesia, Thailand, The Philippines, India, and South Korea.

#90344b0046 12/10/1990 ~Business Wire

REDMOND, WA (DEC. 10) BUSINESS WIRE - Microsoft Corp. Monday released the preliminary specification for object linking and embedding (referred to here as OLE), a new technology which provides graphical applications developers with a powerful new set of capabilities for integrating information created by different applications.

The OLE specification enables developers to access these advanced capabilities by making simple extensions to existing graphical applications which run under Microsoft Windows graphical environment version 3.0, OS/2 Presentation Manager and Apple Macintosh System 7.0.

Object linking and embedding has been developed as an open, industry-wide specification, led by the Microsoft applications group, incorporating input and contributions by other applications developers including Lotus Development Corp., Aldus Corp., WordPerfect Corp. and Micrografx. The OLE specification was made available today in preliminary form to more than 200 software developers at an ISV design workshop hosted by Microsoft in Redmond.

Object Linking and Embedding

Object linking and embedding was developed to meet the needs of users to integrate information from different applications. While it evolved from and complements the static Windows clipboard and dynamic data exchange (DDE) linking capabilities, the OLE specification represents a significantly more powerful set of capabilities. OLE supports two ways of importing information into a document: a user may choose to ''embed'' it, that is, to place the information into the target document, or the user may insert a link to the source information. With OLE, information is exchanged as ''objects'' containing the application's data or link to that data.

The exchange of objects, for example, enables a graphical word processing document to access information from any other graphical application which supports object linking and embedding. The ''object'' containing the source application data for a chart, for example, can be inserted into a word processing application without requiring the word processor to understand the format of the chart. The word processor simply calls APIs (Application Programming Interfaces) in the OLE dynamic link library (DLL) when it needs to invoke or edit the object. The OLE DLL is the code which manages the OLE protocol.

For example, by using OLE to develop a compound document, it is a simpler task for the user to create and update a monthly report containing information from various applications such as formatted text files, spreadsheets, and maps and

diagrams from a graphics package. The user sets up the report as a compound document, embedding the appropriate applications. Because the document is linked to the actual applications, as they are individually updated, the composite monthly report is updated automatically. This automatic updating is more powerful than today's cut-and-paste method, which requires more direct manipulation of individual applications by the end user.

OLE enables applications to work closely together, even if these applications have been developed by different vendors, employing different data formats, and OLE allows the user to look at information in the context of a single document without needing to manually switch from application to application. The process of deciding what application code to run and how to do that is hidden from the user and fully automated.

Microsoft Corp. (NASDAQ: MSFT) develops, markets and supports a wide range of software for business and professional use, including operating systems, network products, languages and application programs, as well as books, hardware and CD-ROM products for the microcomputer marketplace.

SAN DIEGO (DEC. 10) BUSINESS WIRE - Pacific Bell announced Monday its largest agreement for CENTREX IS (Integrated Systems) service, the company's new Integrated Services Digital Network (ISDN) offering, with Jet Propulsion Laboratory (JPL).

The company said that JPL will implement 1,000 basic-rate lines during the next two years at its facilities in La Canada and Altadena.

Jim Sands, Pacific Bell account manager for JPL, said this is the largest order for CENTREX IS since it became generally available last December.

While JPL will be developing specific applications during the next two years, at this time they plan to use CENTREX IS for personal-computer-to-LAN access, switched-56-Kbps applications, as a substitution for coaxial cable and applications requiring high bandwidth on demand.

CENTREX IS also will increase data throughput and eliminate throughput variations caused by varying network demands in comparison to the present coaxial interconnections.

The move also will allow transmission speed to increase from 9.6 Kbps to 19.2 Kbps with the potential to go as high as 64 Kbps.

In addition, JPL will realize considerable economic savings by replacing broadband coaxial-cable connections between Ethernet LANs with standard phone lines.

During the next five years, JPL plans to replace many of its 13,000 lines with CENTREX IS as older customer premises equipment is phased out, Iverson said.

Sands said that JPL's ambitious plans for CENTREX IS will benefit from Pacific Bell's automated system for provisioning ISDN services. Pacific Bell is the only company with a mechanized system for handling complex ISDN service orders.

Both of the JPL locations and adjacent facilities will be served from the same Northern Telecom DMS SuperNode switching system. The DMS SuperNode provides a full set of sophisticated features and services, including the industry's most comprehensive offering of digital residential and business services, such as CLASS, Meridian Digital Centrex, Meridian ISDN Centrex, data and networking features.

ISDN increases the efficiency of telecommunications systems by dividing a standard telephone line into as many as three digital channels, making a single line capable of simultaneously transmitting voice, data and video. At its foundation are standards for the telecommunications network of the future that eventually will be implemented worldwide.

Pacific Bell CENTREX is a private business communications system that operates from a Pacific Bell central switching office, rather than from privately owned equipment located at customers' premises.

Pacific Bell is a subsidiary of Pacific Telesis Group, a diversified worldwide telecommunications corporation based in San Francisco.

DALLAS (DEC. 10) BUSINESS WIRE - The board of directors of Aancor Holdings Inc., the parent of National Gypsum Co., Monday announced that Peter C. Browning, president and chief executive officer of Aancor and National Gypsum, has been elected to the additional position of chairman of the board of directors of Aancor, effective Jan. 1, 1991.

He succeeds John P. Hayes, who has been named chairman emeritus. Browning, 49, joined the company in February 1989 as executive vice president of Gold Bond

Building Products division after 24 years of service with Continental Can Co. Inc.

In August 1989, he was named president and chief executive officer of Gold Bond and was elected to the Aancor board of directors in December 1989. He was named president and chief executive officer of Aancor and National Gypsum in October 1990, succeeding John P. Hayes, 69, who retired from the company after 43 years of service.

Browning was graduated from Colgate University in 1963 with a bachelor of arts degree in history and received an MBA degree from the University of Chicago in 1976.

Aancor Holdings Inc. was formed in 1986 as part of an acquisition of National Gypsum. Aancor is a privately held company. National Gypsum, with 1989 sales of $1.4 billion, consists of two primary operating divisions: Gold Bond Building Products, the nation's second largest manufacturer and supplier of gypsum wallboard and related products, and The Austin Co., the oldest and one of the largest design, engineering and construction firms in the United States.

OMAHA, NE (DEC. 10) BUSINESS WIRE - Data Transmission Network Corp. and Street Software Technology Inc. of New York, announced Monday the introduction of DTN Treasuries, a United States Treasury securities quote service now available as an additional service on DTN Wall Street.

DTN Wall Street is an electronic business news and financial markets information and quotes service with more than 2,500 subscribers.

DTN Wall Street subscribers receive more than 60 electronic screens (pages) of information, including business news, economic reports, delayed quotes on user-selected stocks, bonds and mutual funds, commodity futures quotes, indexes, currency and precious metals prices, market commentary and more.

DTN Wall Street is priced at $29.95 per month for delivery via selected cable television systems and $34.95 per month if received via satellite. DTN provides all of the equipment required to receive the service as part of the monthly subscription fee.

The DTN Treasuries service will display indications of prices and yields on United States Treasury securities, including active T-Bills and all notes, bonds and strips. The price quotes will be updated every fifteen minutes during the United States cash trading hours of 9 a.m. to 3 p.m., Eastern time.

Street Software Technology will use data from Bear, Stearns, & Co. Inc., a primary dealer in Treasury securities, to produce the price quotes. The quotes will be an indicator of the market in each security but will not represent bids or offers from Bear, Stearns or any other source to buy or sell the treasury securities.

The DTN Treasuries quote service will be available as an add-on service to subscribers of DTN Wall Street for $40 per month, in addition to the $29.95 or $34.95 subscription fee for the basic DTN Wall Street service.

At $69.95 or $74.95 per month, DTN Treasuries will be the first economically priced service to deliver both treasury quotes and financial market news electronically. Street Software Technology Inc. is a leading software and analytics firm that specializes in the fixed income market.

The company provides end-of-day quotes and analysis to a variety of institutional investors, traders and publications.

The market for the DTN Treasuries service is expected to be financial institutions, insurance companies, corporate cash managers, financial planners and individual investors.

Based in Omaha, Data Transmission Network Corp. is a leading provider of video text information and communication services. The company has more than 53,000 subscribers to its three primary electronics services, DTN AgDaily, DTN Wall Street and DTNergy.

OTTAWA, ONTARIO (DEC. 10) BUSINESS WIRE - Gandalf Technologies Inc. has established a new company, Gandalf Mobile Systems Inc. (GMSI), to pursue opportunities in mobile communications markets worldwide.

GMSI is jointly owned by its management and Gandalf Technologies, the majority shareholder. GMSI formerly operated within Gandalf as the company's Computer Dispatch Systems division.

GMSI president and chief executive officer is Herb Woods, 43. Woods was general manager of the Computer Dispatch Systems division since 1988. Chairman of the new company is Gandalf Technologies Chairman and Chief Executive Officer Des Cunningham.

GMSI has a clear mandate to address the rapidly growing market for mobile data communications, according to Cunningham. Additionally the creation of GMSI allows Gandalf Technologies to focus its resources more sharply on its core businesses.

GMSI's plans to diversify and expand its business include marketing the Cabmate system in Australia and Europe.

The new company also will market integrated dispatch systems to courier and trucking customers worldwide, and it will provide dispatch systems on public radio networks as well as on GMSI's private radio network, according to Woods.

GMSI will continue to operate from its current headquarters at 177 Colonnade Road, Nepean, Ontario, and from its U.S. sales and service office in Wheeling, Ill.

SAN FRANCISCO (DEC. 10) BUSINESS WIRE - Pacific Gas and Electric Company announced Monday the acquisition by PG&E Resources of Corpus Christi Exploration Company, a privately held gas and oil exploration and development company which operates primarily offshore in the Gulf of Mexico.

PG&E Resources, headquartered in Dallas, acquires, develops, explores for, produces, processes and markets natural gas and oil resources. It is a wholly-owned subsidiary of PG&E Enterprises, the unregulated business unit of Pacific Gas and Electric.

Corpus Christi Exploration will become PG&E Resources Offshore Company. It will continue to operate over 100 wells in the Gulf of Mexico with a daily producing capacity in excess of 225 million cubic feet of gas for itself and joint venture partners.

San Francisco -based Pacific Gas and Electric Company is the largest investor-owned energy utility in the United States and supplies natural gas and electricity to 11 million California residents. The company has 352,000 shareholders and assets of some $22 billion.

SANTA ANA, CA (DEC. 10) BUSINESS WIRE - Novadyne Computer Systems Inc. has trademarked NOVAPAGE, a unique, sophisticated and intelligent peripheral communications product that automates paging processes.

An alternative for automatically paging employees, NOVAPAGE is an innovative peripheral product consisting of an INTEL micro processor platform motherboard 1MEG ram, one floppy drive, color monitor, a PC printer and intelligent dialers. Currently NOVAPAGE performs approximately 300 pages per hour; this will expand to 800 pages per hour in the first quarter of 1991.

Novadyne developed the product internally and, since December 1988, has successfully completed over 500,000 pages for its own field engineering organization.

Sales and marketing distribution company Dispatch Technologies and Novadyne reached an agreement in 1990 providing that the Westport, Conn.-based Dispatch Technologies assume distribution for the Novadyne-manufactured NOVAPAGE called CAPTAIN (computerized automated paging terminal).

This strategic alliance allows that Novadyne provide the support services necessary to interface and maintain the NOVAPAGERS sold by Dispatch Technologies in North America.

CAPTAIN takes page commands from a host computer at speeds upwards of 19.2 Kbytes and transmits them. Customer pager records are maintained in the host computer, therefore users never have to worry about lost or corrupted data or data-entry errors in NOVAPAGE.

CAPTAIN is fully compatible with all RCC protocols, a feature that ensures ease of installation and guarantees the flexibility to add or to otherwise modify system configurations. It engages in two-way dialogue with all industry-standard RCC paging terminals including all voice prompt and nationwide paging protocols. It interfaces with any system that communicates through an RS-232 port or 3270 protocol.

Future enhancements will include LAN interconnectivity.

Dispatch Technologies specializes in providing consultation as well as various telecommunications and computer-related products primarily to the field service and disaster recovery industry. They market into industries which require centralized dispatching improvements, cost control and business-resumption planning.

Novadyne Computer Systems products and services are marketed nationwide to companies in all facets of commerce including aerospace, retailing, transportation, distribution, communications, health care, educational organizations and federal and local government agencies.

#90344b0087 12/10/1990 ~Business Wire

SAN FRANCISCO (DEC. 10) BUSINESS WIRE - IBM researchers will reveal here this week that they have built transistors out of a promising computer chip material called ''silicon-on-insulator'' that run three times faster than comparable pure silicon transistors.

The researchers will present their work Wednesday at the International Electron Devices Meeting (IEDM) convening in San Francisco this week.

The transistors are the Complementary Metal Oxide or CMOS type of electronic devices, a mainstay of computer chips that power laptop and personal computers. The development, said Dr. Ghavam Shahidi, indicates the long range promise of silicon-on-insulator, a material that could someday speed operation and decrease errors in computer circuits. Shahidi is a research staff member at IBM's T.J. Watson Research Center in Yorktown Heights N.Y.

Computer scientists have long known that silicon grown on top of an insulating material, known as SOI, offers advantages over silicon alone for building computer circuits. By putting the silicon (a semiconductor material that conducts charge), over an insulator (a material that does not conduct charge) chip designers can reduce leakage of current from the semiconductor and speed the chip's operation.

Silicon-on-insulator also protects tiny computer circuits from ''soft errors '' mistakes caused by exposure to external radiation sources such as cosmic rays.

But despite the appealing properties of SOI, the material has proven difficult to produce, primarily because of the very different properties of semiconductors and insulators. That mismatch has stood in the way of growing the kind of defect-free, ultra-thin layers of silicon on top of an insulator that are necessary for computer chips.

But, at the IEDM conference, the IBM researchers will report a new way to coax silicon to grow on insulator that results in material that is virtually defect-free and comparable in quality to pure silicon.

To grow the thin films of silicon-on-insulator, the scientists started with a silicon wafer as a base. To grow oxide on top, they heated the wafer in an 1,800 degree Fahrenheit furnace in the presence of oxygen. The process produced a layer of silicon dioxide, which is the insulator.

#90344b0090 12/10/1990 ~Business Wire

RICHLAND, WASH. (DEC. 10) BUSINESS WIRE - Engineers from the Hanford site have developed a faster, safer and more economical method for drilling ground water monitoring wells and minimizing risk to workers.

''We need to find a better method to drill ground water monitoring wells to lower costs and comply with the Tri-Party Agreement,'' said Denny Myers, principal engineer for Westinghouse Hanford Co. ''Our traditional method of cable tool drilling is too slow and expensive and may not be able to keep up with the increased number of wells required for ground water monitoring. We needed to look at alternative methods of well drilling that would provide these improvements and maintain control of potentially contaminated drill cuttings.''

The Tri-Party Agreement provides a blueprint for clean up of the radioactive and chemical wastes at the Hanford site over the next 30 years. The increased number of ground water monitoring wells on the Hanford site is a requirement of the agreement and federal environmental laws.

''We combined several existing technologies and came up with a drill cutting containment system that can be used with any drilling technique which uses compressed air to remove the drill cuttings from the borehole,'' Myers explained.

The drill cutting containment system removes soil and rock particles from the discharge air stream and packages these materials in waste containers until samples can be analyzed and the appropriate disposal method can be determined. The ability to control and package the drill cuttings makes it possible to consider the use of alternative drilling methods such as air rotary or dual wall percussion hammer for the construction of ground water monitoring wells.

Drill cuttings that are generated while drilling the well are discharged to a cyclone separator which removes most of the cuttings and places them in 55 gallon drums. The air and remaining small particulate that were not removed by the cyclone are discharged to a secondary containment tank where the air passes through two stages of filtration before being discharged to the environment. The containment and waste packaging system removes 99.97 percent of the particles larger than 0.3 microns from the air.

#90344b0092 12/10/1990 ~Business Wire

SAN FRANCISCO (DEC. 10) BUSINESS WIRE - IBM scientists attending the International Electron Devices Meeting (IEDM) here this week will announce several world speed records for the kinds of circuits used in high-speed mainframe computers.

''We now hold all the important records for laboratory versions of the kinds of circuits found in high-end computers,'' said Paul Horn, who directs silicon research at IBM's T.J. Watson Research Center in Yorktown Heights, N.Y.

The records, Horn said, set new standards for the future fast circuits of the kind now used in mainframe computers. And they promise a long life for silicon as a computer chip material for the fastest computers.

The records were set using ''bipolar'' transistors, so-called because they use both positively and negatively charged particles to carry electrical current. The experimental transistors described by IBM at this conference carry current through thin ''control'' layers that are just 600 Angstroms -- or 2.4 millionths of an inch -- thick.

At the IEDM conference Monday and Tuesday, IBM will announce new switching speed records for circuits using both types -- known as ''NPN'' and ''PNP'' -- of bipolar transistors. Switching speed or gate delay is the time it takes for electrical current to travel through a standard benchmark circuit. (That circuit, a standard in the computer industry, is known as an emitter coupled logic or ECL circuit.)

The three IBM world records are:

- Circuits using both silicon and silicon-germanium NPN transistors that switch in less than 25 picoseconds. (A picosecond is a trillionth of a second.) These NPN transistors are fabricated with a control layer of material that contains mostly positively charged carriers (P) sandwiched between two layers that contain mostly negatively charged carriers (N).

The NPN bipolar transistors are widely used in today's high-performance mainframe computers. IBM scientists are the first to successfully build circuits using the silicon-germanium transistors.

- A circuit using pure silicon PNP transistors that runs in 35 picoseconds. (PNP is the complementary configuration for bipolar transistors, where a thin control layer with mostly negatively charged current carriers is sandwiched between two layers of material with mostly positively charged carriers.)

The new record for PNP transistors is six times faster than the old record of 216 picoseconds, set in 1986. It shows that complementary PNP transistors can operate in the same speed range as NPN transistors, opening the possibility

that they could be put together in new bipolar circuits, a design that would conserve power while maintaining the highest speeds.

- An individual NPN silicon-germanium transistor that operates at a frequency of 97 billion cycles per second when cooled to -300 degrees Fahrenheit (-184 degrees Centigrade). The ultra-fast speed promises possible application of the bipolar transistors to supercooled, superfast computers of the future.

MILPITAS, CA (DEC. 10) BUSINESS WIRE - NetFRAME Systems Inc. Monday announced that unmodified, standard NetWare 386 v. 3.1 from Novell will be available for the NetFRAME system family in January 1991, offering customers all the enhancements and functionality of the latest release of NetWare such as support for NetWare Loadable Modules (NLMs), third-party applications and databases.

Current NetFRAME customers with NetWare 386 v. 3.0 for NetFRAME will be upgraded to the 3.1 release at no charge.

NetFRAME also disclosed that it has been accepted into and will participate in Novell's Independent Manufacturer Support Program (IMSP) Level II. Through this select test and certification program, Novell and NetFRAME will work together to guarantee that NetFRAME systems support each new release of NetWARE prior to first customer shipments of the product.

This will ensure concurrent first customer shipments of future Novell products and will facilitate fast and efficient resolution of any joint Novell/NetFRAME support questions.

NetFRAME will bundle NetWare 386 v. 3.1 with NetFRAME's powerful network management and administration software products, ''SAM'' and ''RCON.'' These tools, unique to NetFRAME systems, reduce the cost and complexity of network server maintenance and administration.

NetFRAME Systems Inc. is a privately-held company started in 1987 by Carlton G. Amdahl, a veteran mainframe computer scientist, and Enzo Torresi, co-founder of Businessland Inc.

The company designs, manufactures and markets a family of multiprocessor network computers that run industry standard network operating systems for the PC-LAN environment. NetFRAMEs combine the high reliability, data integrity and computing power of mainframes with the manageability, flexibility and cost advantages of personal computers.

KANSAS CITY, MO (DEC. 10) BUSINESS WIRE - More than two million members of USAA will be able to enjoy significant savings and 100-percent digital quality on their long distance service thanks to a custom designed program announced Monday by US Sprint and USAA Buying Services.

Under the comprehensive new program, USAA members who sign up for Dial 1 or Sprint Plus(sm) will receive the benefit of a special USAA discount. Additionally, new customers who switch to US Sprint's high-quality long distance services will receive a $5 certificate per line towards the switchover which accommodates up to two telephone lines.

The USAA program also includes a customized FONCARD(sm), US Sprint's travel card, which allows the user to charge calls from any phone, even rotary. Dial 1 and Sprint Plus are US Sprint's long distance services for residential and small businesses.

Richard Goertz, USAA's Buying Services vice president, stated, ''US Sprint's emphasis on quality and customer service mirrors USAA's commitment to our members.''

USAA members began receiving information on US Sprint's USAA program early this fall and are now invited to call 1-800/800-USAA (1-800/800-8722) to initiate long distance service.

Changing their service to US Sprint's USAA program helps members save substantially on their monthly long distance bills. USAA members also will receive a unique benefit package that provides additional discounts on all long distance calls.

USAA, founded in 1922, is a large insurance and diversified financial services institution with a home office in San Antonio, Texas. It manages more than $18 billion in assets. USAA's current membership is over 2 million members and associate members, including more than 96 percent of active duty military officers.

US Sprint is a unit of United Telecommunications Inc., a diversified international telecommunications company with $7.5 billion in revenues. US Sprint provides a comprehensive array of voice, data and video communications products and services on the nation's only all-digital, fiber-optic network.

SAN JOSE, CA (DEC. 10) BUSINESS WIRE - Hyundai is placing increasing emphasis on its family of monitors as it continues to broaden its product offerings with two new 14-inch VGA displays: the HCM-421E Super VGA color monitor and the HMM-413 VGA monochrome.

With the addition of these two new models, Hyundai meets a wide range of graphics and text processing needs with a selection that now includes 12-inch and 14-inch monochrome and VGA monochrome, 14-inch VGA color in a choice of resolution, and a 19-inch one megapixel double-page monochrome monitor.

Prices: The HCM-421E Super-VGA color monitor is priced at $629 (S.R.P.); the HMM-413 is $199 (S.R.P.). Both are available in December.

The HCM-421E is a 14-inch Super-VGA color monitor with 0.28 dot pitch and a resolution of 1024 by 768, which makes it ideal for high resolution graphics. It can support up to 256 colors. The HCM-421E is an RGB analog monitor with paper white phosphor display and ergonomic tilt and swivel stand.

Hyundai's monitors, as are all of Hyundai's personal computer products, are covered by the company's 18-month warranty. An optional on-site service program is also available for Hyundai's PCs and monitors.

Hyundai Electronics America is a major supplier of a full line of quality, reliable monitors and personal computer products that are competitively priced.

Hyundai's wide experience in electronics extends beyond personal computers to telecommunications products, industrial electronics and semiconductors, produced worldwide by Hyundai Electronics Industries, Co. Ltd. (HEI), of which Hyundai Electronics America is a subsidiary. HEI belongs to the $32 billion Hyundai Group, the largest industrial company in Korea.

DALLAS (DEC. 10) BUSINESS WIRE - The board of trustees of Continental Mortgage and Equity Trust (NASDAQ: CMETS) Monday announced they authorized the

purchase of up to $1.0 million of common stock of Transcontinental Realty Investors Inc. (NYSE: TCI) and up to $1.0 million of shares of beneficial interest of National Income Realty Trust (NASDAQ: NIRTS) through negotiated and open market transactions.

The board of National Income Realty Trust approved the purchase of up to $1.0 million of shares of beneficial interest of Continental Mortgage. Management of the trusts will determine the amount and timing of stock purchases based on the market prices of the shares relative to management's assessment of their underlying asset value.

''We continue to believe the pervasive negative sentiment toward real estate-related stocks provides an excellent investment opportunity,'' said a spokesperson for the trusts.

Continental Mortgage and Equity Trust and National Income Realty Trust are combination mortgage and equity real estate investment trusts which operate nationwide. The two trusts, and Transcontinental Realty Investors Inc. are advised by National Realty Advisors Inc. and share the same board.

TEMPE, ARIZ (DEC. 10) BUSINESS WIRE - Motorola Inc. (NYSE:MOT), Monday announced that Anaheim, Calif.-based General Automation Inc. (ASE:GA) will purchase the company's Delta Series 3000 and Delta Series 8000 computer systems under a long-term original equipment manufacturing (OEM) agreement.

Motorola estimates the value of the multi-year agreement to be in excess of $36 million.

Under terms of the agreement with the Motorola Computer Group, General Automation will use the Motorola computers as a platform for its future PICK/UNIX and UNIX-oriented computer systems. Orders for systems to be shipped to Australia and the United Kingdom have been received by General Automation.

General Automation will port PICK/UNIX-based operating systems, as well as portions of its worldwide library of PICK-based applications software to the Delta Series systems. General Automation's R91 Enhanced Pick Application Environment will be ported to Delta Series systems in the future, thereby assuring their customers of migration path alternatives as technology advances.

The Delta Series 3000 and Delta Series 8000 are UNIX-based computer systems. The Delta Series 3000 uses the Motorola MC68030 complex instruction set

computer (CISC) microprocessor, and the Delta Series 8000 uses the Motorola M88000 reduced instruction set computer (RISC) processor.

General Automation offers business systems, related application and system-level software, and field service capabilities that are provided through a multinational network of computer marketing, support and service companies in the United States, United Kingdom, Europe, Latin America and in the South Pacific/East Asia region.

Motorola is one of the world's leading providers of electronic equipment, systems, components and services for worldwide markets. Products include two-way radios, pagers, cellular telephone systems, semiconductors, defense and aerospace electronics, automotive and industrial electronics equipment, computers, data communications, and information processing and handling equipment.

Motorola was a winner of the first Malcolm Baldridge National Quality Award in 1988, in recognition of its superior company-wide quality management process.

ORLANDO, FL (DEC. 10) BUSINESS WIRE - Candle Corp., the leading supplier of DB2 performance monitoring tools, announced the availability of OMEGAMON for DB2, Version 200 at its 6th annual users conference.

Major enhancements provide the data base administrator and applications developer with easy-to-use tools needed to develop effective DB2 applications and manage expanded DB2 capabilities.

The historical feature now provides three modes of data collection to best meet the needs of both development/testing and production. The data collected provides information to prevent problems before they occur, solve current problems and understand long-term trending.

OMEGAMON for DB2 is a component of Candle's integrated system management software called OMEGACENTER, which provides analysis through the OMEGAMON family of products, automation, through the AF products and comprehensive monitoring through Status Monitor and OMEGAVIEW.

Candle Corp., founded in 1977, markets its products worldwide with 1989 revenues of $128.1 million. Corporate headquarters are in Los Angeles with eleven domestic and six international offices. The company offers customers

24 hour-a-day, seven days-a-week service and support. In addition to OMEGAMON performance and automation tools, Candle markets data base tools for DBA's and application development tools (CL product family) to assist customers with end-user productivity.

SAN FRANCISCO (DEC. 10) BUSINESS WIRE - GATX/CL Air Monday delivered LACSA Airlines' first Airbus A320-200, a state-of-the-art short-to-medium range aircraft.

LACSA, the national airline of Costa Rica, will become the first to operate this aircraft in Latin America. It also was the first delivered by the leasing company, GATX/CL Air of San Francisco. This aircraft is one of four A320s LACSA has committed to lease from GATX/CL, a joint venture between GATX Leasing and Credit Lyonnais. Delivery is scheduled to take place within the next year.

The Airbus Industrie A320 is one of the most technologically advanced commercial aircraft ever designed in its category. Designed to replace an older generation of aircraft, the A320 is a narrowbody aircraft with a spacious 168-seat interior and highly fuel efficient twin engines. The aircraft has extended range capability enabling it to handle longer overseas flights.

With the new planes secured through GATX/CL Air, LACSA will have one of the most modern fleet of aircraft in Latin America. LACSA's current international fleet consists of five Boeing 727s and a McDonnell Douglas DC-8-55 freighter.

This is the first A320 delivered through GATX/CL Air, a partnership that combines the financial resources of Credit Lyonnais and other international institutions with the marketing and equipment knowledge of GATX Air. GATX/CL Air was established in June 1988 by GATX Capital Corp. and Credit Lyonnais, one of the five largest European banks. Its portfolio of aircraft and related equipment is valued at approximately $1 billion and includes orders for 20 Airbus A320-200 aircraft, five Boeing 737-300s and one Boeing 767-200ER.

The GATX/CL Air Leasing Cooperative Association, which is set up in the Netherlands Antilles, also includes four other equity partners, Household Commercial Financial Services, Nichimen Corp., Mitsubishi Bank Limited and Sanwa Bank Limited. Each participant in the association funds purchases of equipment in proportion to its venture share and retains a significant interest in the equipment after delivery. The association is managed by GATX and co-managed by Credit Lyonnais.

GATX Capital Corp., a leader in the field of capital equipment leasing and financing, is a major lessor of commercial jet aircraft, rail and marine equipment. GATX Capital is a wholly-owned subsidiary of GATX Corp., a leading operating leasing company, founded in 1898, with total assets of $3.1 billion.

LOS ANGELES (DEC. 10) BUSINESS WIRE - Brenda Z. Doby has been named senior vice president and manager of Sterling Bank's Entertainment Division.

The announcement was made by bank president, Joseph C. Carona. ''We are very fortunate to have such a capable and experienced professional as Brenda to head our new Entertainment Division,'' said Carona. ''We're expecting this division to be very successful in the coming year under her leadership.''

Ms. Doby comes to Sterling Bank from Lincoln National Bank. There she helped form the bank's entertainment division and served as senior vice president.

Brenda began her banking career with Bank of America where she held various lending positions. She spent seven years as vice president of the Entertainment Division of Bank of California, specializing in the financing of motion pictures and serving the financial needs of executives and entertainers in the television and music/recording industries.

Ms. Doby is a graduate of the University of California, Santa Barbara and holds a masters degree from Pepperdine University, Malibu, Calif.

The Entertainment Division of Sterling Bank is located at the bank's Beverly Hills regional office, 433 No. Camden Drive, Suite 1050. Other regional offices are in Burbank, Glendale and Tarzana. The bank's corporate headquarters and main office is in Los Angeles.

#90344b0155 12/10/1990 ~Business Wire

DENVER (DEC. 10) BUSINESS WIRE - Colorado Crystal is the definitive leader in the Denver sparkling bottled water market, according to the most recent A.C. Nielsen's Scantrack Market Survey.

Colorado Crystal, produced by Rocky Mountain Beverage Co. (NASDAQ:RMBCU), surpassed Coors' water, and all other bottled sparkling waters, in both dollar volume and market share for the period ending Nov. 3, 1990.

Colorado Crystal significantly outsold Coors in dollar volume resulting in a 19 percent market share, compared to Coors' 14.5 percent share.

Colorado Crystal regained the No. 1 position of bottled sparkling water in this market, winning over the reintroduced Perrier, Coors and Pepsico's H20h!, in spite of the competition's significantly larger size.

''We continue to believe in the superior taste and purity of Colorado Crystal '' said Raymond A. Murtha, president and chief executive officer of Rocky Mountain Beverage Co.

''Consumers familiar with bottled waters who try our product and then compare it to others clearly prefer Colorado Crystal. With the very heavy promotional spending in this market by major brands, we expect the competition to be fierce, but we welcome it.''

Colorado Crystal succeeds despite the huge expenditures of promotional money other companies are spending.

''Given the lack of support it has received in Colorado, it makes sense why Coors' has not decided whether to sell its sparkling waters nationally, regardless of the large sums of money it has spent promoting the product,'' said Murtha. ''Bottle water consumers are looking for quality, and Colorado Crystal's quality speaks for itself. Consumers believe in us and sales reflect that fact.''

Referring to the recent introduction of Colorado Crystal into the Arizona market, Murtha said that ''in a few months we expect to be ahead of Coors, even though they have had almost a year's head start on us.''

Colorado Crystal is a naturally flavored mountain spring water bottled at the source in the Grand Mesa area of Western Colorado. The Coors' product is bottled under a contract agreement by the Safeway bottling plant in east Denver.

#90344b0160 12/10/1990 ~Business Wire

PROVO, UT (DEC. 10) BUSINESS WIRE - Novell, Inc. (NASDAQ:NOVL) Monday reported net revenue of $497.5 million for its fiscal year ended Oct. 27, 1990 up 18 percent from net revenue of $421.9 million in fiscal 1989.

Net income for the year was $94.3 million, up 94 percent from $48.5 million in 1989. Earnings in fiscal 1990 were $1.36 per share up from $0.73 the previous year.

In the fourth fiscal quarter 1990 net revenue was $140.5 million, up 27 percent from the $111 million reported in the like period of 1989. Net income for the fourth quarter was $32.6 million, up from $14.3 million in 1989. Fourth quarter 1990 earnings were $0.46 per share, up from $0.21 per share the

year before.

Fiscal year revenue from software sales rose 38 percent to $387 million as the company continued to eliminate hardware product lines from its product mix. Software revenue accounted for 83 percent of total revenue in the fourth fiscal quarter 1990, and for the year averaged 78 percent of total revenue.

During the year Novell recorded strong growth from its new NetWare 386 operating system software for business-wide computer networks. In its first full year of availability, sales of NetWare 386 totaled more than $90 million. The company also realized very strong demand for NetWare products that network small workgroups of up to eight computers, such as PCs and Apple Macintoshes. Sales of ELS NetWare products into this market category were up well over 50 percent compared to fiscal 1989.

International revenue for the fiscal year grew 34 percent to $197 million, or 40 percent of total revenue. In 1989, international revenue stood at $147 million, or 35 percent of total revenue.

On the balance sheet, cash and short term investments increased by 96 percent over fiscal year-end 1989, reaching $255 million at the close of fiscal 1990. On average, the company's cash position grew just over $30 million per quarter throughout fiscal 1990.

The company announced a two-for-one stock split to shareholders of record as of July 31, 1990. The distribution date for the additional shares was Aug. 17. Earnings per share numbers for all periods referenced in this press release reflect this action.

Novell develops NetWare systems software products that manage and control the sharing of data across a variety of network computing environments, including computer workgroups, departmental networks and business-wide information systems.

#90344b0162 12/10/1990 ~Business Wire

HOUSTON (DEC. 10) BUSINESS WIRE - Moss Bluff Gas Storage Systems has announced that operations have begun and gas supplies are being stored in its recently completed salt dome cavern storage facility in Liberty County, Texas.

The facility, which is coming on-line in time to enhance supply capabilities for the 1991 winter heating season, is a joint venture between subsidiaries of Phibro Energy Inc. and Tejas Power Corp. Current working storage capacity is 1.3 billion cubic feet (Bcf), and maximum daily deliverability from the cavern

is 150 million cubic feet per day.

According to Tejas Power's President Larry W. Bickle, the Moss Bluff facility will directly interconnect with five major interstate and intrastate pipelines creating a highly reliable ''pooling point'' for access to both a diverse array of gas supply sources and to gas markets in several geographic areas.

The facility will also provide for the introduction of new, innovative gas service.

''We are pleased that we were able to develop this facility in just 14 months '' Bickle said. ''As far as we know, that's an industry record. When reliable, high-deliverability of natural gas is important -- such as during the record cold snap in mid-December 1989 -- this type of storage service is critical to helping natural gas companies meet their customers' needs.''

Bickle added that Moss Bluff Storage Systems is already flowing gas to Channel Industries Gas Co., an affiliate of Tenngasco Corp., through an interconnect with Channel's 30-inch mainline system. Moss Bluff expects to begin deliveries from the cavern to Texas Eastern Gas Transmission and United Texas Transmission by mid-December.

Future interconnects with Exxon Gas Systems and Natural Gas Pipeline Company of America are planned for the first quarter of 1991.

Phibro's 50 percent ownership in Moss Bluff greatly enhances its natural gas marketing, trading and transportation activities. Phibro markets nearly 300,000 MMBtu per day utilizing firm and interruptible transportation, which will now be complimented by firm and interruptible peaking and storage.

In conjunction with the startup of the Moss Bluff facility, Phibro has initiated a bundled gas options service whereby purchasers have the firm right to call on additional peaking gas supplies over the term of the contract. Conversely, producers will use the options service to attain the firm right to deliver additional gas to Phibro under similar arrangements.

The facility's location, as well as Phibro's marketing presence, will allow Phibro to provide the options service into most Gulf Coast pipelines.

Phibro Energy Inc., a subsidiary of Salomon Inc. (NYSE:SB), is an internationally diversified energy trading company. Phibro is the world's largest trader of crude oil and refined products as well as a trader of natural gas, LPGs, petrochemicals, fertilizers, plastics, coal and coke and is the fourth-largest independent refiner in the United States and one of the world's largest ship chartering companies.

Tejas Power Corp. gathers, processes, transports, stores and markets natural gas. Tejas owns and operates more than 20 pipeline systems in Texas and

Louisiana and markets natural gas throughout the eastern United States.

LOS ANGELES (DEC. 10) BUSINESS WIRE - The 326 employees of MGM Grand Air will launch ''Operation: Desert Cheer'' on Dec. 17 to deliver a plane-load of holiday gifts to U.S. troops in Saudi Arabia.

The luxury airline's employees in Los Angeles and New York initiated ''Operation: Desert Cheer'' to send holiday greetings to troops deployed to the Persian Gulf as part of ''Operation: Desert Shield.'' The USO is sponsoring the airlift in cooperation with the Department of Defense.

An MGM Grand Air's DC-8 Super 62 will depart for Dharhan, Saudi Arabia, from the airline's West Imperial Terminal at 9:30 a.m. Monday, Dec. 17. The plane will be loaded with more than 15 tons of gifts donated by more than 50 companies.

Gifts include Lancome Maximum Sun Block, Disney audio cassettes, Kodak cameras Gucci sunglasses, 20,000 Mrs. Fields' cookies and other upscale items. Chevron has also donated fuel, and overseas airports along the route have waived landing fees.

Schoolchildren in Hawthorne and El Segundo are writing cards and letters for the troops. Former President Reagan and Mrs. Reagan are also sending a holiday greeting card via MGM Grand Air.

''Sending gifts alone is not the main purpose of 'Operation: Desert Cheer','' said Charles L. Demoney, president and chief executive officer of MGM Grand Air. ''The true mission is to assure our troops that they are not forgotten this holiday season by the folks back home.''

On Dec. 15, the employees will wrap the gifts being sent over to the Persian Gulf and, on Dec. 16, will help load packages onto the aircraft at West Imperial Terminal.

MGM Grand Air is a transcontinental airline for the executive business travel market and offers extraordinary service at ordinary fares. MGM Grand Air, the Desert Inn Hotel and Casino in Las Vegas, and the newly announced MGM Hotel and Theme Park are subsidiaries of MGM Grand Inc.

#90344b0181 12/10/1990 ~Business Wire

PHOENIX (DEC. 10) BUSINESS WIRE - America West Airline's (NASDAQ:AWAL; PSE:AWA) ''50 Percent Off Any Fare Anywhere'' sale attracted approximately 100,000 travelers to Sky Harbor Airport's Terminal 4 on Saturday, Dec. 8.

The airline offered customers a 50 percent discount on all published fares for travel between Jan. 7 and Nov. 1, 1991. In addition, the carrier offered a ''buy one, get one free'' program on its Value Pack, Senior Saver Pack and America West Gift Certificates.

Mark Coleman, senior vice president of sales and product development for the airline said, ''America West's '50 Percent Off' sale was a phenomenal success. The response to our air travel offer was incredible.'' He added, ''The program was very unusual and to our knowledge, has never been done before.

''It may be one of the most dynamic marketing programs in the aviation history as evidenced by the superb turnout.'' Coleman noted that due to the large crowds, America West handed out rainchecks to thousands of customers.

Customers may redeem rainchecks for half-price tickets, two-for-one coupon books and two-for-one gift certificates between Jan. 6 and Jan. 20. Passengers may only purchase tickets with the 50 percent discount if a reservation had been made to meet the program guidelines and if the reservation was confirmed prior to midnight, Dec. 8.

Passengers without confirmed reservations may redeem rainchecks for Value Pack Senior Saver Pack or America West Gift Certificates. Discounts will be made on America West's Dec. 8, 1991, fare levels. Rainchecks may be redeemed at all America West ticketing locations in Phoenix.

America West, the nation's number one carrier in on-time performance, operates a fuel efficient fleet of 102 aircraft including Boeing 747s, 757s, 737s and de Havilland Dash 8s. The carrier recently acquired up to 118 Airbus A320s and will operate 16 of the new aircraft by mid-1991. America West offers convenient service with more than 650 daily flights from coast-to-coast and across the Pacific to Hawaii.

WICHITA, KN (DEC. 10) BUSINESS WIRE - Sage Drilling Co., the Wichita-based contract drilling and energy company, Monday reported a net loss of $214,000 for the first quarter of fiscal 1991, ended Sept. 30, 1990.

In the comparable quarter of fiscal 1990, Sage reported a net loss of $215,000. The net loss per share of 28 cents equalled the net loss per share for the same period in fiscal 1990. Total revenues for the first quarter of fiscal 1991 amounted to $1,056,000 compared to $989,000 for the same period a year earlier.

Commenting on the first quarter results, Sage President John R. Bartholomew said, ''The current Persian Gulf crisis is beginning to affect the contract drilling industry. Our rig utilization and contract drilling revenues showed slight improvements compared to our first quarter of the prior year.

''Should the uncertainty continue in the Persian gulf, we anticipate further improvements.''

RICHARDSON, TEXAS (DEC. 10) BUSINESS WIRE - Micrografx Inc. (NASDAQ:MGXI), the leading developer of PC graphics applications for the Microsoft Windows environment, Monday announced that it has entered into a letter of intent providing for the acquisition of Astral Development Corp., a developer of Windows-compatible color/grayscale image editing software.

Astral is the developer and marketer of Picture Publisher, a Windows 3.0 graphics application which enables users to access an ''Electronic Darkroom'' of interactive color image editing and manipulation tools. Picture Publisher is the first product for the IBM PC environment with the image editing power

and flexibility of Macintosh-based products.

Picture Publisher earned the ''Publish!'' magazine 1989 and 1990 Readers' Choice Award for Grayscale Image Editing and has a suggested retail price of $695.

''The addition of Astral's people and technology will add a significant new dimension to the Micrografx product line,'' said J. Paul Grayson, chairman and chief executive officer of Micrografx.

''High resolution, color image editing has just become possible on standard personal computers and we are thrilled about the possibility of acquiring a true pioneer in this area. Astral's combination of superior technology and expertise is second to none, and we are very excited about the possibility of Astral becoming a part of the Micrografx family.''

The proposed acquisition contemplates the issuance of approximately 250,000 new shares of Micrografx common stock in exchange for the stock of Astral. Consummation of the acquisition is subject to negotiation, execution and delivery of a definitive acquisition agreement and other customary conditions.

Astral Development Corp. was founded in 1988 by Frank Mazza, John Dearborn and Peter Tarca. Mazza and Dearborn worked together at Xerox Corp. marketing, selling and supporting imaging systems and joined with Peter Tarca at startup scanner manufacturer ImagiTex.

Micrografx generates nearly half of its revenues outside the United States and has over 200 employees in the United States, Canada, Denmark, France, Germany and the United Kingdom.

DAYTON, Ohio (DEC. 10) BUSINESS WIRE - Judge Frederick Smalkin, Federal District Court Judge for the District of Maryland, today dismissed without prejudice an amended complaint in a lawsuit filed by AT&T against NCR and the Maryland attorney general.

The complaint sought a declaratory judgment that the receipt of revokable proxies by AT&T for purposes of a potential shareholder vote would not make AT&T a beneficial owner of NCR shares represented by such proxies under the Maryland Business Combination Act.

Under the Maryland Business Combinations Act, a ''beneficial owner'' of 10 percent or more of the outstanding voting stock is precluded for at least five years from entering into any ''business combination'' with that corporation

unless the company's board of directors approves prior to the beneficial owner becoming a 10 percent shareholder.

Because the court dismissed the complaint, it did not consider AT&T's request to enter a temporary restraining order which would have barred NCR from commencing or prosecuting any litigation against AT&T in connection with a tender offer in any other court.

SAN DIEGO (DEC. 11) BUSINESS WIRE - Ventura Software Inc. Monday announced the establishment of a Pacific Rim headquarters in Sydney, Australia.

Designed to offer localized contact and support for Ventura Software's family of desktop software products, the office will be responsible for marketing, managing and controlling distribution, technical support, education and training. The office will serve users in Hong Kong, Singapore, New Zealand, as well as Australia. Pacific Rim General Manager Named

Effective immediately, Graham Hobbs has been named general manager for Ventura Software Inc. Pacific Rim.

Reporting directly to Patrick Linehan, Ventura Software Inc.'s senior vice president sales and marketing, Hobbs has more than 20 years experience in publishing systems and software.

Most recently, Hobbs worked with Rank Xerox as manager of electronic publishing, supporting sales and marketing in the Pacific Rim. Prior to his tenure with Xerox, Hobbs spent 18 years with Compugraphic Corp. as regional director of the Pacific Rim business unit, where he pioneered the development of the international market for Compugraphic publishing products. Ventura Software Extends Worldwide Presence

The formation of the Australian office brings the number of worldwide Ventura Software headquarters to four, including the United States, Canada, Europe and the Pacific Rim. Pricing and Product Availability

Ventura Publisher Gold Series (DOS/GEM, Windows 3.0, Macintosh and OS/2 1.3 Editions) and FormBase 1.1 are immediately available in Pacific Rim countries.

Additionally, distributors have been signed and include: MegaVision in

Australia; Xicon in New Zealand; and Imagineering, servicing Hong Kong and Singapore.

Manufacturer's suggested retail pricing per Australian dollar:

Ventura Software Inc., a Xerox company, is a leading supplier of publishing, forms processing and database software solutions. Ventura Publisher is available in DOS/GEM, Windows 3.0 and Macintosh versions. An OS/2 Edition, based on IBM Corp.'s OS/2 version 1.3, will be released by year end.

In 1991, Ventura Publisher will also be offered for the UNIX platform running under OPEN LOOK. FormBase is currently available for IBM PCs and compatibles running under Windows 3.0. The company markets its software solutions through a worldwide dealer network of more than 6,000 outlets.

Ventura Software Inc., formerly Xerox Desktop Software, has its headquarters in San Diego.

MOUNTAIN VIEW, CA (DEC. 10) BUSINESS WIRE - Sun Microsystems and The Foxboro Co., a Siebe Company, have signed a joint technology and business agreement.

This agreement will allow Foxboro to incorporate SPARC and other advanced Sun computer technologies into Foxboro's I/A Series industrial process management and control system on an ongoing basis. The agreement also includes an exclusive marketing arrangement whereby Foxboro will provide an integrated product offering to satisfy the requirements of their industrial automation customers.

The first three products to emerge from the Foxboro/Sun agreement will be available in February 1991. These Foxboro products allow a bidirectional exchange of information between Foxboro's I/A Series Systems and Sun's SPARCstation workstations and servers, MS-DOS personal computers running Sun's PC-NFS software, and other platforms.

The products are the Foxboro I/A Series Application Interface Software; the I/A Series Open Application Platform, a product that includes both the

application interface software and a SPARCstation workstation; and the I/A Series Open Information Server, a SPARCserver-based networked hardware/software product.

These new application interface products give engineers, managers and other supervisory network users direct access to plant production information. The products also provide process control operations personnel with access to appropriate engineering or business information.

With Sun's ONC networking capabilities, this high degree of interoperability and functional integration also extends to a wide assortment of other networks and host computers.

The Foxboro Co. is a major, international supplier of advanced systems, high-quality instruments and services, and comprehensive solutions for industrial process automation and real-time information management. Foxboro is a member of the Siebe PLC International Engineering and Controls group.

Sun Microsystems Inc., with headquarters in Mountain View, is a leading worldwide supplier of network-based distributed computing systems, including professional workstations, servers and UNIX operating system and productivity software.

JOPPA, MD (DEC. 10) BUSINESS WIRE - Dec. 10, 1990, Merry-Go-Round Enterprises Inc. (NYSE:MGR) announced today that its Board of Directors declared a three-for-two common stock split in the form of a 50 percent stock dividend payable on January 4, 1991 to shareholders of record at the close of business on December 21, 1990.

This action was taken in recognition of the Company's continuing growth and with the expectation of increasing the outstanding float and broadening the stockholder base.

After the stock split, the quarterly dividend rate on the Company's common stock will be 2 cents ($0.02) per share, which represents a 20 percent increase in the dividend rate.

Merry-Go-Round Enterprises Inc., is a leading retail specialty apparel chain selling contemporary fashions for young men and women in over 670 retail

stores in 38 states.

DALLAS (DEC. 10) BUSINESS WIRE - Cybertek Corp. (NASDAQ/NMS:CKCP) Monday announced the signing of a major license and services agreement with Golden Rule Insurance Co. of Indianapolis.

Founded in 1942, Golden Rule has emerged as a major provider of accident and health insurance with approximately $400 million of annual premium income. Although Golden Rule has focused its activities predominantly in the accident and health field, a considerable amount of ordinary life and individual annuity business is also conducted by the company.

The total value of the agreement is expected to be approximately $1 million.

Under the terms of the agreement, Cybertek will provide its CK4/VS licensed software and Strategic Business Support (SBS) Services to Golden Rule and its subsidiary companies. A subsequent agreement is pending that will provide additional consulting and programming assistance from Cybertek in the transition of the company's data from CYPROS AP to CK4/VS.

Golden Rule ultimately plans to convert all of its individual life and health policies to the CK4/VS system.

Now in its 21st year, Cybertek has long been considered a pioneer in the development of real-time computer systems and software programs designed to increase user productivity for insurance customers.

SANTA CLARA, CA (DEC. 10) BUSINESS WIRE - Networking vendor Ungermann-Bass Monday introduced NetDirector, a multitasking PC-based system for the physical management of local and wide area networks.

The network management solution includes a standard Structured Query Language (SQL) database, enabling users to incorporate off-the-shelf software into the

network management platform. Many Ungermann-Bass customers are already upgrading to NetDirector, including Harris Methodist Health Services, Fort Worth, Texas, and the University of Kentucky.

According to Roger Bertman, vice president of marketing for Ungermann-Bass, NetDirector, which will be offered in a series of roll outs over the next year is more than a family of management products, it is a strategic network management platform.

NetDirector implements a client/server architecture through LAN Manager's Named Pipes facility. This enables several administrators to simultaneously access management applications over the network. Customers Migrate to New Platform

The NetDirector platform has gained across-the-board support from Ungermann-Bass customers, who are tailoring the platform to meet their needs. Beta customers have been using the initial phases of the product for several months to consolidate management functions.

The university network supports more than 3,900 devices and over 20 LANs with 40 Ungermann-Bass Access/One smart hubs. Prior to NetDirector, the school's information systems team was using different management screens for each network channel.

Joe Zarrehparvar, network engineering manager for Harris Methodist Health Services echoed Friskney's comments.

Harris also needed to centralize the management of its multisite, 2,000-node network. According to Zarrehparvar, with NetDirector, they have been able to consolidate management functions from five PCs down to one; but having a single management console was just one of the advantages to this OS/2-based platform.

Zarrehparvar added that with the menu-driven graphical user interface and on-line help, training and development time has been significantly reduced.

Harris Methodist Health Services uses the network management software to monitor all network nodes including PCs, token ring and Ethernet devices, T-1 and protocol independent bridges across six sites and 25 Access/One smart hub enclosures, through a single NetDirector server. Topological Map

Founded in 1979, Ungermann-Bass pioneered enterprise networking -- the sharing of data resources among dissimilar computer systems throughout a business organization. Ungermann-Bass is a leading international designer and supplier of networking hardware and software data communications systems.

SANTA CLARA, CALIF. (DEC. 10) BUSINESS WIRE - National Semiconductor Corp. Monday announced that sales for the second quarter of fiscal 1990, ended November 25, were $427.4 million, compared to $416.8 million in the comparable quarter a year ago.

The company reported net earnings of $3.5 million, or 1 cent per share, compared to net earnings of $2.4 million, or $0.00 per share, in the second quarter of fiscal 1990. Results for the quarter include a $2.4 million credit reflecting the reversal of certain restructuring charges connected with the closure of the company's Danbury, Conn., plant.

For the first half of fiscal 1991, the company reported sales of $870.1 million, with a net loss of $162.0 million, or $1.62 per share. Sales in the first half of fiscal 1990 were $814.4 million, with a net loss of $19.5 million, or 26 cents per share.

During the quarter, the company announced that it had signed a letter of intent for the sale of its Puyallup, Wash., facility to Matsushita Electronics Corp. The company expects to close the transaction in the first quarter of calendar 1991.

Charles E. Sporck, National Semiconductor president and chief executive officer, said: ''The company met the financial milestones which we set for the quarter. The significant improvement in operating performance in this quarter, compared to the first quarter of this fiscal year, reflects the benefits resulting from the restructuring activity which the company undertook this past August.

''We continue to reduce fixed costs in order to further improve the company's financial performance.

''Additionally, the company further strengthened its balance sheet, reducing debt by $18 million, while maintaining its cash position. At the same time, the company reduced inventory by $20 million, compared to the first quarter, in response to current business conditions.

National Semiconductor Corp. designs, manufactures and markets high-performance semiconductor products. Headquartered in Santa Clara, the company is a global leader in mixed analog-and-digital technologies.

#90344b0632 12/10/1990 ~Business Wire

POMPANO BEACH, FLA. (DEC. 10) BUSINESS WIRE - Atlantic Magnetics Inc. here announces a new solder station for dip-tinning copper wires in electrical and electronic manufacturing facilities.

''Our revolutionary new Roto-Dross wire tinning station offers more throughput and safety features than any other such product on the market,'' notes AMI President Edward Cammarata.

''Its automatic surface-skimming feature eliminates needless operator motion and increases throughput by 20 percent or more,'' he said. ''It consumes just 250 Watts, instead of 800. Energy savings, productivity gains and operator safety combine to make the unit quickly return its cost to the user.''

New Roto-Dross Dip Tinning Station reduces burn hazards. There is no need for operators to manually skim the solder pot's molten surface with a spatula. The unit incorporates a safety tray that catches hot dross (slag) to prevent it from spilling in the operator's lap. A wide foundation prevents the unit from tipping over.

''A large air space beneath the unit reduces localized heating, warping, discoloration and fire potential.''

In any dip-tinning station, dross always accumulates on the surface of the molten solder and has to be removed every 15 to 30 seconds. Otherwise, tinned wires pick up the dross and degrade quality by producing contaminated solder joints. Roto-Dross improves quality by sweeping the surface clean four times a minute.

Roto-Dross features three-digit thumb-wheels to set temperature, computer control to hold plus or minus 5 deg F, and an LED display for solder temperature. A 50 CFM fan with charcoal air filter keeps fumes to an absolute minimum, and a wooden hand rest that reduces operator fatigue and increases efficiency.

Roto-Dross Dip Tinning Station is priced at $1295 each. Delivery is quoted at stock to four weeks ARO.

Atlantic Mangetics Inc. is a manufacturer of wire-wound coils and related production equipment and test instruments.

DAYTON, OH (DEC. 10) BUSINESS WIRE - NCR Corp. has been awarded a contract by BellSouth to provide systems for the BellSouth Computing Architecture (BSCA), to achieve the company's strategy for open systems throughout BellSouth's distributed computing environment.

The initial project, the Regional Negotiations System (RNS), will include the installation of over 13,000 workstations and servers, X-terminals, multiuser systems peripherals and networking products from various vendors.

NCR will provide BellSouth with its scalable System 3000 series 3400, NCR model 3445 uniprocessors, NCR model 3450 multiprocessors and its TowerView workstations for possible use for RNS and/or other BSCA projects. The products in the scalable Systemp 3000 3/4 offer object code compatibility throughout the product line.

RNS will increase the productivity of BellSouth's customer service representatives by consolidating access to multiple mainframe-based systems into a UNIX-based client/server environment. An easy-to-use graphical user interface will increase productivity and reduce customer service training time.

Client/server technology will make access to a custKmer's total history with BellSouth -- bill payments, address and other data -- quick and comprehensive.

BellSouth is a worldwide telecommunications holding company composed of two operating telephone comanies, Southern Bell and South Central Bell, which serve 70 percent of the population in nine southeastern states; BellSouth Services, which performs staff and planning functions for the two operating companies; and BellSouth Enterprises, which manages the corporation's non-regulated activities throughout the United States and internationally.

Service and maintenance support for NCR products is provided by 5,000 customer service professionals at 400 locations in the United States.

NCR Corp., based in Dayton, develops, manufactures, markets and supports business information processing systems for worldwide markets.

MILPITAS, CA (DEC. 10) BUSINESS WIRE - Octel Communications Corp. (NASDAQ:OCTL) announced Monday that Kaiser Permanente, Southern California Region, has signed a one-year $2 million agreement to purchase Octel voice processing systems to link the staff of 17 Southern California region medical centers, administrative and medical offices in a voice mail network.

Management at Kaiser Permanente said it expects the network to help provide improved patient service and to increase productivity and enhance communications between doctors and other staff at the 17 medical facilities.

Todd said Kaiser Permanente selected Octel because of its user-friendly features, superior networking capabilities, multiple PBX integrations and high product reliability.

In addition to the voice mail network, Octel Aspen systems will allow staff of Kaiser Permanente in Southern California to benefit from a full range of voice processing applications -- telephone answering, automated attendant, call routing menus, voice bulletin boards and voice-prompted forms applications.

Octel Communications Corp. designs, manufactures and markets a full line of high-performance voice processing systems. Octel's Aspen product line is sold in the United States, Canada and overseas to small businesses and large multisite corporations.

The Sierra multiple-application voice processing platform is a very large capacity system designed to meet the special needs of telephone companies and other voice information service providers. Octel was founded in 1982 and has headquarters in Milpitas.

Kaiser Permanente, the nation's largest pre-paid, group practice health maintenance organization, provides comprehensive medical and hospital services to more than 6.4 million members in 12 regions nationwide and more than 2.2 million members in Southern California.

LOS ANGELES (DEC. 10) BUSINESS WIRE - Security Pacific Corporation (NYSE: SPC) is taking action to strengthen its profitable core businesses by disbanding its Merchant Bank; building its reserves for credit losses; and establishing other reserves which will result in reducing its net income for the full year 1990 to the range of $160 million to $200 million.

The actions are expected to produce a fourth quarter loss in the range of $320 million to $360 million.

With regard to dividend policy, management anticipates that it will recommend to the board of directors at its regular meeting in January 1991, that the quarterly dividend be maintained at its current level of $.63 per share, given SPC's historically strong core earnings sources, and its outlook for future profitability.

After these actions, at December 31, 1990, the corporation's Tier 1 capital ratio is expected to be approximately 4.1 percent of risk-adjusted assets, which exceeds the year-end 1992 minimum regulatory capital guidelines.

AUSTIN, TEXAS (DEC. 10) BUSINESS WIRE - HealthVest (ASE:HVT) Monday announced that its lenders have provided the necessary consents contemplated by the interim restructuring agreement signed last week between HealthVest and its principal operator, Healthcare International Inc. (ASE:HII).

HealthVest's lenders have also agreed to extend the expiration date of their Standstill Agreement with the Trust until June 30, 1991, subject to further extension to Sept. 30, 1991, if certain
minimum payments are made by HealthVest to the lender groups.

The extended standstill is subject to early termination, however, if a definitive merger agreement between HealthVest and Healthcare is not executed by Feb. 28, 1991. The previous Standstill Agreement with the lenders was to expire on Dec. 14, 1990.

As previously reported, HealthVest and Healthcare have agreed to a non-binding term sheet that outlines the framework of a proposed merger between the two companies.

HealthVest is a self-administered Real Estate Investment Trust (REIT) that invests in income-producing health care-related properties including psychiatric, general health and rehabilitation hospitals, skilled nursing facilities, retirement centers, medical office buildings, medically oriented fitness centers, and facilities offering other related health care products and services.

CLINTON, NJ (DEC. 10) BUSINESS WIRE - Generadores de Vapor Foster Wheeler, S.A., a Madrid-based subsidiary of Foster Wheeler Corp., will be part of a three-company consortium to build a 700 megawatt power plant in Mexico.

The installation is valued at more that $500 million.

The facility, known as the Carbon II Power Plant, to be built for Mexico's Commission Federal de Electricidad, will be located near Piedras Negras in Coahuila State. Generadores de Vapor Foster Wheeler's responsibility under the consortium agreement is for the design, manufacture and construction of two 350-megawatt steam generators and auxiliary equipment valued at more than $160 million.

Other members of the consortium, supplying other plant components, are Bufete Industriale, S.A. (Mexico) and Mecanica de la Pena, S.A. (Spain). Engineering work for the installation will begin immediately. The plant is scheduled for completion in 1994.

Foster Wheeler Corp. is a worldwide organization offering a broad range of design, engineering, construction, manufacturing, management, real estate development and environmental services. The corporation's headquarters are at

Clinton.

SAN DIEGO (DEC. 10) BUSINESS WIRE - Immunetech Pharmaceuticals has completed the transfer of its research and development laboratories to Japan's Tanabe Seiyaku Company Ltd., according to Cam L. Garner, Immunetech president and chief executive officer.

He said Immunetech also has completed its acquisition of Thera Tec, a Tampa (Fla.)-based manufacturer of nebulization systems marketed by Dura Pharmaceuticals, Immunetech's wholly owned subsidiary.

Garner said the two deals will aontin%e Immunet's planned change from a research company to an operating pharmaceutical business.

Tanabe, which became a major equity investor in Immunetech in 1988, will operate the research laboratory under the name Tanabe Research Laboratories USA Inc. Garner said Immunetech retains North American co-marketing rights for allergy/asthma products that are a result of compounds synthesized by this new group during the next three years.

Tanabe will employ Immunetech's 18 researchers and will assume Immunetech's lease of the Sorrento Valley facility, Garner said. Immunetech will relocate, along with the Dura group that is currently located in Ramona, to new space in the Sorrento Valley area.

Shuichiro Izutsu, deputy general director of Tanabe's Overseas Affiliate Support division, said his company's new subsidiary will focus its study in the area of immunology and allergy.

''We will continue in those areas where Immunetech has established excellent research results,'' he said.

Garner said Immunetech retains all rights to Pentyde, a novel anti-allergy peptide developed by the company. New drug applications for Pentyde Nasal Spray, Pentyde Injectable and Pentyde Ophthalmic are awaiting approval from the U.S. Food and Drug Administration. Garner said the current Clinical and Regulatory Group will remain with Immunetech and not be transferred to Tanabe.

Thera Tec, founded in 1986, was originally 50 percent owned by Dura. Garner said he expects to move Thera Tec to San Diego sometime next year.

Dura, which Immunetech acquired in late 1989, markets a combination of pharmaceutical products and medical devices for the treatment of allergies, asthma and respiratory disorders in the United States and Canada, as well as U.S. military bases around the world.

Within the past year, the Dura national sales force has more than doubled. Garner said he expects to double that again in 1991 as Dura is evaluating the in-licensing of several new products.

Immunetech Pharmaceuticals is a leading marketer of allergy/asthma compounds and devices to allergists throughout North America.

MARLBORO, MA (DEC. 10) BUSINESS WIRE - Stratus Computer Inc. (NYSE:SRA) Monday announced that Seven-Eleven Japan Co. Ltd. of Tokyo, the largest convenience store chain and food retailer in Japan, has chosen Stratus XA2000 Continuous Processing Systems to run its new store inventory management and merchandising system.

Initially, Seven-Eleven Japan has ordered nine Stratus systems -- representing $3.9 million in revenues for Stratus -- with plans to order an additional three Stratus systems in 1991.

Seven-Eleven Japan will use the fault-tolerant Stratus systems to collect sales transactions from its 4,200 stores throughout Japan. The Stratus systems also will supply the store managers with pricing changes, videotex-quality color images of promotional products, and continuously updated sales histories.

In addition, the Stratus systems are networked to more than 300 Seven-Eleven Japan vendors to allow store managers to place orders for replacement merchandise. Approximately 2,000 stores will be linked to the Stratus systems by March 1991, with the remaining stores to be online by June 1991.

The retailer will connect the Stratus systems to its thousands of stores using the world's largest Integrated Services Digital Network (ISDN). Seven-Eleven Japan breaks new ground with its aggressive implementation of ISDN, which is gaining initial acceptance as a lower-cost, higher-capacity alternative to other networks.

This new system also leads the trend toward quick response merchandising by giving store managers more control and better sales information on which to base their buying decisions. Seven-Eleven Japan estimates its total

investment in new systems, software, networking equipment, and terminals at 23 billion yen, or U.S. $17 million.

The Stratus systems for Seven-Eleven Japan were sold through Tokyo-based C. Itoh Techno-Science Co., Stratus' distributor in Japan.

The systems were purchased by Nomura Research Institute of Tokyo, who is the prime contractor, systems integrator, and application developer for Seven-Eleven Japan. From its computer centers, NRI will operate the Stratus-based system exclusively for Seven-Eleven Japan.

Stratus Computer Inc. is a leading supplier of fault-tolerant systems for critical online applications. One of the fastest-growing companies in the industry, Stratus reported revenues of $341.3 million for fiscal year 1989, up 29 percent from $265.3 million in 1988.

The company, whose headquarters are in Marlboro, markets Stratus systems worldwide through direct sales and reseller channels. Stratus Computer's common stock is traded on the New York Stock Exchange and the Boston Stock Exchange.

SAN FRANCISCO (DEC. 10) BUSINESS WIRE - Sierra Capital Realty Trust IV Co. (ASE:SCZD) announced Monday that it will omit payment of a dividend for the fourth quarter of 1990.

The company believes that, notwithstanding the trust's positive cash from operations of $1,987,837 for the first nine months of 1990, this decision is a prudent response to the anticipated loss of two major tenants in 1991, the loss of rental revenues and turnover costs therefrom, and to uncertainties surrounding the country's current economic climate and real estate markets.

The dividend action was taken pending complete consideration and possible adoption of revisions to the trust's dividend policy, to enhance the trust's ability to meet its anticipated liquidity requirements, and to enhance the trust's cash reserves.

If the revised policy is implemented in the first quarter of 1991 as anticipated, it is likely that cash dividends will not be resumed for at least the next few quarters.

NEW YORK (DEC. 10) BUSINESS WIRE - Enzo Biochem Inc. (AMEX:ENZ) announced Monday that it is moving for partial summary judgement in its federal court litigation against Johnson & Johnson (J&J) and two J&J subsidiaries, Ortho Diagnostic Systems Inc. (Ortho) and J&J Development Corp.

Enzo asserts that the contract language in Enzo's 1982 joint venture agreement with Ortho is unambiguous in important respects relating to Enzo's entitlement to royalties and certain manufacturing rights in connection with products resulting from projects in analysis of genetic material and nucleic acids for human diagnostics.

Enzo's position on its motion is that a diagnostic product for non-A, non-B Hepatitis (Hepatitis C) developed by Ortho and Chiron Corp. comes within the contractual language of the 1982 joint venture agreement. The Hepatitis C product is currently being sold by Ortho and also by Abbott Laboratories under a licensing agreement with Ortho.

The 1982 agreement between Enzo and Ortho provided for cooperation between the two companies in researching, developing, manufacturing and marketing certain health care products.

Enzo has charged in its lawsuit that Ortho has breached the 1982 agreement and that the defendants defrauded Enzo and violated the Racketeer Influenced Corrupt Organizations Act (RICO). Briefs on Enzo's motion for partial summary judgement are to be filed with the Court by the litigants in early 1991.

Enzo Biochem Inc. is an established New York City-based biotechnology company engaged both in the research, development and manufacture of innovative health care products based on molecular biology and genetic engineering techniques and in the provision of diagnostic services to the medical community.

PORTLAND, OR (DEC. 10) BUSINESS WIRE - The Waggener Group Monday announced its new name, Waggener Edstrom, recognizing the client service contributions of Senior Vice President Pam Edstrom.

The agency, which serves technology and science-based clients, has annual revenues of more than $5 million. Melissa Waggener, company founder, will remain president and chief executive officer.

''We are expanding the company's focus of providing the highest quality public relations counsel to our clients,'' Waggener said. ''Edstrom has set high standards in account service excellence for the last seven years. The new name reflects our mission to extend our superior account service into the next decade.''

Edstrom is the agency partner responsible for managing an account group that includes Dell Computer, Microsoft Corp. and Saros Corp. As senior vice president for the agency, Edstrom will continue to manage account teams.

Agency Partners Announce Worldwide Intent

Waggener and Edstrom, with their two partners Jody Peake, vice president, and Jim Buchanan, chief operating officer, also announced today the formation of a new organization, Waggener Worldwide. The mission of the new entity is to establish a framework for future growth while allowing Waggener Edstrom to focus on technology and science-based account service.

Waggener Edstrom, formerly The Waggener Group, was founded in November 1983. The firm provides public relations counsel and services to a variety of technology and science-based clients including Dell Computer Corp., Microsoft Corp., Sequent Computer Systems Inc., Central Point Software, Logic Automation Inc., CH2M HILL and Calera Recognition Systems.

NOTRE DAME, IND. (DEC. 10) BUSINESS WIRE - American Biogenetic Sciences, Inc. (''ABS'') (NASDAQ:MABXA (common), MABXU (units), MABXW (warrants)3/8 Monday announced that Robert J. Hennessey, former Corporate Vice President of Sterling Drug, has been retained by the Company to represent and assist in its strategic development and corporate partnering activities.

During his ten years at Sterling Drug, Mr. Hennessey spearheaded the aggressive global acquisition program that brought under Sterling's ownership Maggioni (Italy), Schwartzhaupt (Germany), Furt (France), Valda (France-Italy) Isoflex (U.K.), and five U.S. medical and consumer companies.

Mr. Hennessey was also responsible for negotiating key licensing agreements as well as identifying and divesting underperforming operations and those not in keeping with Sterling's long term objectives. In 1988, Mr. Hennessey was a key member of the team that negotiated Sterling's merger into Kodak.

Prior to joining Sterling, Mr. Hennessey had been Director of International Strategic Planning and Business Development for Abbott Laboratories. Before that, he was Director of the SmithKline Biologicals unit of SmithKline & French, Rixensart, Belgium. He began his career in the pharmaceutical industry with Merck Sharp & Dohme International, and had worked previously at the Office of the U.S. Secretary of Commerce.

Mr. Hennessey received his undergraduate and masters degrees from the University of Connecticut and later did post-graduate work in finance, mergers acquisitions and negotiations at both New York University and Harvard University. Alfred J. Roach, Chairman of ABS, stated, ''Mr. Hennessey's extensive experience and high level contacts in the industry will be most useful in helping us commercialize diagnostics and therapeutics for cardiovascular disease as well as vaccines for infectious diseases.''

NORTH STONINGTON, CONN. (DEC. 10) BUSINESS WIRE - Analysis & Technology Inc. (NASDAQ: AATI), which specializes in professional and technical services for submarines an antisubmarine warfare (ASW) and in training programs for Fortune 500 clients, won over $12.1 million in contracts and subcontracts during November 1990, A.T. Mollegan Jr., president and CEO announced Monday.

The company's total contractual backlog stood at approximately $311 milion at the end of November, or slightly below a $322.0 million total on Nov. 30, 1989 which included an exceptional record $54 million in awards for that month.

A $7.6 million two-year sole-source contract was awarded by the Naval Sea Systems Command, Washington, D.C. A&T will provide technical, engineering, and program planning support for the Trident Ship Control System acquisition program and Surface Ship Control Systems.

A&T was notified of a contract award to Planning Systems Inc., on which A&T is a subcontractor. This contract, awarded by the Naval Supply Center in Charleston, S.C., is for technical support services for oceanographic and meteorological systems to the Naval Oceanographic Office. A&T estimates that this subcontract will have a value of approximately $1.9 million over a five-year duration.

A $1 million contract modification was awarded by the Naval Underwater Systems Center, New London, Conn., for A&T to provide engineering services life-cycle support for surface ship sonar software system engineering.

Also during November, A&T opened a new office. It is in Monterey, Calif., and will support the design and development of environmental prediction and analysis systems for the Naval Oceanographic and Atmospheric Research Laboratory and the Fleet Numerical Oceanography Center.

In addition, A&T received a variety of subcontracts, smaller awards, and add-ons during November. These total $1.6 million and extend for periods up to one year.

HOUSTON (DEC. 10) BUSINESS WIRE - Northern Border Pipeline Co. (Northern Border) and Natural Gas Pipeline Co. of America (Natural) announced Monday they have signed an agreement under which Northern Border will interconnect with Natural's recently completed Iowa Line.

As part of the agreement, Northern Border will acquire and operate the line, subject to approval by the Federal Energy Regulatory Commission (FERC). Northern Border will reimburse Natural for costs related to construction of the pipeline.

The 150-mile, 30-inch diameter Iowa Line stretches from the current terminus of the Northern Border pipeline, at Ventura, Iowa, in Hancock County, to Natural's compressor Station 109 near Harper, Iowa, in Keokuk County.

Construction of the line began in June and was completed at the end of October.

The Northern Border system originates at the Canadian border near Monchy, Saskatchewan, where it joins a pipeline moving gas from the province of Alberta, Canada.

Northern Border and Natural will proceed immediately with the construction of the interconnection facilities at Ventura. That work is expected to be completed within a few weeks and gas transportation under authority of Section 311 of the Natural Gas Policy Act will start promptly upon completion of the of the facilities.

According to Northern Border management committee chairman Larry L. DeRoin, Northern Border will amend its current optional certificate application, now pending before the FERC, to extend its pipeline from Ventura to Tuscola, Ill., or refile to seek the necessary approvals to purchase the Iowa Line as part of that expansion/extension project.

Under the agreement, Northern Border will purchase the Iowa Line upon receipt of an acceptable FERC certificate for the project.

Initial capacity of the Iowa Line will be about 300 million cubic feet per day (MMcf/d); that will increase to 450 MMcf/d when a compressor facility at Harper is completed this summer.

The Northern Border Pipeline Co. is a general partnership which includes subsidiaries of four major energy companies: Enron Corp., Houston; TransCanada PipeLines, Calgary; Panhandle Eastern Corp., Houston; and The Williams Cos. Inc., Tulsa.

Natural Gas Pipeline Co. of America is a unit of MidCon Corp., based in Lombard, Ill. MidCon is a subsidiary of Occidental Petroleum Corp., Los Angeles.

LOS ANGELES (DEC. 10) BUSINESS WIRE - Aura Systems Inc. (NASDAQ:AURA) and Ball Corp. (NYSE:BLL), ''using Aura's magnetic suspension technology, will build and introduce an Electromagentic Redraw Actuator (ERA) which should dramatically improve the performance of aluminum can body manufacturing machines, with the intention of ultimately using these units on Ball's more than 300 machines,'' it was jointly announced Monday by Harry Kurtzman, Aura President, and Edward C. Miller, Ball Corp.'s Manager of Research and Development.

''The first seven units will be installed and tested in the Ball production line in late 1991 and will be purchased by Ball at approximately $25,000 per actuator,'' the executives said.

Under the joint development agreement, Aura and Ball will equally share the development cost of the first unit. Said Kurtzman: ''The initial target market for these units is, of course, the more than 300 aluminum can body manufacturing machines that constitute the Ball equipment inventory, but the application clearly has ramifications for the entire can manufacturing industry which is estimated to be more than 2,500 machines.

''We believe this new unit will result in important savings for Ball, once tested and installed, and will provide a major market opportunity for Aura Systems.''

Aura Systems Inc. is a leader in magnetic technology, and Ball Corp. is a leading producer of aluminum cans.

NEW YORK (DEC. 10) BUSINESS WIRE - Thomas J. Findley Jr. has been promoted to treasurer of ASARCO Incorporated, Richard de J. Osborne, chairman of Asarco, announced Monday.

Osborne also announced that Kevin R. Morano has been promoted to general manager of the Ray/Hayden Copper Complex in Hayden, Arizona and Terry E. Erskine has been promoted to general manager of the combined Missouri lead operations.

Findley most recently director of management information services, will report to Francis R. McAllister, vice president, finance and administration. Morano, most recently treasurer, will report to Robert J. Kupsch, Asarco vice president, and will have responsibility for the Ray copper mine and Hayden smelter, both of which are located in close proximity in Hayden, Ariz.

Erskine, most recently manager of Asarco's Troy Unit in Montana will report to Robert M. Novotny, Asarco vice president, and will have responsibility for the Sweetwater and West Fork lead mines in Reynolds County, Mo., and the Glover smelter and refinery in Glover, Mo., facilities that are also in close proximity.

Findley, 42, joined Asarco in 1971 as an accountant at New York corporate headquarters and was named chief accountant at Asarco's Manchester Unit in Lakehurst, N.J. in 1973. He became accounting manager of the company's Midland Coal Company subsidiary in 1976. In 1982, he became accounting manager at the company's Eastern Mining Department headquarters in Knoxville, Tenn. He was appointed director of management information services in 1987.

A native of Alhambra, Calif., Findley received a bachelor's degree in business administration from Roanoke College in 1970. He is a member of the Society for Information Management, the National Association of Accountants and the American Institute of Mining, Metallurgical and Petroleum Engineers (AIME).

Findley is married to the former Janet E. Parks of Tucson, Ariz. They are the parents of two sons and reside in Belle Mead, N.J.

ASARCO Incorporated, headquartered in New York City, is one of the world's leading integrated producers of nonferrous metals, principally copper, silver, lead, zinc and gold. Asarco also produces specialty chemicals, minerals and other industrial products and provides environmental services. Asarco had 1989 sales of $2.2 billion.

WALTHAM, MA (DEC. 10) BUSINESS WIRE - Meditrust (NYSE:MT) announced Monday its third private placement of $100 million of unsecured senior notes.

The notes have a blended interest rate of 10.46 percent and consist of series

A senior notes due Dec. 1, 1995 and series B senior notes due Dec. 1, 2000 with an average life of eight years. The proceeds of the private placement were used to extinguish all of the company's existing short-term floating rate debt. The balance of the funds will be used to fund forward commitments and to finance additional health care facilities.

Jonathan S. Sherwin, president of Meditrust, stated that ''This transaction reflects continued confidence by the private placement community in the creditworthiness of Meditrust. With the completion of this financing, the company will continue to execute its strategy of matching fixed-rate long-term debt with its leases and mortgages.''

Meditrust, with headquarters in Waltham, Mass., is the nation's largest health care real estate investment trust, holding investments in 110 health care facilities with 18 different operators in 25 states totaling over $775 million of investments.

The company specializes in the sub-acute sector of the health care industry, including investments in rehabilitation hospitals, long-term care facilities, alcohol and substance abuse treatment centers, psychiatric hospitals and retirement living communities. A.M.A. Advisory Corp., a Delaware corporation, is engaged as the advisor to Meditrust.

SOUTH PLAINFIELD, NJ (DEC. 10) BUSINESS WIRE - Creative Learning Products Inc. announced Monday that it has retained Rosenkrantz, Lyon & Ross as its investment banker.

Rosenkrantz, founded in 1947, is a member of the New York Stock Exchange and specializes in providing for the financing needs of emerging growth companies. The firm will provide corporate investment services and act as a market maker for CLP securities, which are traded on NASDAQ under the symbols, CLPI, CLPIU, and CLPIW, respectively.

Creative Learning Products, based in South Plainfield, manufactures and distributes educational products for children including workbooks, paper activity products, cards, stationery, and early learning videos.

The company enjoys national distribution throughout the mass, gift, stationery and children's market in addition to worldwide retail distribution throughout the military post exchange system.

Commenting on the announcement, Peter Jegou, chairman and CEO of CLP said,

''While Creative Learning is still in the process of growth, we believe that its position in the children's educational marketplace will increase substantially in the next few years. Creative's financial relationship with Rosenkrantz will afford the company the opportunity for new business acquisitions and licensing agreements.''

Creative Learning Products, co-founded in 1986 by Peter Jegou and Carol Kulina currently distributes over 100 individual products. James F. Lowe, vice president of Rosenkrantz, Lyon & Ross said, ''We believe that CLP's managerial expertise as well as the well defined and rapidly growing children's educational market will result in a very successful company and thus are very excited about this new corporate finance relationship.''

#90344b0722 12/10/1990 ~Business Wire

PETERSBURG, VA (FEB. 10) BUSINESS WIRE - C.A. Blockers Inc. (the ''company'') announced that it has continued to experience losses from operations and negative cash flow.

In addition to the loss of $1,031,250 reported for the year ended June 30, 1988, and $3,001,292 for the year ended June 30, 1989, the company's unaudited financial statements indicate a loss of approximately $365,890 for the year ended 1990.

The company's liabilities, including accounts payable and secured obligations, many of which are past due and in default, aggregate in approximate amounts of

$670,000. The company has exhausted all identified sources of financing and on Dec. 7, 1990, the lease covering all the company's cigarette manufacturing equipment was terminated as a result of the company's inability to make required past due payments.

Accordingly the company has been forced to suspend all cigarette manufacturing activities. The company's only remaining business activity is the ownership of product and patent rights to N-Bloctin.

The company has not derived revenues from the marketing of products containing N-Bloctin since mid-1988, at least in part as a result of the Federal Food and Drug Administration's (FDA) notification that no further manufacturing or marketing of products containing N-Bloctin could take place within the United States without FDA compliance. Because of the company's difficult financial position, FDA compliance has not been pursued.

In addition the company's right to N-Bloctin are the subject of pending litigations and claims arising out of the company's inability to maintain required payments under the N-Bloctin licensing agreement.

The above described events have caused the company to become inactive, and unless the company can obtain additional financing, which, given the company's financial condition and prior financing efforts is unlikely, the company will remain inactive.

Paul H. Lamb III has resigned effective today as a director and officer of the company.

Any further inquiries concerning the company should be directed to C.A. Blockers Inc., c/o John J. Llewellyn, Attorney at Law, 545 Starks Building, Louisville, Ky.

HAUPPAUGE, NY (DEC. 10) BUSINESS WIRE - Orbit Instrument Corp. (NASDAQ:ORBT) Monday announced that its wholly-owned subsidiary, Canada Classique Inc., had acquired the operating assets, subject to certain liabilities, of Rice Sportswear Ltd., (''Rice''), a manufacturer of branded and private label men's and women's outerwear located in Winnipeg, Manitoba, Canada.

Rice had sales of approximately $US 25,000,000 for the 12 months ended June 30 1990. The purchase price for the assets consisted of (i) a cash payment of approximately $US 4,000,000 representing the estimated net book value of the acquired assets as at the closing date and subject to adjustment upon audit, plus (ii) a contingent payment of up to an additional $US 4,000,000 payable pursuant to the terms of a five-year ''earn out.''

Max Reissman, president of Orbit, stated that the current executive management will continue in the operation of the company and the acquisition should complement the operations of Orbit's other apparel subsidiary, USA Classic Inc., which manufactures and sells, men's women's and children's apparel, particularly active wear and outerwear, under various licensed trademarks pursuant to license agreements with the trademark owners.

Trademarks used by USA Classic include ''Everlast'', ''Nautica'', and ''B.U.M. Equipment.'' A subsidiary of USA Classic is a designer, importer and distributor of men's and boy's leather garments using the ''Philippe Monet'' trademark.

Orbit is a Long Island based manufacturer of customized electronic components and subsystems for military and non-military governmental applications. It's other subsidiary is Orbit Semiconductor Inc., which is a state of the art manufacturer of customized semiconductors servicing the high realibility and quick turn around markets.

ST. LOUIS (DEC. 10) BUSINESS WIRE - St. Louis-based Bridge Information Systems Inc. Monday announced the awarding of a five-year, $15 million contract to provide the company's domestic and international data network.

Bridge is a major international provider of financial information to top institutional investors, brokerage firms, exchanges and corporations.

Bridge's new data network is custom-designed to enhance the company's ability to provide a wide array of financial information services involving stock market quotes, market analysis, corporate histories, management and operations hardware, and applications systems to more than 2,000 Bridge user sites throughout the United States and internationally.

One of the more unique aspects of the MCI-Bridge agreement involves the transfer of much of Bridge's existing data telecommunications equipment to MCI switching facilities -- an arrangement called co-location. The co-location of equipment at MCI facilities will result in (1) cost savings to Bridge, and (2)

a more secure and strictly-controlled environment in which to house the sensitive data equipment.

In addition, MCI will upgrade the existing Bridge network to accommodate ''digital'' data transmission. Digital communication is the transmission of conversations or data in an electronically-coded form. Information transmitted in digital form is less susceptible to interference and distortion and generally travels at higher speeds.

The upgrade will allow Bridge to increase the number and types of financial information services available to their clients.

''The rapid and accurate distribution of financial information is our lifeblood,'' said Bridge Chairman and President Charles Lebens. ''Choosing MCI to upgrade and enhance our data network not only enables us to provide more efficient and reliable service, it keeps us at the technological forefront of our industry.''

''Bridge Information Systems is one of the most highly-respected companies of its kind, and MCI is proud to have been entrusted with the critical responsibility of providing their long distance data communications,'' said Bert C. Roberts Jr., MCI president and chief operating officer.

''In addition, we feel the selection of MCI is especially noteworthy given the long and extremely thorough decision-making process employed by Bridge in choosing a long-distance company.''

MCI is the nation's second-largest long distance provider, employing advanced fiber optic, digital microwave, and satellite technologies. The company supplies a full range of worldwide voice, data and messaging services to businesses, residences and government agencies.

PEABODY, MASS. (DEC. 10) BUSINESS WIRE - Analogic Corp. (NASDAQ:ALOG), a leading manufacturer of high precision industrial and medical data conversion and signal processing instruments and equipment, announced Monday the results for the first fiscal quarter ended Oct. 31, 1990.

Revenues for the first quarter ended Oct. 31, 1990, were $33,447,279 compared with the prior year's first quarter revenues of $35,037,757.

Net income for the first quarter was $2,733,869, or 20 cents per share,

compared with $3,171,562, or 21 cents per share, for the prior year's first quarter.

The slight decrease in both revenue and net income was principally due to a quarterly shortfall in sales in the Signal Processing Technology Products Group.

DALLAS (DEC. 10) BUSINESS WIRE - Ito-Yokado Co. Ltd., Seven-Eleven Japan Co. Ltd. and The Southland Corp. announced that Southland will file a report Monday setting forth the names of certain individuals who will be proposed as members of Southland's post-confirmation board of directors.

The appointments of the proposed board members are subject to consummation of the three companies' Stock Purchase Agreement, which is contingent on confirmation of Southland's prepackaged reorganization plan by the United States Bankruptcy Court in Dallas.

The report will be filed in the bankruptcy court later Monday in preparation for the confirmation hearings on Southland's prepackaged reorganization plan, scheduled to begin Dec. 14. The United States Bankruptcy Code requires that Southland disclose, to the extent known, its anticipated post-confirmation board of directors and senior management.

Upon closing of the Stock Purchase Agreement, Southland's post-confirmation board will consist of (i) three individuals designated by the existing share-holders of Southland; (ii) 10 individuals selected by Ito-Yokado and Seven-Eleven Japan; (iii) two individuals designated by the Official Bondholders' Committee in the bankruptcy proceeding; and (iv) if needed to meet applicable stock exchange requirements, two independent directors.

Monday's filing names Masatoshi Ito, president of Ito-Yokado and chairman of Seven-Eleven Japan, as the proposed chairman of Southland's post-confirmation board.

Toshifumi Suzuki, executive vice president of Ito-Yokado and president of Seven-Eleven Japan, is proposed as vice chairman, with John P. Thompson and Jere W. Thompson, current board members of Southland, proposed as co-vice chairmen.

Others proposed for appointment to that board are Joe C. Thompson Jr., currently a Southland board member; Nobutake Sato, senior managing director of Ito-Yokado; Masaaki Kamata, senior managing director of Seven-Eleven Japan;

and Clark Matthews, Southland's chief financial officer.

In addition, the filing proposes that, following consummation of the Stock Purchase Agreement, Matthews will be named president and chief executive officer of Southland. According to the filing, the remaining directors have not been determined and will be named at a later date. The report contains no other proposed changes to Southland's senior management.

Southland filed a prepackaged reorganization plan under Chapter 11 of the United States Bankruptcy Code in the United States Bankruptcy Court for the Northern District of Texas, Dallas Division, on Oct. 24.

Under their Stock Purchase Agreement with Southland, Ito-Yokado and Seven-Eleven Japan, Southland's long-standing business partners, will purchase 70 percent of Southland's common stock for $430 million in cash. The purchase is contingent on consummation of Southland's prepackaged reorganization plan on or before March 15, 1991.

#90344b0753 12/10/1990 ~Business Wire

TIMONIUM, MD. (DEC. 10) BUSINESS WIRE - Kirschner Medical Corp. (NASDAQ:KMDC) has announced the completion of the sale of its Chick Medical Products Division in Greenwood, S.C., which had previously been recorded as a discontinued operation, to CSS Inc., a wholly-owned subsidiary of Midmark Corp. of Versailles, Ohio.

The sales price to CSS Inc. for Kirschner's surgical table and operating room light business was approximately $9 million subject to certain post closing adjustments and payment for certain product modifications. Kirschner said Midmark has also leased for one year the company's 80,000 square foot manufacturing facility in Greenwood with an option to purchase the land and building during the lease period for $2.2 million.

Bruce J. Hegstad, Kirschner's President and CEO, said approximately $6.2 million was paid in cash at closing, $2 million was deposited in escrow from which the costs of certain product modifications will be deducted according to a mutually agreed upon formula, and certain Kirschner obligations were assumed by CSS. It is expected an additional sum will be paid in cash to Kirschner upon completion of post closing adjustments. Hegstad said the net proceeds from the sale will be used to reduce debt.

The amount of any gain or loss cannot be determined at this time because of postclosing adjustments and product modifications which must be completed before a final accounting is available. Although the company's continuing operations will assume certain interest expenses previously charged to discontinued operations, this transaction is expected to have a positive impact on the cash flow of the company including interest savings through the reduction of debt.

Kirschner develops, manufactures and markets orthopedic instruments and implants including reconstructive surgery and trauma devices, orthopedic support products and medical endoscopic systems.

The company operates facilities in Timonium; Fair Lawn, N.J.; Delray Beach., Fla.; Marlow, Okla; Hopkinton, Mass.; and Valencia, Spain.

LOUISVILLE, KY (DEC. 10) BUSINESS WIRE - The Cumberland Federal Bancorporation Inc. (NASDAQ/NMS:CMBK) announced Monday that its board of directors has approved an offer to purchase up to 1 million shares of The Cumberland's outstanding common stock, or approximately 40 percent of the shares outstanding, in exchange for newly issued 12 percent Subordinated Debentures Due 1999 (the ''Exchange Offer'').

The Exchange Offer will commence in the near future upon completion of regulatory review.

''We regard the repurchase of our shares in the exchange as an attractive investment,'' H. David Hale, chairman, president and chief executive officer, said. ''We believe that The Cumberland has a solid future and that its stock is undervalued relative to its long-term prospects.''

Under the Exchange Offer, The Cumberland's stockholders will be invited to tender up to 1 million shares of common stock in exchange for $10.25 principal amount of Debentures per share.

The Exchange Offer will not be conditioned on any minimum number of shares being tendered, but will be subject to a number of other conditions. On Dec. 7, 1990, the closing sale price of a share of The Cumberland's common stock was $8.25.

Neither The Cumberland nor its board of directors makes any recommendation to any stockholder as to whether to tender or refrain from tendering any or all of such stockholder's shares in the Exchange Offer and has not authorized any

person to make any such recommendation.

Details of the Exchange Offer will be mailed to all of The Cumberland's stockholders.

The Cumberland Federal Savings Bank is a wholly owned subsidiary of The Cumberland Federal Bancorporation Inc., whose common stock trades on the NASDAQ National Market System under the symbol CMBK.

Founded in 1886, The Cumberland has assets of $1.4 billion, and is the largest federal savings bank and the third largest financial institution headquartered in Kentucky. Corporate offices are located in Louisville with 41 offices located in 11 cities throughout the state. The Cumberland offers a full line of banking services with special emphasis on real estate and consumer lending.

WILMINGTON, DE (DEC. 10) BUSINESS WIRE - Himont's Advanced Materials Group Monday announced a North American price increase of 8 cents per pound for all grades of Himont's HiFax thermoplastic olefin (TPO) resins.

The increase is effective Jan. 15, 1991.

HiFax TPO resins are used primarily in automotive applications such as exterior body claddings and farings, grilles, fascias instrument panels and under-the-hood components.

Himont, a Montecatini company (Ferruzzi/Montedison Group), is the world's leading producer and marketer of polypropylene resins and a major producer of a broad range of specialty composites, alloys and advanced materials.

Himont is the leading licensor of technology related to the production of polypropylene and also develops and markets catalysts used in its manufacture.

The Ferruzzi Group is a leading international industrial system, which operates through Montedison in the chemical, pharmaceutical and energy sectors as well as in the agro-industrial sector, with an aggregate turnover of approximately $30 billion.

BETHESDA, MD. (DEC.10) BUSINESS WIRE - Survival Technology Inc. (NASDAQ:SURV) announced Monday the appointment of Russell A. Gall to the newly created position of senior director, manufacturing, at its St. Louis facility.

Gall was formerly manager, Package Engineering & Contract Manufacturing at Syntex Laboratores Inc. and as such is very familiar with major aspects of the company's business. Survival Technology Inc. produces Syntex Laboratories drug Toradol IM (intramuscular) in their patented Cartrix syringe system.

Prior to joining Syntex, Gall held positions in engineering and sterile manufacturing management with Alcon Laboratories Inc., Kimberly-Clark Corp. and Bristol-Myers Squibb.

The addition of this new position will further strengthen the company's management structure during this time of dramatic business increase and better position the company for future growth.

Survival Technology Inc. provides medical devices, pharmaceutical delivery systems and cardiac monitoring services for use in a variety of medical indications.

MARIETTA, GA (DEC. 10) BUSINESS WIRE - Three Lockheed Aeronautical Systems Co. (NYSE:LK) employees, detained in Iraq since that country's invasion of Kuwait, arrived in the United States Monday.

William T. Deaton, 53, of Marietta, Robert S. Sherrill, 39, and Michael A. Villarreal, 28, of Meridian, Miss., arrived in Atlanta Monday.

The trio were on an aircraft that arrived in Frankfurt, Germany, from Baghdad on Sunday. They were met by a representative of Lockheed's international marketing organization upon arrival there.

Terry Powell, LASC vice president of human resources, and Jim Adams, field support division manager, flew to Frankfurt on Sunday to arrange accommodations and passage on the first available commercial flight to the United States.

The three men were working under contract for the Kuwait Air Force modifying L-100 Hercules aircraft when the invasion took place.

Deaton, a field service representative and team leader for the modification effort, has been employed by Lockheed since April of 1962.

Sherrill, an employee since November 1983, and Villarreal, an employee since May 1986, are production assemblers at LASC's subassembly plant in Meridian.

#90344b0771 12/10/1990 ~Business Wire
ORLANDO, FL (DEC. 10) BUSINESS WIRE - Candle Corp. announced the latest release of OMEGAMON for CICS, Version 500 at its 6th annual CMG Users Conference.

This upgrade introduces a graphically oriented SAA/CUA (Common User Access) compliant interface for significantly enhanced ease-of-use.

The adoption of CUA interfaces and recent support for CICS/ESA illustrates Candle's commitment to back the latest IBM developments. Candle is supplying system management solutions to fit the recently announced IBM SystemView structure. OMEGAMON for CICS, Version 500 is one component that Candle provides in SystemView's performance management discipline. OMEGAMON for CICS Version 500 is also fully integrated with OMEGACENTER, Candle's

enterprise-wide system for service level management.

OMEGAMON for CICS, Version 500 raises the power of OMEGAMON performance monitoring to a new standard. With a fully SAA/CUA compliant interface, the industry standard to be adopted by vendors and users alike when developing software, this new release offers PC-like ease-of-use without sacrificing functionality. Users can easily navigate to any related data without the need for prior product knowledge.

The CUA interface features an action bar, pull-down menus and pop-up windows to give users the freedom to move around the product in a task-oriented fashion, rather than being restricted to hierarchical menu paths.

OMEGAMON for CICS, Version 500 extends the Status Monitor methodology by letting users quickly view the health of individual CICS regions using color indicators to reflect system conditions. It interfaces with the Status Monitor as well as Candle's recently announced OMEGAVIEW for an immediate, at-a-glance display of conditions in CICS as well as MVS, DB2, IMS, VTAM, VM an environmental systems.

In addition, it works with AF/OPERATOR for automated problem diagnosis and resolution and AF/REMOTE for automatic notification and remote access.

When a CICS problem is indicated on the Status Monitor, users can select the problem area and zoom into OMEGAMON for details. OMEGAMON's color indicators highlight response time and availability threats, excessive resource consumption and activity aberrations. Simple point-and-shoot navigation presents the user with detailed information and problem resolution.

Candle Corp. pioneered performance monitoring products with its introduction of OMEGAMON for MVS in 1977. In addition to its family of performance products, Candle offers automated operations, DB2 management and end-user application integration products, which are distributed on a worldwide basis and used by over 75 percent of the Fortune 500 companies.

PROVIDENCE, RI (DEC. 10) BUSINESS WIRE - Old Stone Corp. Monday announced the reaching of an agreement in principle to sell the Walla Walla, Wash.-based mortgage servicing operation of Old Stone Mortgage Corp. to Meridian Mortgage Corp., a major mortgage banking company headquartered in Wayne, Pa., and a subsidiary of Reading, Pa.-based Meridian Bank.

Under the terms of the agreement, Meridian will purchase Old Stone Mortgage Corp.'s $2.5 billion residential mortgage servicing portfolio and the Walla Walla-based servicing operations for an undisclosed price.

The transaction is expected to take effect, after the necessary regulatory approvals, during the first quarter of 1991. The sale does not involve Old Stone Mortgage Corp.'s mortgage origination offices located in six western and midwestern states, which will continue in operation.

Old Stone Mortgage Corp. is a subsidiary of Old Stone Bank, a Federal Savings Bank, the principal subsidiary of Old Stone Corp., a $3.7 billion asset financial services company headquartered in Providence, R.I. The sale is part of a previously announced restructuring plan.

Since Old Stone announced its restructuring plan in September, 1989, the corporation has sold its California-based residential real estate construction lending unit, its tuition budgeting company, Academic Management Services Inc. and its Seattle-based retail branch network.

''Efficient mortgage servicing is a volume driven business and our strategic alternatives were to become more deeply involved or to exit the business. The sale is consistent with other measures we have taken to strengthen Old Stone Bank's capital ratios'' said Theodore W. Barnes, president and chief executive officer of Old Stone Corp.

CHARLOTTE, N.C. (DEC. 10) BUSINESS WIRE - Brad Ragan Inc. (ASE: BRD) Monday announced that its board of directors, acting on the recommendation of a special committee of outside directors, accepted a previously announced proposal by the Goodyear Tire & Rubber Co. to acquire the approximately 25 percent of Brad Ragan's common stock that Goodyear does not already own for a price of $22 cash per share.

Interstate/Johnson Lane Corp. is acting as financial advisor to the special committee of outside directors. The acquisition will be accomplished pursuant to a plan of share exchange and must be approved by the vote of a majority of Brad Ragan's outstanding common stock.

Goodyear had indicated that it intends to vote the approximately 75 percent of Brad Ragan shares owned by it in favor of the transaction, thus assuring approval of the transaction by the stockholders of Brad Ragan. It is anticipated that the shareholders meeting will be held in early 1991, followed by consummation of the transaction.

Brad Ragan Inc. is the largest United States producer of retreaded tires for off-highway vehicles and distributes new and retreaded off-the-road and truck tires through a network of 50 commercial tire centers in 20 states. The company also operates a chain of 133 retail stores in the Southeast, featuring products and services for the auto and home.

ATLANTA (DEC. 10) BUSINESS WIRE - Dun & Bradstreet Software (D&B Software) announced Monday a management structuring for the future that will allow it to better meet the objectives recently outlined in the company's investment strategy, which focuses on the development of products and services that will meet short- and long-term customer needs.

The new organization includes:

Henry (Hank) Holland has been appointed president and chief operating officer reporting to Chairman John Imlay. Most recently, Holland was executive vice president with responsibility for development and customer services. (See attacheed biography for additional information).

Michael Choukas joins D&B Software as executive vice president with responsibility for strategy and business development, reporting to Imlay. Choukas was formerly a vice president with Bain & Co., a Boston-based management consulting firm. In that role, he worked extensively with the Dun & Bradstreet Corp. and McCormack & Dodge (M&D) on a number of projects, including the acquisition of Management Science America Inc. (MSA) and the subsequent merger with M&D that led to the creation of D&B Software. (See attached biography for additional information).

John Landry joins the organization as executive vice president and chief technology officer with responsibilities for research and development, reporting to Holland. Most recently Landry was president for Agility Systems Inc. Previously, he served as executive vice president for M&D and Cullinet Software Inc.

In addition to the moves outlined above, William Evans, executive vice president and chief financial officer, continues to report to Imlay, adding the legal department, headed by Senior Vice President, General Counsel and Secretary James Alberg, to his current responsibilities.

D&B Software, a division of the Dun & Bradstreet Corp., is the world's largest provider of financial, human resources, materials management, manufacturing and higher eductation software solutions, tools and services. The company serves more than 10,000 customers worldwide, including 75 percent of the Fortune 500.

#90344b0832 12/10/1990 ~Business Wire

SYDNEY, Australia (DEC. 10) BUSINESS WIRE - The Westpac-Melbourne Institute Leading Index suggests that the earlier indications of Australian economic recovery by mid-1991 were misplaced.

The Index is now pointing to a deeper and more protracted recession for Australia than previously indicated, according to a report issued by Westpac Banking Corp. (NYSE:WBK).

Westpac economists now believe that sustained economic recovery by mid-1991 is looking increasingly unlikely and that recovery is likely to commence in the second half of 1991.

The Leading Index fell 1.6 points (or 1.3 percent) in October following a 1.0 point (or 0.8 percent) decline in the previous month.

Westpac's Chief Economist Bob Graham said, ''It was significant that there had also been a marked deterioration in the smoothed annual growth rate of the

Index in October. It fell by 7 percent, whereas for several months up until September, the downturn in the annual growth rate had appeared to be moderating.''

The Coincident Index declined a further 1.5 points (or 1.0 percent) in October reflecting the current weakness in economic activity.

The latest report on the international leading indexes produced by the Center for International Business Cycle Research at Columbia University in New York City indicates that the indexes are weak for nine of the 11 countries covered.

Graham said, ''World growth in 1991 could well be lower than 2 percent currently forecast by the OECD.''

Westpac Banking Corp. is an international financial services group headquartered in Australia, with operations extending offshore to 29 countries. In its home markets of Australia, New Zealand, Papua New Guinea and the South West Pacific, Westpac offers a full range of banking and financial services. Specialized services are provided through Westpac offices in Asia, Europe and the United States.

WASHINGTON (DEC. 10) COMTEX - The 8-K report filed at the SEC shows on Nov. 21, 1990, Pegasus Gold Corp.(TICKER: PGU) purchased 600,000 common shares of Artech Recovery Systems Inc.(TICKER: ARTK) for $200,000, or $0.3333 per share.

Artech additionally agreed to issue a warrant to Pegasus to purchase another 600,000 shares at $0.45 per share, exercisable any time prior to Nov. 21, 1993.

Pegasus' current holdings in Artech now have increased from 2.80 million shares (37.1%) to 3.40 million shares, or 41.7%. Artech also agreed to increase Pegasus' representation on its board of directors from two to three and expand its board from six to seven members.

Artech agreed to devote 50% of its research efforts, until May 31, 1991, towards investigating new methods to treat refractory gold ores, and to grant

to Pegasus a 50% interest in Artech's interest in any new refractory gold processing technology discovered, subject to certain conditions.

WASHINGTON (DEC. 10) COMTEX - The 8-K report filed at the SEC shows on Nov. 30, 1990, Antennas America Inc. announced the company has extended the exercise expiration date of its Class A common stock purchase warrants until Dec. 31, 1990.

The company states there are currently 10.55 million Class A common stock purchase warrants outstanding.

These warrants cannot be used until the company's amendment to its registration statement concerning exercise of the warrants has become effective.

The company is in the business of designing and developing a variety of antennas and antenna systems.

Its executive address is 14045 West 66th Avenue, Arvada, CO 80004, and its telephone number is (303) 421-4063.

#90344c0005 12/10/1990 ~Comtex

WASHINGTON (DEC. 10) COMTEX - The 8-K report filed at the SEC shows on Nov. 29, 1990, Management Technologies Inc.(TICKER: MTCI) announced that by resolution of its board of directors, Ian K. Leeper, an employee of the company, was granted the right to purchase 44,640 shares of common stock from the company's treasury shares at $0.375 per share, or for the sum of $L9,000 or $16,740.

These shares are restricted and do not have a right of registration.

Leeper exercised his right to purchase the shares and as a result, the issued and outstanding shares of common stock of the company increased from 10.15 million to 10.20 million.

#90344c0007 12/10/1990 ~Comtex
WASHINGTON (DEC. 10) COMTEX - The 8-K report filed at the SEC shows on Nov. 30, 1990, United Banks of Colorado Inc.'s (TICKER: UBKS) total nonperforming assets, $144.9 million at June 30, 1990, increased to $156.4 million at Sept. 30, 1990, and are expected to increase further through the balance of the year the bank stated.

Additionally, United reports the Securities and Exchange Commission's Division of Enforcement has informed United that it is conducting an informal inquiry concerning a portion of United's previously announced second quarter special provision for loan losses attributable to certain specified loans.

United reports the Division stated its interest in the matter should not be construed as an indication that any violations of federal securities laws have occurred.

STAMFORD, CT (DEC. 10) COMTEX - Houston-based Starstream Communications Inc. (TICKER: SCGI) has acquired a controlling 80-percent stake in PZ Polton Ltd., an audio-cassette duplicator and animator that does most of its business in Poland, in exchange for $435,000 cash and 250,000 Starstream Communications common shares.

Polton's main asset is its license to conduct business in Poland, according to a Securities and Exchange Commission filing.

Starstream Communications believes the acquisition will give it access to other Eastern European countries, and provide it with additional domestic business opportunities.

Starstream Communications financed the purchase by selling 700,000 of its common shares at $1 each, plus warrants to buy another 280,000 shares, to two British companies -- GT Management P.L.C. and Beta Global Markets Investment Trust.

This 8-k Filing was submitted to the Securities and Exchange Commission on Dec. 6, 1990.

-30- 1129
#90344c0024 12/10/1990 ~Comtex
STAMFORD, CT (DEC. 10) COMTEX - Auburn, Calif.-based Centurion Gold Ltd., (TICKER: CEUM) through its Nevada King Co. subsidiary, has sold a 62.5 percent interest in the royalties of two Nevada gold-mining operations to Euro-Nevada Mining Corp. Ltd. of Toronto for $1 million.

Also, Nevada King acquired the Grey Eagle gold mine in the Klamath Mountains in Northern California from Siskon Corp. in exchange for 5.4 million of its

common shares valued at $2.7 million, according to a Securities and Exchange Commission filing.

This 8-k Filing was submitted to the Securities and Exchange Commission on Dec. 6, 1990.

#90344c0197 12/10/1990 ~Comtex
WASHINGTON (DEC. 10) COMTEX - The 8-K report filed at the SEC shows on Nov. 19, 1990, Weyco Group Inc.(TICKER: WEYS) entered into stock redemption agreements with Thomas W. Florsheim and Robert Feitler, pursuant to which each shareholder granted the corporation a right of first refusal in the event of any sale of such shareholder's stock in the corporation.

The corporation gave each shareholder the right to require it to repurchase all or any part of his shares upon the shareholder's death, disability or retirement from employment with the company, whether at stated retirement age or earlier, with the corporation's consent.

The redemption price for any required repurchases under such conditions will be the fair market value of the shares on the date on which the option arises.

Florsheim currently beneficially owns 209,292 shares of common stock, or 12.60%, and 202,140 shares of the company's Cl. B common stock, or 39.25%.

Feitler beneficially owns 142,682 shares of common stock, and 128,682 shares of Cl. B common stock, or 8.57% and 24.98%, respectively.

#90344c0201 12/10/1990 ~Comtex
WASHINGTON (DEC. 10) COMTEX - The 8-K report filed at the SEC shows upon the filing for bankruptcy Nov. 21, 1990 of Laventhol & Horwath, the company's independent accountants for more than a decade, that company advised Analogic Corp.(TICKER: ALOG) that it would not continue its professional activities.

Subsequently, Analogic engaged the firm of Coopers & Lybrand in that office.

For the previous two fiscal years, audits performed by those former auditors contained no adverse opinion or disclaimer of opinion nor were they modified as to uncertainty, audit scope, or accounting principles.

The company, a development stage enterprise, reports it did not derive any revenues during either the nine-month or the three-month periods ending Sept. 30, 1990 and has reported no revenues since its inception. The operating loss is attributable to start-up costs and the expenses connected with costs of an initial public offering ultimately abandoned by the company in 1988, and a second public offering declared effective Aug. 14, 1990 and closed Aug. 22, 1990. Its corporate offices are located at 1064 Howell Branch Road, Winter Park, Florida 32789, and its telephone number is (407) 645-1104.

SCHEDULE 13D

SEC - AMENDMENT NUMBER: 1

ANNOUNCEMENT:

On Aug. 14, 1990 Brothers, Bailey and DH Partners LP filed an amended petition relating to the June 12, 1990 action against Resolution Trust Corp. and Hallmark including claims that Hallmark's irrevocable proxy to vote pledged shares was invalid. On Aug. 21, 1990 the court issued an order temporarily restraining Hallmark from disposing of the pledged shares and setting a temporary injunction hearing matter for Sept. 14, 1990. On Sept. 12, 1990 Hallmark entered into a stock purchase agreement with DHRG Investment Partners LP under which Hallmark agreed to sell the pledged shares under certain conditions. On Sept. 13, 1990 William M. Brothers filed for Chapter 11 bankruptcy and as a result, all actions by Hallmark with respect to disposition of the pledged shares were stayed and the injunction hearing cancelled. At a hearing in the bankruptcy proceeding on Nov. 21, 1990, Hallmark withdrew its objection to the sale of the pledged shares from the debtor-in-possession to DH Partners LP at $1.80 per share on or before Nov. 30 1990. The sale was approved by the court. The sale was not consummated before the deadline however, and Hallmark intends to dispose of the pledged shares as expeditiously as possible.

By MICHAEL STRAUSS - Comtex Washington Correspondent

WASHINGTON (DEC. 10) COMTEX - Fearing the insurance industry is heading down the same regulatory road which produced the savings and loan debacle, Sen. Howard Metzenbaum (D-Ohio) opened a series of hearings today examining the solvency and soundness of insurers, declaring "state regulation is, in many cases, a mirage."

Metzenbaum, chairman of the Senate Antitrust subcommittee, said lax regulation losses in real estate, mortgage and junk bonds and "accounting gimmicks" may mask losses incurred by insurance companies.

"They (insurance industry) argue that junk bonds and troubled real estate and real estate mortgage assets represent only a small portion of the industry's assets," Metzenbaum said. "This is yet another thinly disguised attempt to dupe the public into believing their security blanket is not in jeopardy."

Today's hearing focused on whether accounting standards should be shifted from

a historical cost framework to a market-based method in which assets such as junk bonds and real estate would be pegged at their present value rather than being carried at their original cost.

Thomas Borman, Minnesota commisioner of commerce who is responsible for regulating his state's insurance, real estate and banking industries, is calling for state insurance commissioners to require insurers to mark their distressed real estate holdings to reflect current market value. Borman said this can be accomplished either by reserve or write-down in the carrying value of an asset.

The Securities and Exchange Commission believes banks and thrifts should be required to report their investment securities at market value, arguing this would allow regulators to much more clearly gauge the fiscal health of these institutions. However, the SEC is not presently seeking a change to market-based accounting for other type of assets such as loan portfolios and real estate holdings.

Congress delegated regulation of insurance companies to the states in 1945 to permit them to share actuarial information and the Ohio senator believes the industry should be returned to federal oversight.

This view runs contrary to Sen. Strom Thurmond (R-S.C.), a proponent of states' rights, who said "the federal government has no constitutional authority in the field of insurance."

Terence Lennon, representing the National Association of Insurance Commissioners, a group representing insurance regulatory officials of each state, agreed with Thurmond.

"I don't believe from what I've seen that federal S&L regulators have done nearly as good a job as (insurance) state regulators," Lennon said.

However, Borman believes the federal government could play a useful role. "What makes sense is the federal government playing a role in making tough standards and this would be administered by the states," Borman said. "The problem is getting policies and procedures adopted by the states."

The subcommittee invited six life insurance companies to testify today and none agreed. Metzenbaum contends the vast majority of troubled assets are now held by life insurance companies.

But the president of the American Council of Life Insurance wrote a letter to Metzenbaum saying his group would be willing to appear before the Senate panel. In his letter to Metzenbaum, Richard Schweiker, president of the trade group, said life insurance firms carry their bonds at book value because they have liabilities that are long-term and must match them with long-term assets.

"Some argue that recording bond values at market prices would provide a more accurate picture of the liquidation value of an insurance company's investment portfolio," Schweiker said in his letter. "But valuation of the asset side of a balance sheet cannot be separated from the liability side."

Metzenbaum said he will hold a series of hearings on the insurance industry next year to determine whether the public is properly protected by the way states regulate insurance companies and their investments.

R.D. HUBBARD OWNS 391,882 SHARES (9.90%) OF HOLLYWOOD PARK ENTERPRISES INC. (TICKER: HTRF) OF INGLEWOOD, CALIFORNIA.

ANNOUNCEMENT:

In a press release dated Dec. 3, 1990 R. D. Hubbard announced the filing of a suit to enjoin the Operating Co. and certain directors, including Marjorie Everett, from continuing violations of the federal securities laws in connection with materially false and misleading statements made by the Operating Co. designed to influence stockholders concerning Mr. Hubbard's current solicitation of consents and proxies to elect himself and his nominees to the company's board. In a statement made Dec. 5, 1990, Mr. Hubbard responds to a lawsuit brought against him in connection with a proxy contest and consent solicitation that, "the suit was a desperate act by Marje Everett and nothing more than a smokescreen designed to prevent the stockholders from expressing their long, pent up dissatisfaction with Mrs. Everett by voting for my director nominees who are committed to, and capable of restoring Hollywood Park to its former position of greatness." On Dec. 5, 1990, a complaint was filed by Operating Co. in the federal district court in the Central District of California against Mr. Hubbard, Harry Ornest, Thomas W. Gamel and the Ornest Family Partnership alleging that Messrs. Hubbard, Ornest and Gamel the Partnership have violated the federal securities laws by, among other things failing to disclose that they are each acting with others as part of a "group" for purposes of Section 13(d) of the 1934 Act, failing to disclose that a purpose of their transactions is to effectuate a change in control of Operating Co. to benefit Santa Anita and Lost Alamitos racetracks and failing to promptly amend their 13d statements to disclose these facts. On Dec. 6,

1990, Operating Co., Messrs. Forsythe, Griffin, Paulson, Spelling and Seiden filed a cross-claim in the Court of Chancery of the State of Delaware in and for New Castle County against Realty and its directors, including Mr. Hubbard, which seeks to enforce the pre-notification requirements for stockholders intending to bring business before a meeting of Realty's stockholders.

COPENHAGEN (DEC. 10) - Denmark's early general election on December 12 was provoked by government proposals to lighten taxes to align the nation with other European Community states.

The Social-Democrat opposition refused to accept this gift to the most heavily taxed electorate in the 12-nation EC (the marginal tax rate is 68 per cent) on grounds that "there is no money in the budget to finance" such a move.

Conservative Prime Minister Poul Schlueter, leading his fourth minority government, knew that he was not risking much by holding early general elections. His master card is Denmark's economy which since his arrival as head of the government in 1982 has gone from strength to strength gaining "better results than those of Japan, Switzerland and Germany," he said.

The policy of austerity has borne fruit. Foreign trade is booming, with an expected surplus in 1990 of almost 40 billion Danish kroner (seven billion dollars).

The balance of payments this year will be in surplus for the first time since 1963. Inflation, expected to register 2.8 per cent for the year is among the lowest in the Western world and wage increases, contained to under five per cent a year, have strengthened Danish companies' competitiveness abroad.

Standard Poors, the U.S. rating firm, downgraded Denmark by two categories in 1983. But now analysts say Denmark is becoming a first class country economy-wise.

But the small nation's spectacular economic achievements have been made at the cost of stagnant three per cent growth over the five years 1987-1991, the lowest since the reign of King Christian IX in 1872-77. In addition unemployment has risen to 280,000 or about 10 per cent of the working population. The figure is one of the highest in Western Europe.

-30- 1977

#90344d0150 12/10/1990 ~French/German News Agency

PARIS (DEC. 10) - France is to boost the number of its troops in Saudi Arabia Defense Minister Jean-Pierre Chevenement announced Monday.

"A top level decision in principle was made on reinforcements, which had been sought for a long time to to ensure maximum security for our forces in all eventualities," he told reporters.

Details of the buildup will be announced in a few days after consultations with senior officers, the minister said.

The decision to use French forces in an armed conflict against Iraq lies with the French president, head of the army.

Mr. Chevenement said it had become necessary to give French troops the means to face all situations, notably new missions which could be ordered after January 15.

United Nations' resolution 678 allows the international force deployed in Saudi Arabia to use force against Iraq if it does not withdraw from Kuwait by January 15.

At least a thousand soldiers armed with 18 or 24 155mm mobile canons will be sent to Saudi Arabia by January 15.

Well-informed sources said the decision would entail a number of other measures including the deployment of more soldiers, AMX 30 heavy tanks and some fighter planes.

A wide-ranging re-evaluation of the French forces in the Gulf was expected after both the United States and Britain announced substantial increases in their military strength in the region.

Operation Daguet currently involves 6,250 men from an airborne land brigade and the air force and Mirage FI CR reconnaisance planes, Mirage 2000 air defence planes and Jaguar attack aircraft.

Lat Friday one of the Mirage FI CRs crashed during a training flight, killing the pilot.

France had already sent reinforcements to the Gulf when it sent 24 fighter helicopters and AMX-10 RC light tanks at the end of October.

#90344d0200 12/10/1990 ~French/German News Agency

PHNOM PENH (DEC. 10) - A Soviet delegation arrived here Monday to negotiate an important new economic cooperation deal with Cambodia, Soviet sources said.

The Moscow team arrived in the Cambodian capital from neighbouring Laos and is led by Vladimir Goussev, vice president of the Soviet Council of Ministers.

The sources did not have details of Mr. Goussev's agenda or his length of stay.

But they said he would be here to negotiate a new economic package with ally Phnom Penh, which has relied heavily on oil imports from the Soviet Union under a five year deal that ends this year.

Soviet sources said a new agreement was likely to be signed on a one year basis only. One suggested Moscow might not be able to guarantee any agreement given its current problems.

Most observers expect the Soviet government will demand dollars for future economic exchanges.

#90344d0270 12/10/1990 ~French/German News Agency

LAGOS (DEC. 10) - Nigerian and British officials began a meeting here on Monday aimed at improving economic relations between the two nations, diplomatic sources said.

The three-day meeting will review economic relations between the two countries and propose ways of increasing commercial activities between them, the source said.

The Nigerian team at the meeting is being led by the director-general in the ministry of trade and tourism, Alhaji Abdulkadir, while the British side is led by the minister of state for trade, Timothy Sainsbury.

Nigeria is concerned about the slow inflow of new direct foreign investment from Britain in recent years, Mr. Abdulkadir said at the opening of the meeting.

Total recorded net flow of resources to Nigeria was 536.5 million dollars in 1984, 1.12 billion dollars in 1986 and only 97.4 million dollars in 1988, he said.

Britain is prepared to enter into a new era of economic acitivities with Nigeria, Mr. Sainsbury stated.

#90344d0300 12/10/1990 ~French/German News Agency

AMMAN, (DEC. 10) - U.S. Assistant Secretary of Defense for International Security Affairs, Henry Rowen, left here Monday after a two-day visit and talks with King Hussein, the official Petra news agency reported.

Mr. Rowen is the first high-ranking U.S. official to visit Amman since the Iraqi invasion of Kuwait August 2.

A Jordanian official said Sunday that the king and Mr. Rowen had, in addition to discussing the Gulf crisis, stressed the "need for exerting genuine efforts to tackle other Middle East conflicts through a comprehensive respect for international legitimacy."

King Hussein said earlier Sunday that peace could not prevail in the Middle East if a settlement were restricted to the Gulf region.

Jordanian-U.S. relations have been strained, as the kingdom -- showing sympathy for Iraq -- has spearheaded efforts to forge an Arab solution in the Gulf.

TOKYO (DEC. 10) - Japan will gradually increase its share of the cost of maintaining the 50,000 U.S. servicemen posted here in fiscal 1991 beginning in April, the Kyodo news agency reported Monday.

The plan for expanding Japan's share of the cost from the current 35 per- cent to 50 percent was outlined at an informal meeting of Japanese and U.S. defense officials here Monday, Kyodo quoted Japanese defense sources as saying.

The U.S. officials told the meeting that sentiment in the U.S. Congress and among the public toward Japan would harden unless Japan substantially boosted its share of the host-nation support cost every year, Kyodo said.

The U.S. side was led by Deputy Assistant Secretary of Defense Carl Ford and Deputy Assistant Secretary State of State Desaix Anderson.

The Japanese Government has budgeted 168 billion yen (1.3 billion dollars) for its share of the cost of maintaining U.S. troops in fiscal 1990. The budget covers maintenance and personnel costs.

BEIJING (DEC. 10) - Chinese seismologists have predicted a major earthquake in the northwest region of Xinjiang before the year 2000, a local press report said.

The Xinjiang Daily newspaper, in an issue dated December 3 and received here Monday, said China would experience its fifth major phase of seismological activity in the 1990's.

The Xinjiang autonomous region has experienced 15 tremors measuring higher than seven on the open-ended Richter scale since 1900. Seventeen tremors measuring higher than five have rocked the rural and sparsely populated area this year.

Xinjiang has 45 seismological observation stations operating around the clock, the paper said, adding that readers were advised to go outside in the event of an earthquake.

The last devastating earthquake to hit China was in 1976 in Tangshan, 150 kilometers (90 miles) south of here. It destroyed the town and left about 650,000 people dead.

LONDON (DEC. 10) - A rise in the level of western world stocks of aluminium

pushed the three-month price of the metal down Monday on the London Metal Exchange (LME), dealers said.

Figures from the International Primary Aluminium Institute (IPAI) rose by 69,000 tonnes from September's levels to an October total of 1.478 million tonnes.

In after-hours kerb trading, three-month metal was quoted at 1,566 dollars per tonne, up by three dollars from the afternoon close, but down from Friday's closing level of 1,597 dollars.

Copper recovered on the kerb to 1,292 pounds per tonne, against 1,286 on the afternoon ring. The metal had been lower earlier in the day, but it did not manage to recover to the 1,299-pound price at which it closed Friday.

WASHINGTON (DEC. 10) - U.S. Defense Secretary Dick Cheney Monday said Iraq's decision to release all its foreign hostages should not raise hopes for a peaceful resolution of the Gulf crisis.

"The illegal, immoral, illicit act of Saddam Hussein in holding hundreds of American hostages against their will for several months appears to be coming to an end," Mr. Cheney said in a speech to a defense industry group, referring to Iraq's president.

"But I don't believe Saddam Hussein deserves any credit for stopping a practice that obviously is abhorrent to the civilized world," Mr. Cheney added. Iraq continues to send reinforcements to Kuwait and southern Iraq, Mr. Cheney said.

He added that Mr. Hussein "has given us absolutely no indication whatsoever of any intention" to comply with a United Nations resolution demanding that he pull out of Kuwait by January 15 or face possible military attack.

#90344d0780 12/10/1990 ~French/German News Agency

PARIS (DEC. 10) - Dassault Electronique company, which makes civilian and military electronics products, announced on Monday that it was setting up two new subsidiaries, one in the United States.

The new American firm is called Dassault Electronique Inc., and is to be headquartered in Dover, Delaware.

The firm's purpose is to push sales of Dassault automatic devices and systems in the United States, and particularly of ATB (Automated Ticket and Boarding

pass) systems for the aviation industry.

The other new subsidiary, Dassault Electronique Developpement, will act as a legal structure when the time comes to put the automatic systems business in the hands of a subsidiary, Dassault said.

Dassault Electronique, formerly named Electronique Serge Dassault, had pre-tax sales of 4.1 billion francs (820 million dollars) in 1989.

#90344d0850 12/10/1990 ~French/German News Agency

BRUSSELS (DEC. 10) - Economics and finance ministers from the 12 European Community (E.C.) countries were unable here Monday to decide on the size of an emergency food and technical aid package for the Soviet Union.

''The question of financing is still open,'' said E.C. Commission President Jacques Delors, while Italian Finance Minister Guido Carli who chaired the meeting reported that agreement in principle had been found.

A majority of E.C. members apparently were not prepared to go along with a proposal from the E.C. commission to borrow money for the proposed 1.35 billion dollar emergency aid.

Sources close to the meeting said the E.C. on the other hand does not have enough money to pay for the aid as a donation.

Delors told the meeting he reserved the right to make a final proposal on the aid package next Friday to the E.C. summit in Rome which is expected to issue a political signal for helping the Soviets.

The E.C. would also demand guarantees from the Soviets that the emergency aid actually reaches persons in need, he said.

The E.C. Commission proposed that the aid package should consist of over a billion dollars in humanitarian assistance and some 350 million dollars in technical help.

BAGHDAD (DEC. 10) - More than 130 Japanese hostages held in Iraq will be evacuated Wednesday on board an Iraqi Airways jet to Bangkok, where they will catch another flight to Tokyo, Japanese Embassy sources said here Monday.

The passengers will include 78 Japanese who were used as "human shields" at strategic sites after Iraq invaded Kuwait on August 2, as well as 14 employees of the Japanese Embassy in Kuwait City, they said.

On Sunday, 39 Japanese held in Iraq as hostages returned home with their relatives on a special Japan Airlines flight.

They were freed Saturday after a four-month ordeal following the Iraqi invasion and subsequent annexation of Kuwait.

Their release followed negotiations with Iraqi officials by Antonio Inoki, a member of the upper house of the Japanese parliament, and a professional wrestler who visited Baghdad heading a group of family members of the Japanese hostages.

President Saddam Hussein on Thursday said all foreigners held in Iraq and those hiding in Kuwait were free to leave.

NEW YORK, United Nations (DEC. 10) - The United States appeared set to exercise its veto power Monday against a U.N. Security Council resolution calling for an international conference on the Mideast to settle the Palestinian question.

The Security Council was scheduled to resume debate on the resolution late Monday, and the draft, in its current form, was said to be unacceptable to the United States.

With council debate slated to resume at 2000 GMT, U.S. diplomats made final efforts to arrive at a compromise resolution text. Finland agreed to take part in the negotiations, as did Yemen, which is presiding over the 15-member council this month.

Only the five permanent members - the United States, the Soviet Union, Britain France and China - have absolute veto power over council actions.

The draft resolution in question was proposed by Colombia, Cuba, Malaysia and Yemen, known as the "Group of Four" for the similarity in their voting. It deals with the protection of Palestinians in Israeli occupied territories.

The draft includes a particularly controversial paragraph which states that, at the appropriate time, a Middle East peace conference "would facilitate the achievement of a comprehensive settlement and lasting peace in the Middle East."

The United States is trying to weaken that paragraph in order to skirt any apparent capitulation to the demands made by Iraqi President Saddam Hussein to link resolution of the Gulf crisis to the Palestinian issue.

Washington also is likely to take into account Israel's firm stand against convening any international conference aimed at resolving the Palestinian problem.

#90344d1050 12/10/1990 ~French/German News Agency

WASHINGTON (DEC. 10) - Iraqi troops have strung barbed wire along an area south of Kuwait's northern frontier in an apparent attempt to redraw its border, the State Department said Monday.

State Department Spokesman Richard Boucher said the barbed wire went up two months ago, along with Iraqi statements about creating a new ''Kuwaiti province''.

''Any unilateral action taken by Iraq in reference to the international border of Kuwait has absolutely no validity,'' he said. ''Their annexation of Kuwait was declared null and void by the United Nations Security Council.''

Boucher disparaged comments made earlier in the day by Iraq's information minister, who asserted that his country would not remove its troops from Kuwait.

But ending the occupation and restoring the previous Kuwaiti government remains the U.N. goal, Boucher said, although Iraq ''has so far not shown anything to suggest that it's prepared to withdraw.''

#90344d1130 12/10/1990 ~French/German News Agency

HONG KONG (DEC. 10) - The China National Oil Development Corporation (CNODC) signed a contract Monday granting an oil exploration contract to a New Zealand-led consortium, an official Chinese report said here.

The New China News Agency (NCNA), in a report monitored here, quoted a CNODC spokesman in Beijing as saying it was the first Sino-foreign petroleum contract since 1985.

CNODC president Cheng Shouli said he hoped the contract would pave the way for more cooperation in oil exploration and development between foreign companies and China.

(New Zealand's Petrocorp Exploration had earlier announced the deal in Wellington, saying it was the first foreign firm to be granted an exploration licence on mainland China.

(Petrocorp Exploration will be the operator of the exploration licence, with a 60 percent share in the consortium, which also includes two U.S. exploration

companies, Santa Fe Energy Corp. (25 percent) and Nomeco (15 percent).

(The agreement gives the consortium the right to explore an area 15,900 kilometres (6,360 miles) square in the central region of China.

(The concession lies in the Dongting Basin in the southern part of a major geologic trend called the East China Rift System, in which more than 25 billion barrels of oil have been discovered.)

NCNA said in the report monitored in Hong Kong that the signing ceremony in Beijing was attended by Petrocorp managing director Jim Patek, Nomeco president Richard Burgess, Santa Fe president James Payne, U.S. ambassador James Lilley and New Zealand's ambassador John Powles.

(Under the agreement, CNODC has the option of taking up to a 51 percent interest in the development of any field, and the consortium will retain 49 per cent, Petrocorp said in Wellington.)

Until now, foreign oil companies have limited their exploration to off-shore areas, such as the mouth of the Pearl River in the South China Sea.

Onshore, 11 provinces and regions south of the Yangtze River have been open to foreign oil development for the past four years.

TOKYO (DEC. 10) - Japan's Sanyo Electric Co. plans to become the first Japanese electric appliance maker to have a representative office in Vietnam since the 1975 communist takeover of the south, it was reported Monday.

Sanyo plans to appoint Tran Huynh Long, 52, who obtained Canadian citizenship after fleeing Vietnam following the fall of Saigon, as its representative in Vietnam, the Kyodo news agency said.

Sanyo, Matsushita Electric Industrial Co. and Sony Corp. of Japan had joint ventures in Vietnam to produce radios and black-and-white television sets but they pulled out of the country when South Vietnam fell to the communist North.

Vietnam's state-run enterprise Vietronics has taken over the plants of the joint ventures and now assembles color television sets with parts from Victor Co. of Japan and small-sized videocassette recorders with parts from Sony, Kyodo said.

#90344d1550 12/10/1990 ~French/German News Agency

WASHINGTON (DEC. 10) - The United States Monday rejected any attempt by Iraq to alter unilaterally its border with Kuwait, confirming that Iraq had installed a barbed wire fence south of the Iraqi-Kuwaiti frontier.

"We do understand that Iraq has strung barbed wire along a point south of Kuwait's northern border, approximately where Iraq claims that the border of its 'province' begins," State Department spokesman Richard Boucher announced.

"The Iraqis took this action approximately two months ago," Mr. Boucher said.

"Any unilateral action taken by the Iraqis in reference with the international border of Kuwait has absolutely no validity. Their annexation of Kuwait was declared null and void by the U.N. Security Council," the spokesman added.

A British newspaper reported on the weekend that Iraq had altered its border with Kuwait to include within Iraq the entire disputed Rumallah oil field, which officially straddles the frontier dividing the two countries. The report suggested the act was an indication that Baghdad might try to negotiate a partial withdrawal from Kuwait which would allow it to keep the Rumallah zone.

Mr. Boucher said the United States was not particularly concerned with Iraq's border action.

"Nothing that Iraq has done suggests they're ready to withdraw" from Kuwait, he said.

#90344d1560 12/10/1990 ~French/German News Agency

MOSCOW (DEC. 10) - Soviet President Mikhail Gorbachev sought backing for his proposed union treaty on Monday before the Communist Party Central Committee, in a speech offering several concessions to nationalists in the Soviet republics.

Addressing the plenum of the conservative-dominated Central Committee, Mr. Gorbachev declared that the Communist Party wanted both the "survival and radical overhaul" of the Soviet Union, Tass news agency reported.

"This is not a tactical maneuver or a concession to anyone under the pressure of circumstances, but a position of principal for the party," he said.

Mr. Gorbachev aruged that in a country of more than 150 nationalities, with tens of millions of people living outside their native republics, the disintegration of the Soviet Union would lead to "cataclysms which would have a disastrous consequences not only on the country, but on the entire world."

These could include mass population migrations and the renewal of border disputes.

Mr. Gorbachev was seeking the backing of the Central Committee before the Congress of People's Deputies, or full parliament, meets December 17 to discuss his proposed union treaty, which sets out a new division of authority between federal authorities and the republics.

The Central Committee was to continue its plenum behind closed doors on Tuesday. The plenum marked the second time the central committee has met since last summer's party congress renewed its 300-odd membership.

#90344d1600 12/10/1990 ~French/German News Agency

HAMBURG, GERMANY (DEC. 10) - Road traffic in and around several major cities in southern and western Germany was halted for hours Monday as snowstorms struck for the first time in the new winter season. A man was found frozen to death in a park in Karlsruhe.

Other countries in western Europe, including Britain, France, Switzerland, Austria, Italy and Spain have also been hit by heavy snowfalls and sub-zero temperatures, causing road and rail traffic disruptions.

German motorists around Stuttgart, Freiburg, Duesseldorf and Dortmund were forced to spend hours in their motionless vehicles, unable to get off the icy roads lined with wrecked cars and trucks that had slithered into each other.

Police complained that many motorists were still driving with summer tyres despite the weather warnings and that truck drivers caused accidents by overtaking other vehicles recklessly.

#90344d1660 12/10/1990 ~French/German News Agency

ISLETON, California (DEC. 10) - A Vietnam veteran set fire to himself and burned to death to protest U.S. policy in the Gulf, police officials said.

Timothy Brown, a 48-year-old self-employed knife sharpener, set himself on fire Sunday after covering himself with fuel outside an abandoned cannery here, some 65 kilometers (40 miles) southeast of Sacramento.

Mr. Brown placed a pile of one-page letters explaining his action next to his van. They were marked with a sign reading: "Take one."

"I, Tim Brown, Vietnam veteran, declare that my act of self-immolation is a direct protest of American war policy in the Middle East. America, do not go to war ... America, do not repeat the mistake of Vietnam," the letters said.

Mr. Brown also left fliers on the windshields of cars parked nearby.

Sacramento County coroner's office investigator Bob Brian said the blaze spread to the cannery, where firefighters extinguished the flames.

Mr. Brown was well known in the Sacramento-San Joaquin Delta area east of San Francisco where he lived in a houseboat and served restaurants and other customers from his van.

PORT OF SPAIN (DEC. 10) - A state of emergency and curfew imposed by the government of Trinidad and Tobago following an aborted coup attempt July 27 were lifted Monday.

More than 30 persons detained under the state of emergency were released Monday.

National Security Minister Selwyn Richardson said security forces were now in full control.

-30- 537
#90344d2210 12/10/1990 ~French/German News Agency
WASHINGTON (DEC. 10) - Environmental organizations are expressing alarm over government proposals to ease U.S. dependence on foreign oil, including opening national parks to oil exploration and ease environmental regulations.

Experts at the Department of Energy have drawn up a list of 67 proposals to reduce growing U.S. dependence on foreign oil.

The proposals include a new tax on oil, opening of a national park in Alaska to oil exploration, construction of new natural gas pipelines, tax breaks for oil production and energy conservation, easing nuclear regulations and generally taking into account the energy impact of environmental protection measures.

"There is no vision. There is simply a long list of options," Christopher Flavin, an expert at the Worldwatch Institute, said Monday.

Many environmentalists believe the plan would emphasize measures to boost production at the expense of conservation measures, which politically are more difficult to pass.

"All signs point to a policy that will reward and placate entrenched energy interests," said Edwin Rothschild of Citizen Action, a consumer advocacy group based in Washington.

Under study since 1989, the reform of U.S. energy policy has acquired new urgency in light of the oil crisis that has followed Iraq's August 2 invasion of Kuwait. The administration is expected to unveil its reform plan in early 1991.

The decline of oil prices during the 1980's has discouraged exploration in the United States while off-shore drilling have been restricted as a result of pressure by environmentalists.

U.S. oil production has dropped to around 2 million barrels a day since 1986, according to the American Petroleum Institute. U.S. oil imports, which represented 20 per cent of the total in 1960, now amount to more than 50 per cent.

#90344d2220 12/10/1990 ~French/German News Agency
LONDON (DEC. 10) - More than 380 former hostages, most of them British, arrived in London late Monday on an Iraqi Airways jumbo jet from Baghdad, airport officials said.

The plane arrived at Gatwick airport, south of London, after a

five-and-a-half-hour flight from the Iraqi capital.

The released hostages then had a private reunion with families and friends at an airport landing gate before clearing customs and passport control.

Their long-awaited return had been delayed for nearly five hours when the aircraft was kept on the tarmac at Baghdad Airport.

A Gatwick Airport spokeswoman said the delay was thought to have been caused by difficulties in obtaining clearance for the flight.

#90344d2230 12/10/1990 ~French/German News Agency

WASHINGTON (DEC. 10) - The State Department Monday urged Angola's ruling party to call elections for as quickly as possible, saying that it was pleased with the decision to allow a multiparty system.

The Popular Movement for the Liberation of Angola (MPLA) voted Saturday to endorse the formation of political parties, guarantee freedom of the press and freedom of association and establish an open market system.

"We are encouraged by the MPLA party decision to move toward amending the constitution to allow for the creation of other political parties in Angola," State Deparment spokesman Richard Boucher said.

Mr. Boucher said Washington hoped the change would come as quickly as possible and that rebels with the National Union for the Total Independence of Angola (UNITA) would be allowed to form political parties.

The spokesman said that Luanda's decision would not change Washington's financial support for UNITA, which is headed by Jonas Savimbi. Mr. Boucher said the aid would continue until UNITA was guaranteed a role in Angola's political system.

#90344d2240 12/10/1990 ~French/German News Agency

WASHINGTON (DEC. 10) - The Pentagon said Monday more F-15 Eagle fighters had been ordered to the Gulf and the U.S. Army announced the call-up of more National Guard and Army Reserve personnel.

The Pentagon said elements of the 36th Tactical Fighter Wing at Bitburg, Germany would be going to the Gulf beginning December 28. The number of F-15's being sent was not disclosed, however.

The sending of additional F-15 fighters follows the deployment of more F-117A "stealth" fighter bombers, F-111 medium-range bombers, A-10 tank killers and

OA-10 observation planes.

The F-15's are armed with Sidewinder and Sparrow missiles and a 20mm Gatling gun.

An unknown number of F-15's already has been sent to the Gulf from the 1st Tactical Fighter Wing at Langley Air Force Base, Viriginia and from the 4th Tactical Fighter Wing at Seymour Johnson Air Force Base, North Carolina.

Meanwhile, the army said it had called 1,457 members of the national guard and reserve units to active duty to provide support services such as cargo transport, medical service and civil affairs.

In all, 120,281 reservists have been called to active duty from all four services -- more than 90,000 of them from the army national guard or reserve.

#90344d2270 12/10/1990 ~French/German News Agency

LOS ANGELES (DEC 10) - Security Pacific Corp. said Monday it was adding 850 million dollars to its reserves to cover bad loans and the costs of closing a subsidiary.

The move will mean a net loss of 320 million dollars to 360 million dollars for the fourth quarter of 1990 and could reduce profits for the year to 160 million dollars, according to the banking group, the nation's fifth largest.

Security Pacific showed a 741 million dollar profit in 1989, and a 639 million dollar profit for 1988.

In adding to its reserves, Security Pacific is following the example of other large U.S. banks, who have been hit hard by a soft real estate market on the East Coast, which has since spread to California and the Northeast.

-30- 897

#90344d2290 12/10/1990 ~French/German News Agency

LONDON (DEC. 11) - The five permanent members of the United Nations Security Council -- Britain, China, France, the Soviet Union and the United States -- may meet soon in order to reaffirm a U.N. ultimatum to Iraqi President Saddam Hussein, the Foreign Office said here Monday.

The London newspaper The Evening Standard said that the talks, if held, would take place at foreign minister level in London sometime before December 25.

The aim would be "to agree a joint line with Saddam which will repeat the ultimatum already given to the dictator," the paper said.

A Foreign Office spokesman said only that the holding of the talks was a possibility which was currently under discussion. He gave no indication of a possible date.

The United Nations Security Council has given Mr. Hussein until January 15 to pull his troops out of Kuwait after which individual U.N. members will be authorized to use force to dislodge them.

-30- 1133

#90344d2340 12/10/1990 ~French/German News Agency

PARIS (DEC. 11) - Four months after the start of the Gulf crisis, tensions on the oil market have subsided and oil supply worldwide is now sufficient, officials the Paris-based International Energy Agency said on Monday.

Quincey Lumsden, in charge of the oil market for the 21-member IEA, said that the supply of oil products was better than the supply of crude oil, but that overall "tension has diminished."

Mr. Lumsden, speaking at the close of a meeting of representatives of the IEA here, estimated surplus production capacity for crude oil worldwide -- excluding embargoed sources in Iraq and Kuwait -- at only 0.5 million barrels a day.

British IEA representative Geoffrey Chipperfield told reporters that member states continued to hold themselves in a "high state of readiness," in the event of any future disruption of supply.

He said IEA members were prepared to call for an emergency session if need be.

The IEA secretariat in a report said Soviet oil exports towards the Organization for Economic Cooperation and Development (OECD) countries fell from 1.7 million barrels per day during the first nine months of the year to 1.4 million barrels per day for the October-November period.

Although the drop could partly be explained by seasonal variations, there was evidence that falling production this year has worsened the decline in exports the report said.

A rise in production in several countries has compensated for the loss of embargoed Iraqi and Kuwaiti oil, the report said, with Organization of Petroleum Exporting Countries (OPEC) production up to nearly 23 million barriels per day for the month of November.

But the IEA underlined the severe problems faced by the developing countries and the states of Eastern Europe, hit by a loss of suppliers and higher import costs.

-30- 2016
#90344d2430 12/10/1990 ~French/German News Agency
SYDNEY (DEC. 11) - The environmental group Greenpeace said here Tuesday it had entered the territorial waters of France's South Pacific nuclear test site Mururoa Atoll.

Greenpeace said in a statement received here that an inflatable dinghy carrying five crew members from the Rainbow Warrior II had entered the 12-mile (20 kilometre) territorial exclusion zone around Mururoa at 2300 GMT Monday.

French authorities, who had refused Greenpeace permission to cross the 12-mile limit, were informed of the action shortly before the boat entered French waters, the group said.

They were told the object of the mission was to collect samples from the lagoon at Mururoa to check for possible radioactive contamination, Greenpeace said.

Alain Connan, 57, of Greenpeace France and captain of the Rainbow Warrior II, said in the statement that the team he was leading was unarmed and non-violent and had no intention of landing on the atoll itself.

"We have to find out the truth about the (radioactive) damage to Mururoa and the only way to do that is to take samples in the lagoon itself," Capt. Connan said.

He said Greenpeace had "found indications of radioactivity in plankton 12 miles (20 kilometres) out", notably Caesium 134 and Cobalt 60.

Greenpeace said the most likely cause of the contamination "is the French nuclear testing program."

France has conducted some 120 nuclear tests at Mururoa since it took its test program underground in 1975.

It has maintained a program averaging two series of four tests each year, with devices ranging from 30 kilotons to around 100 kilotons.

On board the dinghy were Capt. Connan, Norm Buske, 47, of the United States, Martin Gotje, 41, a New Zealand resident from the Netherlands, Beth Higgs, 29, of Australia, and Remuna Tafariua, 37, of French Polynesia.

#90344d2620 12/10/1990 ~French/German News Agency
NEW YORK (DEC. 11) - Fifty-seven of Uruguay's 70 creditor banks have committed to restructuring the country's foreign debt by 92 per cent in the

medium- and short-term, officials said.

Nicolas Herrera, Uruguayan vice minister of Economics and Finance, said the banks had committed themselves to the task by last Friday's deadline -- the last day for banks to take advantage of an early participation fee of one-eighth of one per cent of their total commitment.

So far, 36 per cent of the deals have sought to resell the debts to the Uruguayan Government at 56 per cent of their principal amount in cash buy-backs, said Mike Graffenried, of Citibank, president of the banking committee for Uruguay.

The 1.64-billion-dollar restructuring is almost all of the Uruguayan debt in the short- and long-term, which is approaching some 1.69 billion dollars.

Uruguay owes some 5.51 billion dollars to industrial countries and multilateral financing institutions.

Mr. de Graffenried emphasized that some banks did not subscribe to any agreement by the deadline, but he was certain that all of them would participate in the restructuring package by January.

About 64 per cent of the deals agreed so far will be distributed among other options such as new loans and 30-year par notes with an interest rate of 6.75 per cent.

#90344d2690 12/10/1990 ~French/German News Agency

MEXICO CITY (DEC. 10) - Mexico lowered the prices of the crude oil it exports last month to bring it in line with the prices of other crudes, such as West Texas Intermediate, PEMEX announced Monday.

The state-owned firm said in a written statement that the lower prices affected all three types of crude oil exported to the United States, Europe and the Far East.

The statement said that on the American market light Isthmus crude sold for 30.22 dollars a barrel in November, down from 3.54 dollars; heavy Maya crude went for 24.67 dollars a barrel, down 1.62 dollars; and extra-light Olmeca was priced at 32.51 dollars a barrel, down 2.77 dollars.

In the Far East, light crude dropped 3.35 dollars a barrel to sell for 30.67 dollars, while the price of the heavier crude fell 3.32 dollars to sell for 24.34 dollars.

The Mexican petroleum company announced that Mexico exported an average of 1,357,000 barrels a day, 58 per cent of which went to the United States. Spain

imported 15.5 per cent and Far Eastern countries purchased 12.1 per cent.

-30- 1260

#90344d2760 12/10/1990 ~French/German News Agency

JAKARTA (DEC. 11) - The state oil firm Pertamina has invited foreign and national oil companies to explore for oil and gas in nine blocks in eastern Indonesia, the official Antara news agency said Tuesday.

Antara quoted Pertamina President Director Faisal Abda'oe as saying that the nine blocks on tender were Satengar and Sailus in Lombok island, Spermonde off South Sulawesi, Uta, Tanimbar and Halmahera in the Molluccas islands and in Dili, Kailaka and Jaco in East Timor.

Oil companies usually operate in Indonesia under production sharing contracts, with a split formula of 85:15 in Pertamina's favour for any oil found. The ratio is 70:30 for natural gas.

The government however has offered various additional tax and financial incentives for so-called frontier territories, mostly in yet untapped areas in eastern Indonesia, where experts believe there is the potential of good finds.

Indonesia has taken various measures in the last two years to encourage more exploration as its oil reserves have come under pressure from soaring domestic demand, while new oil discoveries have been slow.

Officials have warned that unless new reserves were found, Indonesia, a member of the Organisation of Petroleum Exporting Countries, could become a net oil importer by the turn of the century.

A total of 50 oil companies, mostly American, are currently operating in Indonesia in 84 different blocks, Mr. Abda'oe said.

LONDON (DEC. 11) - An emerald and diamond ring which belonged to the late U.S. film star Ava Gardner was sold at auction here for 209,000 pounds (397,000 dollars) on Monday, officials at Sotheby's said.

The Van Cleef and Arpels ring, which had been valued at 150,000 pounds, was one of 24 pieces owned by Miss Gardner which were sold for a total of 355,000 pounds (690,000 dollars).

The actress died at her London home in January this year.

TOKYO (DEC. 10) - Some 4.46 milllion employees of central and local government and state-run corporations, including Prime Minister Toshiki Kaifu, received a total of 3.16 trillion yen (24.3 billion dollars) in winter bonuses Monday, government officials said.

The bonuses averaged about 708,500 yen (5,450 dollars) per person or 2.5 times the average monthly salary, the same level as last year, they said.

But the civil servants expect additional bonuses by the end of this year as the Japanese Diet (parliament) is expected to pass a bill on wage hikes for public-sector officials in its session convened Monday, the officials said.

Supreme Court Chief Justice Ryohachi Kusaba topped the bonus list with 4.85 million yen (37,300 dollars), followed by Mr. Kaifu with 4.81 million yen (37,000 dollars).

In the private sector, Japanese city banks have estimated that the bonuses of private company employees totaled about 21 trillion yen (151.5 billion dollars), making a grand total of 24 trillion yen (184.6 billion dollars) in bonuses in the public and private sectors.

Japanese employees receive bonuses semi-anually, in summer and winter, which are regarded as a portion of their annual salary.

TOKYO (DEC. 10) - Nissan Motor Co., Ltd. said Monday it had decided to cancel its previously planned license production of Volkwagen AG's new Passat cars in Japan as the car has proved unpopular to Japanese buyers.

Nissan officials said Nissan had plans to start production of the new 2000 cc Passat car next summer under a license agreement with the German carmaker.

But the company decided to cancel the plan because sales of imported Passat cars have reached only 200 vehicles a month, compared to the projected 700 units, they said.

Nissan, which began selling the German cars in May this year, plans to continue marketing the imported Passat car in Japan, they said.

SYDNEY (DEC. 10) - Australian Prime Minister Bob Hawke on Monday accused the European Community (EC) of "massive hypocrisy" over international trade.

Mr. Hawke told the Foreign Correspondents' Association here that the blame for the collapse of talks on the General Agreement on Tariffs and Trade (GATT) in Brussels last week "lies directly with the European Community."

The final ministerial conference of the Uruguay Round of GATT failed to produce a compromise on farm subsidies between the EC and its critics -- the United States and the Cairns Group of agricultural producers led by Australia.

This failure, Mr. Hawke said, cast doubt on the EC's future.

He described the EC's progress towards economic union in 1992 as "one of the great and beneficial acts of statesmanship this century" for bringing peace and prosperity to western Europe.

But, he went on, "if Europe will sacrifice GATT to protect agriculture, how can we fail to fear that Europe '92 will be Fortress '92, a self-seeking and powerful trade bloc, where it could be and should be an outward-looking and constructive world leader?"

Mr. Hawke said that reforms to international trade were among the great challenges facing those "building a new architecture in the aftermath of the Cold War."

The challenge was "to understand that it is not only pointless, but massively hypocritical, to insist upon market economics in the former command economies and the Third World if we do not heed exactly the same injunction in the international trading system."

He insisted that the "massive hypocrisy" was that of the EC.

#90344d7420 12/10/1990 ~French/German News Agency

SYDNEY (DEC. 10) - Australia's second largest newspaper publisher, John Fairfax Group, went into receivership Monday, the latest media empire to crumble.

Fairfax joined commercial television networks Seven and Ten in receivership after the company's bankers led by ANZ Banking Group refused to roll over a 850 million Australian dollar (655 million U.S.) debt.

The banking syndicate sought the appointment of Deloitte Ross Tohmatsu as receiver to the group which publishes three of Australia's most influential newspapers: The Sydney Morning Herald, founded 159 years ago, The Age of Melbourne and The Australian Financial Review.

Simultaneously the directors of the group, which is the main competitor of Rupert Murdoch's News Ltd., applied for a liquidator to the company's financial

arm.

Peter Walker of liquidators Ferrier Hodgson and Co. said the group had debts of 1.7 billion Australian dollars (1.3 billion U.S.) of which 1.2 billion dollars (920 million U.S.) was owed to banks, mainly the ANZ Bank and Citibank.

A further 450 million dollars (345 million U.S.) was junk bonds issued by collapsed firm Drexel Burnham Lambert of the United States while the remaining 50 million dollars (39 million U.S.) was owed to smaller creditors, he said.

Shares in ANZ Bank sagged 16 cents to 3.46 dollars in late trading before the announcement that Fairfax had gone into receivership.

The financial woes of Fairfax stem from the 2.1 billion Australian dollar (1.6 billion U.S.) privatisation of the group by 29-year-old Warwick Fairfax, great-great-grandson of founder John Fairfax.

The bid, launched just before world stockmarkets collapsed in 1987, left the company 75 per cent owned by Warwick, while the remaining 25 per cent was owned by his mother, Lady Mary Fairfax, who had no voting rights.

The company has been wracked by board squabbles and resignations in the past four months as directors tried to force Warwick Fairfax to come to terms with falling advertising revenue and mounting debt.

Chairman Bryan Kelman, director Bob Johnston, a former head of the Reserve (central) Bank, and Chief Executive Chris Anderson quit in August leaving Warwick the only board member, after the young proprieter rejected a debt-refinancing program that would have slashed his equity to as little as five per cent.

The receivership leaves prized newspapers open for new owners.

Mr. Murdoch has been reported to be one of the high-fliers circling Fairfax. He has described the Herald and The Age as two of the world's great newspapers.

But he has been reported as saying that the government would ban him from increasing his already sizable newspaper empire in Australia.

Another touted suitor for the job is Kerry Packer, who recently regained control of the Nine Television network from Alan Bond for 725 million dollars (558 million U.S.), three years after he sold it to the West Australian entrepreneur for one billion dollars (770 million U.S.).

The receivership is the latest blow for Australia's media, struggling as the economy is in recession.

Late last year the commercial Seven Network went into receivership after the

collapse of owner Christoper Skase's Qintex group. It has still to find a buyer.

In September the commercial Ten Network was placed in receivership.

Mr. Murdoch's empire is struggling, the parent company News Corp. recently having its debt downgraded to just above default levels by the Australian arm of Standard and Poor's.

Barings Brothers Burrows and Partners, speaking on behalf of the banks which put Fairfax into receivership, said the banks wanted to keep Fairfax a single entity and "to continue all Fairfax's current business operations with full editorial independence.

LONDON (DEC. 10) - There were more unusual bird sightings in Britain at the weekend after storm winds blew a rare Arctic lesser white-fronted goose and thousands of little auks off course, bird experts said Monday.

Some 2,300 little auks were spotted during a three-hour period Sunday near Aberdeen, Scotland while hundreds more of the small seabirds were seen further inland. One appeared on a lake in the northern city of Leeds.

Bird watchers gathered at the Wildfowl and Wetland Trust headquarters in the central English town of Slimbridge to see the lesser white-fronted goose which was carried south from the Arctic Circle by the winds.

DOHA (DEC. 10) - Foreign ministers from the Gulf Cooperation Council (GCC) appealed here Monday for a peaceful resolution in the Gulf but also backed the option of using force to drive Iraqi troops out of Kuwait.

The ministers issued the call in a statement following a meeting to prepare for a GCC summit here December 22. The council groups Saudi Arabia, Kuwait, the United Arab Emirates, Oman, Qatar and Bahrain.

Qatari Foreign Minister Mubarak al-Khater, asked about GCC involvement in forthcoming U.S.-Iraqi talks, told journalists "the members of the council have an indirect role in the dialogue."

But he stressed that the purpose of the dialogue was to "complete the United Nations Security Council resolutions" demanding an unconditional Iraqi withdrawl.

"The idea of making concessions to the Iraqi regime is not a subject for discussion," Mr. Khater said.

While the GCC prefers a peaceful solution, "the military option is not to be discarded," he added.

In an address Sunday Mr. Khater described the Iraqi seizure of Kuwait August 2 as "an aggression against all members of the GCC" and urged the council to strengthen its collective defensive capabilities.

PARIS (DEC. 10) - Russian-born writer Boris Kochno, who worked with Diaghilev in the last period of the Ballets Russes died on Saturday night, friends announced on Monday. He was 86.

Born in Moscow in 1904, Kochno met the famous choreographer in 1922 and became his secretary and artistic advisor, writing several ballets for the celebrated troupe.

After Diaghilev's death in 1929, he directed the company and after World War II co-founded the Champs Elysees ballet company, giving Roland Petit the opportunity to create his first ballets.

AMMAN (DEC. 10) - The Jordanian cabinet is to be reshuffled in the next few days to include four to five members of the Islamic fundamentalist Moslem Brotherhood for the first time in the country's history, a government source disclosed Monday.

Among the posts expected to go to the fundamentalists is the education ministry, a position long sought by the Moslem Brotherhood.

More than half the members of the new cabinet will be drawn from parliament, the source said, in a reshuffle that follows the November 17 election as speaker of Moslem Brotherhood spokesman Abdel Latif Arabiyat.

Islamic fundamentalists, of whom 22 are members of the Brotherhood, gained 31 of the 80 seats in the Jordanian parliament in elections in November 1989.

Abdel Rahman Khalifeh, the leader of the Moslem Brotherhood, told AFP that discussions were currently under way with Prime Minister Moudar Badran.

"If we reach an agreement we will take part in the government," he said.

He added that his associates wanted to "ensure military security and food sufficiency for Jordan, as well as a healthy educational climate for the new generation."

Government sources said Mr. Badran was now prepared to accept a Brotherhood demand for the education portfolio, a demand he had refused in the formation of his first cabinet last January.

The other cabinet seats likely to go to Moslem Brothers are Health, Labor, Social Affairs and Agriculture.

BEIJING (DEC. 10) - Chinese authorities plan to enact new rules that they say will guarantee freedom of religion while regulating its practice so as to maintain "stability of religious policy", the China Daily said Monday.

Control of religious affairs has become lax and an thorough investigation was needed was "many religious problems", the English-language paper said.

Freedom of religion and "normal" religious practice is enshrined in the Chinese constitution, but no laws regulate religious affairs, the paper said a day after the closure of a five-day conference on religion here.

The director of China's Religious Affairs Bureau, Ren Wuzhi, was quoted as saying that promulgation of the legislation would top the bureau's agenda next year.

"Religious affairs officials say the promulgation plan indicates the government's determination to guarantee the continuity and stability of religious policy," the paper said.

In practice, the Chinese leadership is keen to limit Moslem religious expression in Xinjiang, where Islamic fervour was blamed by the authorities for riots in April which officially left 20 people dead.

The official press announced the closure of 200 mosques in the far western region last week.

Buddhism, subject to persecution during the 1966-1976 Cultural Revolution,

is experiencing an revival of interest but monasteries in Tibet, accused of being separatist hotbeds are under tight surveillance.

An underground Catholic church, with some three million followers, has refused to break ties with the Vatican and join an "official" church approved by Beijing and which appoints its own clergy.

According to official statistics there are some 100 million Buddhists, 20 million Moslems, five million Protestants and 3.3 million Catholics in China.

NAIROBI (DEC. 10) - The U.N. Food and Agriculture Organization (FAO) on Monday appealed for more than a million tonnes of food for famine-stricken Sudan, hit by drought for the second consecutive year.

In a press release here, FAO said foor shortfalls were "likely in all regions except the east" and would be worst in western regions particularly North Darfur and North Kordofan.

FAO called for one million tons of food for next year, and another 30,000 tons of cereals to replenish stocks left at "dangerously low levels" after last year's poor harvest, also hit by low rainfall.

Sudanese authorities, after initially denying famine reports, last month declared the province of North Kordofan a famine zone, the weekly New Horizon reported.

Poor rainfall has destroyed 80 per cent of millet and sorghum harvests in North Kordofan, provincial governor Colonel Faisal Medani Mukhtar, a member of Sudan's ruling junta, was quoted as saying.

FAO experts who recently visited Sudan estimated the country's 1990-91 cereal crop, now being harvested, at 2.1 million tons -- 24 per cent below average.

"Already prices on local markets have risen to levels which are beyond the purchasing power of large sections of the population, and a major and immediate relief effort is required to avert large-scale food shortages and human suffering in the coming months," FAO said.

The Netherlands granted Sudan food aid worth 15 million guilder (nine million dollars) in November.

Relief organisations are airlifting food from Nairobi to the south Sudanese town of Juba, besieged by rebels.

#90344d7890 12/10/1990 ~French/German News Agency
WELLINGTON (DEC. 10) - New Zealand's Petrocorp Exploration will head the first foreign consortium to be awarded an exploration licence on mainland China, the firm said late Monday.

Petrocorp is to be the operator of the licence, with a 60 per cent share in a consortium which also includes two U.S. exploration companies, Santa Fe Energy Corp. (25 per cent) and Nomeco (15 per cent).

The agreement, signed in Beijing, gives the consortium the right to explore 15,900 square kilometres (6,360 square miles) in the central region of China.

The concession lies in the Dongting Basin in the southern part of a major geologic trend called the East China Rift System in which more than 25 billion barrels of oil have been discovered.

It is currently producing more than two million barrels of oil per day, approximately 80 per cent of China's production.

China is a major oil nation with proven reserves of more than 25 billion barrels of oil with many large basins unexplored or underexplored. There has been no exploration in the Dongting area since 1981.

#90344d7900 12/10/1990 ~French/German News Agency
Moscow (DEC. 10) - The Soviet parliament Monday approved what the Tass agency called a ''landmark law'' to give trade unions broad independent rights and guarantees.

To take effect January 1, 1991, the law makes unions independent of state, economic and political authorities, the agency reported.

The law, which maps out the unions' future as the Soviet system undergoes the transition to a market economy, give the unions the right to control companies' observance of the country's labour code.

Also, in the future enterprises must inform trade unions at least three months in advance about plans to close down or suspend operations. The unions must be involved in preliminary talks to guarantee workers' interests, Tass said.

Unions will have a right to take part in consultations on adapting wages to price changes and to control the observance of legally established minimum living standards, the agency said.

Tass noted that the law meets the requirements of International Labour Organisation conventions which the Soviet Union has already ratified.

#90344d8000 12/10/1990 ~French/German News Agency
PARIS (DEC. 10) - The Hewlett-Packard computer group saw its 1990 annual profits fall by 11 per cent to 739 million dollars from 829 million in 1989, but sales rose 11 per cent to 13.2 billion dollars, the president of Hewlett-Packard France Kleber Beauvillan, said here on Monday.

Orders also rose to total 13.5 billion dollars, he said.

He said: "This fall is disappointing even if it is very positive in comparison with the results of most of our competitors."

The fall was due mainly to the cost of restructuring, and the reduction of the workforce from 95,000 people to 92,000 people. The weakness of the dollar had added to operating costs which were up 11 per cent.

-30- 864
#90344d8010 12/10/1990 ~French/German News Agency
MANAMA (DEC. 10) - Kuwait on Monday strongly denied reports it was engaged in secret negotiations with Baghdad in return for an Iraqi troop withdrawal from the emirate.

Exiled Foreign Minister Sheikh Sabah al-Ahmad al-Sabah, cited by the Kuwaiti News Agency (KUNA), said a report carried by the British newspaper The Independent was "totally false."

"Kuwait is not engaged in any negotiations with Iraq ... and will not give up an inch of its territory," said Sheikh Sabah.

He also reiterated his country's demand for an unconditional Iraqi withdrawal from Kuwait, which Baghdad invaded on August 2 and subsequently annexed.

Kuwait is also asking for compensation.

The Independent on Sunday reported that Saudi Arabia and Kuwait were secretely sounding out Iraq to reach an agreement on the disputed Iraq-Kuwait border, with Oman acting as an intermediary.

According to the report, Kuwait would lease Iraq the Bubiyan and Warba islands in the northern Gulf for 99 years and give it the disputed Rumaila oilfields near the border region.

On Sunday Saudi Arabia, commenting on unidentified published reports, denied having agreed to concessions to Iraq in exchange for a withdrawal from Kuwait.

-30- 1384
#90344d8050 12/10/1990 ~French/German News Agency
JERUSALEM (DEC. 10) - Israel Monday was weighing the expulsion of several Palestinians following two bomb attacks that killed an Israeli soldier and wounded two others, defense ministry sources said.

Defense Minster Moshe Arens has asked the security services to prepare a list of "Palestinians who could be expelled" and has himself handed the state prosecutor a demand to reduce the red tape involved.

Yehoshua Matza, a member of the ruling right-wing Likud bloc, urged the government to "expel quickly those reponsible for the attack as well as their families."

Israeli soldier Guy Friedman, 20, was killed Sunday in the occupied West Bank town of Bethlehem when two bombs exploded outside the headquarters of the military authorities at three minutes interval.

Two other soldiers were wounded in the attack - the latest in a long series of anti-Israeli assaults with knives, gunfire and other weapons since October.

(In Amman, the fundamentalist Islamic Jihad Kataeb al-Aqsa said it was responsible for the blast. The group, which is active in the Israeli-occupied territories, has claimed responsibility for attacks on Israeli targets in the past month in east Jerusalem and near Tel Aviv.)

Israeli investigators, saying Sunday's attack was prepared "Lebanese style," said the explosives had been concealed in metal tubes and placed 30 meters (yards) apart.

The bloodshed came hours after Israeli troops killed a 20-year-old Palestinian demonstrator in the occupied Gaza Strip amid celebrations marking the third anniversary of the anti-Israeli uprising.

Israeli officials "must prepare to enter a new phase" of action, wrote Monday the Davar newspaper, adding that "not one day goes by without gunshots at Israeli civilians and troops."

"The army must change its strategy. The sooner military officials understand this, the sooner they will be able to neutralise Palestinians preparing armed attacks," the military correspondent of Yedioth Aharonoth newspaper said.

Another independent daily, Hadashot, warned that "firearms, most of them stolen from army arsenals" abounded in the occupied territories.

#90344d8100 12/10/1990 ~French/German News Agency

TOKYO (DEC. 10) - Japan's Toshiba Corp. said Monday it had developed a new one-megabit static random access memory (SRAM) chip with the world's fastest access time of 15 billionths of a second.

Sample shipments of the chip, whose access time is 25 per cent faster than existing one-megabit SRAMs, is scheduled to start in February with samples priced at 50,000 yen (385 dollars) each, a company statement said.

Toshiba said the new chip could also process 16 bits of information at the same time compared with existing one-megabit SRAMs, which can process only one, four or eight bits of information simultaneously.

SRAM chips can retain information longer and have a faster access time than the more widely used dynamic random access memory (DRAM) chips.

Toshiba said its new chip contained 6.3 million elements -- the same level of integration as a four-megabit DRAM.

BERLIN (DEC. 10) - The German Cartel Office said here Monday it has raised no objections to the planned takeover of the brandy company Asbach by the British alcoholic beverages firm Guinness plc.

The office said that Guinness, with its various gin and whisky products, would not be adding to its market share in Germany for these products with its takeover of the brandy maker.

Guinness and Asbach announced two weeks ago the plans for the British firm to acquire a 67.5 per cent of Asbach.

Guinness in 1989 had a group turnover of 3.1 billion pounds sterling and pre-tax profits of 691 million pounds. Asbach in 1989 reached a turnover of almost 470 million marks (317 million dollars).

#90344d8170 12/10/1990 ~French/German News Agency
LONDON (DEC. 10) - The firm recent trend in the dry cargo market continued over the past week, supported by the Soviet Union's announcement of major food import plans, dealers said.

The Baltic International Freight Futures Exchange (BIFFEX)'s Baltic Freight Index finished the week up 103 points at 1,451, although by the end of the week dealers were saying the market was overbought and anticipating an easier trend.

Some dealers indicated disappointment that the level of Soviet purchases was not actually higher, but nominal quotes on the important U.S. Gulf to Japan grain route were still significantly up at 25.75 dollars per tonne, against 24.20 dollars at the end of the previous week.

The increase in nominal rates reflected a fixture for a 52,000 tonne vessel made on the physical market at 25.50 dollars per tonne against 23.50 dollars two weeks previously.

The grain route between the U.S. Gulf and northern Europe was also markedly firmer, with nominal quotes up from 13.460 dollars per tonne the previous week, to 15.750 dollars per tonne. Again, this reflected movement on the physical market with a 55,000 tonne ship on the U.S. Gulf to AntwerpRotterdam route securing 14.15 dollars per tonne, compared to 13.30 dollars two weeks previously.

#90344d8190 12/10/1990 ~French/German News Agency
PRAGUE (DEC. 10) - President Vaclav Havel of Czechoslovakia asked parliament Monday to strengthen his own powers until a new constitution is approved to resolve a dispute over control of its two constituent republics.

In a televised address, Mr. Havel said he would send parliament a bill within a few days "to reinforce presidential powers".

He also said he had sent parliament draft legislation providing for a constitutional court to be set up and the introduction of referendums.

Mr. Havel said the laws should help find a "constitutional solution to a political conflict" between Slovaks and Czechs over the prerogatives of the federal and local governments.

Slovakia threatened Thursday to vote in legislation giving preeminence to its own laws over those of the federal government in Prague.

#90344d8200 12/10/1990 ~French/German News Agency
LONDON (DEC. 10) - The first batch of British hostages freed under Saddam Hussein's latest decree returned here Monday to tearful reunions with their families and recounted the four harrowing months they spent in hiding or captivity.

"I consider myself to be a very lucky man to be alive here back with my family " said Keith Swaden, 34, who until a few days ago lived in hiding in a Kuwait City villa along with three friends.

"It seems like a nightmare that is now all over. We tried not to think of the dangers but the possibility of being killed was always there," Mr. Swaden said.

Mr. Swaden was one of 91 British hostages who returned aboard a British Airways flight to London's Heathrow airport after being airlifted aboard a U.S.-chartered Iraqi Airways flight to Frankfurt on Sunday.

An additional 10 Britons who were aboard the flight from Baghdad to Germany had decided not to return immediately to Britain, a Foreign Office spokesman said.

Fifteen more Britons also arrived here Monday aboard a British Airways flight from Rome where they had spent the night after being evacuated from Iraq, airport authorities said.

Mr. Swaden described how he and his companions were informed by telephone within hours of the August 2 Iraqi invasion of Kuwait and had had enough time to stock up on supplies before going into hiding.

A Filipino maid at the villa also smuggled in supplies during the group's period in hiding, Mr. Swaden said, adding that it was the fear of capture more than poor living conditions that compounded their anxiety.

"We heard intermittent shooting and shelling and on one occasion some shells landed near us which was frightening," he said. At one point, a group of Iraqi soldiers raided a neighboring house and they thought their own capture was imminent.

Harvey May, a 45-year-old banker, spent much of the past four months held hostage at Kuwait University along with a number of other detainees.

MUNICH (DEC. 10) - Siemens announced here Monday it has set up a joint venture in Rumania to produce digital telephone and transmission equipment.

The German company said it would hold a 49 per cent share in the ''Encom'' venture. Electromagnetica and Rom Post Telecom, a subsidiary of the Rumanian post office, will hold the majority share.

Investments of some 20 million marks (13.6 million dollars) were foreseen for production facilities. Manufacturing of the digital equipment will begin in 1991 and by 1993 output is to reach 500,000 telephone links per year, Siemens said.

Rumania has become the fifth East European country where Siemens has established telecommunication equipment joint ventures. The others are the Soviet Union, Poland, Czechoslovakia and Yugoslavia. dpa ds 101255 Dez 90

#90344d8300 12/10/1990 ~French/German News Agency

PARIS (DEC. 10) - Iraqi President Saddam Hussein would "accept as a basis for

talks" the idea of an Arab force replacing Iraqi troops in Kuwait "for a temporary period", a French philosopher who met with him recently said here Monday.

Under the plan, philosopher Roger Garaudy told Agence France-Presse, the exchange would go ahead simultaneously with "the lifting of the (United Nations-imposed trade) blockade" and "an American withdrawal".

Several hundred thousand U.S. troops have been deployed in the Gulf region at the head of a multi-national force in the wake of the August 2 Iraqi invasion of Kuwait.

Mr. Garaudy, a convert to Islam and former member of the French Communist Party leadership, met with Mr. Hussein on Wednesday during a visit to Baghdad that he described as "strictly private".

They discussed a "five-point peace plan" devised by Mr. Garaudy which provided for an "Arab solution" under which troops from Arab North African countries would take over from Iraqi occupying forces in Kuwait and an international Middle East peace conference would be convened, he said.

However the plan would also bar the emir of Kuwait, Sheikh Jaber al-Ahmad al-Sabah, from returning to power.

Iraq and the United States have agreed to hold talks on the Gulf crisis but are locked in dispute over the date on which their envoys should meet.

#90344d8320 12/10/1990 ~French/German News Agency
JOHANNESBURG (DEC. 10) - Production at the Mooinooi chrome mine near Rustenburg, 100 kilometres (62 miles) west of here, was halted Monday after weekend clashes between miners and security officials which left one miner dead, mine administrators Genmin said.

The mine would remain closed until its labour problems had been solved, a spokesman for Genmin said.

The clashes erupted when about 40 miners left their hostel around midnight on Saturday, threatened mine security officials and continued to advance after being warned to disperse.

One miner died and six were injured when the security officials opened fire, the spokesman said.

Saturday's incident followed the sacking of 500 workers on Tuesday last week after the miners allegedly refused to comply with certain underground safety rules.

The sacked workers had been allowed to remain at the mine pending the outcome of their appeal against dismissal, the spokesman added.

He said representatives of the giant National Union of Mineworkers (NUM) will meet with Mooinooi management Tuesday to try and solve the labour dispute.

BAGHDAD (DEC. 10) - More than 300 freed hostages, most of them British, were Monday preparing to leave Baghdad, but further steps toward a peaceful resolution in the Gulf were complicated by a row over when U.S. and Iraqi officials would meet here.

U.S. Secretary of State James Baker and National Security Advisor Brent Scowcroft also hinted that Washington's opposition to Iraq might not be totally alleviated by an Iraqi withdrawal from Kuwait.

Both men in television interviews Sunday said there would be continued concern over Iraq's chemical weapons arsenal and reports that it is seeking to acquire a nuclear weapons capacity.

Kuwait and Saudi Arabia, meanwhile, denied British press reports that they were engaged in secret negotiations with Iraq that would allow Baghdad to lease two strategically important Kuwaiti islands, Bubiyan and Warba, and to keep the Rumaila oil field in return for Iraq's withdrawal from the emirate.

Despite the current diplomatic snags, last week's decision by Iraqi authorities to release an estimated 3,000 Western and Japanese nationals, held to deter a U.S.-led attack, raised hopes for a diplomatic solution to the four-month-old crisis.

Iraq over the weekend moved quickly to implement the measure, freeing nearly 580 U.S., British and other foreigners and allowing them to leave.

Two Iraqi Airways flights left here Sunday for Frankfurt and Rome and another Boeing 747 was due to fly to London later Monday with an estimated 350 Britons according to the Foreign Office.

Of that figure, around 220 had been held as "human shields" at strategic sites all over the country, the Foreign Office said, adding that they had all been transferred to the capital on Sunday.

Another flight to London, along with one to Frankfurt, was being arranged for Tuesday.

BRUSSELS (DEC. 10) - The Belgian central bank on Monday increased the interest rate on its three-month treasury certificates from 9.50 per cent to 9.70 per cent.

It was the fifth increase in the rate for these instruments since November 16 under a policy to link the Belgian franc to the Deutschemark which was introduced earlier this year.

JAKARTA (DEC. 10) - Sun Alliance plc of Britain has set up a joint venture insurance firm with top Indonesian investors, the official Antara news agency reported Monday.

PT Sun Alliance Insurance Indonesia was formed with a capital of 15 billion rupiah (7.93 million dollars) with the British firm holding 60 per cent of the equity, Antara said.

The other shareholders are PT Tugu Pratama Indonesia, Indonesia's largest insurance firm partly owned by the state oil firm Pertamina, with 30 per cent and William Suryadjaya, owner of the widely diversified conglomerate Astra Group, with 10 per cent.

Oslo (DEC. 10) - Soviet President Mikhail Gorbachev Monday received here the Nobel Peace Prize for his leading role in the international process of disarmament and democratisation.

Soviet deputy foreign minister Anatoly Kovalyov accepted the prize of 4 million kroner (about 748,000 dollars) on Gorbachev's behalf.

In the acceptance speech delivered by Kovalyov, Gorbachev said he was ''deeply and personally moved'' by having been awarded the prize.

''I intend to do everything in my power in order to fulfill the expectations and hopes of my people and all others who supported the decision of the Nobel committee,'' Gorbachev said.

The Soviet president did not attend the ceremony due to a ''heavy workload'', and the Norwegian Nobel committee last month turned down his request for a postponement of the awarding ceremony.

Dynamite producer Alfred Nobel established the fund for the prize. He died in

1896 on December 10, which has been the day of the awards ceremony without fail since 1901.

COPENHAGEN (DEC. 10) - The Danish balance of payments on current account showed a surplus of 7.3 billion krone (1.3 billion dollars) during the first 10 months of the year, compared with a deficit of 4.2 billion krone (736 million dollars) during the same period of last year, official figures showed on Monday.

Economy Minister Niels Helveg Petersen said that this was "a good, historic result" and he noted that during the last 12 months the balance showed a surplus of five billion krone (877 million dollars).

Danish financial experts said that the balance was heading for the first annual surplus in 1990 for 27 years.

#90344d8660 12/10/1990 ~French/German News Agency

PARIS (DEC. 10) - The French Air Liquide group, which leads the world in industrial gases, announced on Monday that it was investing nearly one billion French francs (about 200 million dollars) in Asia.

The company also said it expected 1990 profits to be about 10 per cent higher than in 1989. First-half net profits rose by 12 per cent to one billion francs (200 million dollars). In 1989 consolidated net profits were 1.8 billion francs (360 million dollars).

About half of the investment in the construction or modernisation of factories would be made in Japan, the company said.

Air Liquide already makes 13 per cent of its sales in Asia, where it will build, modernise or enlarge nine production units with the emphasis being on the market for gas for the electronics industry.

The company has been present in Japan since 1907 and holds 20 per cent of the market, compared with 40 per cent for Nippon Sanso.

Air Liquide will build three factories for the production of gas, mainly nitrogen and oxygen through its Teisan subsidiary.

Two other plants with bigger capacity will be built in association with other industrial companies.

A big centre for packaging special gases for electronics near Tokyo has just

been opened. It will supply Japan and Southeast Asia, where demand is growing.

In South Korea, Daesung Sanso, in a joint venture involving Air Liquide, will build a plant for producing nitrogen and oxygen for the petro-chemical industry. Daesung Sanso alrady has three plants in the country.

In Taiwan, where Air Liquide recently put an air gas plant into service, the group will build a unit capable of turning out many kinds of gases for the Texas Instrument Acer company.

A similar unit is to be built in China near Shanghai, particularly to supply Philips.

Air Liquide said that "these big investments confirm the desire of Air Liquide to develop in Asia and to progress in the electronics sector".

The plants would supply the Japanese electronics industry, and the group hopes that in this way it would gain easier access to European electronics groups.

DAMASCUS (DEC. 10) - A radical Palestinian group, the Popular Front for the Liberation of Palestine-General Command, on Monday claimed responsibility for a bomb attack on the West Bank that killed one Israeli soldier and wounded two.

The PFLP-GC in a statement here said one of its components active in the Israeli-occupied territories had set off two bombs in Bethlehem on Sunday as an Israeli patrol was passing by.

The army said a 20-year-old soldier was killed in the attack and two soldiers were slightly injured.

In Amman, another group active in the territories, the fundamentalist Islamic Jihad Kataeb al-Aqsa, also said it was behind the explosions.

LAGOS (DEC. 10) - The African Commission for Human and People's Rights on Monday urged African governments to recognise the rights, duties and freedom of their citizens.

The commission, in a statement issued here by its president Orji Umezurike, to mark the 42nd anniversary of the declaration of human rights, urged governments on the continent to adopt legislative and other measures to give effect to the rights of their citizens.

African governments should render periodic reports, disseminate knowledge of the commission's charter and cooperate with the commission in the discharge of its duties, the statement said.

The commission also called on countries that had not ratified the charter to do so to make it a truly African document.

Hamburg (DEC. 10) - Demand for petroleum products, in keeping with the overall condition of the economy, is showing robust growth in western Germany in 1990, while oil product sales are putting in a mixed performance in eastern Germany, it was reported here Monday.

''Erdoel Informationsdienst'', a petroleum industry newsletter, said a survey taken of oil firms pointed to petroleum sales rising by 4 million tonnes or about 4 per cent, to 103 million in western Germany this year.

In eastern Germany, where statistical data was less comprehensive, petroleum products demand was seen at somewhere between 12 and 14 million tonnes. While demand for fuel by private car owners is rising there, industrial demand for oil is dropping, the report said.

The newsletter said that in western Germany, gasoline sales were expected to reach 26.8 million tonnes, up from last year's 26 million tonnes, while diesel sales will rise by one million tonnes to total 18 million.

The strongest rise in western Germany is in light heating oil, sales of which are expected to rise to 31 million tonnes this year compared to the 1989 level of 28.4 million, the report said.

#90344d9030 12/10/1990 ~French/German News Agency

PARIS (DEC. 10) - French air traffic will be severely disrupted on Tuesday and Wednesday due to a strike by air traffic controllers of the Athis Mons center, the nation's most important one, union sources said on Monday.

The controllers are demanding more staff and an additional allowance reflecting the "specific nature" of the Athis Mons center, which handles traffic for all northern France.

Domestic airline Air Inter was forced to cancel almost half of scheduled flights for Tuesday and Wednesday, the company announced.

National carrier Air France will maintain only half of its medium-range flights on the two days, it announced, but all long-distance flights will be

maintained.

Air France will also cancel a few flights Monday evening and Thursday morning in connection with the work stoppage.

British Airways announced Monday that it had been authorized to maintain only three flights from Paris to London on the two days: two on Tuesday and one on Wednesday. Flights between Paris and Birmingham, Glasgow, Edinburgh and Manchester have been cancelled for the two days.

British Airways normally has 10 Paris-to-London flights a day.

#90344d9370 12/10/1990 ~French/German News Agency

Ruesselsheim (DEC. 10) - Adam Opel, the German carmaking subsidiary of the General Motors concern, said here Monday it will sign an agreement Thursday to pave the way for a new car assembly plant in eastern Germany.

Opel said that the one billion-mark (680 million dollar) project foresees production starting up in Eisenach, about 250 kilometres southwest of Berlin, at the end of 1992. The plant is to produce 150,000 ''Corsa'' and ''Kadett'' cars annually.

The agreement will be signed in Berlin on Thursday with the Treuhandanstalt, the trust office facility set up to privatise the former East Germany's nationally-owned companies.

Eisenach is currently the site where the eastern German ''Wartburg'' car is produced.

Opel said the factory at Eisenach will not have its own engine manufacturing or chassis plants.

The engines for the Opel cars made in Eisenach will be supplied by a Gm company in Hungary while chassis components will be delivered from Opel plants in Ruesselsheim, Bochum and Kaiserslautern. The transmissions will likely be provided from Czechoslovakia.

Opel becomes the third German automotive company which has announced plans for assembly plants in the former East Germany. Volkswagen will be producing cars and Mercedes-Benz has a project to build trucks in eastern Germany.

Opel chief executive Louis Hughes said last week his company expected, as in the cases of Vw and Mercedes, to receive official state subsidies of up to 33 per cent of its investment costs in the project.

#90344d9390 12/10/1990 ~French/German News Agency

LONDON (DEC. 10) - The troubled British food group Berisford International on Monday announced that it had sold its main subsidiary British Sugar to Associated British Foods (ABF) for 880 million pounds (1.7 billion dollars) on Saturday.

Despite a pre-tax profit of 110 million pounds from British Sugar, Berisford reported an annual net loss of 91 million pounds (175 million dollars).

The sale will help Berisford reduce debts totalling 1.2 billion pounds (2.3 billion dollars).

Under a refinancing agreement reached with creditors in September, the group must repay all debts by June 31.

ABF, which held 23 per cent of Berisford, made a takeover bid in 1987, but then dropped its plan because of the stock market crisis.

Berisford said that in 1990 it made a loss per share of 18.3 pence compared with a profit of 15.7 pence a year earlier. A final dividend was not declared.

Heavy losses were made in property consequent on a disastrous diversification in New York by former chairman Ephraim Margulies who resigned at the beginning of the year and was replaced by John Sclater.

Berisford shares lost 2.5 pence to 26 pence. ABF shares rose 25 pence to 422 pence.

On July 5 Berisford had put all of its assets up for sale in response to bad interim results, and has already sold several of its financial services subsidiaries.

An earlier attempt by Tate and Lyle to buy British Sugar did not succeed because of official objections that Tate and Lyle would have dominated more than 90 per cent of the British sugar market.

Baghdad (DEC. 10) - Another 200 Iraqi prisoners of war returned home Monday after they were released by Iran in line with an agreement reached by the two former Gulf War adversaries last month, Radio Baghdad reported.

An Iraqi plane flew the Pows home from Teheran, it said.

It was the ninth batch of Iraqi prisoners freed by Iran since the two sides agreed to resume the exchange of prisoners during a November visit to Baghdad by Iranian Foreign Minister Ali Akbar Velayati.

Iran and Iraq fought a bitter eight-year war that ended in August 1988. The two nations restored diplomatic ties last October.

Santiago (DEC. 10) EFE - The world's most powerful optical telescope, a four-lens array giving 16 square meters of reflective surface, will be assembled over the next decade in the desert terrain of northern Chile, scientists announced Monday in Santiago.

The so-called Very Large Telescope, will be sited at Cerro Parral, on the Pacific coast 130 km south of Antofagasta, said Hugo Schwartz of the European Southern Observatory (ESO) consortium which is funding the project.

The observatory will cost dlrs 300 million and take 10 years to complete. When finished, its lenses will be able to focus clearly on an object one meter in diameter on the surface of the moon.

"Chile was chosen on account of the quality of its skies," said Schwartz, after studies indicated that Cerro Parral, 2,684 meters above sea level, had a 75 per cent probability of providing astronomers with crystal-clear night skies.

He said prospects of political stability was also a factor in settling on the northern Chilean site following a two-year search of southern hemisphere locations.

"Up to now we have not been able to carry out important research necessary to determine the origins of the universe and its basic structure, because we haven't had a proper telescope," Schwartz added.

Moscow (DEC. 10) EFE - Two Italian engineers have been found murdered near the Soviet city of Volgograd where they had gone to work on the construction of a metals plant, the Soviet news agency TASS reported Monday.

TASS listed the dead as R. Mabelli and E. Gabazzi but did not say how or why the two were believed to have been killed.

The men were among a group of 30 Italian technicians who arrived in Volgograd last Wednesday on a charter flight from Genoa, Italy. The group was awaiting transportation to the nearby town of Volzhskiy where they were to live.

The bodies of the two engineers were apparently found in Volzhskiy, located about 40 km from Volgograd. It was unclear why or how the men had traveled from Volgograd to Volzhskiy.

The Interior Ministery is investigating the case, TASS reported.

MANAGUA (DEC. 10) EFE - The Nicaraguan Supreme Court Monday ordered the arrest of a U.S. millionaire who the Costa Rican government wants extradited to face drug-trafficking and arms-dealing charges, court officials said.

The San Jose government Friday asked Nicaragua to extradite fugitive businessman John Hull Clark, who has been accused of drug trafficking and illegal arms sales in Costa Rica.

According to Nicaraguan press reports, Hull was allegedly involved in the U.S. Iran-Contra scandal in which profits from illegal arms sales to Tehran were diverted to fund rightist Nicaraguan Contra rebels.

The Contras waged an eight-year war in a bid to topple the leftist Sandinistas who ruled from 1979 until losing elections earlier this year.

Foreign Ministry officials Friday said Hull, who entered Nicaragua with his daughter in August, had not been seen since last Tuesday.

An Interior Ministry source said that Hull was possibly in central Nicaragua, where he received support from anti-Sandinista politicians.

Hull had set himself up in the central Nicaraguan town of Juigalpa in order to invest in ranch and forestry projects.

The millionaire's daughter and five of his assistants have also been missing since Friday.

#90344e0058 12/10/1990 ~Latin America New Agency
GUATEMALA CITY (DEC. 10) EFE - The U.S. head of a Roman Catholic order claimed Monday that the Guatemalan government had done little to investigate the kidnapping, torture and rape last year of one of the order's nuns because police were implicated in the crime.

Sister Superior Francisca Virgen of the U.S. Ursuline Order told press that the government had done little to clear up the attack on Sister Diana Mark Ortiz, a U.S. citizen, because Guatemalan policemen were "directly responsible" for the crime.

Virgen handed press a statement claiming members of a police partol had seized Ortiz, 31, in the town of Antigua Guatemala, 45 km south of the capital, in November 1989 then "brutally" tortured her.

A special commission set up by President Vinicio Cerezo in April has yet to report on the case.

A member of the Ursuline mission in Guatemala said Monday that if the government did not fully investigate the case, the order would ask Washington to freeze its aid package to the country next year.

The United States has earmarked some dlrs 125 million in assistance to Guatemala for 1991.

Ortiz returned to the United States shortly after the incident took place.

Meanwhile, two U.S. congressmen in Guatemala to investigate human rights abuses claimed Monday that some Guatemalan security force members continued to violate citizen's rights.

Democrats Constance Morella and Frederick Boucher made the claim after meeting Defense Minister Gen. Juan Leonel Bolanos over the weekend.

The congressmen raised with Bolanos the issue of last week's massacre of 14 people by soldiers in the northwestern town of Santiago Atitlan.

Bolanos has pledged to bring the "full weight of the law" down on a sergeant and lieutenant implicated in the killings.

Human rights groups have claimed that security forces and proxy death squads have killed nearly 600 people this year in extra-judicial executions.

An estimated 100,000 people have been killed in political violence in Guatemala over the past 30 years, the majority by death squads, according to rights groups.

#90344e0060 12/10/1990 ~Latin America New Agency

WASHINGTON (DEC. 10) EFE - Iraqi Foreign Minister Tareq Aziz said Monday that Baghdad would reject any peace deal that obliges Iraq to disarm without requiring a similar move by Israel.

But he said Baghdad was willing to sign an eventual regional security accord under which both Iraq and Israel would destroy their nuclear and chemical arms.

He made the comments in Baghdad in an interview with the U.S. CNN television network.

Aziz also denied U.S. government reports that Iraq has built a nuclear bomb.

Some analysts have suggested that the Gulf crisis could be solved peacefully through by a deal requiring Iraq to destroy part of its arsenal and to withdraw from Kuwait, which it occupied August 2.

U.S. President George Bush has invited Aziz to Washington for talks on the crisis and has offered to send Secretary of State James Baker to Baghdad to meet Iraqi President Saddam Hussein.

Iraq has accepted the offer, but no dates have been confirmed.

The United States has spearheaded a multinational force in the Gulf region to prepare for possible war to drive Iraq from Kuwait, and the United Nations Security Council has authorized the use of force against Baghdad if it does not withdraw by January 15.

Saddam has called for a negotiated solution to the crisis in which talks would focus on Israel's occupation of parts of neighboring Arab countries and Syria's presence in Lebanon, as well as the Iraqi occupation of Kuwait.

A bipartisan group of U.S. Congress members and former diplomats Monday urged Bush to make the destruction of Iraq arsenals an objective of American policy.

The group said the United States should use force if necessary to destroy Iraq's chemical, biological and nuclear arms even if Baghdad pulls its troops out of Kuwait.

The group includes Republican Senators Richard Lugar and John McCain, Democratic Representatives Stephen Solarz and Robert Torricelli, and former ambassador to the United Nations Jeane Kirkpatrick.

On Sunday, Israeli Prime Minister Yitzhak Shamir said in New York that "the world cannot survive" while Iraq's military capability remains intact.

BEIJING (DEC. 10) XINHUA - THE WAGES OF CHINESE WORKERS HAVE INCREASED STEADILY DURING THE SEVENTH STATE FIVE-YEAR PLAN PERIOD (1986-90), THE "PEOPLE'S DAILY" REPORTED TODAY.

THE TOTAL WAGES OF THE WORKERS THROUGHOUT THE COUNTRY THIS YEAR WILL COME TO 296 BILLION YUAN, 2.14 TIMES THAT IN 1985, THE NEWSPAPER QUOTED THE STATE STATISTICS BUREAU AS REVEALING.

AT THE SAME TIME, THE PER CAPITA INCOME OF WORKERS IS EXPECTED TO REACH 2,130 YUAN THIS YEAR, AN INCREASE OF 85.5 PERCENT OVER 1985 OR AN AVERAGE INCREASE RATE OF 13.2 PERCENT A YEAR SINCE 1985.

THE PER CAPITA INCOME OF WORKERS IN FOREIGN-INVESTED ENTERPRISES WILL REACH 2,950 YUAN THIS YEAR WHILE THAT OF WORKERS IN STATE-OWNED ENTERPRISES WILL BE 2,260 YUAN AND WORKERS IN COLLECTIVE-OWNED ENTERPRISES WILL EARN 1,710 YUAN.

DURING THE PERIOD, THE ECONOMY IN THE COUNTRY'S COASTAL AREAS SAW A FASTER GROWTH THAN IN THE COUNTRY'S OTHER AREAS. AND THE AVERAGE WAGE ALSO INCREASED FASTER IN THE COASTAL AREAS THAN IN THE OTHER AREAS, SAID THE NEWSPAPER.

FOR INSTANCE, THE AVERAGE WAGE PER WORKER IN 12 COASTAL AREAS WAS 2,087 YUAN LAST YEAR, 7.6 PERCENT HIGHER THAN THE NATIONAL AVERAGE.

BONUSES AND SUBSIDIES NOW ACCOUNT FOR AN INCREASINGLY LARGER PART OF A WORKER'S TOTAL INCOME. THIS YEAR BONUSES AND SUBSIDIES WILL ACCOUNT FOR 40.5 PERCENT OF A WORKER'S TOTAL INCOME, COMPARED WITH 27.6 PERCENT IN 1985.

PYONGYANG (DEC. 10) XINHUA - SOUTH KOREAN MINISTER OF FOREIGN AFFAIRS CHOL HO-JOONG INDICATED TODAY THAT SOUTH KOREA WILL NOT APPLY FOR U.N. MEMBERSHIP THIS YEAR.

ACCORDING TO RADIO REPORTS FROM SEOUL, CHOL HO-JOONG MADE THE REMARK WHILE MEETING WITH REPORTERS EARLIER IN THE DAY.

IT HAS BEEN A LONG-TERM POSITION OF SOUTH KOREA TO JOIN THE UNITED NATIONS AS SOON AS POSSIBLE, CHOL HO-JOONG WAS QUOTED BY THE REPORTS AS SAYING.

HOWEVER, THE FOREIGN MINISTER ADDED THAT AS THE PERMANENT MEMBER COUNTRIES OF THE U.N. SECURITY COUNCIL ARE FOCUSING ALL THEIR ATTENTION ON THE GULF CRISIS, IT IS AN INOPPORTUNE TIME FOR SOUTH KOREA TO JOIN THE UNITED NATIONS, GIVEN THE CIRCUMSTANCES.

HE ALSO SAID THAT EFFORTS SHOULD BE MADE TO MAKE THE NORTH CHANGE ITS POSITION ON THIS MATTER.

OBSERVERS HERE NOTED THAT CHOL HO-JOONG MADE THE DISCLOSURE JUST BEFORE THE OPENING OF THE THIRD SUMMIT MEETING BETWEEN THE NORTH AND SOUTH IN SEOUL.

THE NORTH AND SOUTH HAVE BEEN DIVIDED OVER THE ISSUE OF U.N. MEMBERSHIP, WITH THE SOUTH MAINTAINING THAT BOTH THE NORTH AND SOUTH SHOULD EACH JOIN THE INTERNATIONAL BODY SIMULTANEOUSLY. AND IF THIS CAN NOT BE REALIZED, THEN EACH SIDE MAY APPLY FOR MEMBERSHIP UNILATERALLY.

BUT THE NORTH INSISTS THAT BEFORE THE REALIZATION OF KOREAN REUNIFICATION, BOTH SIDES SHOULD JOIN THE UNITED NATIONS AS ONE MEMBER.

THE TWO SIDES GROUPS HAVE FAILED TO COME TO ANY AGREEMENT ON THIS ISSUE DURING THE FIRST TWO ROUNDS OF NORTH-SOUTH SUMMIT MEETINGS.

BEIJING (DEC. 10) XINHUA - THE CHINA NATIONAL OIL DEVELOPMENT CORPORATION (CNODC) SIGNED A CONTRACT HERE TODAY WITH THREE COMPANIES FROM NEW ZEALAND AND THE UNITED STATES TO CO-OPERATE IN PETROLEUM EXPLORATION IN THE DONGTING BASIN HUNAN PROVINCE.

A SPOKESMAN FOR CNODC SAID THAT THIS WAS THE FIRST SINO-FOREIGN PETROLEUM CONTRACT SINCE 1985 WHEN THE CHINESE GOVERNMENT DECIDED TO SEEK FOREIGN CO-OPERATION FOR DEVELOPING INLAND OIL RESOURCES IN 11 SOUTHERN PROVINCES AND REGIONS.

THE THREE FOREIGN PARTNERS ARE SANTA FE ENERGY RESOURCES INC. AND NORTHERN MICHIGAN EXPLORATION COMPANY FROM THE U.S., AND PETROLEUM EXPLORATION LTD OF NEW ZEALAND.

THE SIGNING CEREMONY WAS ATTENDED BY JAMES PAYNE, PRESIDENT OF SANTA FE ENERGY RESOURCES INC., JAMES PATEK, CHIEF EXECUTIVE OF PETROLEUM EXPLORATION LTD, RICHARD BURGESS, PRESIDENT OF NORTHERN MICHIGAN EXPLORATION COMPANY, JAMES LILLEY, AMERICAN AMBASSADOR TO CHINA, AND MICHAEL JOHN POWLES, NEW ZEALAND'S AMBASSADOR TO CHINA.

CHINESE STATE COUNCILLOR ZOU JIAHUA MET WITH THE CHIEF EXECUTIVE OFFICERS FROM THE THREE FOREIGN COMPANIES BEFORE THE SIGNING CEREMONY.

CHENG SHOULI, CNODC PRESIDENT, SAID THAT HE HOPED THIS CONTRACT WOULD PAVE THE WAY FOR MORE FOREIGN OIL COMPANIES TO COME TO CHINA FOR CO-OPERATION IN OIL EXPLORATION AND DEVELOPMENT.

CHENG SAID THAT HIS COMPANY WAS READY TO DISCUSS CO-OPERATION POSSIBILITIES WITH FOREIGN COMPANIES IN OIL EXPLORATION AND DEVELOPMENT IN SOUTH CHINA.

NEW DELHI (DEC. 10) XINHUA - INDIA'S GARMENT EXPORTS HAVE CROSSED THE 40 BILLION RUPEES (2.35 BILLION U.S. DOLLARS) MARK DURING THE FIRST 11 MONTHS OF THE CURRENT CALENDAR YEAR AGAINST AN ANNUAL TARGET OF 39 BILLION RUPEES.

OFFICIAL SOURCES SAID TODAY THAT THE PERFORMANCE HAS IN FACT ASSURED THE COMMERCE MINISTRY AN ADDITIONAL 5 BILLION RUPEES OVER AND ABOVE THE SET TARGET

FOR THE YEAR.

THIS, HOWEVER, IS SUBJECT TO CERTAIN CONDITIONS, NAMELY GREATER SUPPORT FROM THE GOVERNMENT. ON THEIR PART, THE AUTHORITIES ALREADY PANICKING AT THE DROP IN OVERALL EXPORTS, HAVE BEEN URGING SECTORS SUCH AS GARMENTS, HANDICRAFTS AND LEATHER, TO BOOST THEIR EXPORTS.

IN THIS CONTEXT, GARMENT EXPORTERS WHO MET SENIOR OFFICIALS OF THE COMMERCE MINISTRY, SAID THAT THE INDUSTRY WOULD REQUIRE CASH COMPENSATORY SUPPORT TO PROVIDE AN ADDITIONAL 5 BILLION RUPEES.

THE OFFICIAL SOURCES ADDED THAT WHILE THE GOVERNMENT HAS AGREED THAT IT WILL HAVE TO GIVE A FIVE PERCENT ADDITIONAL CASH AID TO PROMOTE NON-QUOTA ITEMS, BOTH TO NON-QUOTA COUNTRIES AND QUOTA COUNTRIES, SO IT HAS NOT ACCEPTED THE REQUIREMENT BY THE EXPORTERS.

THE UNITED STATES AND THE EEC CONTINUED TO BE MAJOR IMPORTERS OF INDIAN GARMENTS, THE SOURCES SAID.

RIO DE JANEIRO (DEC. 10) XINHUA - HOMICIDES WENT UP 2 PERCENT SINCE THE BEGINNING OF 1990 OVER THE SAME PERIOD LAST YEAR IN SAO PAULO.

ACCORDING TO THE REGIONAL DEPARTMENT OF POLICE REPRESENATIONS OF GREATER SAO PAULO (DEGRAN), 5,828 MURDERS HAD BEEN REGISTERED FROM JANUARY TO NOVEMBER 1989 WHILE THEY WENT UP TO 5,932 THIS YEAR, AVERAGING 16 MURDERS EVERY DAY. THE NUMBER OF INTENTIONAL HOMICIDES AND OF MURDERS FOLLOWING ARMED ROBBERIES HAS ALSO INCREASED.

DEGRAN DIRECTOR JORGE MIGUEL, THE CHIEF OF POLICE OF GREATER SAO PAULO, SAID THAT THE RISE IN THE NUMBER OF KILLINGS WAS DUE TO EASIER ACCESS TO WEAPONS. THE CIVIL POLICE CONTROLLED PRODUCTS DIVISION, THE FORMER EXPLOSIVES DEPARTMENT, THIS YEAR AUTHORIZED 29,169 PEOPLE TO HAVE WEAPONS IN THEIR HOMES WHILE REGISTERING 38,696 NEW LICENCES TO USE FIREARMS

SAO PAULO HOMICIDES DIVISION VICE-DELEGATE MARCO ANTONIO NOVAES DE PAULA SANTOS DECLARED THAT THE NUMBER OF HOMICIDES HAD GROWN OWING TO SOCIAL INSTABILITY. "THERE IS A LARGE UNEMPLOYMENT RATE AND THE ASSASSINATIONS ARE MOSTLY AIMED A LOW-INCOME RESIDENTS", HE SAID.

MIGUEL ALSO EXPLAINED THAT BRAZILIAN LAWS ON MURDER ENCOURAGED IMPUNITY SINCE MURDERERS RARELY REMAINED MORE THAN FIVE YEARS IN JAIL.

TOKYO (DEC. 10) KYODO - YASUDA TRUST AND BANKING CO. PREDICTED MONDAY THAT JAPAN'S REAL ECONOMIC GROWTH IN FISCAL YEAR 1991 STARTING NEXT APRIL IS LIKELY TO FALL TO 3.5 PERCENT FROM AN ESTIMATED ANNUAL GROWTH OF 5.1 PERCENT FOR THE CURRENT FISCAL YEAR.

IT ATTRIBUTED THE LOWER GROWTH IN GROSS NATIONAL PRODUCT (GNP) TO LOWER HOUSING INVESTMENT AND A DECLINE IN CAPITAL INVESTMENT TRIGGERED BY WORSENING CORPORATE PROFITS.

JAPAN'S CURRENT-ACCOUNT SURPLUS, IT SAID, IS EXPECTED TO STAY AT 40 BILLION DOLLARS, DUE TO INCREASED EXPENDITURES IN TOURISM AND INVISIBLE TRADE IN FISCAL 1991.

YASUDA MADE THE PREDICTION ON THE BASIS THAT THE YEN IS LIKELY TO AVERAGE 123 YEN AGAINST THE U.S. DOLLAR AND THE OIL PRICE AT ABOUT 20 DOLLARS PER BARREL.

MEANWHILE, ACCORDING TO ASAHI MUTUAL LIFE INSURANCE CO., JAPAN'S REAL GNP GROWTH RATE IN FISCAL 1991 IS EXPECTED TO MARK 3.8 PERCENT, WHILE THE CURRENT-ACCOUNT SURPLUS IS EXPECTED AT 28.6 BILLION DOLLARS. IT EXPECTS THE JAPANESE CURRENCY TO CHANGE HANDS AT AROUND 131.80 YEN TO THE DOLLAR.

#90344k0054 12/10/1990 ~Japanese News Agency

TOKYO (DEC. 10) KYODO - THE FEDERATION OF ECONOMIC ORGANIZATIONS (KEIDANREN) OF JAPAN WILL NAME FOUR NEW VICE CHAIRMEN DECEMBER 21, SOURCES AT THE

FEDERATION SAID MONDAY.

THE FOUR ARE SETSUYA TABUCHI, CHAIRMAN OF NOMURA SECURITIES CO., ISAO NAKAUCHI CHAIRMAN AND PRESIDENT OF DAIEI INC., KENJI KAWAKATSU, CHAIRMAN OF SANWA BANK AND KATSUHIRO UTADA, HONORARY CHAIRMAN OF AJINOMOTO CO.

THE DECISION WILL BE MADE OFFICIAL AT THE DECEMBER 21 EXTRAORDINARY GENERAL MEETING OF KEIDANREN, THE SOURCES SAID.

FOLLOWING THE RESIGNATION ANNOUNCEMENT BY KEIDANREN CHAIRMAN EISHIRO SAITO AND THREE VICE CHAIRMEN NOVEMBER 26, THE FEDERATION HELD A MEETING OF TOP OFFICIALS MONDAY TO DECIDE ON THE NEW VICE CHAIRMEN, ACCORDING TO THE SOURCES.

GAISHI HIRAIWA, CHAIRMAN OF TOKYO ELECTRIC CO. AND CURRENT VICE CHAIRMAN OF KEIDANREN, IS TO ASSUME THE POST HELD BY SAITO, 79, WHO CITED HIS ADVANCED AGE AS THE REASON FOR HIS RESIGNATION. THE APPOINTMENT WILL ALSO BE FORMALIZED DECEMBER 21.

#90344k0063 12/10/1990 ~Japanese News Agency

TOKYO (DEC. 10) KYODO - SAUDI ARABIA HAS NOTIFIED JAPANESE TRADING HOUSES AND PETROLEUM COMPANIES OF ITS INTENTION TO SUSPEND EXPORTS OF KEROSENE AND GAS OIL UNTIL FURTHER NOTICE, INDUSTRY SOURCES SAID MONDAY.

THE OIL-PRODUCING NATION SAID IT WILL NOT HALT THE EXPORT OF NAPHTHA, BUT SHIPMENTS OF THE OIL WILL BE DELAYED BY BETWEEN A WEEK TO 10 DAYS.

THE INDUSTRY SOURCES BLAMED THE SUSPENSION ON A FIRE THAT BROKE OUT AT SAUDI ARABIA'S RAS TANURA REFINERY, THE WORLD'S LARGEST OIL DISTILLERY, WHICH HAS THE CAPACITY TO REFINE 500,000 BARRELS OF OIL A DAY.

THE REFINERY BECAME THE MAJOR SUPPLIER OF JET FUEL, LIGHT OIL, AND GASOLINE TO THE MULTINATIONAL DEFENSE FORCE IN THE PERSIAN GULF FOLLOWING THE AUGUST 2 IRAQI INVASION OF KUWAIT.

OIL INDUSTRY OFFICIALS SAID THE DETRIMENTAL EFFECTS OF A SUSPENSION IN SHIPMENTS WILL NOT BE FELT ON THE ECONOMY BECAUSE OF THE COUNTRY'S AMPLE SUPPLIES OF KEROSENE.

THE FIRE ON NOVEMBER 30 CUT THE DISTILLERY'S CAPACITY BY ABOUT HALF, INDUSTRY SOURCES ESTIMATED.

THE SHORTFALL WILL FORCE SAUDI ARABIA TO SUPPLY THE MULTINATIONAL FORCE WITH OIL SUPPLIES FROM THE JUBAIL REFINERY.

BECAUSE JAPAN IS HEAVILY RELIANT ON OIL SUPPLIES FROM JUBAIL, THE TRANSFER OF THE RESOURCES MEANS THAT SAUDI ARABIA WILL HAVE TO TEMPORARILY HALT SHIPMENTS

TO JAPAN.

MORE THAN 20 PERCENT OF JAPAN'S PETROLEUM PRODUCTS ARE IMPORTED. AN ESTIMATED 26 PERCENT OF THE COUNTRY'S KEROSENE IMPORTS, TOTALING 3.40 MILLION KILOLITERS IN THE FIRST HALF OF 1990, CAME FROM SAUDI ARABIA.

SAUDI ARABIA FURNISHED APPROXIMATELY 40 PERCENT OF THE NATION'S IMPORTS OF GAS OIL TOTALING 3.24 MILLION TONS IN THE FIRST HALF OF THE YEAR.

BUT JAPANESE OIL COMPANIES HAVE CUT THEIR IMPORTS OF PETROLEUM PRODUCTS BY ABOUT HALF SINCE AUTUMN, IN RESPONSE TO THE SURGE IN PETROLEUM PRODUCTS PRICES IN OVERSEAS MARKETS.

FORTUNATELY THE WARM WINTER HAS REDUCED DEMAND AND PUSHED DOWN NOVEMBER DELIVERY FOR OIL BY NEARLY 20 PERCENT FROM THE SAME MONTH LAST YEAR, THE INDUSTRY SOURCES SAID.

''A TEMPORARY RISE IN OVERSEAS OIL MARKETS WILL HAVE VERY LITTLE IMPACT ON JAPAN, WHICH HAS AMPLE SUPPLIES,'' SAID ONE SOURCE.

-30- 2327

#90344k0068 12/10/1990 ~Japanese News Agency

KUALA LUMPUR (DEC. 10) KYODO - PRIME MINISTER MAHATHIR MOHAMAD SAID MONDAY MALAYSIA WILL INITIATE A MARKET PACT AMONG EAST ASIAN COUNTRIES TO COUNTER PROTECTIONISM THAT MAY EMERGE IN WESTERN COUNTRIES SHOULD THE CURRENT GATT GLOBAL TRADE TALKS COLLAPSE.

THE LIST OF MEMBERS, HE SAID, WILL INCLUDE JAPAN, CHINA, SOUTH KOREA, HONG KONG, TAIWAN, VIETNAM, MYANMAR, AND THE SIX MEMBERS OF THE ASSOCIATION OF SOUTHEAST ASIAN NATIONS (ASEAN) -- MALAYSIA, SINGAPORE, BRUNEI, THE PHILIPPINES, THAILAND AND INDONESIA.

''BUT WE EXPECT COUNTRIES, ESPECIALLY JAPAN, TO COME UNDER GREAT PRESSURE FROM CERTAIN GROUPS TO REJECT THE PACT,'' HE TOLD REPORTERS AFTER OPENING THE CHINESE NEWSPAPERS 23RD INTERNATIONAL CONVENTION HERE.

PRIMARY INDUSTRIES MINISTER LIM KENG YAIK SAID LAST WEDNESDAY THAT MALAYSIA WANTS JAPAN, AS THE MOST INDUSTRIALIZED COUNTRY IN EAST ASIA, TO HEAD THE PACT.

LIM ALSO SAID THAT THE PROPOSAL WILL BE PUT TO JAPANESE PRIME MINISTER TOSHIKI KAIFU WHEN HE VISITS MALAYSIA IN MID-JANUARY.

MAHATHIR SAID HE WILL DISCUSS THE MATTER WITH CHINESE PREMIER LI PENG, WHO ARRIVED HERE MONDAY, DURING A TWO-HOUR MEETING SCHEDULED FOR TUESDAY.

THE URUGUAY ROUND OF MULTILATERAL TRADE TALKS UNDER THE AUSPICES OF THE GENERAL AGREEMENT ON TARIFFS AND TRADE (GATT) WAS SUSPENDED FRIDAY WITH THE

EUROPEAN COMMUNITY AND THE UNITED STATES DEADLOCKED ON THE QUESTION OF EUROPEAN FARM SUBSIDIES.

ECONOMISTS WIDELY SAY THE INTERNATIONAL TRADE TALKS ARE LIKELY TO FAIL AS THERE IS VERY LITTLE TIME LEFT BEFORE THEY ARE SCHEDULED TO END ON DECEMBER 31.

MALAYSIA, IN PROMOTING THE EAST ASIAN PACT, BELIEVES THAT WITH THE FAILURE OF THE TALKS PROTECTIONISM WILL EMERGE IN THE U.S.-CANADA-MEXICO MARKET AND THE SINGLE EUROPEAN MARKET IN 1992.

''WE CANNOT ACT ON OUR OWN TO OPPOSE THE TRADE RESTRICTIONS WESTERN COUNTRIES ARE BOUND TO IMPOSE,'' HE SAID.

MAHATHIR SAID MALAYSIA WILL CONTINUE TO LOBBY FOR THE FORMATION OF AN EAST ASIAN MARKET EVEN IF THERE IS LACK OF SUPPORT OR STRONG OPPOSITION.

-30- 2180

#90344k0077 12/10/1990 ~Japanese News Agency

TOKYO (DEC. 10) KYODO - THE FINANCE MINISTRY PLANS TO BEGIN LIFTING CONTROLS ON INTEREST RATES ON DEMAND DEPOSITS AND OTHER LIQUID BANK DEPOSITS IN THE SPRING OF 1992, MINISTRY SOURCES SAID MONDAY.

THE DEREGULATION WILL BE IMPLEMENTED IN TWO STAGES. BANKS WILL FIRST BE ALLOWED TO OFFER A NEW ACCOUNT WHICH BEARS HIGHER INTEREST BUT CHARGE A FEE TO DEPOSITORS. ALL CONTROLS ON INTEREST RATES WILL BE PHASED OUT AFTERWARDS, THE SOURCES SAID.

THE MINISTRY IS PROPOSING THAT THE INTEREST RATE ON THE NEW ACCOUNT BE TIED TO THE MARKET RATE AND THAT DEPOSITERS PAY ACCOUNT FEES WHEN THE OUTSTANDING AMOUNT OF DEPOSITS IN THE ACCOUNT FALLS SHORT OF A CERTAIN LEVEL, THE SOURCES SAID.

ACCORDING TO THE SOURCES, DETAILS, INCLUDING A TIMETABLE FOR TAKING THESE DEREGULATION MEASURES, WILL BE HAMMERED OUT BY NEXT MAY WHEN A PRIVATE ADVISORY PANEL TO THE BANKING BUREAU'S DIRECTOR GENERAL WILL SUBMIT A REPORT ON FINANCIAL ISSUES.

THE FINANCE MINISTRY, FACED WITH PRESSURE FROM THE UNITED STATES TO MOVE QUICKER TO LIFT INTEREST RATE CONTROLS, IS REPORTEDLY CONSIDERING PHASING OUT SUCH REGULATIONS BY THE SPRING OF 1993 -- FAR BEYOND A U.S. PROPOSAL FOR A ONE-YEAR DEADLINE.

IN JAPAN-U.S. FINANCIAL TALKS, U.S. TREASURY OFFICIALS HAVE ARGUED THAT INTEREST RATE CONTROLS ARE IN EFFECT SUBSIDIZING JAPANESE BANKS, GIVING THEM A SOURCE OF CHEAP CAPITAL FOR LOANS AND OTHER INVESTMENT.

ANALYSTS SAY INTEREST RATE DEREGULATION WOULD FORCE BANKS TO PAY MORE FOR

TAKING DEPOSITS, SPAWNING TOUGHER BUSINESS CONDITIONS AND POSSIBLY LEADING TO A RESTRUCTURING IN THE BANKING INDUSTRY.

BY ONE ESTIMATE, ROUGHLY HALF THE INTEREST RATES IN JAPAN ARE SUBJECT TO GOVERNMENT REGULATIONS, BUT INDUSTRY DATA SHOWS THE PORTION OF REGULATION-FREE FINANCIAL INSTRUMENTS HAS BEEN INCREASING ON PARTIAL LIBERALIZATION.

-30- 2000

#90344k0078 12/10/1990 ~Japanese News Agency

MANILA (DEC. 10) KYODO - THE PHILIPPINE FOREIGN DEBT EXPANDED BY 794 MILLION DOLLARS TO 28.41 BILLION DOLLARS IN AUGUST, COMPARED TO THE DECEMBER 1989 LEVEL OF 27.61 BILLION DOLLARS, THE COUNTRY'S CENTRAL BANK SAID MONDAY.

THE CENTRAL BANK SAID THE COUNTRY'S DEBT-REDUCTION PROGRAMS RETIRED 2.36 BILLION DOLLARS OF FOREIGN DEBT SINCE THE REDUCTION SCHEMES WERE IMPLEMENTED BY THE GOVERNMENT OF PRESIDENT CORAZON AQUINO WHEN IT ASSUMED POWER IN FEBRUARY 1986.

THE 2.89 PERCENT EXPANSION IN TOTAL FOREIGN DEBT WAS DUE TO THE USE OF SHORT-TERM CREDITS AND DISBURSEMENT OF THE FIRST TWO TRANCHES OF NEW MONEY FROM FOREIGN COMMERCIAL CREDITORS.

ABOUT 23.70 BILLION DOLLARS OF THE TOTAL EXTERNAL DEBT WERE MEDIUM AND LONG-TERM DEBTS, WHILE THE REST WERE SHORT-TERM CREDITS.

FROM JANUARY TO SEPTEMBER THIS YEAR, ABOUT 761 MILLION DOLLARS IN NEW FOREIGN LOANS WAS DISBURSED TO THE COUNTRY IN SHORT-TERM CREDITS, 565 MILLION DOLLARS IN THE FIRST TWO TRANCHES OF NEW MONEY FROM COMMERCIAL BANKS, 206 MILLION DOLLARS IN NET USE OF REGULAR MEDIUM AND LONG-TERM LOANS, AND 510 MILLION DOLLARS FROM THE PARIS CLUB CREDITORS.

#90344k0090 12/10/1990 ~Japanese News Agency

TOKYO (DEC. 10) KYODO - THE HEAD OF NIPPON MOTOROLA LTD. SAID MONDAY THE COMPANY PLANS TO BUILD AN INTEGRATED CHIP PLANT IN THE SUBURBS OF SENDAI IN NORTHEASTERN JAPAN.

RICK YOUNTS, PRESIDENT OF THE FIRM, TOLD REPORTERS THAT A WAFER FABRICATION FACILITY WILL BE ADDED TO THE ASSEMBLY AND INSPECTION FACILITY NOW BEING BUILT ON ABOUT 120,000 SQUARE METERS OF LAND IN THE IZUMI PARK TOWN SUBURBAN INDUSTRIAL ZONE.

THE ASSEMBLY AND INSPECTION FACILITY, WHICH REPRESENTS THE LATTER-HALF PROCESS OF THE CHIP PLANT, WILL COST AN ESTIMATED 6 BILLION YEN TO BUILD. THE FACILITY IS SCHEDULED FOR COMPLETION NEXT APRIL.

A WAFER FABRICATION FACILITY, WHICH ACCOUNTS FOR THE FIRST-HALF PROCESS OF THE PLANT, WILL BE CONSTRUCTED ON THE SAME SITE AT AN ESTIMATED COST OF 80 BILLION YEN.

YOUNTS SAID MICROCONTROLLING UNITS (MCUS) AND APPLICATIONS- SPECIFIC INTEGRATED CIRCUITS (ASICS) WILL BE MADE AT THE PLANT. ASICS ARE ICS FOR SPECIFIC USES.

IT HAS NOT BEEN DETERMINED, HOWEVER, WHEN CONSTRUCTION WORK ON THE WAFER FABRICATION FACILITY WILL BEGIN, HE ADDED.

YOUNTS ALSO SAID NIPPON MOTOROLA IS HOLDING DISCUSSIONS WITH TOSHIBA CORP. ON POSSIBLE JOINT DEVELOPMENT OF CHIPS FOR HIGH-DEFINITION TELEVISION BASED ON A FORMULA ADOPTED BY JAPAN BROADCASTING CORP. (NHK). HE SAID IF THE TWO AGREE, THEY WILL SEEK NHK'S COOPERATION.

YOUNTS ALSO SAID ISAMU KURU, EX-HEAD OF TOSHIBA'S NEW BUSINESS DEVELOPMENT DEPARTMENT, RECENTLY JOINED NIPPON MOTOROLA AS VICE PRESIDENT. HE INDICATED THAT KURU WILL PROBABLY REPLACE HIM AS PRESIDENT OF NIPPON MOTOROLA NEXT SPRING.

JAKARTA (DEC. 10) KYODO - THE INDONESIAN LEGAL AID INSTITUTE URGED THE GOVERNMENT AND PARLIAMENT TO DEVELOP LAWS THAT WILL ENSURE ECONOMIC DEMOCRACY IN THE COMMEMORATION OF THE INTERNATIONAL HUMAN RIGHTS DAY ON MONDAY.

THE INSTITUTE CALLED FOR THE IMPLEMENTATION OF A PEOPLE-CENTERED DEVELOPMENT STRATEGY, NOTING THAT THE LAWS WHICH ARE AGAINST UNIVERSAL HUMAN RIGHTS VALUES SHOULD BE REVIEWED.

THE INSTITUTE WAS AMONG NINE NON-GOVERNMENTAL ORGANIZATIONS, WHICH SIGNED A STATEMENT IN THE COMMEMORATION OF INTERNATIONAL HUMAN RIGHTS DAY, THE DAY WHEN THE UNITED NATIONS ISSUED A DECLARATION OF HUMAN RIGHTS IN 1948.

INDONESIA IS GOING TO HAVE A NEW CRIMINAL LAW AND THE INDONESIAN LEGAL AID INSTITUTE IS READY TO GIVE INPUT TO MAKE SURE THAT THE NEW LAW WILL SECURE HUMAN RIGHTS, SAID ABDUL HAKIM, CHAIRMAN OF THE INSTITUTE.

LOEBI LOEKMAN, A DOCTOR OF LAW AT THE PRESTIGIOUS UNIVERSITY OF INDONESIA ALSO SAID BASIC HUMAN RIGHTS ARE STILL NOT FULLY REFLECTED IN THE PRESENT CRIMINAL LAW.

HARYONO TJITROSOEBONO, CHAIRMAN OF THE INDONESIAN LAWYERS' ASSOCIATION, SAID THE TENDENCY OF THE PRESENT CRIMINAL LAW CODE IS TO SUBORDINATE THE PEOPLE'S RIGHTS UNDER THE GOVERNMENT'S INTERESTS.

HE CITED THE SUBVERSION LAW WHICH HE SAID IS FREQUENTLY USED TO CURB THE ACTION OF DISSENTERS.

KYOTO (DEC. 10) KYODO - A NINE-YEAR-OLD BOY FROM OSAKA WHO RECEIVED PART OF HIS FATHER'S LIVER IN A TRANSPLANT OPERATION IN JUNE DIED MONDAY AT KYOTO UNIVERSITY HOSPITAL, HIS DOCTORS SAID.

THE BOY, WHOSE NAME IS BEING WITHHELD AT THE REQUEST OF HIS FAMILY, WAS RELEASED FROM THE HOSPITAL IN JULY AND RETURNED TO SCHOOL AFTER UNDERGOING THE NATION'S SECOND LIVER TRANSPLANT INVOLVING A LIVE DONOR.

HE IS THE THIRD PATIENT IN JAPAN TO DIE AFTER UNDERGOING SUCH A TRANSPLANT OPERATION.

DOCTORS AT THE UNIVERSITY, WHICH HAS CARRIED OUT SIX OF JAPAN'S 10 LIVER TRANSPLANT OPERATIONS INVOLVING LIVE DONORS, SAID THE BOY SUFFOCATED AFTER BEING UNABLE TO HOLD DOWN HIS FOOD.

PHYSICIANS SAID THE DEATH WAS ACCIDENTAL AND NOT THE RESULT OF ORGAN REJECTION SYNDROME OR LIVER MALFUNCTION.

-30- 949

TOKYO (DEC. 10) KYODO - JAPAN AND THE SOVIET UNION STARTED TALKS IN TOKYO ON MONDAY TO NEGOTIATE QUOTAS IN THEIR RESPECTIVE 200-MILE ECONOMIC WATERS FOR NEXT YEAR.

NEGOTIATIONS ARE EXPECTED TO MAINLY COVER JAPANESE QUOTAS FOR CATCHING ALASKAN POLLACK AND SOVIET QUOTAS FOR SARDINES.

MICHIO SHIMADA, OCEAN FISHERY CHIEF OF THE JAPANESE FISHERIES AGENCY OPENED THE MEETING BY SAYING THE LONG HISTORY OF COOPERATION BETWEEN THE TWO COUNTRIES IN FISHERIES MUST BE MAINTAINED. HE ALSO EXPRESSED HIS HOPE THAT THE MEETINGS WILL YIELD SWIFT RESULTS.

Y.U. MOSKALTSOV, CHAIRMAN OF DALRYBA, THE SOVIET FAR EASTERN WATERS PRODUCTION CORPORATION, SAID EFFORTS WILL BE MADE TO IMPROVE RELATIONS BETWEEN THE TWO FISHING NATIONS.

THE TWO DELEGATIONS ARE EXPECTED TO PROPOSE NEW TERMS FOR FISHING TUESDAY.

ISLAMABAD (DEC. 10) KYODO - A 12-MEMBER JAPANESE ECONOMIC MISSION HELD A FIRST ROUND OF TALKS ON MONDAY WITH A TEAM OF SENIOR GOVERNMENT OFFICIALS HERE ON ''MEDIUM AND LONG-TERM JAPANESE AID'' FOR PAKISTAN, OFFICIALS SAID.

THE JAPANESE MISSION IS BEING LED BY TOSHIAKI MUTO, A FORMER JAPANESE AMBASSADOR TO THE SOVIET UNION AND CURRENTLY SPECIAL ASSISTANT TO THE MINISTER FOR FOREIGN AFFAIRS, WHILE THE PAKISTANI SIDE IS LED BY FOREIGN SECRETARY SHEHERYAR MOHAMMAD KHAN. OFFICIALS FROM VARIOUS ECONOMIC MINISTRIES ALSO ATTENDED THE MEETING.

PAKISTAN IS SEEKING URGENT ASSISTANCE FROM DONOR COUNTRIES TO OVERCOME THE IMPACT OF THE GULF CRISIS AND HAS REQUESTED 500 MILLION DOLLARS IN ASSISTANCE FROM JAPAN.

A JAPANESE EMBASSY OFFICIAL, HOWEVER, SAID THE DELEGATION WOULD DISCUSS THE POSSIBILITY OF JAPANESE PARTICIPATION IN THE FIVE-YEAR DEVELOPMENT PLAN OF THE NEWLY INSTALLED PAKISTAN GOVERNMENT.

THE MISSION WILL STAY FOR ONE WEEK IN ISLAMABAD AND KARACHI, AND WILL HOLD TALKS WITH GOVERNMENT OFFICIALS AND REPRESENTATIVES OF THE PRIVATE SECTOR.

#90344m0002 12/10/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (DEC. 10) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

"The Wall Street Journal" reports this morning that analysts predict the dollar will fall to record lows within several months. Even a shooting war in the Mideast would spur only a temporary rally, they say. "There would still be no change in the fundamentals, which point to a lower dollar," says JOHN LIPSKY at SALOMON BROTHERS INTERNATIONAL, one of a number of currency specialists cited. He sees the dollar down to a post World War II low of about 1.38 German marks and 120 yen in six months. (WSJ, 12/10)

"The New York Times" reports this morning that the Fed probably will lower the discount rate from 7% soon to keep it below the federal funds rate that was driven down to 7.25% on Friday. "We would be reluctant to move the funds rate under the discount rate," the paper quotes a top official as saying. ROBERT CHANDROSS, chief economist at LLOYDS BANK, says, "The markets would interpret [such a move] as a very clear statement of a very aggressive Fed policy." (NYT, 12/10)

"What provoked the Fed to act [Friday] was [that] the November numbers were far worse than they appear at first glance," says PHILIP BRAVERMAN at DKB

SECURITIES. "A truer and sadder picture emerges when one looks at the household tally of the jobless and not just the non-farm payroll numbers." As to banks lowering interest rates, he says, "The bigger banks are hurting too much to do anything that would reduce their profit margins, certainly not before they are to issue their year-end reports in a few weeks." Braverman says the Fed is "well behind the learning curve. ... The patient is in the intensive care ward and the doctor says 'Take an aspirin and call me in the morning.'" (NYT, 12/8 and "Investor's Daily", 12/10)

"My guess is the Fed was shocked by the data," says ALAN SINAI, chief economist at the BOSTON COMPANY. "Last week, they seemed aware that we were in a recession, but not one that is as sharp and sweeping as the employment data suggest." (NYT, 12/10)

"So far, the Fed's moves to lower rates have had a relatively little beneficial impact on rate at which individuals and smaller businesses can borrow, which is one reason why I expect further easing by the Fed," says DANA JOHNSON at FIRST NATIONAL BANK OF CHICAGO. (NYT, 12/8)

ANDREW BAUER, chairman of SOUTHWEST BANK of St. Louis, explains why his institution - which so frequently is ahead of larger banks in cutting the prime lending rate - dropped its rate Friday: "We have a little different deposit mix, we have a little different problems here in St. Louis here than they do in New York and in Los Angeles. We move when we feel the time is appropriate and we felt the time was appropriate this morning." (CNBC "Market Wrap-Up", 12/7)

"We went into this recession with seemingly neutral interest rates," says ROBERT BARBERA at SHEARSON LEHMAN BROTHERS. "We had a bank- induced credit crunch with no rise in interest rates because people changed their minds about what constituted a safe loan. To make lending safe again you will need much lower rates." DONALD FINE at CHASE MANHATTAN BANK says, "The reluctance of banks to extend credit is a new nuance that you have to allow for and while the consumer malaise perhaps won't get much worse, it is not improving." (NYT, 12/10)

"I do expect [the Fed] to cut the discount rate by 50 basis points," says ALAN LERNER of BANKERS TRUST. He believes that move may come "within the next week." (FNN "Marketwrap", 12/7)

"I'm really expecting interest rates to fall," says BILL WOLMAN, of "BusinessWeek" and "CNBC." "I think we're going to see a Treasury bill under 5% before next June. We have not had a recession like this for a long time and yields under 5% on Treasury bills have happened very frequently in steep recessions. We're going back to this. There's not much inflation. We're going back to rates of that kind. The long bond may even go below 7% during the course of what is going to happen in through here, so it's bonds, bonds, bonds." (CNBC "Market Wrap-Up", 12/7)

"This is time to put a one-year CD in your stocking," says ROBERT HEADY, publisher of "Bank Rate Monitor." "Savings rates will continue to fall in 1991." RANDELL MOORE, editor of "Blue Chip Financial Forecasts," says, "My guess is that after Friday's [unemployment] report, we'll see economists forecasting a steeper downturn in the economy and the necessity of further easing by the Fed." ("USA Today", 12/10)

"You can certainly reduce rates, but that doesn't necessarily mean the banks will lend and people will borrow," says DENNIS HYNES, managing director of research at R.W. PRESSPRICH. "If you make more drastic cuts [more than a quarter-point at a time] you immediately communicate to the foreign investor that he shouldn't be here and we can't do that. ... If you cut rates by half-a-percent you are telling foreign investors ... we don't need your money to fund our deficit. And we don't want to do that. ... For drastic cuts, you're showing shock, you're showing panic. We're trying not to panic these markets and the way you do that is you do it with confidence and you do it with slow and progressive declines." (CNBC "Market Wrap-Up", 12/7)

"If the Fed pushes down our interest rates too far, then a lot of money is going to flow right out of this country," says ELLIOTT PLATT of DONALDSON, LUFKIN & JENRETTE. Because that money would then go to Germany or Japan, where interest rates are more attractive, Platt calls such a reduction "counterproductive." (CNN "Moneyline", 12/7)

"Fed policy works with a long lag, six months to two years," says JEREMY GLUCK at MITSUBISHI BANK. "This should limit the length and the depth of a recession." ("Investor's Daily", 12/10)

RICHARD RAHN, chief economist for the U.S. CHAMBER OF COMMERCE, says recent economic problems "clearly show that SADDAM HUSSEIN and high oil prices are being used by officials as a smoke screen to hide the failed economic policies of the Fed." JOHN RUTLEDGE, chairman of the CLAREMONT ECONOMIC INSTITUTE in Southern California, says his quarrel "is over what monetary policy is supposed to be doing and I think the Fed has created this recession." DAVID JONES at AUBREY G. LANSTON says FED CHAIRMAN ALAN GREENSPAN's "forte" is his "numbers-crunching ability ... and it may be that when psychology and anecdotal evidence are more important than those numbers, the Greenspan Fed is a bit slow to respond." ("Investor's Daily", 12/10)

"The boom in equities that marked the '80s appears likely to be succeeded by a boom in bond prices that might last well into the '90s," MARTIN PRING, publisher of "Pring Market Review," writes in "Barron's" this week. ("Barron's", 12/10)

THE ECONOMY:

"My own guess is that GNP is now falling in this quarter at a rate of about 3%

or 4%, far beyond the expectations of the consensus economists' forecast and we're in a wing-ding rapid decline in the economy," says BILL WOLMAN, of "BusinessWeek" and "CNBC." "This is a real recession. And even if we suddenly turned, it's a recession because it's a very, very sharp decline. These are staggering [unemployment] numbers. It's very, very serious." He adds, "Today's markets [Friday] were a perfect recession market: bonds strong, stocks week - a perfect recession market. Things could get brighter if the Fed eases enough before Christmas." (CNBC "Market Wrap-Up", 12/7)

GORDON RICHARDS, economist at the NATIONAL ASSOCIATION OF MANUFACTURERS, says the November unemployment report "pretty much confirms that [the economy] is in the free-fall stage." He was looking for GNP to shrink at an annual rate of 2.5% in the fourth quarter and now thinks it will be as much as 3%. EDWARD YARDENI, senior economist at PRUDENTIAL-BACHE, says, "Every economist is willing to use the 'R' word now. The news is so bad, it actually holds some good news" because it will goad the Fed into further easing. ("USA Today", 12/10)

"We have increasing pieces of information that we can pull out to look at to say the economy is in recession," says ROBERT BRUSCA at NIKKO SECURITIES. "We don't have to talk about soft landings, about slowdowns, about slumps, about credit crunches. There is only one thing we have to talk about and that's recession." He says, "This is beginning to look about as bad as any recession looks" and suggests the Fed "will have to change its gradualist ways, and soon if it is to stop the economic deterioration." (CNBC "Market Wrap-Up", 12/7 and WSJ, 12/10)

"I can't remember a time when we had such large job losses," says ROBERT GAY of MORGAN STANLEY. Managers are cutting jobs in anticipation of a slowdown, perhaps creating a self-fulfilling prophecy, according to Gay. ALAN LERNER of BANKERS TRUST says these low employment numbers may be harbingers of "deep recession, depression levels." (FNN "Marketwrap", 12/7)

DOUG HANDLER, manager of economic analysis for DUN & BRADSTREET, says the unemployment report was "one of the most depressing releases I've seen in years." Even so, he says the official unemployment rate of 5.9% may not accurately depict the level of stress on labor markets. "If the labor force had not been contracting [the rate] would be skyrocketing," he says. RAY STONE at STONE & McCARTHY RESEARCH ASSOCIATES agrees that the rate "isn't a bad number in and of itself. But what is alarming is that it has decidedly turned upward and one shouldn't expect that [unemployment] would rise sharply" given modest growth in the labor force. ("USA Today" and "Investor's Daily", 12/10)

Friday's employment report should convert "anybody who had a doubt before these numbers," says EDWARD CAMPBELL of BROWN BROTHERS HARRIMAN & CO. The jobs numbers were some of the worst in a decade. ("Nightly Business Report", 12/7)

"It's unambiguously clear that we're now in a recession," says RICHARD RAHN of the U.S. CHAMBER OF COMMERCE. He blames "policy mistakes" made in Washington, specifically Fed actions. "A lot of Americans are suffering as a result," says Rahn. (CNN "Moneyline", 12/7)

#90344p1447 12/10/1990 ~PR Newswire

GAINESVILLE, FL (DEC. 10) PR NEWSWIRE - Gates Energy Products has introduced a new rechargeable battery system specifically for Texas Instruments' new TravelMate(TM) 3000 notebook PC. The new computer, measuring 8.5 inches wide by 11 inches long by 1.8 inches deep, has both the power and performance of a 20MHz 386SX desktop and weighs only 5.7 pounds including the battery.

The TravelMate battery is a specially configured system from Gates Energy's new ULTRAMAX(TM) product line. Comprised of D size cells, the battery pack provides 5000 mAh and is the highest capacity nickel-cadmium battery available today. The ULTRAMAX cells, developed specifically for portable computers, offer up to 70 percent longer run times than standard nickel-cadmium batteries.

The TravelMate 3000 is aimed at users who require the utmost in portability and need the power of their 386SX PC. The ULTRAMAX batteries represent another dramatic step in the evolution of nickel-cadmium battery technology for the new smaller, lighter-weight laptops and notebooks. "Gates new ULTRAMAX technology is a major achievement in boosting battery life in our notebook computers," said Vaughn Watts, portable products engineering manager of Texas Instruments. "Not only does it allow our new TravelMate 3000 to run longer under battery operation, but it provides quicker recharge which consumers insisted they needed."

The TravelMate 3000, designed and manufactured at the Texas Instruments Temple Texas facility, will be available through TI's Peripheral Products Division's distributors, value-added resellers and dealers.

Gates Energy Products is North America's largest manufacturer of sealed, rechargeable batteries. Earlier this year, Gates Energy introduced the ULTRAMAX line to manufacturers of battery-powered products. The ULTRAMAX line consists of six battery sizes: AA 800mAh, 4/5Af 1000mAh, 7/5Af 1700mAh, Cs 2000mAh, CsC 2300mAh, C 2800mAh and D 5000mAh. All cells, when used with proper charge termination techniques, can accept three to five hour and one hour fast charging.

Gates Energy Products also introduced VALUMAX(TM), the world's highest capacity standard line, late last year. The company entered the retail business with its rechargeable Millennium(TM) Power System in early 1990. Manufacturing, assembly and distribution operations are located in Gainesville Warrensburg, Mo.; El Paso, Texas; Juarez, Mexico; Newcastle-under-Lyme, Great

Britain; and Hong Kong.

OREM, UT (DEC. 10) PR NEWSWIRE - Wicat Systems Inc. (NASDAQ: WCAT) announced today it has been selected by the Civil Aviation Authority of China (CAAC) to provide computer-based training (CBT) products for the company's flight training. The CAAC is the parent organization of Air China.

The training system was purchased through an intermediary company, Airtrust International Corp., a Texas City (Texas) engineering firm and supplier to the CAAC.

Under terms of the recent agreement, Wicat provided CBT products for Boeing 747-400 pilot transition training. The new computer lab includes several of Wicat's 12 Mhz, 80286-based, MS-DOS compatible WITS 2000 computers running courseware jointly developed by Wicat and Boeing Commercial Airplanes of Seattle.

The sale is part of a CAAC trial program to investigate the benefits of computer-based training for aviation personnel. If the trial program proves successful, CAAC plans to increase its use of computer-based training.

Wicat Systems, is a world leader in technology-based training and education solutions, providing products and services to help clients achieve 30 to 50 percent learning improvement in schools, industry and government. Wicat's stock is traded in the NASDAQ market under the symbol WCAT.

PALO ALTO, CA (DEC. 10) PR NEWSWIRE - Dialog Information Services Inc. and Teikoku Databank Ltd. have announced an agreement in which Teikoku will produce an English-language segment of their prestigious COSMOS2 (Corporate Information File) database for online access via DIALOG(i).

The agreement, which grants Dialog exclusive distribution rights to the database outside of Japan, marks the first time this vital Japanese company information has been translated into English. The database, which will be known as TEIKOKU DATABANK: JAPANESE COMPANIES, will become available during the spring of 1991.

TEIKOKU DATABANK will consist of approximately 50,000 companies which have designated official English company names, and which have overseas business dealings. The database may be expanded in the future to include additional companies and information.

Each company profile in TEIKOKU DATABANK will contain approximately 20 fields, including:

-- Company name, address, and telephone number
-- Japanese Standard Industrial Classification (SIC) code
-- Executive officer name, address, and telephone number
-- Number of employees -- Credit rating -- Sales ranking
-- Declared income
-- Sales for latest reporting term (and previous term if available)
-- Profits for latest reporting term (and previous term if available)
-- Dividends for latest reporting term (and previous term if available) -- Major trading banks

#90344p1472 12/10/1990 ~PR Newswire

IRVINE, CALIF. (DEC. 10) PR NEWSWIRE - Fluor Corp. (NYSE: FLR) today announced net earnings for the year ended Oct. 31, 1990, of $146.9 million, or $1.81 per share, up 35 percent compared with net earnings of $108.5 million, or $1.35 per share a year ago. Revenues advanced 19 percent to $7.4 billion, compared with $6.3 billion in 1989.

Net earnings for fiscal 1990 and 1989 both include nonrecurring gains. As reported in the third quarter of 1990, results included a discontinued operations gain of 10 cents per share from the sale of Pea Ridge Iron Ore Co. Results for 1989 include an 11 cents per share gain from a settlement with the National Iranian Oil Co. net of certain nonrecurring costs.

Fluor Daniel, the company's engineering and construction unit, reported substantially higher earnings compared with the prior year. Engineering and construction backlog grew 14 percent in 1990 to $9.6 billion from $8.4 billion for the prior year on the strength of new awards which totalled $7.6 billion compared with $7.1 billion in 1989.

The combined operating earnings from the company's coal and lead investments were up slightly from 1989 due to a strong advance by A.T. Massey Coal. Operating earnings from Doe Run, the company's lead investment, declined in 1990 due primarily to reduced by-product credits which were exceptionally strong in 1989.

For the fourth quarter of 1990, net earnings rose 40 percent to $40.7 million, or 50 cents per share, compared with $29.1 million, or 36 cents per share a year ago. Revenues were $2 billion, up 18 percent from 1989. New awards for the fourth quarter were $1.8 billion, slightly below the same period in 1989.

Fluor Corp. is an international engineering, construction, maintenance and technical services company with investments in coal and lead.

#90344p1473 12/10/1990 ~PR Newswire

INDIANAPOLIS (DEC. 10) PR NEWSWIRE - Autoworks today introduced a citywide reclamation program for the collection and reprocessing of used motor oil.

According to Brian Holeman, company spokesperson, the effort is focused on the return and recycling of used oil. "The program offers consumers on easy, clean, environmentally smart way to collect and return used motor oil to any of our stores. And let's face it, we have the outlets. We offer both point-of-purchase and point-of-return." Added Holeman, "Plus, we'll provide people with the opportunity to purchase a simple oil drain and storage device that can be used and returned over and over again."

Autoworks has made an agreement with a local recycler to collect and transfer the oil for later reprocessing, Holeman said. One of the largest programs of its kind in the United States, the recycling effort provides individuals with a way to deal with a problem that is growing, and poses severe environmental concerns. Sources estimate that used motor oil from one oil change can contaminate up to 1 million gallons of drinking water -- enough fresh water for 50 people during a year.

Holeman said the program, which has been implemented in several states, will be introduced nationwide over the next 18 months.

Northern Automotive Corp. is the largest automotive aftermarket specialty retailer in the United States. In total, the chain manages more than 800 stores throughout 25 states in the West and Midwest. Autoworks currently operates 35 stores in the Indianapolis area.

The stores currently operate as Autoworks in the Midwest; Schuck's in the Northwest; Kragen in California; Checker in the Rocky Mountain and Southwestern states; and Crown in the Plain states.

BRIDGEWATER, N.J. (DEC. 10) PR NEWSWIRE - Integrated Network Corporation (INC), a designer and manufacturer of intelligent network systems and data communications products, today announced that Codex Corporation's Systems Division will distribute and market INC's CM-1056 and CM-1056E CSU/DSUs for switched high speed applications through custom system integration bids.

Codex Corporation, headquartered in Mansfield, Mass., is a major manufacturer of private network data communications equipment. INC's products complement Codex's product line by offering access to new switched digital services being offered by local and long distance carriers.

The 1056 products to be distributed by Codex Systems Division are used extensively for videoconferencing, bulk data transfer and dial back-up applications using switched 56 services. INC currently sells these products through its own salesforce and through value added resellers. According to Bryan Hall, INC product line manager, "Codex has a large national salesforce which will enhance the distribution and availability of our 1056 products to Codex Systems Division customers. The decision to carry our products is supported by the growing customer interest in 'bandwidth on demand' services. With Codex's complete line of private network equipment and INC's switched network access units, customers will now be able to configure fail safe networks for their mission critical applications."

Headquartered in Bridgewater, N.J., INC designs and manufactures intelligent systems that provide universal access to advanced voice and data services. In addition, INC manufactures and markets an expanding line of customer premises equipment for high speed digital services.

#90344p1482 12/10/1990 ~PR Newswire
LONDON (DEC. 10) PR NEWSWIRE - SmithKline Beecham (NYSE: SBH) today announced a restructuring of the company's board of directors in which the present board of 10 executive and 10 non-executive members will be replaced by a 16-member board with seven executive and nine non-executive members.

Describing the restructuring, Chairman Henry Wendt said: "Following the merger last year, our focus has been on the successful creation of a new company. As we move to the next phase our focus is on directing the development of SmithKline Beecham as a growing force in global health care.

"Change of this order begins in the board room. We believe the board should

reflect the transnational nature of our company. We also believe a board smaller than the present 20 members is now appropriate. Finally, we believe successful corporate governance now and in the future requires a board comprised of a majority of non-executive directors experienced in corporate matters, a broad perspective, and representative of a variety of points of view."

Wendt said that Alain Gomez, 52, a French national who is chairman and chief executive officer of Thomson SA, the leading French-based worldwide supplier of electronics and defense equipment, will be joining the SmithKline Beecham Board Jan. 1, 1991. Prior to joining Thomson in 1982 Gomez was chairman and chief executive officer of the glass and packaging division of Saint Gobain SA.

"Mr. Gomez has important experience in the international arena that will play a vital role in the deliberations of the new board," Wendt said.

Other non-executive members remaining on the board are: Andrew R. F. Buxton, Francis P. Lucier, William Grant, James White, Sir Robert Clark, Donald McHenry, Ralph A. Pfeiffer, Jr., and Sir Peter Walters. Sir John Kingman and Handel Evans, who had served as non-executive members have submitted their resignations.

In addition to Wendt, executive members remaining on the board are: Robert P. Bauman, chief executive; Dr. Keith Mansford, chairman, research and development; Jan Leschly, chairman, Pharmaceuticals; Frederick W. Kyle, president, commercial operations, Pharmaceuticals; Hugh R. Collum, finance director/chief financial officer; and John Hunter, chairman-Consumer Brands.

The executive board members submitting their resignations are: Kenneth Kermes, corporate development director; Peter Jackson, corporate personnel director, and Martyn Greenacre, chairman-European Pharmaceuticals. They continue as senior corporate executives and members of the executive committee, the company's top management forum.

#90344p1485 12/10/1990 ~PR Newswire

LOS ANGELES (DEC. 10) PR NEWSWIRE - Security Pacific Corporation (NYSE: SPC) is taking action to strengthen its profitable core businesses by disbanding its Merchant Bank; building its reserves for credit losses; and establishing other reserves which will result in reducing its net income for the full year 1990 to the range of $160 million to $200 million. The actions are expected to produce a fourth quarter loss in the range of $320 million to $360 million.

Robert H. Smith, president and chief executive officer, said, "Security Pacific has very strong core businesses in California, in the Pacific Northwest, and in our nationwide consumer and business finance companies. With this organizational and financial restructuring, we will allocate more of our capital to those strong and very profitable basic businesses. Our objective is to directly focus our strategies and our resources on the areas where we can consistently achieve solid profit growth. As a result of these actions, the corporation expects to substantially strengthen its future profitability. The overall strengths of the corporation permit us to take these actions at this time."

"We will establish a reserve to cover the costs of restructuring our merchant banking activity, which will result in a charge of approximately $200 million in the fourth quarter. We expect to sell, downsize, or completely withdraw from many of our European and Australian activities, due to dramatic and continuing changes in economic and financial markets. The plan includes the consolidation of traditionally profitable wholesale banking units into other parts of the corporation, with the elimination of underperforming units, and those which do not fit well with our consistently profitable core business activities," Smith said.

"Although we have increased our provisions for credit losses by 60 percent over the prior year to a total of $541 million through the first three quarters of 1990, we will be making a fourth-quarter provision in the range of $600 million to our reserve due to recent economic deterioration in a number of international and domestic markets. This provision is expected to be approximately $275 million in excess of anticipated fourth quarter loan losses. This significantly increased provision will bring our overall credit loss reserve to approximately 2.2 percent of total loans and leases outstanding, up from 1.8 percent at the end of the third quarter. We are also establishing an additional reserve of $50 million in anticipation of the accelerated disposition of commercial real estate acquired through foreclosure " Smith said.

With regard to dividend policy, management anticipates that it will recommend to the board of directors at its regular meeting in January 1991, that the quarterly dividend be maintained at its current level of $.63 per share, given SPC's historically strong core earnings sources, and its outlook for future profitability.

After these actions, at Dec. 31, 1990, the corporation's Tier 1 capital ratio is expected to be approximately 4.1 percent of risk-adjusted assets, which exceeds the year-end 1992 minimum regulatory capital guidelines.

MINNEAPOLIS (DEC. 10) PR NEWSWIRE - Country Lake Foods Inc. (NASDAQ:CLFI) today became the first in the United States to announce introduction of an all-dairy milk with less cholesterol. The company's new LAND O LAKES(R) 2% Lowfat Milk with 60% Less Cholesterol represents a major technological breakthrough in dairy product development. It will be available to Minnesota consumers in a few weeks.

In addition, Country Lake Foods is currently working on the development of a full line of milk products with less cholesterol. The company expects to achieve a cholesterol reduction of up to 80 percent in whole milk, Thomas N. Packard, president, said.

The new products will be marketed under the LAND O LAKES brand name, which is licensed to Country Lake Foods.

"The development of cholesterol-reduced milk by Land O' Lakes is a significant advance for the dairy industry," Packard said. "The cholesterol is removed naturally, and the final composition of the milk is unchanged with the exception of the dramatic reduction in cholesterol."

"Our totally natural milk with less cholesterol offers consumers a new choice in milk that provides all the benefits of an all-dairy product including great taste," Packard said.

Other cholesterol-reduced milk-type products currently available in the U.S. contain substances that replace natural milk ingredients. These products, called "filled" milk, are not natural dairy products.

Headquartered in Minneapolis, Country Lake Foods produces and distributes fresh packaged milk, ice cream, other dairy products and fruit juices in a six-state Midwest region.

CAMBRIDGE, MA (DEC. 10) PR NEWSWIRE - Cunningham Communication, Inc. is expanding to the East Coast and today announced the establishment of an office here.

Founded in 1985 and offering a full range of communication, marketing, and public relations consulting services, including strategic communication planning, product positioning, sales and distribution strategies, press relations, and events management, Cunningham Communication has grown to be one of the San Francisco Bay Area's largest agencies, serving such clients as Motorola, Hewlett-Packard, Kodak, Aldus, Borland, and Autodesk.

"Our goal is to redefine the way companies view communication and public relations," said Andrea Cunningham, president and founder of the agency. "By establishing partnerships with our clients, we help them win in the marketplace. With an office in Cambridge, we can better serve clients throughout the country with no geographical limitations."

Cunningham's expansion will enable the agency to provide an increased level of service to its current client base, and to service clients in the country's major high technology centers. Maura FitzGerald, former senior vice president of Miller Communications, Inc., will manage Cunningham's East Coast office.

FitzGerald brings more than 15 years of experience in public relations and journalism to Cunningham's newest senior post. At Miller, FitzGerald was

responsible for the comprehensive strategic communication planning efforts for a variety of clients, including Compaq Computer Corp., Thinking Machines Corp. and American Superconductor Corp.

Cunningham Communication, Inc. is Silicon Valley-based consulting firm specializing in the development and implementation of strategic communication and marketing strategies for high technology companies.

Portfolio clients include Aldus Corp., Autodesk's Multimedia Division, Borland International, C-Cube Microsystems, Digital F/X, Eastman-Kodak, Electronic Arts, Hewlett-Packard Computer Systems Group, Information Networks Group and Software Engineering Systems Division, Interactive Systems, Metaphor Corp., Motorola Microprocessor and Memory Technologies, Network General, ParcPlace Systems and Truevision. The firm was established in 1985 and currently employs 40 associates.

MCLEAN, VA (DEC. 10) PR NEWSWIRE - Excalibur Technologies Corporation (NASDAQ: EXCA), a software development and marketing company, today announced the release of its Ultrix version of PixTex and Savvy/TRS, new generation text and image retrieval software for Digital Equipment Corporation's Unix systems and workstations. Ultrix is Digital's trademarked name for its Unix operating system.

"We are releasing PixTex and Savvy/TRS on Ultrix in response to demand from our users who are excited about having document image processing on Digital's workstations," said Pat Patterson, executive vice president of Excalibur Technologies Corporation. "The open architecture of Ultrix coupled with the high performance capabilities of reduced instruction computing is the perfect platform for document imaging systems. We believe that PixTex and Savvy/TRS are the most powerful and versatile electronic filing and imaging software products available today."

The Ultrix version of PixTex now features a user-definable thesaurus, unlimited data indexing, customizable windows, enhanced filing capability and multiple image display. "PixTex enables a company to locate information anywhere on its network and gives users rapid and accurate access to documents eliminating the problems of lost or misfiled papers," said Patterson.

The PixTex and Savvy/TRS software products are available directly from Digital Equipment Corporation under a distribution agreement with Excalibur. Digital and Excalibur target the fast-growing workstation market with this off-the-shelf product which provides content-based retrieval of text and

images. Imaging systems using Excalibur's software are now being used in the oil and gas, aerospace, insurance, semiconductor, pharmaceutical, petro-chemical and banking industries.

Excalibur Technologies Corporation is located at 2000 Corporate Ridge, Suite 1095, McLean, Va. 22102; telephone 703-790-2110.

#90344p1498 12/10/1990 ~PR Newswire

CERRITOS, CA (DEC. 10) PR NEWSWIRE - Cardis Corp. (OTC) achieved operating profits for the second quarter and six months ended Oct. 31, 1990, although interest expense contributed to a net loss for both periods.

Operating profit before interest expense was $264,000 in the second quarter versus an operating loss of $382,000 last year. The company reported a net loss of $871,000, or eight cents per share, for the quarter compared with a net loss of $1,334,000, or 12 cents per share, in the same period a year ago. Results reflect interest expense of $1,207,000 in the fiscal 1991 period versus $3,000 a year ago, when the company was operating under Chapter 11 bankruptcy protection. The company posted net sales of $21,114,000 for the three-month period, compared with $21,956,000 a year earlier.

For the six months ended Oct. 31, the company posted an operating profit of $223,000, versus an operating loss of $1,218,000 a year ago. Interest expense of $2,394,000 resulted in a loss of $2,042,000, or 19 cents per share, in the six months of fiscal 1991. In the prior-year period, the company incurred a net loss of $3,096,000, or 28 cents per share, including an extraordinary item associated with the debt restructuring and reorganization costs. Six-month revenue in fiscal 1991 was $42,632,000 compared with $43,257,000 a year earlier.

With the company's emergence from bankruptcy in December 1989, interest on debt has been charged to operations at contractual rates.

Kenneth D. Walker, Cardis president and chief executive officer, said the improved operating results reflected the continuing higher gross margins and further reductions in expenses, consistent with management's objectives.

Cardis Corp. currently operates nine warehouse distribution centers and 22 retail stores located throughout California.

ANAHEIM, CA (DEC. 10) PR NEWSWIRE - Odetics (AMEX: OA, OB) today announced the appointment of Donald Greenspan, division manager, Precision Time Division; Margaret Lamb, director of program management, Space Division; and Richard Petit, general manager, Automated Tape Library Division as vice presidents and officers of the company.

According to Joel Slutzky, chairman of the board and chief executive officer of Odetics, the announcment of these new officers reflects a continuing effort to place decision-making authority with the company's operating divisions. "The best decisions are made by people who are closest to the action," said Slutzky. "The election of Don Greenspan, Margaret Lamb and Dick Petit as company officers recognizes the outstanding leadership they provide to their respective divisions.

"In addition," Slutzky continues, "their combined 44 years of experience with Odetics, coupled with their diverse backgrounds, provides a balanced viewpoint to the board. While all three manage major business operations, they come from very different areas of the company -- Don from sales and marketing, Dick from engineering and Margaret from quality."

Odetics, headquartered in Anaheim, California, is a leading manufacturer of intelligent machines, including information systems, for collecting digital and analog data, as well as robotic and artificial intelligence systems.

SEOUL, R.O.K. (DEC. 10) PR NEWSWIRE - Cadence Korea Ltd. today announced that Goldstar Electron Co. Ltd. has selected Cadence's Opus(TM) IC Design System integrated circuit design software and Design Framework II architecture for the design of Goldstar Electron's next generation memory, applications-specific integrated circuit (ASIC) product families and custom integrated circuit services. Cadence Korea also announced that Goldstar Electron completed a major purchase of Cadence Opus tools during the third quarter 1990.

Goldstar Electron, a member company of the Lucky Goldstar Group which handles all of Lucky Goldstar's internal and external semiconductor business, chose the Cadence software after a comprehensive six-month competitive evaluation to determine the electronic design automation technology Goldstar Electron would require during the 1990s to become a worldwide IC supplier of DRAMs as well as gate array- and standard cell-based products and services.

Goldstar Electron has already received shipments of the Cadence Opus integrated circuit design software products, including the Cadence design entry system; Verilog(R) logic simulator and other verification tools; Gate Ensemble(TM) gate array layout package; and Dracula(R) IC layout verification package, all operating within the Cadence Design Framework II architecture.

In addition to Goldstar Electron, other Cadence Korea customers include divisions and member companies of Samsung, Hyundai and Daewoo.

Cadence Design Systems Inc. (NYSE: CDN) is a leader in the design, development and marketing of software solutions for the design of integrated circuits and electronic systems. Cadence, with offices throughout the U.S., Europe and Asia, is headquartered in San Jose, Calif., and is traded on the NYSE under the symbol CDN.

LAGUNA HILLS, CALIF. (DEC. 10) PR NEWSWIRE - Community Psychiatric Centers (NYSE: CMY) announced today that total patient days in its psychiatric hospitals increased 13.3 percent during the fourth quarter ended Nov. 30, 1990. During the same period patient days in established hospitals (those open for more than 12 months during the reporting period) rose by 7.5 percent. Total admissions and admissions in established hospitals were up 20.4 percent and 11.0 percent, respectively, for the fourth quarter.

A statistical tabulation of this information and similar information for the full year 1990 follows:

COMMUNITY PSYCHIATRIC CENTERS
Patient Admissions Data

	4th Qtr. 1990	4th Qtr. 1989	Percent Increase
Total admissions	9,798	8,136	20.4
Total patient days	202,856	179,080	13.3
Average length of stay	20.7	22.0	---
Admissions in established hospitals (those open for more than 12 months during reporting period)	9,027	8,136	11.0
Patient days in established hospitals	192,453	179,080	7.5
Average length of stay	21.3	22.0	---
	Year 1990	Year 1989	Percent Increase
Total admissions	35,701	32,662	9.3
Total patient days	768,795	726,989	5.8
Average length of stay	21.5	22.3	---
Admissions in established hospitals (those open for more than 12 months during reporting period)	33,395	32,662	2.2
Patient days in established hospitals	731,497	726,989	0.6
Average length of stay	21.9	22.3	---

Financial results for the fourth quarter and year will be released at the end of January 1991 when the audit has been completed.

Community Psychiatric Centers owns and manages a chain of acute psychiatric hospitals. These facilities are located across the United States, primarily in the western and southeastern sections, and in the United Kingdom.

The stock of Community Psychiatric Centers is traded on the New York, Boston, Midwest and Pacific Stock Exchanges.

SAN JOSE, CA (DEC. 10) PR NEWSWIRE - Cadence Design Systems Inc., (NYSE: CDN) a worldwide leader in electronic design automation (EDA) software, today

announced an agreement with Intel Corp. (NASDAQ: INTC) (Santa Clara, Calif.) to provide Intel with Cadence's Opus(TM) IC Design System and Design Framework II(TM) architecture technology. The Cadence tools will be utilized by internal design teams in the design of complex VLSI circuits.

"We selected the Cadence products after an intensive evaluation process of commercially available EDA offerings," said Albert Yu, Intel vice president and general manager of its Micro Products Group. "Our current tools will be supplemented with the features found in the Opus tool set."

The Cadence Design Framework II will support Intel's team engineering environment. In addition to Design Framework II, Intel will use Cadence's symbolic layout tools and Cadence's industry-standard Dracula(R) physical layout verification package.

Joseph B. Costello, Cadence's president and chief executive officer, said, "We are delighted that Intel has selected our software for internal adoption from among the offerings available from EDA developers.

"We are pleased that Intel has decided to use our Design Framework II to complement Intel's internal CAD tools with the commercially-proven Cadence offerings. We look forward to a long-term and mutually rewarding relationship with Intel."

Intel Corp. is an international manufacturer of microcomputer components, modules, and sytems.

Cadence Design Systems Inc. is a leader in the design, development and marketing of software solutions for the design of integrated circuits and electronics systems. Cadence, with offices throughout the U.S., Europe and Asia, is headquartered in San Jose and is traded on the NYSE under the symbol CDN.

VANCOUVER, BRITISH COLUMBIA (DEC. 10) PR NEWSWIRE - Granges Inc. (AMEX: GXL, Toronto: GXL) announced today that Tony White has accepted appointment to the board of directors of the company to fill the vacancy created by the resignation on Nov. 26, 1990 of Kenneth H. Dredge.

White, a mechanical engineer who resides in Brisbane, Queensland, is currently executive general manager-copper of M.I.M. Holdings Ltd. of Australia, whose wholly-owned subsidiary M.I.M. (Canada) Inc. has recently increased its 32.2 percent interest in Granges to 36.5 percent. White has been with the M.I.M.

Group for 30 years and has worked in the United States, Zambia and Western Australia, holding several senior management positions. In his current position as executive general manager-copper, he is responsible for the copper stream activities of the M.I.M. Group worldwide.

The company also reported that changes in senior management functions prompted the board to approve title changes for several senior management personnel. Effective Nov. 26, 1990, T. Derek Price formerly vice president commercial and acting chief financial officer, becomes vice president finance, R.J. (Don) MacDonald formerly vice president finance, becomes vice president corporate development, and David C. Beling, formerly acting vice president operations, becomes vice president operations (U.S.)

#90344p1510 12/10/1990 ~PR Newswire

ST. PAUL, MN (DEC. 10) PR NEWSWIRE - Northwest Airlines today signed an agreement with Hawaiian Airlines that establishes a wide range of cooperative programs between the two companies, including the transfer to Northwest of Hawaiian's route authority to Australia and a 25 percent ownership in Hawaiian.

Northwest will pay Hawaiian and its parent, HAL Inc., $20 million, including $7 million as a secured loan, as part of the agreement. The pact is subject to government approvals and other conditions.

"The major component of the agreement calls for Northwest and Hawaiian to cooperate in areas of marketing and operations. This will produce major new revenue, significant cost savings and operational efficiencies," stated Tom Talbot, chairman of HAL.

The airlines will engage in other joint activities, such as fuel and parts purchasing, maintenance, revenue accounting, marketing, advertising, frequent flier programs, cargo interchange, and coordinated flight schedules, where savings and benefits will accrue to both Hawaiian and Northwest.

"The agreement fulfills two of our long-standing desires: to strengthen Northwest's presence in Hawaii through a relationship with a leading inter-island carrier, and to expand our international service by entering the Australian market," said John Dasburg, Northwest president and chief executive officer.

"Northwest flies a large number of tourists to Honolulu, and, under the agreement, Hawaiian will be able to best serve these passengers' inter-island transportation needs," Dasburg said.

Under the agreement, Northwest will lease two widebody aircraft, to be operated by Northwest pilots, to Hawaiian so it can operate seven flights a week on the Honolulu-Fukuoka, Japan, route.

In addition to transferring its Australia route to Northwest, Hawaiian also will transfer to Northwest its operating authority to fly between Guam/Saipan and Nagoya/Fukuoka.

Northwest is America's fourth largest airline, serving 130 cities in 41 states Canada, Mexico, the Caribbean, Asia, and Europe. Its Honolulu flight schedule includes nonstops from Tokyo, Osaka, Seoul, Los Angeles, Seattle/Tacoma, San Francisco and, seasonally, Minneapolis/St. Paul.

Honolulu-based Hawaiian Airlines, Inc., Hawaii's largest airline, was founded 61 years ago and serves 22 international and domestic destinations in the Pacific. It operates more than 200 daily flights between the major Hawaiian islands, carrying approximately 4.5 million inter-island passengers a year.

BIRMINGHAM, ALA. (DEC. 10) PR NEWSWIRE - Jones Plumbing Systems Inc. (AMEX: JPS) announced today its third quarter 1990 operating results.

The consolidated net sales for the three-month period ended Sept. 30 were $10,948,002 compared to $10,201,737 for the same period ended 1989. The consolidated net sales for the nine-month period ended Sept. 30 were $31,174,635 compared to $28,796,638 for the same period ended 1989. The consolidated net sales excluding the effect of the sale of water treatment devices which were discontinued June 30, 1989, increased by 7.3 percent ($746,265) and 14 percent ($3,835,797) during the three months and nine months ended Sept. 30, 1990, respectively. Sales in 1989 of water treatment devices amounted to $1,457,800. These increases in sales were the result of new product sales, including J-Hook products, and increased market penetration. Sales of products of a partnership composed of a Jones subsidiary and another entity (Partnership) contributed to the increase in sales for the nine months ended Sept. 30, 1990, but declined during the three months ended Sept. 30, 1990, compared to 1989, due to manufacturing difficulties and the resultant loss of several customers. Jones has made changes in executive and operating personnel of the Partnership to correct these problems.

Gross profit on sales for the three-month period ended Sept. 30 was $3,245,934 compared to $3,287,414 for the same period ended 1989. Gross profit on sales for the nine-month period ended Sept. 30 was $9,663,273 compared to $9,142,639 for the same period ended 1989. Gross profit on sales for the three months

and nine months ended Sept. 30, 1990, decreased and increased, respectively, compared to the comparable periods of 1989. Gross profit as a percentage of net sales decline to 29.6 percent and 31.0 percent for the three months and nine months ended Sept. 30 compared to gross profit percentages of 32.2 percent and 31.7 percent for the comparable periods of 1989. These decreases also are attributable to the Partnership.

Income before taxes for the three-month period ended Sept. 30 was $188,330 compared to $856,017 for the same period ended 1989. Income before taxes for the nine-month period ended Sept. 30 was $1,401,227 compared to $2,113,414 for the same period ended 1989. Income before income taxes decreased $667,687 and $712,187 for the three months and nine months ended Sept. 30, 1990, respectively, compared to the comparable periods of 1989.

Jones Plumbing Systems Inc. is based in Birmingham, Ala., and is a fully integrated manufacturer and distributor of over 11,000 individual plumbing products, related hardware and other items. Its plant includes an automated cast iron foundry, rubber and plastic injection molding equipment, machining, stamping, roll forming and tooling and die facilities. The company sells its products to more than 6,800 customers who are wholesale plumbing suppliers, hardware wholesalers and original equipment manufacturers located primarily throughout the United States.

NEW YORK (DEC. 10) PR NEWSWIRE - The Greater New York Savings Bank (NASDAQ: GRTR) announced today that Marc A. Golden has been elected to serve on the board of directors of the bank effective as of today. Since 1986, Golden has been an investment banker and business consultant, serving as a vice president in the investment banking division of Goldman, Sachs & Co. and, more recently, as a managing director at Prudential-Bache Capital Funding, the investment and merchant banking arm of Prudential-Bache Securities Inc. Previously, Golden was a practicing corporate attorney associated with Cravath, Swain & Moore, a New York law firm. He has also served as a legislative assistant in the United States Senate.

Golden received his undergraduate degree from Yale College in 1975, his masters of business administration degree from Harvard Business School in 1980 and juris doctor degree from Harvard Law School in 1980. He is a member of the New York State Bar as well as the bars of various federal courts, including the United States Supreme Court. Golden resides in New York City.

Charles J. Ohlig, chairman and chief executive officer of The Greater, stated: "We are delighted to have Marc Golden join our board and welcome his outstanding experience in investment banking and law." Golden will serve in

the class of directors whose term of office expires in 1993.

The bank also announced today that George S. Horton will retire from the board of directors of the bank effective as of the 1991 annual meeting of shareholders. At that time Horton will have reached the retirement age of 75 set forth in the bank's by-laws. Ohlig stated: "George Horton has served the bank as a director since 1961. On behalf of the bank, we thank him for his years of faithful service and wish him much happiness in his retirement. He will be missed." With the addition of Golden, the bank will have 12 directors until Horton retires.

The Greater New York Savings Bank is an FDIC insured New York chartered stock savings bank with assets of $3.1 billion, deposits of $2.2 billion and total stockholders' equity of $211 million at Sept. 30, 1990. Nine of its 14 banking offices are located in Brooklyn, where The Greater was originally chartered in 1897, and its five other offices are located in Manhattan, Queens Nassau and Suffolk.

BASKING RIDGE, NJ (DEC. 10) PR NEWSWIRE - AT&T will revise its pricing of Reach Out(R) World service to Mexico on Jan. 1, pending FCC approval. The revisions will include price reductions.

Under the new structure, a direct-dial call from anywhere in the continental United States to Mexico will cost between $.25 and $.90 per minute, depending on which city in Mexico is called.

For example, a ten-minute call at 7 p.m. on Sunday from New York City to Mexico City will cost $9.00, a savings of $3.60 over the current Reach Out World price of $12.60. (See attachment for other examples and for comparisons to regular AT&T international long distance rates to Mexico.)

"Mexico is the second most frequently called country from the United States," said Raul Valasquez, manager, AT&T National Bilingual Center. "Because so many people want to keep in touch with family and friends, we've made our Reach Out World plan for Mexico an even more attractive way to help people do that."

Reach Out World plan prices to Mexico are available from 5 p.m. to 8 a.m. every week day and 24 hours a day on weekends. AT&T will waive the $5 service charge for new Reach Out World customers who sign up before Dec. 31, 1990. Current Reach Out World customers automatically will receive the new discount prices.

AT&T's Reach Out World plan offers savings on calls to more than 40 countries

and areas for a $3 monthly fee. Savings are available at least 13 hours every day and 24 hours a day on weekends. An additional five percent discount applies for each minute of a call longer than ten minutes. Reach Out World customers also receive a five percent discount on interstate direct-dial calls.

For more information about AT&T's Reach Out World service to Mexico and for a savings evaluation, call 1-800-525-6152.

ATLANTA (DEC. 10) PR NEWSWIRE - The Nuclear Regulatory Commission staff has released the results of a Systematic Assessment of Licensee Performance (SALP) report for Carolina Power and Light Company's Brunswick nuclear power plant, located near Southport, N.C., about 30 miles south of Wilmington.

In the report, the NRC said that the overall performance of Brunswick was good and that security at the facility continued to exhibit superior performance. However, the agency said that preliminary improvements observed in the areas of engineering and technical support were overshadowed by problems encountered during replacement of recirculation piping in Unit 2 and problems with the licensed operator requalification training program.

The NRC also said that problems encountered in the areas of plant operations, engineering and technical support, and safety assessment and quality verification were indicative of inadequate management support and involvement at both the site and corporate levels.

The agency told the company that increased management attention is warranted to bring about desired improvements in these areas without neglecting improvement efforts underway or planned in other areas. Here is the list of NRC SALP ratings for Brunswick:

Functional Area	Rating Last Period	Rating This Period
Plant Operations	2	2
Radiological Controls	2	2
Maintenance/Surveillance	2	2 (improving)
Emergency Preparedness	2	2
Security	1	1
Engineering/Technical Support	2	3
Safety Assessment/ Quality Verification	2	2

Category 1 is the best rating available, and Category 3 is the minimum acceptable achievement.

NRC officials will discuss details of the report with CP&L management in a public meeting to be held at the plant Visitor Center at 10 a.m. on Dec. 19. Copies of the report will be available at the meeting.

CONTACT: Ken Clark of the United States Nuclear Regulatory Commission, (404) 331-4503.

#90344p1527 12/10/1990 ~PR Newswire

LOUISVILLE, KY. (DEC. 10) PR NEWSWIRE - Thomas Industries Inc. (NYSE: TII) indicated today continued deterioration of the economy may result in a decline near 10 percent in its year-end earnings, after adjustments for non-recurring items.

Thomas R. Fuller, President and Chief Executive Officer, said economic woes in both Canada and the U.S. are negatively affecting results from Thomas' lighting operations, while domestic orders for fractional horsepower compressors and vacuum pumps produced in U.S. operations are being hurt, as well.

"On the whole, operating income from lighting operations for the second half is essentially flat, although stronger than internal projections. Nonetheless U.S. and Canadian construction markets continue to worsen," Fuller said, "and we are not sure that we have seen the bottom."

Fuller said Thomas has been shielded somewhat for much of the year by a healthy market for the compressors and vacuum pumps it produces in the U.S. and Europe. "We are now seeing an erosion in domestic orders for our OEM pumps and compressors, although those we produce in Europe continue to enjoy solid

markets," he said.

"While we anticipate our fourth quarter to be stronger than that of 1989 after adjustments for non-recurring gains, the quarter will not be strong enough to prevent a decline in earnings for the full year," he said. "We expect the decline will be in the range of 10 percent on an adjusted basis," Fuller said.

Thomas Industries reported 1989 earnings per share of $2.02, including $0.75 attributable to non-recurring items. These non-recurring items included a first quarter gain of $0.21 and a fourth quarter gain of $0.54. Excluding these non-recurring items, Thomas Industries posted earnings per share of $1.27 in 1989. Through the first nine months of 1990, Thomas has reported earnings per share of $0.94.

Thomas Industries Inc. designs, manufactures and markets a broad array of commercial, industrial and residential lighting products, fractional horsepower compressors and vacuum pumps, as well as specialty products, for commercial, industrial and consumer markets. Thomas, with worldwide sales last year in excess of $436 million, has operations in the U.S., Canada, Europe and Asia.

MONTPELIER, VT (DEC. 10) PR NEWSWIRE - Data Communications Group, a Vermont based communications company, announced a nationwide, 24 hour phone service

(1-900-329-2300) called Greet the Troops in Saudi Arabia which allows callers to record news, jokes, gossip, and words of encouragement and support on special 900 lines.

The recordings are then edited to select the most original messages and to eliminate racist or damaging comments and then packaged for shipment to Saudi Arabia. These messages are used to produce a 30 minute radio show.

Once in Saudi Arabia the show may be played on Armed Forces Radio Network as well as distributed on cassettes free of charge for troops to listen to at their leisure.

According to company President, David Davies, "Now anyone can directly support or encourage the brave young men and women who are away from home and loved ones for the holidays serving their country. This is a terrific way for us to do our part to help combat the fear, uncertainty, boredom, and loneliness they are facing out there in the desert. I feel they need all the support and encouragement we can given them." Apparently many agree.

Davies explained that the cost was kept very low so anyone can send a message. "It is actually cheaper than buying a cassette tape, recording it and mailing it yourself." Data-Com will distribute cassettes of messages free to the troops.

Anyone interested in leaving a personal greeting or listening to the messages left by others, can call "Greet the Troops" at 1-900-329-2300. The cost of the call is $1.25 per minute.

CONTACT: Peter Cammann or Dave Davies of Data Communications Group, 1-800-639-3038.

#90344p1534 12/10/1990 ~PR Newswire

ST. LOUIS (DEC. 10) PR NEWSWIRE - Edison Brothers Stores, Inc. (NYSE: EBS), sales grew more than 17 percent in the third quarter, while earnings declined, it was reported today by Andrew E. Newman, chairman, and Martin K. Sneider, president.

The sales gains were attributable largely to new stores and acquisitions. Same-store sales grew only modestly in the third quarter and have continued at similar levels in the fourth quarter.

Edison's earnings for the third quarter were significantly affected by the general slowdown in retail sales during the period. In addition, increased off-price promotions eroded gross margins, contributing to the decline in earnings. The company reports that inventories are in line with current sales levels.

Net income was $11.3 million or 52 cents per share in the quarter ended November 3, 1990. This was a decrease of 28.5 percent in total and 33.3 percent per share compared with net income of $15.8 million or 78 cents per share in the quarter ended Oct. 28, 1989. (Income per share is adjusted for the December 1989 two-for-one stock split.)

Sales for the third quarter of 1990 were $310.6 million, an increase of 17.9 percent over the $263.5 million in the third quarter of 1989.

For the first 39 weeks of 1990, net income was $29.6 million or $1.40 per share. This was down 2.3 percent in total and 7.3 percent per share from $30.3 million or $1.51 per share in the first 39 weeks of 1989 (adjusted for the stock split).

Sales for the first 39 weeks of 1990 were $831.6 million, an increase of 17.7 percent over the $706.4 million in the first 39 weeks of 1989.

During the third quarter of 1990, Edison opened 105 stores, including 34 converted from Foxmoor and Fashion Conspiracy to other chains, and acquired 128 Webster stores. The company closed 26 stores in ongoing chains, ending the period with 2,784 units in operation. The full year will see about 300 store openings (not including acquisitions) and about 150 closings.

Edison Brothers Stores, Inc., operates JW/Jeans West, Coda, Oaktree, J. Riggings, Repp Ltd., and Webster men's apparel stores; 5-7-9 Shops women's apparel stores; Joan Bari accessories boutiques; Bakers, Leeds, Precis, Chandlers, The Wild Pair, Velocity, and Sacha London shoe stores; Fashion Shoe departments in certain department stores; Space Port and Time-Out entertainment centers; and Dave and Buster's restaurant/entertainment complexes.

NEW YORK (DEC. 10) PR NEWSWIRE - Security Pacific Bank (NYSE: SPC) said today it has reached an agreement to begin selling Visa Travelers Cheques issued by Interpayment, a company founded in 1989 by Barclays Bank. This change will take effect Jan. 1, 1991.

"The decision by Security Pacific Bank confirms the value of our strategy to provide neutral-name Visa Travelers Cheques," said John Hayes, president of Interpayment, USA & Latin America.

"Our travelers cheques carry only the name of the selling organizations -- in this case Security Pacific -- and are supported by Visa, one of the world's most widely accepted travelers cheque names," he added.

Many banks and other financial organizations offer travelers cheques bearing the name of the major cheque issuer, Hayes noted. This has the effect of promoting the name and product of a rival.

"Security Pacific Bank's decision to begin selling Visa Travelers Cheques is the strongest possible endorsement of our product and testimony to its strength," added Jean-Jacques Desbons, executive vice president of Visa International. "Visa continues to be the fastest- growing brand of travelers cheques in the world."

"Interpayment, backed by its global network and its state-of-the-art automated services, will provide sales and marketing support for Security Pacific," said Hayes.

The Visa network supports Interpayment Travelers Cheques around the world through a variety of services. These include the Visa Refund Centers, operating 24 hours a day, delivering refunds from over 350,000 locations worldwide, a wide range of currencies, free lost card protection, and advertising/promotional support.

Interpayment is the largest issuer of Visa Travelers Cheques worldwide. Security Pacific Bank is the principal subsidiary of Los Angeles- based Security Pacific Corporation, the nation's fifth largest bank holding company, with more than $88 billion in assets.

BETHESDA, MD. (DEC. 10) PR NEWSWIRE - Martin Marietta Corporation (NYSE: ML) has been awarded a $150.2-million U.S. Army contract for ongoing production of sophisticated helicopter night vision systems.

Martin Marietta Electronic Systems in Orlando, Fla., will deliver an additional 119 Target Acquisition Designation Sight/Pilot Night Vision Sensor (TADS/PNVS) units to the Army beginning in 1992 and continuing until 1994.

TADS/PNVS is an integral component of the Army's AH-64 Apache helicopter, enabling pilots to fly at extremely low altitudes in total darkness and in poor weather, see ground targets, and attack them at standoff ranges.

The new TADS/PNVS order designates 73 systems for U.S. use and 46 units for Egypt and Israel as part of foreign military sales of the Apache helicopter.

The system, currently deployed with Apache helicopters in support of Operation Desert Shield, has achieved 95 percent full mission capability, according to Army data, and also is exceeding reliability specifications.

The latest contract brings total TADS/PNVS orders to 864 systems and cumulative program funding to nearly $2 billion.

DETROIT (DEC. 10) PR NEWSWIRE - Car and Driver magazine has named the 1991 Mercury Tracer LTS, Lincoln-Mercury's all-new sporty sedan, and the entire 1991 Mercury Sable line as two of its "10 Best" cars of 1991.

Lincoln-Mercury is one of four automotive divisions, and the only domestic automaker, to place two cars on the "10 Best" list. "Our first criterion, of course, is excellence," William Jeanes, editor of Car and Driver, said of the selection process. "The second might be stated as a question: 'Would we buy and be seen in this car?' Third is how well the car does the job for which it was intended."

"You will find no wimp-out 'Import' or 'Domestic' designations on our list," Jeanes continued. "We look at cars the same way 80 percent of new-car buyers do: We look for the best one."

"We are extremely honored to have achieved this award." said Ross H. Roberts, Ford Motor Company (NYSE: F) vice president and general manager of Lincoln-Mercury. "This is just one more piece of evidence that we are building and selling cars that provide high quality and good value, as well as a fun driving experience."

Jeanes said the Tracer LTS "gave us more of what we like in a small sedan." "There's excellent fit and finish, enough room, a reasonable price, and a twin-cam, four-cylinder engine that takes Tracer driving out of the humdrum and into the high-grin world," Jeanes said.

The Sable, which shares the award with its stablemate, the Ford Taurus, "still provides the best range of family sedans geared to the mind of the practical folk and the heart of the enthusiast," Jeanes said. "Even the wagons are fun."

The Car and Driver "10 Best" competition, in its ninth year, limits any automotive nameplate from placing more than two cars on the list.

ATLANTA (DEC. 10) PR NEWSWIRE - The Federal Communications Commission has granted an experimental license for BellSouth Enterprises Inc. and Sony Corporation of America to run a technical and limited user trial of a wireless communications system on the University of Georgia campus in Athens, Ga.

The trial will take place over a three-month period beginning immediately and will be available to approximately 35 users.

The Athens trial will involve eight public base stations and 35 single-user base stations which have a transmission range of up to 200 meters each. All trial users will have digital handsets capable of placing outgoing calls through the public base stations. The participants will also have single-user base stations in their homes and/or offices which allow for incoming and outgoing calls on the handsets. Some users will also be provided with pagers to be used in conjunction with their handsets during portions of the trial.

Sony has made arrangements to provide the hardware and the software required for this test from a current equipment manufacturer in the United Kingdom, and BellSouth Enterprises will provide the necessary management and operating infrastructure. The system has been modified to operate on expanded cellular band "B" in the 846.5 to 849 MHz range. This frequency band is already licensed to a subsidiary of BellSouth Enterprises for cellular and other service offerings.

BellSouth Enterprises' Wireless Strategy Group studies the market for and technical viability of a number of wireless systems. The group has completed a nationwide study of broad-based market opportunities for personal communications systems and is conducting a personal communications services trial in Atlanta. The Wireless Strategy Group is part of BellSouth Enterprises which manages a group of companies within BellSouth Corp. (NYSE: BLS) that

provide telecommunications and data processing equipment, mobile telecommunications services and directory advertising publishing services throughout the world.

Sony markets a broad line of consumer telecommunications products including cordless and feature telephones, telephone answering devices and accessories. Sony recently established a research laboratory in northern New Jersey to support the development of telecommunications technologies.

WEST KINGSTON, RI (DEC. 10) PR NEWSWIRE - American Power Conversion Corp. (NASDAQ: APCC) has been selected to provide Uninterruptible Power Supplies (UPS) to computer systems at Army, Navy, and Defense Logistics agency installations under the Small Multiuser Computer (SMC) Contract awarded to systems integrator Electonic Data Systems (EDS) on July 27, 1990.

APC will provide UPS protection to Unix-based Prime computers and Everex workstations used by the government in the United States and abroad. Up to 20,000 computer systems are expected to be provided under the terms of the Prime contract. Over the next several years, APC is expected to supply approximately 42,000 UPS units to protect these systems.

Rodger Dowdell, president, chairman of the board and chief executive officer, said, "Although it's difficult to estimate total value at the outset of the contract, this work could mean as much as $15 million to the company."

"Defense agencies will be performing critical applications on these systems," said Dowdell. "The recent blackouts in Chicago and Manhattan re-emphasize computers' susceptibility to data loss. In this type of environment, UPS protection is essential."

American Power Conversion is a leading manufacturer of uninterruptible power sources (UPS) for use with computers and similar power-sensitive electronic equipment.

HARTFORD, CT (DEC. 10) PR NEWSWIRE - Magellan Petroleum Corporation (NASDAQ: MPET) said its subsidiary, Magellan Petroleum Australia Limited, has completed

the Dingo No. 3 appraisal in central Australia's Amadeus Basin, as a shut-in gas well.

The company said the well recorded a gas flow of 2.8 million cubic feet per day from the Arumbera Sandstone Reservoir at a depth of about 9,700 feet, but that the lower portion of the formation -- which produced gas flows at the two previous Dingo Wells -- was absent at Dingo No. 3.

A Magellan spokesman said the Australian unit and its partners are planning an extensive testing program at Dingo No. 3 as well as a reworking of Dingo No. 2 about one mile to the south, prior to considering further development of the field. He also pointed out that the commerciality of the field would be established by flows of 5 million cubic feet per well per day.

The spokesman further noted that the Navajo Venture, in which the Australian unit has an 11.875 percent interest, is now producing approximately 3,100 barrels of oil and 8.1 million cubic feet of gas per day from its 54,000-acre concession area in the southwestern United States.

NEW YORK (DEC. 10) PR NEWSWIRE - British Airways' (NYSE: BAB) traffic growth in November reflected continued uncertainty in the Gulf coupled with softness in certain economies. Traffic in terms of scheduled revenue passenger miles (RPMs) increased by 4.6 percent compared with the previous year and was in line with growth in the month of October.

The slowdown in traffic growth was evident on both intercontinental and shorthaul services, with an increase in RPMs of 4.9 percent and 3.3 percent, respectively. With a capacity increase of 9.5 percent, there was a 3.0 point reduction in passenger load factor. Cargo continued to grow faster than passenger traffic, with cargo RTMs up by 5.7 percent compared with the previous year.

For the financial year to date, traffic (RPMs) increased by 10.5 percent on a capacity increase of 10.2 percent, producing a passenger load factor of 73.2 percent, up 0.2 points on the previous period. The number of passengers carried on British Airways scheduled services increased by 8.8 percent, and cargo traffic (RTMs) was up by 4.9 percent.

Highlights of the Month British Airways announced September quarter earnings of 116 million pounds sterling ($217 million), up 9.4 percent on the same period last year. An unchanged interim dividend of 31.7 pence per ADR was declared.

British Airways announced the creation of two new brands for passengers traveling in the Economy cabin in an effort to win a greater share of the air travel market. World Traveller on intercontinental services and Euro Traveller on shorthaul services will, from Jan. 15, 1991, offer passengers more comfortable seats, improved catering and a new range of in-flight entertainment, but most importantly, they will provide a new approach to service.

Director of Flight Crew, Captain Colin Barnes, is to become a non- executive director of British Airways Plc and chairman of the board's Air Safety Review Committee with effect from April 1, 1991. Captain Jack Jessop will retire from the board at the same time.

STAMFORD, CT (DEC. 10) PR NEWSWIRE - The Dress Barn, Inc. (NASDAQ-NMS: DBRN) announced today that sales for its first quarter ended Oct. 27, 1990, were $78,694,000 compared with $69,315,000 last year, an increase of 14 percent. Earnings for the 13 week reporting period were $4,082,000, a decrease of 7 percent from the $4,396,000 earned during the 13 week period ended Oct. 28, 1989.

At Oct. 28, 1990, the company operated 502 stores, compared to the 436 it had open at the end of the fiscal period a year ago. Since the end of the fiscal quarter the company has opened eight additional locations.

The Dress Barn, Inc. operates a chain of off-price women's apparel stores, offering in-season, moderate to better quality fashion apparel, primarily with nationally recognized brand names, at substantial discounts from department store prices.

CAMBRIDGE, MA (DEC. 10) PR NEWSWIRE - Cambridge NeuroScience Research, Inc., announced today that it has received a $500,000 Phase II Small Business Innovative Research grant from the National Institutes of Health to develop antipsychotic medicines with improved safety profiles over existing drugs.

Substantial achievements during the NIH-supported Phase I of the project, have enabled the company to project an IND (Investigational New Drug application) filing to the FDA to begin clinical trial in the United States within the next 18 months.

Schizophrenia affects one to two percent of the population throughout the world. Currently, the majority of drugs available for treatment target a particular brain protein known as the dopamine receptor and are associated with severe side effects.

Cambridge NeuroScience is targeting a different protein, the sigma receptor. Findings from Phase I preclinical in vivo studies show that the company's sigma receptor-targeted compounds have been free of dopamine-related side effects and have potential antipsychotic activity.

Cambridge NeuroScience is a Cambridge, Mass. based neuropharmaceutical company which employs advanced drug discovery technologies to develop patentable drugs for the treatment and prevention of severe neurological and psychiatric disorders.

WALTHAM, MASS. (DEC. 10) PR NEWSWIRE - Thermo Electron Corporation (NYSE: TMO) and a majority-owned subsidiary, Thermo Energy Systems Corporation, today announced completion of a sale and leaseback of the $91 million Delano I biomass-fueled power plant in Kern County, California, in a transaction with Westinghouse Credit Corporation.

Delano I, which was completed this fall and has net electric generating capacity of 27 megawatts, is fueled by agricultural and wood wastes. The facility passed its utility capacity demonstration test in excess of 100 percent of its rating. Designed to meet California air-quality standards, Delano I features a high-efficiency fluidized bed combustion system and sophisticated emission controls. The plant's electrical output is being sold to Southern California Edison under a 30-year agreement. Thermo Energy Systems, through Delano Energy Corporation, will operate the facility.

Thermo Energy Systems develops and operates alternative energy power plants,

including biomass-fueled electric power plants and fossil-fueled cogeneration plants. Delano I is one of three biomass-fueled power plants operated through Thermo Energy Systems subsidiaries in California. Thermo Energy Systems also provides operation of alternative energy facilities in New England.

Thermo Electron develops, manufactures, and markets environmental and analytical instruments, custom-engineered and pre-packaged cogeneration systems, industrial process equipment, biomedical materials and products, and fabricated biomedical and aerospace components. The company also provides metallurgical heat treating, water quality engineering,and analytical laboratory services.

NEW YORK (DEC. 10) PR NEWSWIRE - Michael Perry, currently the director responsible for Unilever's personal products operations, is to be appointed to the special committee, Unilever's three-man chief executive. He is also to become a vice president of Unilever PLC.

He will succeed Ronald Archer who will not seek re-election to the boards of Unilever at the annual meetings on May 8, 1991, having reached retirement age. By that time, Archer will have served Unilever for 38 years, 13 of them as a director, including two years on the special committee.

Antony Burgmans, chairman of PT Unilever Indonesia, is to be nominated a director of Unilever at the 1991 annual meetings.

Michael S. Perry, CBE: (born Feb. 26, 1934) joined Unilever in 1957 and was appointed a director in 1985. His previous appointments in Unilever included: chairman Lever Brothers Thailand 1973-77; president Lever y Asoc. Argentina 1977-81; chairman, Nippon Lever KK 1982-83; chairman, UAC International 1985-87; personal products coordinator 1987-91. Perry was awarded the CBE in June 1990 for his services to export as chairman of the Japan Trade Advisory Group.

Ronald W. Archer: (born Dec. 12, 1929) joined Unilever in 1953 and was appointed a director in 1978. He has been a member of the special committee since 1989. His previous posts with Unilever included: vice chairman of Hindustan Lever 1968-70; overseas committee 1970-74; deputy financial director Unilever 1974-78; commercial director, Unilever 1978-83; personnel director, Unilever 1983-89. Archer is a vice chairman of the Halifax Building Society.

Antony Burgmans: (born Feb. 13, 1947) joined Unilever in the Netherlands in 1972 and has been chairman of PT Unilever Indonesia since March 1988. His previous appointments included that of marketing and sales director with Lever

in the Netherlands 1982-85; and marketing director, Lever Germany 1985-87. He studied business administration at Nijenrode, the Netherlands, and social and political sciences in Stockholm. He gained a degree in business administration at Lancaster University.

CHERRY HILL, NJ (DEC. 10) PR NEWSWIRE - Stone & Webster Engineering Corporation will engineer, build and operate a 50-megawatt cogeneration power plant in Binghamton, N.Y., for Binghamton Cogeneration Limited Partnership (BCLP). The company also will procure equipment for and maintain the $60 million facility.

The plant site is adjacent to the Anitec Image Division of International Paper Company complex in Binghamton, which will use some of the thermal energy and electricity generated. Electricity from the cogeneration facility will also be sold to New York State Electric & Gas under a power purchase agreement executed in December 1988.

Cogeneration Partners of America will complete development of the project and will be BCLP's manager during construction and operation of the facility. The partnership consists of subsidiaries of Atlantic Generation, Inc., TriStar Ventures Corporation and Stone & Webster Development Corporation.

Stone & Webster Engineering Corporation, a wholly owned subsidiary of Stone & Webster, Incorporated (NYSE: SW), New York City, engineers and constructs oil/gas processing, petrochemical, chemical, electric- power, industrial, environmental and civil-works facilities around the world. Stone & Webster Development Corporation, another unit of Stone & Webster, Incorporated, develops projects, mainly related to power generation, for which other subsidiaries provide engineering, design and construction management services.

Cogeneration Partners of America is owned by Atlantic Generation, Inc., a wholly owned subsidiary of Atlantic Energy, Inc., and TriStar Ventures Corporation, wholly owned subsidiary of The Columbia Gas System, Inc.

WASHINGTON (DEC. 10) PR NEWSWIRE - Robert W. Maher, president of the Cellular Telecommunications Industry Association (CTIA), last Friday (Dec. 7, 1990) issued the following statement regarding Hughes Aircraft Company's scheduled

Dec. 11 announcement of a new cellular technology:

"I've just been informed by Hughes Network Systems on the plans they will announce on Dec. 11 in New York. I'm excited for the company and for our cellular industry.

"Most people know that historically the cellular telephone industry has grown at a more rapid pace than either facsimile or VCR sales. But our most exciting growth is still ahead. These developments by Hughes Network Systems and General Motors will continue to boost our momentum."

CTIA is the trade association that represents the cellular telephone industry in the United States. It was formed in 1984, shortly after the first cellular systems were activated in the U.S. CTIA now represents more than 90 percent of all licensed cellular carriers and virtually all equipment manufacturers.

Headquartered in Washington, D.C., CTIA represents the industry before regulatory and Congressional bodies, helps oversee the introduction of new technology, and stages the nation's cellular convention each year.

PRINCETON, NJ (DEC. 10) PR NEWSWIRE - Dow Jones Information Services today announced the addition of an electronic clipping service to Dow Jones News/Retrieval.

The Dow Jones Clipping Service keeps News/Retrieval's online subscribers informed 24 hours a day about breaking business news of interest to them. Using the clipping service, subscribers can identify in advance the kinds of articles they want to receive.

The service automatically searches for those articles and stores them in personal electronic folders for later viewing. When users enter News/Retrieval they are alerted to articles that have been clipped.

The clipping service currently searches five exclusive real-time Dow Jones newswires - Dow Jones News Service (the "Broadtape"), Capital Markets Report, Professional Investor Report, Dow Jones International News Services and Federal Filings - and the Business Wire and PR Newswire.

Subscribers access Dow Jones Clipping Service by typing //CLIP. They can then create up to ten folders, each containing as many as five search statements. Because search statements may combine news codes, company and industry symbols and words or phrases, the information //CLIP retrieves may be as broad or as

specific as desired. Stories are held in folders for up to seven days.

"The Dow Jones Clipping Service allows News/Retrieval subscribers to keep on top of the subjects they are most interested in without having to conduct searches themselves," said Richard J. Levine, vice president and editorial director of Dow Jones Information Services. "Subscribers need only check their folders to stay abreast of the latest news and information." Users pay usage and information unit charges and a monthly folder fee.

Dow Jones Information Services is an operating group of Dow Jones & Company, Inc. (NYSE: DJ). Launched in 1974, Dow Jones News/Retrieval provided financial professionals with business and financial news.

With the addition of company data, profiles and more than 500 business publications, Dow Jones News/Retrieval has since become a leading provider of online business news and information. It serves corporate managers as well as financial professionals and personal investors.

Dow Jones is the exclusive online provider of the full text of the Wall Street Journal, Barron's, and the Dow Jones family of domestic and international newswires.

In addition to the Dow Jones newswires and News/Retrieval, Dow Jones publishes the Wall Street Journal, Barron's and the Ottaway group of community newspapers. The company also owns Telerate, Inc., a supplier of real-time financial information, decision support products and transaction services to the international business community.

SHELTON, CT (DEC. 10) PR NEWSWIRE - Data Switch Corporation (NASDAQ: DASW) reported today that it has repurchased $1 million face amount of the company's 8.25 percent convertible subordinated debentures, due 2002.

The debentures were purchased in an unsolicited transaction from a single seller at a purchase price of approximately $580 per $1,000 bond, and will result in a small extraordinary profit in the fourth quarter, according to Michael D. Stashower, Data Switch senior vice president and chief financial officer.

Stashower added that the company had previously purchased approximately $5 million face amount of its 15 percent senior subordinated debentures, due 2000 of which approximately $2 million face amount was purchased in the current quarter. "These purchases, which are possible because of our cash flow, enable us to improve our leverage ratios and reduce our average borrowing

costs."

Stashower stated that the company expects from time to time to acquire senior subordinated debentures in unsolicited transactions, but that it has no immediate repurchase plans.

DETROIT (DEC. 10) PR NEWSWIRE - Ford Motor Company (NYSE: F) is introducing a revised buyer incentive program for the period Dec. 12-Feb. 28 that responds to market tests of dealer and customer preferences.

Ford's present marketing program, which offers customer cash rebates or annual percentage (APR) financing on most 1991 cars and trucks, will expire on Dec. 11. Ford's new program will provide its dealers with alternative cash incentives on most vehicle lines.

"This new program returns the merchandising responsibility to our Ford and Lincoln-Mercury dealers," said Robert L. Rewey, Ford vice president - Sales Operations. "It also enables Ford and its dealers to focus on product advertising and customer satisfaction - which will build owner loyalty - rather than simply selling 'the deal.'

"During the past five months we have tested the new program first in Seattle, and then throughout the Pacific states. We learned that this area not only outperformed the rest of the country, but the dealer and customer satisfaction with the selling process improved significantly."

Exceptions to the new dealer cash programs are customer cash allowances of $500 on the 1991 Ford Escort, Ford Festiva and Mercury Tracer, and $1,000 on the Ford Ranger truck and Mercury Grand Marquis. No customer or dealer cash incentives are offered on 1991 Lincolns, Mercury Capri, and Ford Explorer.

In addition, Ford will offer buyers alternative APR financing of 7.9 percent for 24, 36 and 48 months on the 1991 Escort, Festiva, Tracer, Ranger, and Grand Marquis.

"We are continuing rebates in most of the country on selected models, to ease the transition - for both customers and dealer organizations - to this significantly different way of marketing our products," Rewey said.

CONTACT: David Krupp of Ford, (313) 337-3864.

HOUSTON (DEC. 10) PR NEWSWIRE - Northern Border Pipeline Company and Natural Gas Pipeline Company of America announced today they have signed an agreement under which Northern Border will interconnect with Natural's recently completed Iowa Line.

As part of the agreement, Northern Border will acquire and operate the line, subject to approval by the Federal Energy Regulatory Commission (FERC). Northern Border will reimburse Natural for costs related to construction of the pipeline.

The 150-mile, 30-inch diameter Iowa Line stretches from the current terminus of the Northern Border pipeline, at Ventura, Iowa, in Hancock County, to Natural's compressor Station 109 near Harper, Iowa, in Keokuk County. Construction of the line began in June and was completed at the end of October.

The Northern Border system originates at the Canadian border near Monchy, Saskatchewan, where it joins a pipeline moving gas from the province of Alberta, Canada.

Northern Border and Natural will proceed immediately with the construction of the interconnection facilities at Ventura. That work is expected to be completed within a few weeks and gas transportation under authority of Section 311 of the Natural Gas Policy Act will start promptly upon completion of the of the facilities.

According to Northern Border management committee chairman Larry L. DeRoin, Northern Border will amend its current optional certificate application, now pending before the FERC, to extend its pipeline from Ventura to Tuscola, Illinois, or refile to seek the necessary approvals to purchase the Iowa Line as part of that expansion/extension project. Under the agreement, Northern Border will purchase the Iowa Line upon receipt of an acceptable FERC certificate for the project.

"The agreement includes a provision that Natural will support the proposed purchase and its inclusion in Northern Border's expansion/extension project up to Station 109 before the FERC," DeRoin continued. "We are now pressing forward with added enthusiasm our efforts to secure a certificate for the completion of our project to Tuscola."

"This agreement provides an opportunity to build on the strengths of two existing pipeline systems to improve the efficiency of the interstate gas transportation grid," said John F. Riordan, president and chief executive officer of MidCon Corp., Natural's parent company.

The Northern Border Pipeline Company is a general partnership which includes subsidiaries of four major energy companies: Enron Corp., Houston; TransCanada

PipeLines, Calgary; Panhandle Eastern Corporation, Houston; and The Williams Companies, Inc., Tulsa.

Natural Gas Pipeline Company of America is a unit of MidCon Corp., based in Lombard, Illinois. MidCon is a subsidiary of Occidental Petroleum Corporation, Los Angeles.

#90344p1586 12/10/1990 ~PR Newswire

SALT LAKE CITY (DEC. 10) PR NEWSWIRE - JB's Restaurants Inc. (NASDAQ: JBBB) announced today the completion of an exclusive area development agreement with Sbarro Inc.

This marks the company's entry into the rapidly growing Italian fast-food segment.

"The unique Sbarro concept provides JB's a high-margin vehicle to increase future growth and profitability, and enhance shareholder value," said Fred Gonzales, president and chief operating officer of JB's. "The Sbarro concept complements our core JB's Restaurant concept. Because Sbarro's features Italian entrees in a fast-food format primarily in regional malls, it does not compete directly with the JB's Restaurant concept."

Under the terms of the agreement, JB's obtained the three-year exclusive rights to develop and operate Sbarro restaurants in the Phoenix, Ariz., and Portland, Ore., markets. Plans are to open a minimum of 19 new Sbarro restaurants in these markets and in contiguous markets when and where appropriate. In addition, JB's acquired three operating Sbarro restaurants in Phoenix from Sbarro Inc. and from a Sbarro franchisee.

"Currently, Sbarro is only in approximately 10 percent of the regional malls in the United States. We see tremendous potential for JB's in this area and believe the timing is right to expand the Sbarro concept into our markets," said Gonzales.

To ensure market dominance, JB's will continue new store expansion within its markets to further strengthen its successful JB's Restaurant concept. Also, the company's knowledge of these markets will benefit Sbarro potential in this region.

JB's Restaurants Inc. operates 133 JB's family style restaurants, franchises one JB's family style restaurant, and operates three franchised Sbarro restaurants in the western United States.

AUSTIN, TX (DEC. 10) PR NEWSWIRE - The CompuAdd Corporation today announced the CompuAdd Companion SX for people who have been waiting for a high-performance notebook computer without a high price tag.

The Companion SX, based on the powerful Intel 20MHz 386SX microprocessor, can handle state-of-the-art software programs on the job, in the home or on the run. The new system weighs 5.7 pounds including battery. With dimensions of only 8 inches by 11 inches by 1.8 inches, it can be carried easily in a briefcase.

The base price of $3,995 includes 2MB of RAM, a 20MB hard disk, a built-in 3.5-inch floppy diskette drive and a side-lit, 10-inch diagonal VGA display. The Companion SX also comes with a mouse and preloaded with Microsoft Windows 3.0 and MS-DOS 4.01. The unit can be upgraded to 6MB in 2MB increments; a 40 MB hard disk model is also available for $4,395.

The Companion SX is backed by CompuAdd's 30-day money-back guarantee, one-year warranty and toll-free technical support for the life of the product. It will be available in the first quarter of 1991 through CompuAdd's company-owned stores and direct marketing channels.

CONTACT: John Q. Pope of CompuAdd, 512-250-2000.

PLYMOUTH MEETING, PA. (DEC. 10) PR NEWSWIRE - Charter Power Systems Inc. (AMEX: CHP) announced today that net income for its third quarter ended Oct. 31, 1990, rose 23 percent to $1,263,000 or 22 cents a share, from $1,030,000 or 18 cents a share earned in the third quarter of 1989.

Sales for the period increased 7 percent to $42.1 million from $39.4 million in the prior year.

For the nine months ended Oct. 31, 1990, net income rose 64 percent to a record $3,977,000 or 70 cents a share, up from $2,425,000 or 43 cents a share for the same period in the previous year. Sales were a record $125.3 million, 5 percent higher than sales of $118.9 million reported in the first nine months of last year.

Chairman of the Board and Chief Executive Officer Robert Alvine stated, "The

company is pleased with the continued strong operating results, particularly in light of the more difficult economic environment. We intend to continue to pursue strategies and programs to further enhance our opportunities in the future. We also expect to continue to strengthen the company's balance sheet by reducing long-term debt."

The company's net cash flows of $10,338,000 provided by operating activities for the nine months ended Oct. 31, 1990, rose 9 percent from the same period a year ago. For the eighth consecutive quarter, long- term debt was reduced, reaching a new low of $41,504,000. This combined with more favorable terms negotiated last year and lower base rates, reduced the company's third quarter interest expense by 23 percent to $1,053,000 from $1,365,000 during the same period last year.

"While overall economic weakness in the U.S. and Canadian economies is expected to continue in the fourth quarter, its effect on the company's performance should be mitigated by our enhanced operational effectiveness and reduced interest expense," added Alvine.

Charter Power Systems is a leading manufacturer of battery power systems and their components for commercial, industrial and government use in the North American standby power and motive power markets.

SADDLE BROOK, N.J. (DEC. 10) PR NEWSWIRE - Vornado, Inc. (NYSE: VNO) reported today a loss for the third quarter ended Oct. 27, 1990 of $2.3 million or $1.10 per share, compared to a profit in last year's third quarter of $4.1 million or $1.81 per share. For the nine months, Vornado reported profits of $4.3 million or $1.98 per share, compared to $9.1 million or $3.97 per share in the previous year.

Vornado's third quarter loss results from inventory write-downs in its merchandising operation and from unrealized losses in its securities portfolio. Operating cash flow from its core real estate business improved to $10.9 million in this year's third quarter, compared to $10.7 million in the same period last year.

#90344p1596 12/10/1990 ~PR Newswire

NEW YORK (DEC. 10) PR NEWSWIRE - United Airlines and Amtrak today unveiled an exclusive new Air-Rail transportation package that will enable travelers to purchase exciting vacations combining the best of both worlds - air travel on United and train travel on Amtrak.

Reservations for the air-rail transportation packages, which are competitive with existing round-trip excursion air fares, will be accepted after Jan. 2 as part of Amtrak's 1991 Great American Vacations program. United will be Amtrak's airline partner for the air-rail packages which feature flexible round-trip itineraries, including stopovers.

Amtrak's Air-Rail Travel Plan can be a transportation-only package or it can be combined with another Amtrak Great American Vacations package to include lodging and sightseeing, a cruise or escorted tours. All Amtrak Great American Vacations travel agency bookings are commissionable.

Amtrak's Air-Rail transportation plan may be used for coach-class transcontinental trips or regional travel to any Amtrak or United destination in the continental United States (except Alaska). The transcontinental fares will begin at $419 but will be $499 during the high season (summer and Christmas through New Year's). Regional programs - featuring selected gateways - range from as low as $299 to $419 in the fall, winter and spring and $349 to $489 in the summer.

Amtrak's Air-Rail Travel Plan is designed for use in two ways: travel one way by rail and return by air; or travel by air to a gateway city, travel around the region by rail, and return to a gateway city for a flight home.

For example, a traveler could fly from Phoenix to Chicago on United, travel around the East and South on Amtrak, ending up in New Orleans for a flight back to Phoenix. Three stopovers are allowed on the rail portion of the journey.

"Amtrak knows it can attract thousands of new passengers with this program," said Timothy P. Gardner, Amtrak's vice president of passenger marketing. "Long-distance train trips have enormous appeal among prospective Amtrak passengers, but many people lack the vacation time for a cross country train trip both ways. The Amtrak Air-Rail Travel Plan will enable travelers to take an extended train trip and then fly home," he said.

Route compatibility and new marketing opportunities are principal reasons for the Amtrak-United agreement, said Christopher D. Bowers, United's vice president and general sales manager.

#90344p1604 12/10/1990 ~PR Newswire

NORTH PALM BEACH, FL (DEC. 10) PR NEWSWIRE - Golden Bear International, Inc., today announced the formation of the Jack Nicklaus/Jim Flick Golf Schools for the domestic market. The schools draw upon the collective expertise of Jack Nicklaus' competitive career and Jim Flick's 35 years of teaching. The first Nicklaus/Flick Schools will be operating in 1991 at Desert Mountain in Scottsdale, Ariz; Columbia Lakes, a resort conference center south of Houston; and PGA National in Palm Beach Gardens, Fla.

"Entering this golf school business is a logical and very credible expansion of our golf business activities," said Nicklaus from the headquarters of Golden Bear International. "Because golf is an endless learning process, I've worked with teachers throughout my career. Skilled instruction is the fastest way -- if not the only way -- to play the game as well as you are able.

"We spent more than a year looking for a person who shared my concepts of how the game can be played most easily and consistently and who could communicate these ideas to golfers of all ability levels," said Nicklaus. "What allowed us to go forward is the unique combination of my experience as a player and Jim Flick's success as a top teacher."

Although friendly for years, Nicklaus and Flick first worked together earlier this year when Nicklaus won The Tradition at Desert Mountain. The Scottsdale, Ariz., event was Nicklaus' first outing on the Senior PGA Tour. Flick, recognized as one of the finest instructors in the world, was the PGA Teacher of the Year in 1988. He has worked with more than 100 players on the PGA,

LPGA, and Senior PGA Tours, taught the game to all levels of golfers in 23 countries, and is the author of four top-selling golf instruction books.

"I'm truly excited about the opportunity to work with Jack Nicklaus and offer the finest level of instruction," said Flick. "Jack and I share the belief that if you're a golfer, you'll have more fun if you play better."

The foundation of the Nicklaus/Flick Golf Schools is based on the philosophy that the best teachers teach people -- not methods.

This framework offers a comprehensive curriculum developed by Nicklaus and Flick which makes use of state-of-the-art technology developed exclusively for the schools. For instance, the schools will offer use of the Jack Nicklaus Coaching Studio in which students will have their golf swing videotaped for detailed analysis. Alumni of the Nicklaus/Flick Schools will be offered a chance to review their skills with instructors on an ongoing basis.

Earlier this year, Golden Bear International, along with Mitsubishi Corporation and Suntory Limited, announced plans to establish a nationwide network of golf teaching and practice facilities in Japan. These facilities feature a similar curriculum developed by Nicklaus for use in the United States.

#90344p1607 12/10/1990 ~PR Newswire

NEW YORK (DEC. 10) PR NEWSWIRE - Bio-Technology General Corp. (NASDAQ: BTGC) announced today the further expansion of its clinical program with the initiation of a clinical trial aimed at testing the safety and pilot efficacy of its recombinant human superoxide dismutase (SOD) in ulcerative colitis patients. The study is being coordinated at Hammersmith Hospital, London, and is believed to be the first ever to evaluate the product in the treatment of this condition.

Ulcerative colitis, an inflammatory bowel disease, is a severe chronic disease of the large intestine. Affected patients experience acute periodic episodes which are characterized by high fever, hemorrhage and, ultimately, perforation. An estimated two million Americans suffer from inflammatory bowel disease and each year 30,000 new cases are diagnosed in the United States. Current anti-inflammatory therapy of ulcerative colitis is of limited efficacy and is often associated with adverse reactions. Since there is emerging evidence that the inflammatory response in the gut is mediated by oxygen free- radicals, treating ulcerative colitis with the free-radical scavenger SOD may reduce the severity as well as the incidence of acute

inflammatory episodes.

"We are in the process of undertaking the most ambitious clinical program in BTG's history", stated Sim Fass, president of the company. "Next year, BTG's products are to be involved in nearly 20 clinical trials conducted in 10 different countries. The trials are being conducted to further advance BTG's full and exciting pipeline of near and longer term products. With several of these products approaching commercialization, we expect 1991 to be a milestone year in the company's history."

CLINICAL STUDIES FOR BTG'S PRODUCTS

Product	Indication	Phase	Studies
Vitamin-D3 Metabolite	Psoriasis	III	2
Hepatitis Vaccine	Hepatitis-B	II	5
Hyaluronic Acid	Ophthalmic Surgery	II	2
	Dry Eye Syndrome	II	1
Human Growth Hormone	Anabolic Effects	I/II	4
Superoxide Dismutase	Bronchopulmonary Dysplasia	I	1
	Rheumatoid Arthritis	I	1
	Colitis	I	2

Bio-Technology General Corp. is principally engaged in the research, development and manufacture of genetically engineered products for human and animal health care.

DENVER (DEC. 10) PR NEWSWIRE - OEA Inc. (AMEX: OEA) the Denver-based, high-technology manufacturer of aerospace and automotive products, announced record sales, earnings, and backlog for the first quarter ended Oct. 31, 1990.

Ahmed D. Kafadar, chairman and chief executive officer, reported increases in both net sales and earnings over the prior-year first quarter. Net sales and earnings for the quarter were $18,701,300 and $2,779,200, respectively, compared to $15,357,700 and $2,163,600 for the prior-year first quarter. Earnings per share for the quarter were 41 cents compared to 32 cents per share for the fiscal year 1990 first quarter. The parent company and all subsidiaries and divisions contributed to the 22 percent sales and 28 percent net earnings increases. Operating profits increased to 23 percent and OEA's financial condition remained strong with working capital of $50,990,600 and shareholders equity of $73,071,300.

Bookings of new engineering work and follow-on production of both aerospace devices and automotive air bag initiators exceeded $21 million during the quarter. OEA's backlog of unfilled orders accordingly increased to a record

$92 million at Oct. 31, 1990, up from the $90 million reported a year earlier.

OEA is a leader in the field of propellant and explosive-actuated devices used in (1) the personnel escape systems of military aircraft, missiles, and for space application and (2) the automotive air bag. All new aircraft, such as the F-4, F-111, F-14, F-15, F-16, F-18, B-1B, B-2, S-3A, and AH-64A, the Space Shuttle, and missiles/launchers, such as the Delta II, Titan, Harpoon, Trident ALCM, Peacekeeper, ACM, Ariane, and SICBM, have OEA developed and manufactured devices. Most domestic automobiles equipped with an air bag use an initiator manufactured by OEA's Automotive Safety Products Division.

ATLANTA (DEC. 10) PR NEWSWIRE - Crawford & Co. (NYSE: CRDA CRDB) and Graham Miller Group jointly disclosed today that Crawford & Co. has completed its previously announced acquisition of Graham Miller Group for a total consideration of $24.9 million in cash and notes.

F.L. Minix, chairman and chief executive officer of Crawford & Co., stated that the acquisition of Graham Miller, a London-based international claims adjusting firm, was an important strategic move for Crawford & Co. "With the trend toward global financial and insurance markets," Minix said, "it has become obvious to us that we must have an integrated, world-wide claims network in order to maintain or increase our present market share in the United States, because our insurance company and self-insured clients are increasingly requiring this scope of service. Furthermore, we have recently endeavored to gain increased business from U.S.-based risks which are underwritten in London. With Graham Miller's strong connection to the Lloyds market, London brokers and other international underwriters, this business should accelerate. In addition, we see opportunities for international expansion of the other Crawford services not presently offered by Graham Miller."

Minix further stated that, with the acquisition of Graham Miller, Crawford & Co. becomes the largest international independent claims adjusting firm in the world. Crawford & Co., which has more than 700 offices in the United States and Canada, reported 1989 revenues of $374 million. Graham Miller, which has 56 offices in 40 countries, achieved 1989 revenue of 11.2 million pounds (approximately $22 million at present currency exchange rates).

W.J. Bolton, chairman of Graham Miller Group, said that, "the nationwide network of offices in the U.S.A. and Canada, together with the financial strength of Crawford & Company, will enable Graham Miller to compete more effectively around the world and to capitalize more readily on market opportunities."

Minix emphasized the strategic importance of Crawford's international expansion. "We did not make this acquisition to achieve a short-term financial benefit, but rather for its long-term strategic fit," Minix said. "In fact, the acquisition may cause a slight dilutive effect on Crawford's 1991 earnings of $.01 - $.02 per share. However, this is an investment which we must make in order to position ourselves as a major service provider in the emerging international insurance markets of the 1990s."

Minix stated that the existing management of Graham Miller Group, which led a management buy-out in 1987, would remain in place after the acquisition, and would report to Dennis Smith, newly elected president of Crawford & Co. International. Smith, the former senior vice president of Crawford's Midwest Region, will be based in London.

NEW YORK (DEC. 10) PR NEWSWIRE - R.H. Macy & Co., Inc. announced today that early termination of the applicable waiting periods under the Hart-Scott-Rodino Antitrust Improvements Act of 1976 has now been granted to three investors who have agreed to purchase up to approximately $72 million of shares in the company's previously reported plan to sell additional equity to existing non-management investors. The company said that, as a result, a $70 million minimum condition to closing the offering can now be satisfied.

Macy's said it expects Hart-Scott-Rodino clearance to be received shortly for a fourth large investor who has agreed to purchase approximately $20 million of shares in the offering, and that additional subscribers are currently completing the subscription process.

Macy's has extended the expiration date of the offering to December 14, 1990, from December 7, 1990.

NEW YORK (DEC. 10) PR NEWSWIRE - Thermedics Inc. (AMEX: TMD) announced today at a press conference in New York that the American Stock Exchange has purchased an EGIS(R) explosives detector. The EGIS installation at the American Stock Exchange represents the first sale of this security system to a commercial facility in the United States.

Following a demonstration of the device at the American Stock Exchange, Charles Diecidue, vice president of special services for the Exchange, said that EGIS "effectively complemented the Exchange's existing security measures." Diecidue said that although the system is not in specific response to any direct threats, it could be effectively integrated with existing security systems which include X-ray machines and metal detectors. "With responsibility for the many people who work at this facility, we want to be sure that we are using the latest and most up-to-date security technologies," Diecidue added.

The EGIS explosives detector is capable of detecting trace amounts of military and commercial explosives including plastics. Originally developed under U.S. State Department funding for use at embassies, the EGIS has also been tested at airports and other facilities around the world during the course of the product's development. "EGIS has passed many rigorous operational tests with successful results," said John W. Wood Jr., president of Thermedics. "We are very pleased that our technology is now being used for commercial as well as government applications." EGIS has been designed for use as an integral part of the security program for any type of sensitive facility.

Thermedics develops, manufactures, and markets biomaterials, biomedical products, analytical instruments, and explosives- and drug-detection devices, and provides analytical laboratory services. Thermedics is a public subsidiary of Thermo Electron Corporation (NYSE: TMO).

WINDSOR, UNITED KINGDOM (DEC. 10) PR NEWSWIRE - The Albert Fisher Group PLC ("Albert Fisher") announced today that it has completed the acquisition of two businesses and a subsidiary company from subsidiaries of the Campbell Soup Company ("Campbell") for a total cash consideration of 15.116 million pounds sterling subject to adjustment based on the net assets at the close of business on Dec. 7, 1990.

The Campbell's businesses and subsidiary which have been purchased are: Campbell's U.K. Vegetable Division ("Campbell's Frozen Vegetables") Campbell Seafoods N.V. (trading as "Morubel") Campbell's U.K. Seafood Division ("Campbell's Seafood") Campbell's Frozen Vegetables is based at Hemel Hempstead and is a leading supplier of frozen green vegetables to retailers. The majority of vegetables are purchased from growers in the United Kingdom, however the division is also the largest importer of frozen green vegetables (16,000 tons annually). The division uses third party cold storage, processing and distribution facilities at strategic locations throughout the

United Kingdom. Turnover in the year to July 29, 1990 was 78 million pounds from approximately 115,000 tons of frozen vegetable and potato products.

Morubel and Campbell's Seafood together form one of the leading processors and distributors of frozen, warm water prawns and other specialty fish products to the retail and food service markets in the United Kingdom, Belgium, Germany, France and Italy. The business is organized into two operating units, Morubel and Campbell's Seafood ("the Seafood business"). Morubel is located in Ostend Belgium and is responsible for the processing of seafood products and for Continental European marketing and sales activities. Campbell's Seafood is located in Hampton Wick, near London and handles European procurement and United Kingdom marketing and sales. Morubel has extensive processing and packing facilities at its freehold premises with a production area of approximately 4,500 square meters and a leasehold cold storage facility of 3,000 square meters. The turnover of the Seafood business in the year to July 29, 1990 was 38 million pounds.

The combined net tangible assets of the three businesses at completion amount to approximately 15.018 million pounds after deducting borrowings of 9.46 million pounds. Combined adjusted profits before taxation in respect of the year ended July 29, 1990 were 3.1 million pounds on turnover of 116 million pounds.

HOUSTON (DEC. 10) PR NEWSWIRE - Randal McDonald, president of Conquest Exploration Company (Conquest), and C. Robert Black, president of Texaco Latin America/West Africa (Texaco) jointly announced today a farmout agreement between Conquest Exploration Tunisia, Inc. and Texaco Exploration El Jem Tunisia, Inc., wholly owned subsidiaries of the respective companies. The agreement is subject to ratification by the Tunisian Parliament.

The agreement provides that Texaco will acquire a 60 percent interest and operatorship in Conquest's El Jem block, onshore Tunisia. The block is located 150 kilometers south of the capital Tunis encompassing approximately 987,000 acres.

Under the terms of the agreement, Texaco will assume the cost of drilling one or more exploratory wells and will fund the acquisition of a seismic program during an initial three-year exploratory period. It is estimated that the work program will result in Texaco's spending up to $10 million over the three-year exploratory commitment period.

ARLEE, MONTANA (DEC. 10) PR NEWSWIRE - Montana Naturals Int'l. Inc. (NASDAQ: MTNA) announced today the hiring of a new National Sales Manager for its Montana Big Sky(TM) brand. The company has obtained the services of Michael Taylor to head its national sales program. Taylor comes to Montana Naturals from Murdock Healthcare (Nature's Way) in Springville, Utah. Taylor was their National Accounts Manager and the Northeastern Regional Sales Manager. Taylor comes highly recommended as one of the industry's leading sales professionals. The health food industry recognizes Nature's Way as a leading manufacturer.

Taylor will be responsible for expanding the company's retail account base nationwide through the company's distributor and broker network. He will also be responsible for opening new niche market opportunities for the company's products.

Taylor replaces Jack Cross, who is leaving the company to join his wife, Lei Ann, in developing their own business. During his tenure with Montana Naturals, Cross played a significant role in establishing the company's relationship with national and regional distributors and developing a broker network. The Crosses are purchasing the Nutra Bee(R) product line which Montana Naturals acquired three years ago. They will be doing business as Energetics Naturally. Energetics will focus on developing mass market opportunities with a natural energy product. It will also introduce other natural products for the mass market. Energetics will have its product manufactured by Montana Naturals.

According to company President, Ronald O. Hauge, "We're excited to have a person of Mike Taylor's caliber coming to Montana Naturals. He's the right person, at the right time, for the job. We're sorry to lose Jack Cross, but are enthusiastic about Energetics' potential as a customer."

NEW YORK (DEC. 10) PR NEWSWIRE - Jeffrey B. Lane, former president and chief operating officer of Shearson Lehman Hutton, Inc., will join Smith Barney, Harris Upham & Co. to become senior officer responsible for several key divisions in the investment firm, it was announced today by Frank G. Zarb, chairman and chief executive officer. Lane will also become a vice chairman of Smith Barney.

His appointment becomes effective Jan. 2, 1991. Lane will assume responsibilities for the firm's asset management group, which consists of its money management, mutual fund and unit trust products and services; the sales/marketing product support groups; and the firm's futures division.

Lane, 48 (DOB 6/25/42), will maintain his corporate responsibilities at Primerica Corporation, including oversight of the newly formed Smith Barney Trust Company. Smith Barney is a wholly owned subsidiary of Primerica, which Lane joined earlier this year.

"Jeff is a longtime associate of mine, with a wealth of knowledge and experience in the securities industry," said Zarb. "We're very fortunate to have an opportunity to draw on his talents as we continue to build the Smith Barney of the 1990s."

Before joining Primerica, Lane had been president and chief operating officer of Shearson since 1987. He joined Cogan, Berlind, Weill and Levitt & Co., a predecessor firm to Shearson, in 1969 as a securities analyst. After serving in a number of management capacities in institutional research, sales and

trading, he was named chief operating officer of Shearson in 1983.

Primerica Corporation is a diversified financial services company with assets of $21 billion. Smith Barney became a subsidiary of Primerica in June, 1987.

LOS ANGELES (DEC. 10) PR NEWSWIRE - Neutrogena Corp. (NASDAQ: NGNA) today reported net income for its fiscal year ended Oct. 31, 1990 of $17,234,000, or $.65 per share, on net sales of $209,841,000. For fiscal year 1989, the company earned $26,745,000, or $1.00 per share, on revenues of $203,212,000.

For the fiscal 1990 fourth quarter, net income was $3,157,000, of $.12 per share, on net sales of $56,007,000. This contrasts with net income of $5,388,000 or $.20 per share on net sales of $55,513,000 in the corresponding year-earlier period.

The 1990 results were negatively impacted by approximately $.12 per share related primarily to certain inventory write offs, temporary suspension and reformulation of two Neutrogena products, and a provision for executive severance.

Neutrogena President and Chief Executive Officer Lloyd E. Cotsen said: "Results for the year reflected tighter retailer inventory controls and heightened competition, along with higher promotion expenses at a time of relatively flat sales and a downturn in the economy.

"Somewhat offsetting these conditions were a good performance by our international division, specifically in Europe, and the introductory sales of our special shampoo and conditioner products for permed or color-treated hair."

He added that unit sales were down significantly for regular Neutrogena Shampoo and Neutrogena Conditioner, and the company hopes to counter the erosion of sales through a national television advertising campaign now underway.

Cotsen noted that in line with long-term corporate goals international sales rose to 15 percent of total sales from 11 percent a year ago. This increase included product introductions in new markets, as well as growth in existing lines.

Marketing and selling expenses as a percent of sales rose to 56 percent in fiscal 1990 from 49 percent the year ealier, due principally to costs associated with the testing of television advertising, new product introductions, international programs, and promotional programs conducted in

conjunction with retailers.

The cost of sales as a percent of sales rose two percentage points to 26.5 percent due primarily to higher than normal inventory write-offs and reformulation costs.

Neutrogena Corp., headquartered in Los Angeles, manufacturers and sells high-quality, premium-priced specialty skin and hair care products.

#90344p1630 12/10/1990 ~PR Newswire

BOSTON (DEC. 10) PR NEWSWIRE - The Boston Five Bancorp, Inc. (NASDAQ: BFCS), holding company for The Boston Five Cents Savings Bank, FSB reported a net loss of $13.6 million, or $1.93 per share, for its fourth quarter, ended Oct. 31, 1990, compared with a net loss of $23.0 million, or $3.27 per share, in the fourth quarter of 1989. For the fiscal year ended Oct. 31, 1990, The Boston Five had a net loss of $15.3 million, or $2.17 per share, compared with a net loss of $15.7 million, or $2.22 per share, for 1989.

As of Oct. 31, 1990, The Boston Five exceeded all three current Office of Thrift Supervision (OTS) regulatory capital requirements. The Boston Five has a book value of $15.53 per share.

During the quarter ended Oct. 31, 1990, The Boston Five's deposits increased from $1.6 billion to $2.0 billion. Borrowed funds decreased from $364.8 million to $280.0 million. These changes resulted primarily from the previously announced acquisition of $462 million in deposits from the failed 1st American Bank for Savings on Oct. 19, 1990. The Boston Five paid a premium of $2.1 million to the Federal Deposit Insurance Corporation (FDIC) for the right to acquire these deposits. As a result of this deposit acquisition, the bank intends to allow certain high cost deposits and borrowed funds to roll off as they mature during the first half of fiscal year 1991.

Residential mortgage production totalled $296.1 million for the fourth quarter of 1990, compared with $340.4 million in the comparable quarter of 1989. For the year, residential production was $1.05 billion, compared with $1.02 billion in 1989. Total loan production for the year was $1.16 billion, compared with $1.20 billion for 1989. The Boston Five services $1.8 billion in mortgages for others, a decrease of 28 percent from the $2.5 billion serviced as of Oct. 31, 1989.

As of Oct. 31, 1990, the bank's non-performing assets totalled $137.9 million, compared with $125.2 million as of Oct. 31, 1989. The reserves for loan losses

were $28.6 million as of Oct. 31, 1990, compared with $34.4 million as of Oct. 31, 1989. The provision for loan losses in the fourth quarter of 1990 was $7.4 million, compared with $22.6 million in the fourth quarter of 1989. The loan loss provision for the year ended Oct. 31, 1990, was $14.3 million, compared with $25.6 million for 1989. Net charge-offs for the quarter and year ended Oct. 31, 1990 were $3.6 million and $20.0 million, respectively, compared with $3.2 million and $7.0 million, respectively, in the corresponding periods of 1989.

In the fourth quarter of 1990, The Boston Five had net interest income of $9.5 million, compared with $13.2 million in the fourth quarter of 1989. For the year ended Oct. 31, 1990, net interest income was $43.5 million, compared with $55.7 million a year earlier.

Non-interest income categories generated a loss in the fourth quarter of 1990 totalling $6.8 million, compared with a loss of $11.3 million in the fourth quarter a year ago. The fourth quarter loss in 1990 included a $6.7 million net loss relating to real estate operations and a $4.4 million net loss on securities. These two losses primarily reflect changes in market conditions that resulted in write-downs of properties on which the bank had previously foreclosed and of securities held for sale that are reported at the lower of cost or market value. The net gain on the sale of loans and servicing was $9.3 million in fiscal 1990, compared with $2.4 million in 1989. For the year non-interest income was $3.1 million for 1990, compared with a loss of $774,000 for 1989.

Operating expenses for the quarter ended Oct. 31, 1990, were $13.7 million, compared with $16.3 million for the quarter ended Oct. 31, 1989. Fiscal year operating expenses were $53.9 million for 1990, compared with $55.8 million in 1989.

On Oct. 22, 1990, the 11 former offices of the 1st American Bank for Savings opened for business as offices of The Boston Five. Subsequently, the bank announced that it would close six of these branches on Dec. 15, 1990, and continue to operate the remaining five. These five offices serve the Dorchester, Mattapan and Roxbury neighborhoods of Boston and Quincy, Mass.

The Boston Five Bancorp, Inc. is the holding company of The Boston Five Cents Savings Bank FSB. With total assets of over $2.4 billion, The Boston Five is the largest savings bank headquartered in Massachusetts. Deposits of The Boston Five are insured by the Bank Insurance Fund (BIF) of the FDIC.

MIDLAND, MI (DEC. 10) PR NEWSWIRE - The Midland Cogeneration Venture (MCV) announced hourly, daily and weekly production records for the week ended Dec.

7. The hourly record was established at 9 p.m. on Dec. 4, when 1,436 megawatt (MW) hours of electricity were produced.

The daily record was also established on Dec. 4, when 34,134 megawatt hours of electricity were produced. The plant ran for five days at full capacity, beginning on Dec. 3, establishing a new weekly production record of 162,722 megawatt hours.

"There was a demand for power in the state beyond our contractual obligations and we were pleased to be able to help," said MCV President and CEO Rodney E. Boulanger. "We've been steadily improving plant performance all year, just to be in a position to respond to these needs."

The MCV entered commercial operation in March 1990. The plant's rated capacity is 1,370 MW of electricity and up to 1.35 million pounds per hour of steam for industrial use. Major customers are Consumers Power Company for electricity and The Dow Chemical Company for steam and electricity.

Partners in the MCV include CMS Midland, Inc., a subsidiary of CMS Energy Corporation; Rofan Energy, Inc. (limited partner), a subsidiary of The Dow Chemical Company; Source Midland Limited Partnership, an affiliate of Panhandle Eastern Corporation; Coastal Midland, Inc., a subsidiary of The Coastal Corporation; MEI Limited Partnership, an affiliate of Asea Brown Boveri, Inc.; Micogen Limited Partnership (limited partner), an affiliate of Fluor Corporation; and C-E Midland Inc., (limited partner), a subsidiary of ABB - Combustion Engineering, Inc.

ROCHESTER, NY (DEC. 10) PR NEWSWIRE - Eastman Kodak Company (NYSE: EK) today announced price increases for its consumer films, Funsaver cameras and photographic papers sold in the U.S. The new prices will be effective with orders received beginning Dec. 22, 1990.

Amateur color negative films will increase an average of 3.5 percent. That means that the suggested list price for a 24-exposure roll of Kodacolor Gold 100 film will increase from $4.60 to $4.74, while a 36-exposure roll will increase from $5.87 to $6.05. Ektachrome films and Kodachrome 200 film will increase two percent, while prices of other Kodachrome films will rise four percent.

Included in the price increases are three cameras in the company's Funsaver camera line: the Funsaver 35 camera will increase from $8.35 to $8.95; the Funsaver Panoramic 35 camera will increase from $12.95 to $13.95; and the Funsaver Weekend 35 camera will increase from $13.95 to $14.95. Photographic

papers used by photofinishers will be increased an average of 3.5 percent, while processing chemicals will rise an average of 5.5 percent.

The company attributes the higher prices to the higher cost of doing business. The price increases are consistent with the company's forecast of various consumer and economic indexes for 1991.

TOKYO (DEC. 10) PR NEWSWIRE - Responding to the filing made to Japan's Ministry of Finance by Boone Co. under a new Japanese shareholder disclosure law, Koito Manufacturing Co. President Takao Matsuura today sent a letter to T. Boone Pickens.

The letter states that the filing, made public today in Tokyo, "proves the point Koito has long been making" that Pickens has been acting as a front for Japanese speculator Kitaro Watanabe, who supplied Koito shares to Pickens after failing twice to secure a greenmail payment for the shares.

The letter also calls on Pickens to disclose the details of the Watanabe-Pickens arrangement omitted from the filing, concerning the pledge agreement by which Watanabe continues to hold the Koito shares registered under Boone Co.'s name.

A Koito official said that the company believes the new Japanese disclosure law may also require Watanabe, as the beneficial owner of the shares registered to Boone Co., to file a statement with the Ministry of Finance. No filing was made by Watanabe.

The Pickens filing included a purported "greenmail affidavit" executed by Pickens in June 1990. With respect to this affidavit, a Koito spokesman added: "Pickens has been waving this document around for months to no avail. His American raids were always accompanied by similar sworn disclaimers of greenmail, and the American courts and SEC have consistently found these disclaimers patently false and designed to conceal his real greenmail aims.

"The list of court findings and consent decrees against Mr. Pickens on this score - in his raids on Unocal, Gulf, Phillips, and Homestake Mining, to name a few - demonstrates that his 'greenmail affidavit' is not worth the paper it is written on."

PARIS (DEC. 10) PR NEWSWIRE - Allied-Signal Automotive, Southfield, Mich., finalized the purchase of the brake friction materials business of Valeo, Paris, creating one of the largest and most broadly based friction material suppliers in Europe.

The closing was announced by John W. Day, president of Allied-Signal Automotive.

With the acquisition, Allied-Signal has reinforced its position as a world leading producer of brake friction materials, according to Mark W. Semeyn, vice president and group executive of the firm's Friction Materials Group.

Allied-Signal currently supplies friction materials to the European market through Jurid Werke G.m.b.H., Hamburg, Germany, and Bendix Europe, Paris. Jurid and Bendix are operating units of Allied-Signal.

The businesses being acquired consist of a French subsidiary and a Spanish operation of Valeo which will strengthen the Friction Materials Group's position in the compact and mid-size vehicle segments of the European market, said Semeyn.

It also will enhance the firm's ability to supply the European independent aftermarket and position it to serve the developing markets of Eastern Europe, he added. Semeyn pointed out that the acquired operations will continue to supply brake friction materials to Valeo Distribution for resale in the independent aftermarket.

According to the agreement, Allied-Signal will acquire a 400,000-square-foot factory in Conde-sur-Noireau, France, and lease various facilities from Valeo in St. Ouen, France, and Alcala de Henares, Spain. The agreement also includes continued use of a proving grounds and other testing facilities at Mortefontaine, France.

The leased facilities consist of offices and a technical center in St. Ouen and a 40,000-square-foot production facility in Alcala de Henares.

Over 1,200 people, including about 100 engineers and technicians in research and development, are employed at the affected operations. Over 900 are employed at the Conde-sur-Noireau factory.

Valeo is Europe's second ranking automotive components and systems manufacturer and has a strong presence worldwide with 100 facilities in Europe, North and South America, Asia and Africa. It is a world leader in clutches, clutch facings, engine cooling, steering column locks and IR remote control central locking devices.

The Allied-Signal Friction Materials Group with its affiliates and licensees is one of the world's leading independent producers of brake friction materials for the automotive and aerospace industries. It has operations in the United States, Canada, Brazil, Germany, Spain, Australia and Korea.

Allied-Signal Automotive is part of Allied-Signal Inc. (NYSE: ALD), an advanced technology company with businesses in automotive, aerospace and engineered materials.

#90344p1647 12/10/1990 ~PR Newswire

THOMASVILLE, GA (DEC. 10) PR NEWSWIRE - Davis Water & Waste Industries, Inc. (NYSE: DWW), today reported results for the second quarter and six months ended Oct. 31, 1990.

For the quarter, the company reported net income of $184,793 or six cents per share on net sales of $54,016,245 compared to a net income of $182,347 or six cents per share on net sales of $49,512,831 for the same period last year.

For the six months, sales were $105,208,789 compared to $94,851,045 for the first half of the prior fiscal year. Net income was $350,317 or 11 cents per share compared to a net loss of $355,280 or ten cents per share for the first half of the prior year.

"The increased sales for the quarter and six months are due primarily to our acquisition of the Taulman Company. The improved net income is attributable to cost cutting and reduction programs put in operation during the past year in anticipation of the continued softness of our market," R. Doyle White, president, stated.

"Margins for the water distribution and supplies businesses diminished slightly in the first six months of our fiscal year as compared to the prior year due primarily to the continued slowdown in land development and residential construction and the increased competition we have encountered for the remaining available business. We do not anticipate that market conditions will improve over the remainder of our fiscal year," White said.

MINNEAPOLIS/ST. PAUL (DEC. 10) PR NEWSWIRE - Mesaba Aviation, Inc. today reported that it flew 15.6 million revenue passenger miles during the month of November, an 11.9 percent increase over 13.9 million revenue passenger miles flown during the same month last year (a revenue passenger mile equals one passenger flown one mile). The airline said it carried 74,573 passengers in November, an increase of 13.1 percent over 65,935 passengers carried last November. Mesaba's load factor during the month was 49.2 percent, compared to 50.4 percent last year.

Mesaba operates as Northwest Airlink under an airline marketing agreement with Northwest Airlines at Minneapolis/St. Paul International and Detroit Metropolitan Airports. The regional carrier currently provides scheduled airline service to 38 airports in the 10 states of Illinois, Iowa, Ohio, Michigan, Minnesota, Nebraska, North Dakota, Pennsylvania, South Dakota and Wisconsin.

Mesaba Aviation, Inc. is the wholly owned subsidiary of AirTran Corporation. AirTran's common stock is traded on the NASDAQ National Market System under the symbol ATCC.

MESABA AVIATION, INC. MONTHLY OPERATING STATISTICS

	November 1990	November 1989	Percent Change
Passengers carried	74,573	65,935	+13.1

DALLAS (DEC. 10) PR NEWSWIRE - The board of directors of Aancor Holdings Inc. the parent of National Gypsum Co., today announced that Peter C. Browning, president and chief executive officer of Aancor and National Gypsum, has been elected to the additional position of chairman of the board of directors of Aancor, effective Jan. 1, 1991. He succeeds John P. Hayes, who has been named chairman emeritus.

Browning, 49, joined the company in February 1989 as executive vice president

of Gold Bond Building Products division after 24 years of service with Continental Can Co. Inc. In August 1989, he was named president and chief executive officer of Gold Bond and was elected to the Aancor board of directors in December 1989. He was named president and chief executive officer of Aancor and National Gypsum in October 1990, succeeding John P. Hayes, 69, who retired from the company after 43 years of service.

Browning was graduated from Colgate University in 1963 with a B.A. degree in history and received an MBA degree from the University of Chicago in 1976.

Aancor Holdings Inc. was formed in 1986 as part of an acquisition of National Gypsum. Aancor is a privately held company.

National Gypsum, with 1989 sales of $1.4 billion, consists of two primary operating divisions: Gold Bond Building Products, the nation's second largest manufacturer and supplier of gypsum wallboard and related products, and The Austin Co., the oldest and one of the largest design, engineering and construction firms in the United States.

On Oct. 28, 1990, Aancor and National Gypsum filed voluntary petitions for protection under Chapter 11 in the United States Bankruptcy Court for the Northern District of Texas. The Austin Co. was not included in the filings. Subsequently, the company completed and received court approval to utilize a Debtor-in-Possession revolving credit agreement with General Electric Capital Corp. for up to $105 million in post-filing financing.

NEW YORK (DEC. 10) PR NEWSWIRE - UniWorld Entertainment (UWE) announced today that it has retained Bernie Schulman as vice president, director of television syndication, to head up UWE's new in-house television syndication unit.

"This will create a most complete television and film production package to complement UniWorld's full-service marketing capabilities," stated UWE Chairman and CEO Bryon Lewis.

Schulman will head the newly created syndication division and will supervise all in-house television station clearance, promotion and station relation activities. UWE properties include: "America's Black Forum" (ABF) weekly news program; the year-end "Black News in Review (Black History 1990)" news special the annual "Black Filmmakers Hall of Fame," and forthcoming "1991 CEBA Awards" special.

Schulman has 30 years' experience in television syndication, production and sales. For many years, he operated his own television production company

(Lakeside Television Co.) and later served as director of syndication for Syndicast, Inc. Most recently, he was vice president of syndication for Raymond Horn Syndication, Inc.

Debbie Adrine-Wofford will become a manager, assisting Schulman in all syndication activities, plus continue her production and advertising coordination duties on UWE properties.

#90344p1656 12/10/1990 ~PR Newswire

BRIDGEPORT, CONN (DEC. 10) PR NEWSWIRE - The Hydraulic Company (NYSE: THC) announced today that it had completed the previously announced acquisition of the outstanding shares of SRK Holding, Inc., a Monroe, Conn.-based environmental services firm.

Terms of the transaction were not disclosed. THC President and Chief Executive Officer Jack E. McGregor said the transaction adds three environmental testing laboratories in Connecticut, New Jersey and Illinois to the five labs in North Carolina, Massachusetts, Vermont and Florida owned by Industrial & Environmental Analysts, Inc. (IEA), a wholly owned THC subsidiary.

SRK also owns businesses engaged in engineering, consulting and remediation, which THC intends to sell because they do not fit the company's long-term business plans.

The closing on the SRK transaction occurred after the previously announced settlement of SRK's YWC, Inc. subsidiary with the federal government on making false statements to the U.S. Environmental Protection Agency regarding laboratory test data. The settlement does not affect THC's existing laboratories or other business units.

"It is propitious that YWC was able to resolve this matter and place this situation behind them," McGregor said. "YWC's cooperation with the government was key to the timely resolution of the investigation, which helped clear the way for our acquisition of YWC's parent."

McGregor noted that the test data issue occurred more than three years ago, and was disclosed to the EPA by YWC.

"Our acquisition of SRK will enhance the service we can provide to our growing laboratory business and, at the same time, will strengthen YWC's financial position and ability to serve its customers," McGregor added.

THC's principal subsidiary is Bridgeport Hydraulic Company, an investor-owned utility that provides public water supply to a population of some 500,000 in

18 Connecticut communities.

In addition to its nonutility water services businesses, THC is engaged in forest products, electricity cogeneration and real estate enterprises. The company in 1989 had consolidated revenues of $78.3 million.

MINNEAPOLIS (DEC. 10) PR NEWSWIRE - General Mills' (NYSE: GIS) board of

directors today declared a quarterly dividend of 32 cents per share, payable Feb. 1, 1991, to shareholders of record Jan. 10, 1991.

The 32 cents per share quarterly rate is the equivalent of the 64 cents per share quarterly dividend that prevailed before a two-for-one stock split became effective on Nov. 7, 1990.

General Mills and its predecessor companies have paid uninterrupted dividends without reduction in each year since before the turn of the century. The last increase was for the payment of Aug. 10.

#90344p1664 12/10/1990 ~PR Newswire

VANCOUVER, BRITISH COLUMBIA (DEC. 10) PR NEWSWIRE - Videogram International Corp. is pleased to announce the introduction of one of its new products, the Starmaker station to the United States market.

The Starmaker station (the first of its kind) is a family oriented, fully automated, 24 square foot video production studio which allows the public to create and star in their own videos. Various simulations and special effects create music videos, video messages, TV shows, and video memorabilia for souvenirs and gifts.

Using interactive video laser disc technology and blue screen special effects, customers are keyed into multiple program scenarios chosen via touch screen. Videogram programs come complete with opening, closing, computer graphics, and music.

Customers appear on-screen chroma-keyed over moving or static backgrounds with foreground titles mixed over the picture. Their voice is combined with muscic and sound effects. The Videogram program line-up for it's Southern California test market is in time for seasons greetings as well as sending video messages to family members overseas.

Videogram is now in the process of successfully test marketing a Videogram Starmaker station at the Spencer Gifts retail outlet located in Los Cerritos Mall in Southern California. This is the first of many test markets that Videogram has agreed to undertake in the United States.

The Starmaker station represents one of the few, new, innovative, retail concepts to be launched for the 1990's and introduces new forms of reactive and interactive entertainment. The station is fun, easy to use and meets the demands of the entire family.

You can visualize the thrill of flying through space, spinning in the cockpit

of a jet fighter or meeting King Kong face to face and have this experience recorded on a VHS videotape. Keep the tape as a souvenir or send it to friends or relatives as a memorable gift. Other Videgram concepts conducive to complement and broaden current trends in licensing and retail markets are in the development process.

Included in the current Videogram program menu are a Los Angeles Video Post Card, The Universal Studio Tour Video Post Card, Flying With the Snowbirds (flying, acrobatic simulation), Christmas Greetings, Happy New Year, Fireworks Spectacular, You've Lost That Lovin' Feeling music video and a Videogram Rap Song music video.

Special Videograms for family members to send to armed forces personnel will be featured as well. Programming is rounded out by flying through a starfield and a Video Fan Club program.

#90344p1666 12/10/1990 ~PR Newswire

SEATTLE (DEC. 10) PR NEWSWIRE - By an overwhelming 86 percent margin, employees of Seattle First National Bank ratified a five-year contract on Sunday, simultaneously ending a 13-year legal battle over their right to union representation and becoming the largest group of U.S. bank workers under union contract.

"It's finally over, but a breakthrough like this was worth the wait," exclaimed Nancy Holland-Young, president of the Financial Institution Employees of America, an affiliate of the United Food & Commercial Workers Union. FIEA represents 4,600 Seafirst employees.

FIEA said that Seafirst, now owned by Bank of America, finally agreed to negotiations with the union last March, after the Ninth Circuit Court of Appeals rejected the bank's latest challenge to FIEA's 1977 decision to affiliate with the UFCW when negotiations on its contract with Seafirst broke down.

"Merit pay reforms are the centerpiece of the contract," said Holland-Young. Employees who meet or exceed established performance standards will receive annual merit increases ranging from 2 to 11 percent.

Only employees already at top pay for their classification and those receiving poor evaluations are not guaranteed annual pay increases. Employees given poor ratings may file a grievance and/or request a second review after 120 days.

Under the new union contract, employees are guaranteed that their share of

health insurance premiums will not exceed 30 percent for the next five years. Employees who are promoted are also guaranteed pay increases for the first time, and there are 5 percent increases for workers still receiving the lowest pay for their classification after six months on the job.

Union officials heralded the contract's severance pay provisions as "especially important in the unstable economic climate for banks." A 15-year employee who is laid off would receive 13 weeks pay plus a lump sum payment equal to 10 percent of their previous year's salary.

The union also gained an additional holiday, a fifth week of vacation for 20-year employees, an elimination of split shifts, job security for regularly scheduled casual employees, and minimum pay guarantees for attending meetings and being called in for work.

KANATA, ONTARIO (DEC. 10) PR NEWSWIRE - Newbridge Networks (NASDAQ-NMS: NNCXF) announced today that the company has signed a letter of intent with MODDATA, S.A. under which MODDATA will become a distributor of the complete line of Newbridge products in Brazil. Sales in the first year are expected to exceed US$2 million.

Fernando Otavio Jardim, president of MODDATA, said, "I strongly believe that because of its strategy of globalization and compliance with international standards, Newbridge has the best combination of products to fulfill the digital telecommunication needs of the multinational businesses and telephone companies established in Brazil."

Mike Pascoe, general manager of the Canada, Asia Pacific and Latin America region at Newbridge, added, "The market potential for digital networks in Brazil is extremely encouraging. Newbridge is pleased to have MODDATA, one of the most important suppliers of telecommunication products in Brazil, as its distributor."

Newbridge Networks is an international company which specializes in the design manufacture and marketing of voice and data communications equipment for global networks. Offices and manufacturing facilities are located in Canada, the United States, Europe and Asia.

Newbridge Networks Corporation is a public company whose common shares are listed for trading on the Toronto Stock Exchange (NNC) in Canada and quoted for trading on the NASDAQ National Market System in the United States.

LOS ANGELES (DEC. 10) PR NEWSWIRE - Scotti Brothers Entertainment Industries, Inc. and All American Television, Inc. (NASDAQ: ALLT) today jointly announced that they have extended until Dec. 20, 1990, the date by which definitive merger and related agreements must be executed in order to coordinate completion of all necessary documentation. The parties previously announced that All American had accepted an offer by Scotti Brothers pursuant to which Scotti Brothers would be merged into a subsidiary to be formed by All American. The parties continue to anticipate that the closing of the merger will occur in late January or early February, 1991.

Scotti Brothers is a privately held entertainment corporation based in Los Angeles. Its divisions include a record company, a motion picture production and distribution company, a television production company, and an international sales and distribution organization for motion pictures and video.

All American is a New York based publicly-traded company engaged in the distribution of television programming to domestic and international television stations, cable television networks and home video markets, and the sale of commercial time to advertisers.

ST. LOUIS (DEC. 10) PR NEWSWIRE - St. Louis-based Bridge Information Systems Inc. today announced the awarding of a five-year, $15 million contract to provide the company's domestic and international data network. Bridge is a major international provider of financial information to top institutional investors, brokerage firms, exchanges and corporations.

Bridge's new data network is custom-designed to enhance the company's ability to provide a wide array of financial information services involving stock market quotes, market analysis, corporate histories, management and operations hardware, and applications systems to more than 2,000 Bridge user sites throughout the United States and internationally.

One of the unique aspects of the MCI-Bridge agreement involves the transfer of much of Bridge's existing data telecommunications equipment to MCI switching facilities -- an arrangement called co-location. The co-location of equipment

at MCI facilities will result in (1) cost savings to Bridge, and (2) a more secure and strictly controlled environment in which to house the sensitive data equipment. In addition, MCI will upgrade the existing Bridge network to accommodate "digital" data transmission. Digital communication is the transmission of conversations or data in an electronically coded form. Information transmitted in digital form is less susceptible to interference and distortion, and generally travels at higher speeds. The upgrade will allow Bridge to increase the number and types of financial information services available to their clients.

MCI is the nation's second-largest long distance provider, employing advanced fiber optic, digital microwave, and satellite technologies. The company supplies a full range of worldwide voice, data and messaging services to businesses, residences and government agencies.

#90344p1682 12/10/1990 ~PR Newswire

MENLO PARK, CA (DEC. 10) PR NEWSWIRE - SRI International today announced the appointment of Martin Rayl, Ph.D. as vice president, Quality. He will report to Dr. James J. Tietjen, president and chief executive officer. Rayl, a member of the Board of Examiners of the Malcolm Baldrige National Quality Award, had previously been director, Group Quality, Automotive and Industrial Electronics Group, at Motorola, the corporation which won the first Baldrige Award sponsored by the U.S. Department of Commerce.

"Quality is perhaps even more important," said Tietjen, "in the research environment than at any other point in the business process. Dr. Rayl understands the need for quality in all aspects of business and has experience from the laboratory bench to product introduction. His international experience in assessing quality and product assurance will be particularly valuable in assuring the continued improvement of SRI's global activities."

Rayl will have the responsibility of conceiving and helping implement the changes required to further enhance quality in SRI's broad base of activities which range from science and engineering to public policy and international business consulting.

Rayl, with degrees from Wayne State, the University of Chicago and a Ph.D. from the University of Illinois (Champaign-Urbana), has also worked in positions of increasing responsibility at Atomic Power Development Associates, IBM Corporation, and RCA. He is married, with three children and will locate in the Menlo Park area.

SRI International is a world renowned research and consulting organization

with over 3,000 employees and over $350 million in annual revenues.

#90344p1683 12/10/1990 ~PR Newswire

ANN ARBOR, MI (DEC. 10) PR NEWSWIRE - Daedalus Enterprises, Inc. (OTC: DDEI) announced today a loss of $221,000, $.39 per share, on revenue of $471,000 for the quarter ended Oct. 31, 1990, down from earnings of $254,000, $.41 per share, on revenue of $1,604,000 for the quarter ended Oct. 31, 1989.

The loss in the first quarter of fiscal 1991 is primarily due to the timing of standard product contracts which resulted in the recognition of virtually no standard product revenue during the quarter. During the first quarter of the preceding year, the majority of the revenue was from standard product sales. Contributing to the first-quarter loss was an increase in research and development expenditures partially offset by a slight reduction in selling and administrative expenses.

The company also expects to have a year-to-date loss at the end of the second quarter of this fiscal year. Revenue and earnings for fiscal 1991 will be dependent upon the timing and amount of new contracts currently under negotiation, but are likely to be reduced compared to fiscal 1990.

The company's backlog at Oct. 31, 1990, was approximately $1,934,000, as compared to approximately $3,652,000 one year earlier. The majority of the Oct. 31, 1990, backlog is expected to be filled this fiscal year. The company expects the backlog at the end of the second quarter to be significantly higher than that of Oct. 31, 1990, indicating the potential for a renewed growth in the company's revenue and earnings for fiscal 1992.

Daedalus Enterprises, Inc. is a leading developer and manufacturer of remote sensing instruments used for environmental measurement and monitoring.

The company's stock is traded in the over-the-counter market under the symbol "DDEI" and is quoted in the automated quotation system of the National Association of Securities Dealers.

MINNEAPOLIS (DEC. 10) PR NEWSWIRE - Metropolitan Financial Corporation (NYSE: MFC) announced today that Lawrence E. Davis, Minneapolis, has been elected to the company's board of directors and to the board of directors of its insured

savings bank subsidiary, Metropolitan Federal Bank, Fargo, N.D.

Davis, 54, is the executive vice president and general manager of Edina Realty where he has spent the past 21 years. Earlier this year, Davis announced his plans to retire from his day-to-day responsibilities at the real estate sales and brokerage company in January of 1991. His election to the board was effective Dec. 1, 1990 and is for a term to expire in 1993.

Norman M. Jones, chairman of Metropolitan Financial Corporation's board of directors, commented, "We are delighted that we will be able to benefit from Larry Davis' experience and wisdom at the board level. His wealth of experience in the real estate and mortgage lending business, as well as his knowledge of the Twin Cities market will benefit Metropolitan Financial Corporation as we seek to continue to enhance our presence throughout the market."

Roger L. Rovick, the president of Edina Realty, noted, "We at Edina Realty see the election of Larry Davis to the Metropolitan Financial Corporation board of directors as an affirmation of the quality management team that we have assembled over the years. We know that he will bring the same level of commitment and enthusiasm to the MFC board that he has brought to Edina Reality for the past two decades."

Metropolitan Financial Corporation is a regional financial services holding company. Its full service consumer savings bank operates 110 offices in 92 communities in the states of North Dakota, Minnesota, Iowa, South Dakota, Wisconsin, and Arizona and is the Twin Cities largest originator of residential mortgage loans. Its real estate sales and brokerage subsidiary, Edina Realty, is Minnesota's largest home seller. At Sept. 30, 1990 the company reported consolidated assets of nearly $4.2 billion. Metropolitan Financial Corporation's common and preferred stock trade on the New York Stock Exchange, the common under the symbol MFC.

MARIETTA, GA (DEC. 10) PR NEWSWIRE - Lockheed Aeronautical Systems Co. has been informed by the Republic of Korea that the company's P-3C Orion has been selected for the maritime patrol missions of the Republic of Korea Navy (ROKN).

Byron Boyer, Lockheed's program manager for the P-3, said the company expects to receive a contract to build eight of the aircraft for delivery to Korea in 1995. Boyer said the version to be built for the Korean Navy is the P-3C Update III, the most recent version operated by the U.S. Navy.

Lockheed Aeronautical Systems Co. has consolidated its headquarters and its

aircraft production programs at its Georgia facility and will build the aircraft for the ROKN at the company's Marietta, Ga., facilities, Boyer said.

Since 1962, Lockheed has delivered 641 Orions in a variety of models that are operated by the U.S. Navy and the armed forces of 10 other nations. Special versions of the Orion also are flown by the U.S. Department of Commerce and the U.S. Customs Service.

#90344p1687 12/10/1990 ~PR Newswire

SAN FRANCISCO (DEC. 10) PR NEWSWIRE - Chevron Corporation, on behalf of an international consortium, today announced the group has received petroleum development and pipeline licenses and will go ahead with development of the Iagifu/Hedinia (including Usano) and Agogo oil fields in the Southern Highlands of Papua New Guinea. The fields are collectively referred to as the Kutubu Project. Development of the area is estimated to cost the consortium approximately $1 billion in addition to the $400 million which has been spent to date on exploration and evaluation.

"Kutubu will be Papua New Guinea's first petroleum exporting project," said Richard Matzke, president of Chevron Overseas Petroleum Inc., the unit of Chevron Corporation devoted to exploration and production of crude oil and natural gas reserves outside the United States and Canada.

The consortium is known as the "Kutubu Project Joint Venture" and has its primary operations located in Papua New Guinea's Petroleum Prospecting License 100 (PPL 100).

As of Oct. 31, 1990, 47 wells (including sidetrack wells) had been drilled within PPL 100. Thirteen of these wells will be utilized in the Kutubu Project. Total production is expected to reach approximately 130,000 barrels per day of 44-degree API gravity crude oil by the end of 1992. The joint venture has set a goal of third quarter 1992 for the first production.

The most challenging part of the project will be construction of the 163-mile (261-kilometer) pipeline from Kutubu to a marine terminal located in the Gulf of Papua.

Initially, the project will be supported by air transport using a small airstrip currently being constructed nearby. A 65-mile (104-kilometer) access road will be constructed connecting the end of the existing road to the airstrip.

Crude oil will be treated at a central production facility located in the

Iagifu/Hedinia oil field, then shipped via pipeline to a marine terminal in the Gulf of Papua. The marine terminal will consist of a platform for metering and pressure reduction, and a single-point mooring for tankers.

SAN DIEGO (DEC. 10) PR NEWSWIRE - General Dynamics (NYSE: GD) Space Systems division today delivered the first wide-body Centaur upper stage for the U.S. Air Force Titan IV program. The vehicle was flown to Cape Canaveral Air Force Station, Fla., for the start of launch processing.

Space Systems is under contract to Martin Marietta to build 15 Centaur upper stages for the Titan IV program. Titan IV/Centaur provides the Air Force with a launch capability for payloads previously planned for the Space Shuttle.

"The Centaur high energy upper stage continues to be the most efficient upper stage in the world today," said Russ H. Thomas, Space Systems division vice president and Titan/Centaur program director. "Coupled with the Titan IV booster, it gives our nation its most powerful space launch capability and ensures U.S. access to space for critical heavy payloads."

Centaur is 29-1/2 feet long and 14 feet in diameter. Powered by two Pratt & Whitney RL-10A3 engines, it has a thrust of 33,000 pounds. It carries 50 percent more propellant than the original 10-foot-diameter Centaur D-1A used

with the Atlas booster, which is also built by Space Systems. Titan IV/Centaur is capable of placing 10,000-pound payloads into geosynchronous orbit 22,300 miles above the Earth.

The Centaur propellant tank structures are fabricated at Air Force Plant 19 at Space Systems division in San Diego. Final assembly of the vehicle takes place at Space Systems' Kearny Mesa facility.

#90344p1697 12/10/1990 ~PR Newswire

NEWPORT BEACH, CALIF (DEC. 10) PR NEWSWIRE - Pacific Scientific Co. (NYSE: PSX) sales will grow more slowly in 1991 than in the past two years, considering today's economic climate, but according to Edgar Brower, chairman, president and chief executive officer, PSX profits will increase sharply as the effects of this year's non- recurring charges disappear and gross profit margins improve. In remarks today to financial analysts and portfolio managers on Pacific Scientific operations and prospects, he attributed the expected improved results to a strong order backlog, greater revenues than 1990's projected $185 million, improved product margins and flat selling and administrative expense. Brower added that the recently announced loss for the fourth quarter of 1990 is not expected to recur, will not have an affect on 1991 results and he indicated that the company is comfortable with analysts' expectations for 1991.

In estimating 1990 results at the Equities Magazine Winter Corporate Conference at the Plaza Hotel in New York, Brower said, "Though we will be profitable for the year, we expect to lose up to $1.5 million for the fourth quarter ending Dec. 28, 1990, breaking our string of seven consecutive profitable quarters. Though the non- recurring fourth quarter expense is disappointing, we look forward to 1991 with non-recurring expense behind us."

Brower stated that world-class manufacturing techniques account for a significant part of Pacific Scientific's 1991 improved results forecast. These techniques include product line focus, rapid-cycle manufacturing, flexible manufacturing and just-in-time. "They result in a market/customer orientation for the company, with short delivery cycles, start-to-finish in one operation, low inventory and high inventory turns, dock-to-line deliveries and quick change of set- ups, tooling and product mix. For example, we now deliver a product in two weeks that took us 18 weeks before we implemented these techniques," Brower said.

Pacific Scientific's core business is designing, manufacturing and marketing technology based proprietary products for niche markets. The principal industrial products include electric motors and controls, and measurement and control instrumentation. Aerospace products include fire detection and

suppression systems, aircraft equipment and electric generators and alternators.

DALLAS, (DEC. 10) PR NEWSWIRE - Ito-Yokado Co. Ltd., Seven-Eleven Japan Co. Ltd. and The Southland Corp. today announced that Southland will file a report today setting forth the names of certain individuals who will be proposed as members of Southland's post-confirmation board of directors. The appointments of the proposed board members are subject to consummation of the three companies' Stock Purchase Agreement, which is contingent on confirmation of Southland's prepackaged reorganization plan by the U.S. Bankruptcy Court in Dallas.

The report will be filed in the bankruptcy court later today in preparation for the confirmation hearings on Southland's prepackaged reorganization plan, scheduled to begin Dec. 14. The U.S. Bankruptcy Code requires that Southland disclose, to the extent known, its anticipated post-confirmation board of directors and senior management.

Upon closing of the Stock Purchase Agreement, Southland's post-confirmation board will consist of (i) three individuals designated by the existing shareholders of Southland; (ii) ten individuals selected by Ito-Yokado and Seven-Eleven Japan; (iii) two individuals designated by the Official Bondholders' Committee in the bankruptcy proceeding; and (iv) if needed to meet applicable stock exchange requirements, two independent directors.

Today's filing names Masatoshi Ito, president of Ito-Yokado and chairman of Seven-Eleven Japan, as the proposed chairman of Southland's post-confirmation board. Toshifumi Suzuki, executive vice president of Ito-Yokado and president of Seven-Eleven Japan, is proposed as vice chairman, with John P. Thompson and Jere W. Thompson, current board members of Southland, proposed as co-vice chairmen.

Southland filed a prepackaged reorganization plan under Chapter 11 of the U.S. Bankruptcy Code in the U.S. Bankruptcy Court for the Northern District of Texas, Dallas Division, on Oct. 24, 1990.

SANTA ANA, CALIF (DEC. 10) PR NEWSWIRE - The purchase agreement between EECO Inc. and a Hong Kong-based investor group led by Dataprep Holdings Ltd. has received the approval of the Federal Bankruptcy Court. Effective Dec. 7, 1990 the Dataprep Investor Group has acquired the assets of EECO Computer Inc. and the assets of EECO Inc. related to the hotel systems business and renamed it ECI Computer Inc.

According to Carl Jeremias, who has been appointed president of the new company, ECI Computer Inc. will hire its 92 employees and will remain headquartered in Santa Ana. Jeremias has been president of EECO Computer Inc. since 1984. Looking forward to the new direction the restructured company will take, Jeremias has agreed to remain as president.

In what represents the company's first major product introduction since 1984, Jeremias recently announced the development of an updated version of its hotel and property management software, ECI/UX, which runs on Unix and Oracle software.

Touted as landmark software technology, ECI/UX offers increased functions as well as greater flexibility in the choice of computer hardware, including Digital Equipment and IBM hardware platforms. "This product will be a strategic step toward regaining our position as the leader in the industry," said Jeremias.

ECI currently is conducting a Beta test of ECI/UX in a Florida hotel, and Jeremias expects the system to become available in early 1991. In addition to the new ECI/UX system, ECI will continue to market and support its existing ECI OS and ECI GuesTrak products.

Dataprep, headed by Hong Kong businessman Fred Eu, has been the Pacific Rim distributor of the company's hotel computer systems for more than 15 years.

Providing turn-key solutions, ECI Computer Inc. now has a complete line of property management systems, central reservations systems and related products for hotels, motels, resorts and convention centers ranging in size from 50 to more than 5,000 rooms. With more than 600 systems installed in hotels, convention and resort operations worldwide, ECI also provides ongoing training customer support and maintenance services.

TORRANCE, CA (DEC. 10) PR NEWSWIRE - Ashton-Tate Corporation (NASDAQ: TATE) and Digital Equipment Corporation today announced they have shipped dBASE IV for VMS. The product was certified by Ashton-Tate in September and is being marketed and supported in the United States by Digital Equipment Corporation.

Digital is offering introductory pricing of $995 for single-user workstations and $4,200 for a four-user license for any VAX system from now until March 31, 1991.

dBASE IV for VMS is a fully implementation of Ashton-Tate's dBASE IV version 1.1 for DOS which is optimized to take advantage of the VMS environment and features. This fully integrated 4GL (Fourth Generation Language) product provides PC-level ease of use and combines a comprehensive data management system and flexible application development language with 4GL programming and productivity tools.

"Shipping dBASE IV for VMS marks a significant milestone in achieving our goal of providing existing dBASE users with a transparent growth path from the PC to more sophisticated multi-user, multi-tasking platforms like Digital's VMS," said David Proctor, Ashton-Tate's executive vice president, product development.

"With dBASE IV, users are able to run their DOS-based application and data on a VAX VMS system without modifying or re-compiling code. This true portability not only offers a cost-effective avenue for growth but also protects the tremendous investment our customers have in data, programming and training," Proctor added.

"Our customers are excited about the power of dBASE IV for VMS together with Digital's Network Application Support," said Henry Ancona, Digital's vice president of information systems and applications. Network Application Support (NAS) is Digital's open system for multi-vendor, distributed application integration.

"From within their familiar dBASE environment, Digital users can now easily build applications that access information from VAX Rdb/VMS databases, and other corporate databases anywhere on the network," Ancona added. Customers

who have been beta testing the software have had positive reactions to dBASE IV for VMS.

"dBASE IV provides features, functionality and a wide range of applications that haven't been available to Digital users in the past," said Hewitt Jackson SourceMate marketing manager, whose company's AccountMate software was ported to the VAX. "For PC developers, dBASE IV for VMS opens up an entirely new sales channel and customer set for our applications. We see this as an incredible opportunity for growth," Jackson added.

Jeff Smiley, computer scientist for Resource Conservation Company of Seattle, whose company designs Water Treatment Plants, said, "dBASE IV for VMS offers the same look and feel as the DOS version of the product and should provide our PC users with a simple interface to our VAX Rdb database."

PLAINVIEW, NY (DEC. 10) PR NEWSWIRE - Professional Care, Inc. (AMEX: PCE), a provider of nurse staffing services and home health care, today announced that the Securities and Exchange Commission has declared effective its Registration Statement on Form S-1 relating to the sale and issuance of 1,050,000 units, consisting of 1,050,000 shares of common stock and 1,050,000 Class A Warrants.

The offering price per unit is $4.75. The exercise price of the Class A Warrants, which are each exercisable for one share of common stock and one-half of a Class B Warrant, is $7.125. The exercise price of the Class B Warrants, which are issuable upon the exercise of two Class A Warrants and are each exercisable for one share of common stock, is $10.6875.

The Class A Warrants and the Class B Warrants are subject to redemption by the company at $.05 per warrant on 30 days' prior written notice at any time provided that the average closing bid price (or last sales price) of the company's common stock as reported by NASDAQ (or on such exchange on which the common stock is traded) exceeds $9.975 and $14.9625 per share, respectively, for 20 consecutive business days ending within 15 days prior to the date of notice of redemption.

The use of proceeds from the offering of the units are intended to be as follows: $1,560,000 towards the repayment of certain outstanding Bridge Notes (inclusive of four percent fixed payment); $1,450,000 towards the acquisition of IMR Acquisition Corporation ('IAC'); $450,000 towards the expansion of the business of the company's phlebotomy staffing services; $150,000 towards the expansion of the business of IAC; and $279,125, towards working capital.

The registration statement discloses that the company anticipates that it will experience a loss in the first quarter of its current fiscal year. The company also announced that the Securities and Exchange Commission has declared effective its Registration Statement on Form S-4 relating to the acquisition of IAC by Hematech, Inc., wholly-owned subsidiary of the company.

#90344p1714 12/10/1990 ~PR Newswire

CINCINNATI, OHIO (DEC. 10) PR NEWSWIRE - Cincinnati Milacron Inc. (NYSE: CMZ) and The Mandelli Group of Piacenza, Italy, today announced an agreement whereby the companies will establish two consortia: one for Europe and one for North America.

Also, as part of the agreement, for the European market Mandelli will receive a license to build and sell Milacron's aerospace profilers. These multi-axis, computer-controlled systems are used to machine large structural airframe components from aluminum, titanium and special alloys. Under the agreement, Mandelli will also provide customer support services for this equipment.

For the North American market, Milacron will receive a license to manufacture and sell Mandelli's horizontal boring mills and traveling gantry/traveling table portal mills. Milacron will also provide customer support for these machines, which produce very large metal parts used in such products as stationary engines and heavy equipment.

"The agreement reflects both companies' commitment to global competitiveness," said Daniel J. Meyer, Milacron president and chief executive officer. "It will significantly strengthen our position in European markets and, likewise, it will greatly enhance Mandelli's presence in North America," he said.

"The partnership with Mandelli will help Milacron achieve two of our most important strategic objectives in the machine tool business," D. Michael Clabaugh, vice president - advanced systems, explained. "First, it will broaden our product offering and open up new markets in the United States, where we intend to be a full-line supplier of systems to machine large metal parts -- not only for aircraft manufacturers but also for builders of power-generation, marine and off-road equipment. Second, it will strengthen our position as a global supplier to the aerospace industry for airframe and engine manufacturing -- in both Western and Eastern Europe," Clabaugh said.

The Mandelli Group, with annual sales of approximately $260 million, is the fourth largest machine tool builder in Europe and fifteenth worldwide.

Cincinnati Milacron, with 1989 sales of $851 million, is one of the world's largest producers of machine tools and plastics machinery. The company is

also a leading manufacturer of measurement and inspection equipment, computer controls, precision grinding wheels and metalworking fluids.

SAN FRANCISCO (DEC. 10) PR NEWSWIRE - Oracle Corp.'s new travel supplier started today.

In September, Oracle announced the award of its multimillion-dollar travel account to Rosenbluth Travel. Rosenbluth opened a dedicated reservation facility in San Francisco and installed a satellite ticket printer network to manage Oracle's travel purchasing management program nationwide.

Rosenbluth hired and trained 44 people in the San Francisco area to work on behalf of Oracle. Rosenbluth's customized training programs have received national recognition for the balance the firm strikes between technical proficiency and service orientation.

"Rosenbluth impressed us immediately with their professionalism, dedication and strong corporate culture," said Jill Blumberg, Oracle's corporate travel manager. "Their commitment to service goes well beyond what a typical mega-agency is willing to provide."

Rosenbluth Travel entered the San Francisco market in 1987 with the acquisition of Travel Forum, a $25 million agency with locations in Sunnyvale and Palo Alto, Calif. Rosenbluth has since been selected by many California companies to manage their business and meeting-related travel including Chevron, Catholic Healthcare West and divisions of General Electric, Eastman Kodak Co. and SmithKline Beecham. Rosenbluth has 13 offices in the Bay Area and employs more than 140 people.

Founded in 1892 as a steamship ticket office, Rosenbluth has grown to become one of the nation's largest travel management firms, offering full-service corporate, vacation and meeting and incentive travel management. Rosenbluth employs more than 2,400 people in the United States, London and Singapore, and projects that annual sales for 1990 will exceed $1.3 billion. Internationally Rosenbluth has created an alliance program with leading travel management companies in 33 countries. Named "Service Company of the Year" by Tom Peters, author of "In Search of Excellence" and "Thriving on Chaos," Rosenbluth Travel is noted for its investment in people, training and technology.

LOS ANGELES (DEC. 10) PR NEWSWIRE - Unocal Exploration Corporation (UXC) (NYSE: UXC) has discovered natural gas in a deep pool test at West Cameron Block 196 in the Gulf of Mexico offshore Louisiana.

The OCS-G 5292 No. A-4 well was tested in a middle Miocene zone between depths of 14,522 and 14,576 feet. It produced 11.3 million cubic feet of gas and 212 barrels of condensate per day through a 13/64-inch choke at a flowing tubing pressure of 11,250 pounds per square inch. Two other middle Miocene zones remain to be tested.

The deep pool exploration well was drilled from a platform installed earlier this year over two wells which had been drilled into a shallower pool where a discovery was made in 1988. Production is expected to begin before 1991.

UXC is modifying production facilities to increase gas processing capacity from 50 million to 100 million cubic feet per day. Two more development wells are scheduled to be drilled in 1991.

UXC holds a 66.67 percent working interest and is operator of the block. Texaco holds the remaining 33.33 percent.

Unocal Corporation (NYSE: UCL) and its subsidiary, Union Oil Company of California, hold approximately 95 percent of the outstanding shares of UXC, which conducts substantially all of Unocal's exploration, development and production business in and near the Gulf of Mexico.

#90344p1724 12/10/1990 ~PR Newswire

BURBANK, CALIF. (DEC. 10) PR NEWSWIRE - Mortgage & Realty Trust (NYSE: MRT) today announced that a disclosure statement and a plan of reorganization under Chapter 11 of the Bankruptcy Code have been mailed to all creditors and Trust shareholders for their approvals. On Feb. 21, 1991, a hearing has been scheduled for final Bankruptcy Court action to approve the plan.

The plan is supported by the Creditors' Committee, the Equity Holders' Committee as well as MRT. It calls for payment in full to all creditors within four and a half years, with interest at an initial rate of prime plus 1 percent, increasing one-quarter percent every six months. The Trust's assets as of Sept. 30, 1990, totaled $595,645,000 with creditors' claims totaling approximately $402,000,000.

On April 12, 1990, the Trust filed a petition for reorganization under Chapter 11 of the U.S. Bankruptcy Code. The Trust defaulted on certain note payments as a result of a downgrading of its commercial paper by Standard & Poor's. This effectively denied the Trust access to the commercial paper market as a source of funds for its investments and operations. A preliminary understanding was then reached with a group of lenders for a $425 million

credit facility. However, the Trustees decided that because of the cost, the severity of operating covenants and the risks of pledging all Trust assets to secure a two-year credit, the best interests of the shareholders would be better protected by reorganization under Chapter 11.

In a statement issued Nov. 20, 1990, the Trust said that dividends paid during the 1990 fiscal year were sufficient to maintain the Trust's status as a Real Estate Investment Trust.

Mortgage & Realty Trust is a self-administered real estate investment trust with investments in floating real estate loans and real estate equities nationwide. Shareholders' equity as of Sept. 30, 1990, was $168,717,000. The Trust's 11,000,000 common shares are traded on the New York Stock Exchange under the symbol MRT.

DALLAS (DEC. 10) PR NEWSWIRE - The board of trustees of Continental Mortgage and Equity Trust (NASDAQ: CMETS) today announced they authorized the purchase of up to $1 million of common stock of Transcontinental Realty Investors Inc. (NYSE: TCI) and up to $1 million of shares of beneficial interest of National Income Realty Trust (NASDAQ: NIRTS) through negotiated and open market transactions. The board of National Income Realty Trust approved the purchase of up to $1 million of shares of beneficial interest of Continental Mortgage. Management of the trusts will determine the amount and timing of stock purchases based on the market prices of the shares relative to management's assessment of their underlying asset value.

"We continue to believe the pervasive negative sentiment toward real estate-related stocks provides an excellent investment opportunity," said a

spokesperson for the trusts.

Continental Mortgage and Equity Trust and National Income Realty Trust are combination mortgage and equity real estate investment trusts which operate nationwide. The two trusts, and Transcontinental Realty Investors Inc. are advised by National Realty Advisors Inc. and share the same board.

DEERFIELD, IL (DEC. 10) PR NEWSWIRE - Gynex, Inc. (NASDAQ: GYNX) today announced an agreement with a company of the Organon Group, a subsidiary of Akzo of the Netherlands, which gives the Organon Group an option to license Gynex' new, patented dosage regimen for oral contraceptives. Organon will conduct studies during the option period to determine the efficacy and potential superiority of Gynex' patented oral contraceptive dosing regimen.

The studies are estimated to take appoximately one year. Once the studies are completed, the option may be exercised to license Gynex' patented dosage regimen as it relates to Organon's progestogens. At that time, a payment of $175,000 will be made to Gynex with additional milestone payments, pending successful development of the product, of up to $275,000 for rights in the United States and up to $500,000 for rights in foreign markets. An advance royalty payment of $250,000 will also be made at the time of FDA approval to market. Additionally, royalties on sales of the product will be paid to Gynex by Organon.

Oral contraceptives use various combinations of estrogen and progestogen and various dosing regimens. Gynex' patent uses a unique estrogen dosing regimen and may be combined with a variety of progestogens. The option agreement is limited to Organon's present and future progestogens although Gynex' patent also covers progestogens marketed by other companies.

Stephen M. Simes, president of Gynex said, "This agreement represents an important step in the development of Gynex' patented oral contraceptive dosing regimen. Organon presently markets Marvelon, the leading oral contraceptive in Europe, and is about to enter the $1 billion U.S. oral contraceptive market through a recently announced co- marketing and development agreement with Ortho Pharmaceutical Corp., a subsidiary of Johnson & Johnson. Ortho presently markets the leading oral contraceptive in the United States."

Gynex, Inc. is engaged in the development of pharmaceutical products for use in the medical practice of gynecology and endocrinology.

#90344p1731 12/10/1990 ~PR Newswire

NEWPORT NEWS, VA (DEC. 10) PR NEWSWIRE - The Flight International Group, Inc. (NASDAQ: FLTI), a leading provider of military readiness training, today reported consolidated operating results for the second quarter of fiscal 1991.

For the three months ended Oct. 31, 1990, Flight International reported a net loss of ($1,988,005), or ($0.53) per share, on revenues of $13,118,317, versus net income a year earlier of $767,837, or $0.23 per share, on revenues of $15,829,816.

For the first half of fiscal 1991, Flight International reported a net loss of ($3,956,339), or ($1.06) per share, on revenues of $24,602,771, versus a net loss a year earlier of ($119,358), or ($0.04) per share, on revenues of $29,655,568.

J. Nelson Happy, chairman and chief executive officer, attributed the fall off in current-quarter revenue to a number of factors, including a reduction in purchase order business; the sale of Flight International's Fixed Base Operation in Carlsbad, Calif., and the absence of revenue comparable to last year's $1.6 million sale of a contract to purchase four aircraft.

"While we've made some solid strides in reducing operating costs, unusual charges for legal and professional fees associated with the our ongoing restructuring have, in part, obscured the progress we've made," said Happy. "These unusual costs should ebb once we've completed our financial and operational restructuring."

The Flight International Group, Inc. is a leader in aviation services with interests in government and military contracts as well as commercial flight operations.

MINNEAPOLIS (DEC. 10) PR NEWSWIRE - General Mills (NYSE: GIS) announced today a series of personnel moves that are part of a planned transition for Joe R. Lee, president of General Mills Restaurants, Inc., to become chief financial officer on May 1, 1992, when Vice Chairman of the Board F. Caleb Blodgett reaches the normal retirement age of 65.

On April 1, Lee will become executive vice president-finance. In this capacity he will report to Blodgett, who will continue as vice chairman, chief financial officer and chief administrative officer until his retirement.

Until April 1, Lee will continue as president of Restaurants based in Minneapolis. After that date, the presidents of Red Lobster and The Olive Garden will report directly to Mark Willes, president and chief operating officer of General Mills, with Lee continuing to hold responsibility for International Restaurants and the new China Coast test concept. General Mills restaurant companies will continue to headquarter in Orlando, Fla.

Lee, 49 years old, joined Red Lobster in 1967 and was a member of its founding team. He was named its president in 1975, a vice president of General Mills in 1976, a group vice president in 1979, and executive vice president in 1981. He was elected to the General Mills board of directors in 1985. He is a past president of the National Restaurant Association.

LONG BEACH, CALIF. (DEC. 10) PR NEWSWIRE - Thorne Environmental Inc. and Baker Pacific Corp., both Long Beach-based environmental clean-up firms, have been acquired by Consolidated Environmental Technologies Inc. (CET), a Canadian-based international environmental firm.

The acquisition marks CET's entrance into the Western United States' environmental marketplace.

Don R. Thorne, president of the Long Beach firms, said operational changes and increased capital investments are planned to reflect the increase in service capability. Thorne will remain head of the two companies.

CET, headquartered in Vancouver, B.C., is a division of Consolidated Press U.S. Inc., which in turn is owned by Consolidated Press Holdings Ltd., a privately held Australian company.

Thorne Environmental and Baker Pacific with 200 employees, have offices in Long Beach, Anaheim, Bakersfield and Hayward, Calif., and Seattle. Active in hazardous waste treatment activities since 1982, the two companies concentrate

their activities in the 11 Western states.

Thorne Environmental and Baker Pacific have established a reputation in California and the Pacific Northwest as leaders in hazardous material removal and waste treatment technology.

Complimenting Thorne Environmental's and Baker Pacific's expertise in waste treatment and removal, CET provides additional technologies including the use of mobile on-site equipment to treat industrial waste, oil sludge, municipal solid waste and contaminated soil. The use of on-site equipment reduces the need for waste transportation and off-site disposal.

#90344p1743 12/10/1990 ~PR Newswire

COLUMBUS, OHIO (DEC. 10) PR NEWSWIRE - The first combined-cycle generation of electricity from American Electric Power's (NYSE: AEP) Tidd pressurized fluidized bed combustion (PFBC) demonstration plant has been achieved, a milestone toward full load operation of the facility.

The 70,000-kilowatt demonstration plant, considered a flagship project of the U.S. Department of Energy's Clean Coal Technology Program, is located at Ohio Power Company's Tidd Plant on the Ohio River near Brilliant, Ohio. The first combined-cycle generation of electricity took place last Friday.

Basically, PFBC involves the burning of coal with dolomite, a type of limestone. Sulfur dioxide released by the burning of coal is captured by the dolomite during combustion, which eliminates the need for flue gas scrubbers.

In addition, the relatively low combustion temperature (1580 degrees F) required for the PFBC process reduces nitrogen oxide emissions to half those

of conventional coal-fired boilers. Scrubbers, of course, do not reduce nitrogen oxide emissions. And, unlike the sludge from scrubbers, the ash products resulting from PFBC are dry granules that can easily be removed.

AEP and DOE plan for the Tidd demonstration program to continue for three years once the plant becomes fully operational in early 1991. The Tidd PFBC facility will burn 30 tons of coal per hour at full load.

AEP has also proposed building the nation's first commercial-scale PFBC facility. This facility, which would generate approximately 340,000 kilowatts would be the largest PFBC plant in the world. Preliminary engineering and design are under way to evaluate the options for this plant. Among the options are the repowering of the Philip Sporn Plant in New Haven, W.Va., which would begin commercial operation in 1996, or construction of an entirely new plant in West Virginia which would begin operation in 1998.

AEP generates approximately 90 percent of its electric energy from coal, and expects to burn 50 million tons in 1990. AEP's operating company subsidiaries provide electric service to portions of Ohio, West Virgina, Virginia, Kentucky Indiana, Michigan and Tennessee.

#90344p1745 12/10/1990 ~PR Newswire

WASHINGTON (DEC. 10) PR NEWSWIRE - Energy Secretary James D. Watkins today commended American Electric Power (NYSE: AEP) for its milestone in producing the first electricity from the Tidd demonstration project, one of the largest ventures in the $5 billion joint government-industry Clean Coal Technology Program.

Watkins called the generation of the first electric power from the advanced technology "a step into the future of environmentally clean coal-fired power production in this country."

AEP announced earlier today from its Columbus, Ohio, headquarters that it had produced the first "combined cycle electricity" from the 70-megawatt demonstration plant. The showcase project involves the refurbishment of Ohio Power Company's 47-year-old Tidd plant, near Brilliant, Ohio, with a new, highly advanced coal combustion process that cleans pollutants from coal while it burns. Following more than three and a half years of design and construction, the $185 million project began start-up activities last month, initially burning oil and gradually switching to high-sulfur coal.

On Dec. 7, the hot coal combustion gases from the seven-story-high boiler were channeled to a gas turbine generator for the first time to produce electric power. Heat from the combustor also made steam for a steam turbine generator. The combination of gas and steam turbines accounts for the name "combined cycle."

"The Tidd project will demonstrate one of the ways we can achieve greater energy security by using American coal while simultaneously improving the quality of our environment," Watkins said. "It is particularly important that this significant new advance in coal burning technology comes at a time when this nation is renewing its commitment to clean air. I commend the employees of AEP and their subcontractors for turning a very promising drawing board concept into an equally impressive engineering reality."

The technology employed at the Tidd plant is termed "pressurized fluidized bed combustion." The process burns coal in a churning, or "fluidized," mass inside the combustion furnace which is kept under high pressures. Dolomite, a natural substance, injected into the boiler, captures more than 90 percent of the sulfur released from the tumbling coal. No scrubbers are needed to achieve even the most stringent environmental standards now being imposed on new coal-burning plants.

The combustor also operates at roughly half the temperature of a conventional

coal burner, cutting the release of nitrogen oxides, another air pollutant, to less than 50 percent of the amount permitted by federal standards. The high efficiency combination of gas and steam turbines also boosts the amount of electric power that can be produced from the coal, and reduces the release of carbon dioxide, one of the "greenhouse" gases.

NEW YORK (DEC. 10) PR NEWSWIRE - AT&T (NYSE:T) announced today that its request for commitments to fund the NCR acquisition was substantially oversubscribed. More than 50 major U.S. and international banks have offered commitments for the $6 billion credit facility AT&T is establishing to finance its proposed acquisition of NCR Corporation (NYSE: NCR) stock for $90 a share.

AT&T has said it has a variety of options to raise the capital for the acquisition -- valued at $6.1 billion -- including short-term borrowing in the form of promissory notes that would be backed by the credit facility. AT&T can also draw directly upon the credit facility.

AT&T Vice President and Treasurer S. Lawrence Prendergast said the "overwhelming positive response from the financial institutions is certainly appreciated. It indicates their belief in the financial soundness of AT&T's offer."

AT&T met with banks on Dec. 6 to discuss the credit facility and begin the syndication process. The deadline for commitments was Friday, Dec. 14, but the credit facility was oversubscribed and so the syndicate books were closed early today.

NILES, OH (DEC. 10) PR NEWSWIRE - RMI Titanium Co. (NYSE: RTI) announced today that it has signed an agreement with SCM Chemicals Inc. ("SCM") for the continuing supply of titanium tetrachloride used in the production of titanium sponge.

Under the new multi-year agreement, which goes into effect Jan. 1, 1992, all the titanium tetrachloride used at the Ashtabula, Ohio, sponge facility will be provided by SCM. In addition, the agreement includes certain provisions that would permit RMI, after several years, to resume construction of its own titanium tetrachloride facility.

RMI, headquartered in Niles, Ohio, is a leading manufacturer of titanium sponge, mill products and powder. The company's products are used principally in military and commercial aircraft and engines, chemical processing equipment mesh for bridge and deck repair, pulp and paper production facilties, and medical implants.

RMI became a public corporation on April 20, 1990, with common stock trading on the New York Stock Exchange under the symbol "RTI." There are 14,981,400 shares of common stock outstanding.

#90344p1762 12/10/1990 ~PR Newswire

ST. PAUL, MN (DEC. 10) PR NEWSWIRE - Bioplasty, Inc. (NASDAQ: BIOP) announced record revenues for the first quarter of fiscal 1991 of $2,451,112, or a 62 percent increase compared to the first quarter of fiscal 1990. Net income for the first quarter of fiscal 1991 was $141,061 compared to net income of $38,346 for the first quarter of fiscal 1990. The company attributes the increase in net revenues and profits to the increased sales of the MISTI(TM) Mammary Implant and the effectiveness of its worldwide sales and marketing force.

On Aug. 30, 1990 the company introduced a new product to the European market, "MISTI GOLD(TM)." On Oct. 19, 1990 the FDA cleared MISTI GOLD for marketing in the United States. This new product is called "MISTI GOLD" because of the new gold-colored gel used to fill the surface-patterned shell of the mammary implant. The "gold" gel is biocompatible with the human body and this new filling material allows x-rays to pass through the MISTI GOLD Implant, better than x-rays can pass through silicone gel-filled or saline-filled breast

implants.

Bioplastique(TM) was first introduced in Western Europe in December of 1989. This injectable micro-implant material is fast becoming a favored technique for the enhancement of facial contours. Bioplastique has proven successful in hundreds of patients seeking cosmetic enhancement of noses, chins, cheeks, lips, etc. The company expects contributions to revenue will flow from this new product line over the next 24 months.

The company believes that the same advantages which make Bioplastique useful in aesthetic plastic surgery will also allow this material to be effective in other applications. For example, Bioplastique implanted around the neck of the bladder may restore control for hundreds of thousands of patients who experience urinary stress incontinence. Currently, the company is searching for a joint venture partner to realize this new product's potential in the urology market.

Bioplasty, Inc. has more than 19 years of experience in the development, manufacturing and marketing of plastic surgery products worldwide. Bioplasty's stock is currently traded on the NASDAQ under the symbol "BIOP."

SAN DIEGO (DEC. 10) PR NEWSWIRE - Calvary Partners, LP announced today that it filed suit against Diceon Electronics, Inc. (NASDAQ: DICN) in the Delaware Chancery Court on Dec. 7, 1990, in connection with Diceon's failure to comply with Calvary's request for Diceon's stockholder list.

Calvary's request on Nov. 27, 1990, was made pursuant to provisions of Delaware corporate law requiring a company to turn over its stockholder list and other information within five business days of a shareholder request which is reasonably related to the shareholder's interest as a shareholder. Calvary stated in its request that the purpose was, among other things, to permit it to "communicate with Diceon's other shareholders in connection with matters of common interest relative to the affairs of the corporation..."

Calvary Holdings, Inc., an affiliate of Calvary Partners, LP, commenced a

tender offer for all of the outstanding common shares of Diceon at $5.25 per share on Dec. 6.

Calvary Holdings, Inc. has conditioned its tender offer on the approval of certain proposals including amendments to Diceon's by-laws concerning qualification of directors and the election of a majority of Calvary's nominees to the board, among other things, at the 1991 annual meeting scheduled for Jan. 16, 1991.

Calvary Holdings, Inc. was formed by Calvary Partners, LP, a San Diego-based LBO research and deal origination firm. Diceon, headquartered in Irvine, Calif., manufactures sophisticated multi-layer printed circuit boards for the computer industry.

ALEXANDRIA, VA (DEC. 10) PR NEWSWIRE - Technology Applications, Inc. (TAI), a Virginia-based high-technology systems integration firm specializing in high performance computing systems, has won a contract worth $19 million to perform computer integration services at the Air Force Supercomputer Center-Kirtland (AFSCC-K) at Kirtland Air Force Base in Albuquerque, N.M.

The AFSCC-K, a state-of-the-art supercomputer center, provides the high-performance computing facilities required for Air Force research in several leading-edge technology areas critical to national defense. Its centerpiece is a CRAY-2 supercomputer capable of nearly 2 billion arithmetic operations per second. In addition, the center includes parallel-processing computers, mainframes, minicomputers and advanced graphics workstations.

AFSCC-K serves an Air Force Research & Development community of more than 1,000 users nationwide. It is connected by highspeed communication links to eight other airforce installations across the nation and to many other sites through government networks. Researchers at AFSCC-K were among the first recipients of the prestigious Gigaflop performance awards, recognizing outstanding efforts in using supercomputing for research, from Cray Research, Inc., last year.

TAI provides professional and engineering services in information technology, high performance computing, C3I, aerospace systems and logistics, ship alteration and installation, simulator maintenance and operation, environmental science and technology, and mission support primarily to agencies of the Department of Defense, the National Aeronautics and Space Administration (NASA), and the Environmental Protection Agency. TAI employs nearly 800 people at more than 40 locations around the United States and

overseas. Principal offices are in the Washington area; Tidewater, Va.; Camarillo, Calif.; and Dayton, Ohio.

Under the contract, TAI will perform hardware maintenance, maintenance of systems and applications software, integration of new hardware and software into the center, and special studies as directed by the Air Force. "TAI is quite proud to have been selected as the contractor for the Air Force Supercomputer Center at Kirtland," said James I. Chatman, president and CEO of TAI. "Our ability to provide superior supercompter integration services has been recognized by one of the most prestigious supercomputer centers in the nation. We look forward to supporting the Air Force in their mission to provide the latest research to users throughout the United States."

TAI's Applied Sciences Division also performs consulting, planning, and systems integration work in support of numerous other agencies, federal and state. TAI is currently one of only four companies licensed by the Software Engineering Institute of Carnegie Mellon University to perform software process assessments commercially for government and industry. TAI teams help client firms assess their software development processes, identify positive and negative aspects of their processes, and implement a program of improvements.

COLORADO SPRINGS, CO (DEC. 10) PR NEWSWIRE - Cray Computer Corp. (NASDAQ: CRAY) announced today that it has received an order for two systems from the National Energy Research Supercomputer Center (NERSC), at the Lawrence Livermore National Laboratory. The order is for the installed eight processor CRAY-2 and for a sixteen processor CRAY-3.

The CRAY-3 development program is scheduled to be completed during 1991. The CRAY-2 has been installed at NERSC since April 12, 1990. The CRAY-3 will be delivered in phases beginning with a two processor system scheduled for the end of 1991. The sixteen processor configuration is scheduled to be completed by the summer of 1992.

The total order value is $42 million. Neil Davenport, president and CEO, said, "We are delighted to have received our first order from such an important supercomputer user as NERSC. The National Laboratories of the Department of Energy have played a major role in the development of the US supercomputer industry. NERSC is an ideal first customer for us."

Cray Computer is engaged in the design and development of the CRAY-3 computer system.

#90344p1771 12/10/1990 ~PR Newswire

CHICAGO (DEC. 10) PR NEWSWIRE - R.R. Donnelley and Sons Company (NYSE: DNY) has created two new operating units, Graphic Services and Information Technology, in a major reorganization designed to strengthen the company's ability to manage and grow its changing business, it was announced today.

The reorganization consolidates management and operation of Donnelley's traditional business of printing and binding services, and its flourishing newer operations in information technologies, in two focused and integrated business units, said John R. Walter, chairman, president and chief executive officer.

"Creation of these separate business units reflects that Donnelley today is in several businesses, with different customers who have different needs for printing and nonprint information products and services," said Walter.

"It is a commitment to our past and a dedication to our future," he added. "It will provide us with the structure and focus needed to manage an increasingly complex business, to continue to provide superior quality and customer service, and to grow our company into the 21st century."

Graphic Services includes the company's current book, catalog, magazine, telecommunications, international and technology groups, as well as Metromail Corp., a subsidiary that is a national leader in list compilation and management.

Carl Doty, executive vice president, operations, is heading Graphic Services. William A. Thompson, currently president of the book group, becomes president of the technology group, while Jerry D. Butler, senior vice president and director of book sales, succeeds Thompson.

Information Technology focuses on customers and markets whose product and service needs can best be met by the company's steadily growing ability to develop and provide nontraditional but print related services.

This unit includes the financial printing services group, with its worldwide satellite-linked network; the documentation services group, organized to serve the computer industry on a global scale; and the information services group, which includes facilities management, technical documentation and graphic design.

Rory J. Cowan, currently president of the documentation services group, has been promoted to head the new unit as director. W. Ed Tyler, head of the

technology group, succeeds Cowan in documentation services. Both Graphic Services and Information Technology report to CEO Walter.

R.R. Donnelley and Sons Co. is the world's foremost printer of catalogs, newspaper advertising inserts, magazines, books, directories, computer documentation and financial printing. The company operates printing plants, service centers, sales offices and subsidiaries in nearly 100 locations in the United States, the United Kingdom, Ireland, Mexico, the Caribbean and the Far East.

#90344p1773 12/10/1990 ~PR Newswire

ATLANTA (DEC. 10) PR NEWSWIRE - Delta Air Lines Inc. (NYSE: DAL) announced today that it has filed a new application to serve Atlanta-Moscow on a one-stop basis via Germany.

The airline also said it has requested permission to withdraw its proposal to operate nonstop service between Atlanta and Moscow/Leningrad in the U.S.-U.S.S.R. North Atlantic Combination Service Case pending before the Department of Transportation.

Whit Hawkins, Delta's executive vice president-marketing and stations said, "While Delta remains keenly interested in serving the U.S.-U.S.S.R. market on a one-stop basis, we reluctantly decided to withdraw our nonstop proposal in the pending case because of a combination of factors including the continued high cost of fuel and the general state of the economy in both the U.S. and U.S.S.R. and its adverse impact on airline traffic."

Delta had proposed to operate three weekly nonstop flights between Atlanta and Moscow in 1991 and daily nonstop service to Moscow/Leningrad in 1992. Given the circumstances described above by Hawkins, the airline decided it would be more prudent to serve the market on a one-stop basis via a point in Germany.

Unfortunately, legal requirements of the department's administrative process would not allow Delta to amend its service proposal in the DOT proceeding from nonstop to one-stop. As a result, Delta decided to not pursue its nonstop proposal. Delta is the latest U.S. airline to withdraw its application in the case -- Continental and United had previously taken similar action.

Delta's interest in the U.S.-U.S.S.R. market remains strong and Delta is filing a new application before the DOT in which it requests authority to operate one-stop service between Atlanta and the U.S.S.R.

ROCHESTER, N.Y. (DEC. 10) PR NEWSWIRE - Genesee Corporation (NASDAQ: GENBB) today announced increased consolidated sales and earnings for the second quarter and six months ended Oct. 31, 1990.

Second quarter gross sales of $38,984,000 were up $596,000 compared to the same period a year ago. Six month sales improved more than $1.8 million to $85,332,000 compared to the first six months of the prior fiscal year. Net earnings for the second quarter increased to $693,000 or $.43 per share compared to last year's second quarter of $216,000 or $.13 per share.

John L. Wehle Jr., president and chief executive officer, said, "We are pleased to report improved performance in the current climate of economic uncertainty." The corporation reported that results for the second quarter were consistent with its strategies of improved sales growth within its food division and improved earnings, particularly by its Genesee Brewing Company subsidiary.

Wehle also announced that the corporation's real estate subsidiary had recently finalized the sale of a 425-unit manufactured home community. Although not included in the second quarter earnings, management reported that the transaction will have a positive effect on the corporation's third quarter consolidated earnings report. Terms of the sale were not disclosed by the corporation.

CHARLOTTE, N.C. (DEC. 10) PR NEWSWIRE - Coca-Cola Bottling Co. Consolidated (NASDAQ-NMS: COKE) today announced that its Board of Directors has authorized the purchase of up to 1,000,000 shares of its common stock.

The Company has not made any decisions regarding the immediate repurchase of shares including share price levels. Furthermore, the Company is still committed to making prudent acquisitions as an important aspect of its long-term direction for building value. The Board authority has been granted to allow the Company to react quickly to changing market circumstances in the event that the Company determines a repurchase of shares would be in the best interest of shareholders.

The Company will evaluate future share repurchases with appropriate consideration given to applicable business circumstances and opportunities.

NEW YORK (DEC. 10) PR NEWSWIRE - Grant Thornton, an international accounting, tax and management consulting firm with offices here, today announced that 14 partners, eight executive directors and more than 130 staff from Spicer & Oppenheim have joined its New York practice.

"We are delighted to welcome this group of talented professionals into our expanding organization," said Robert E. Nason, executive partner of Chicago-based Grant Thornton, which has more than 50 offices nationwide.

With the addition of these former partners and executive directors from Spicer & Oppenheim, which has dissolved its partnership, Grant Thornton will expand its New York operation in three principal areas: investment partnerships; securities and commodities firms; and corporate reorganizations and restructurings.

As a result of this transaction, Grant Thornton's New York office will gain a number of prominent financial services and major commercial clients.

Domenick J. Esposito will continue to head Grant Thornton's New York metropolitan area practice as managing partner. Cono R. Fusco will serve as partner-in-charge of a new practice unit, which will serve Wall Street-area clients from Spicer & Oppenheim's former headquarters at 7 World Trade Center. Grant Thornton's New York City headquarters are located in midtown at 605 Third Ave.

Grant Thornton now has five offices, 45 partners and 400 staff in New York, New Jersey and Connecticut.

Grant Thornton has 2,700 total staff, including more than 300 partners, in the United States. The firm serves clients worldwide through Grant Thornton International, which maintains 465 offices in 60 countries.

HOUSTON (DEC. 10) PR NEWSWIRE - Stewart Information Services Corp. (NASDAQ: SISC) today declared a quarterly cash dividend of 5 cents per share, payable Jan. 31, 1991, to Common stockholders of record Dec. 31, 1990. This is a reduction from the 10 cents per share dividend declared in the third quarter

of 1990.

The company had previously announced the possibility of a dividend reduction when it released its third quarter results in October. The board of directors of the company has now determined that it is appropriate and in the best interests of the company and its stockholders to declare a more conservative dividend. This will permit the company to retain cash considered necessary to support its present operations and maintain its policyholder surplus, which the company considers to be an important competitive factor in the title industry.

The board's decision was influenced by the current real estate recession. In line with declining real estate activity, the company's orders have been in a downward trend, declining 11 percent in the month of November compared with the same period a year ago. The company incurred a loss in November primarily because of a decline in revenues from title operations, increased claim loss provisions, a loss on a mapping contract which is near completion. The company has initiated and is continuing its cost reduction programs and recognizes it is operating in a difficult environment. The company is unable at this time to predict whether it will make a profit for the year.

The outlook in Texas and some of the company's other markets are considered to be "above average" in comparison with national forecasts. This is particularly true of resurging Houston, where Stewart is the leading title company. However, the company believes the overall outlook for real estate is reason for caution.

Stewart's primary business is title insurance. The company issues policies on homes and other real property in 50 states, the District of Columbia and Canada through over 26,600 issuing locations. In issuing a policy, the title is first searched, examined and then closed. Stewart's customers include homebuyers and seller, attorneys, builders, developers, lenders and real estate brokers. The company also sells computer-related services and information to the real estate industry. Additionally, the company produces geographic information systems for government and private entities.

LOS ANGELES (DEC. 10) PR NEWSWIRE - Gamma Electronic Systems Inc. (OTC) announced today its decision to withdraw its listing from the Alberta Stock Exchange. A unanimous board resolution was passed today in favor of voluntary withdrawal. Gamma was notified on Dec. 4 of a 15-day interim cease trade order and of a hearing on Dec. 19.

"It's no secret that Gamma has had cash flow problems since its inception,"

said Michael D. Mayer, president and chief executive officer of Gamma. "The company can no longer afford the costs involved with regulatory compliance particularly in light of the limited benefits realized thus far by Gamma," Mayer added.

Gamma also announced updates on previously announced deals. The Lassaray Group Joint Venture is still pending, and is awaiting the resolution of key internal decisions at Lassaray.

The negotiations for the marketing rights of B.A.S.E.(tm) are still ongoing although the Japanese/U.S. Group has failed to provide Gamma with the monies in the allotted time prescribed in the original letter of intent.

For more information contact Sylvio J. Pennucci, Gamma Electronic Systems Inc. 1631 16th St., Santa Monica, CA, 90404. The Alberta Stock Exchange has neither approved nor disapproved the contents of this press release.

MINNEAPOLIS (DEC. 10) PR NEWSWIRE - Super Valu Stores, Inc. (NYSE: SVU) announced record earnings of $38 million in its recently concluded third quarter, which ended Dec. 1.

Earnings of $38 million (51 cents per share) were produced on sales of $2.8 billion, which increased 3.9 percent from the previous year's $2.7 billion sales. Earnings in the previous year were $37.5 million, or 50 cents per share.

The results brought year-to-date (40 weeks) sales to $8.8 billion, a 4.5 percent increase over the previous year, and net earnings to $107.9 million, a 3.5 percent increase over the same period last year. Earnings per share for the three quarters totalled $1.44, an increase of 3.6 percent.

Super Valu Chairman and CEO Mike Wright indicated that, while the company's retail support and retail foods operations were essentially on plan, overall results reflected lower-than-anticipated sales in the company's ShopKo discount general merchandise division.

"Unseasonably warm weather throughout the month of November and the slow start to the Christmas selling season resulted in a shortfall in ShopKo's expected contribution to earnings," said Wright.

Wright indicated that the company's retail support (wholesale food) sales trends had improved in the third quarter in spite of a moderate decline in the rate of food inflation. He also indicated that the current climate for commercial development has resulted in the delay of a number of projects.

However, new stores, store upgrades and new retailer affiliations had added 2.4 million square feet to the company's retailer base through the first three quarters. Aggressive retailer development should be viewed as a growing competitive strength of the company, Wright said.

"The strength of our balance sheet will enable us to continue to develop new stores at a time when some are finding it difficult to finance store growth. Add to that the market flexibility of our array of store formats and we see considerable competitive opportunity for Super Valu and its independent retailers in the months ahead," Wright said.

The company said that the third and final phase of the opening of its new distribution center in Kenosha, Wis., had been finished, the relocation of administrative offices from Green Bay had been completed and that the center was now fully serving its market area.

The company's Spokane division also completed the addition of produce distribution to its product line, which will allow that division's retailers to further consolidate purchases with Super Valu.

CINCINNATI (DEC. 10) PR NEWSWIRE - Eagle-Picher Industries (NYSE: EPI) announced today that the company received a petition from three personal injury asbestos plaintiffs seeking to force the company into involuntary bankruptcy.

The petition was filed in the United States Bankruptcy Court, Cincinnati, Ohio. The company believes that this action by the plaintiffs is totally without merit. Furthermore, the company is meeting all of its obligations to vendors, creditors, and lenders on a timely basis.

The company does not believe that any of the three have standing to bring the petition because one has already been paid and the other two have not submitted the releases which are a condition to payment.

Thomas E. Petry, Eagle-Picher Chairman, said, "We believe that this filing is an act of desperation on the part of certain members of the plaintiffs' bar whose goal is to sabotage efforts currently under way for a class action solution to the litigation. This class action would break the massive backlog of asbestos personal injury claims that is choking this country's state and federal judicial systems."

It is the company's intention to ask for an expedited determination of this filing and to also ask that the court order reimbursement to Eagle-Picher for all costs and damages to our business incurred as a result of this petition.

NEWARK, NJ (DEC. 10) PR NEWSWIRE - U.S. Magistrate Ronald Hedges today ordered one of the nation's largest freight moving companies, Consolidated Freightways (NYSE: CNF), a wholly owned subsidiary of Emery Worldwide, to pay more than $25,000 in attorneys fees to another trucking firm, Instant Air Freight Co., of Elizabeth, N.J.

Paul Colwell of the Roseland, N.J., law firm of Wolff & Samson obtained the award on behalf of Instant. Hedges also told Consolidated to pay to Instant $1,154.71 in court reporters' expenses, and ordered Emery President Donald Berger to appear at a deposition Dec. 18 in connection with his company's failure to produce documents pursuant to prior court orders, Colwell reported. Hedges also ordered Emery to produce all requested documents by Jan. 18. Both

sides are scheduled to appear before Hedges on Feb. 1.

According to court papers filed by Colwell with U.S. District Court Judge H. Lee Sarokin, Emery breached a contract with Instant that cost Instant 80 percent of its business and caused it to cut its staff from about 100 employees to 20.

In April 1989, Emery Air Freight and CF Air Freight merged and formed Emery Worldwide - and promptly terminated the contract with Instant, which was its exclusive cartage agent, according to the complaint filed by Colwell.

Instant is seeking compensatory damages for lost profits, and punitive damages and treble damages on antitrust and civil RICO claims. The company also charges Emery with breach of contract and lease, unjust enrichment, and fraud.

SHAWNEE, OK (DEC. 10) PR NEWSWIRE - Barton Industries Inc., (NASDAQ: BART) has announced today that a combination of disappointing fourth quarter results and the potential adverse effects of a number of open accounting matters will substantially reduce Barton's earnings for its fiscal year ended Sept. 30, 1990 from previously reported interim period levels. The net results are dependent upon the resolutions of the accounting matters which could result in a loss for fiscal year 1990.

The disappointing fourth quarter results are expected to include significant losses resulting from the unanticipated continuing adverse effect of a previously announced manufacturing problem at the company's Integrated Technology Systems Division resulting in the Division's inability to sell its Pump-Off Plus control units.

BALTIMORE (DEC. 10) PR NEWSWIRE - MNC Financial Inc. (NYSE: MNC) announced that a wholly-owned subsidiary, MBNA Corp., filed today with the Securities and Exchange Commission a registration statement relating to a proposed initial public offering of 45 million shares of MBNA Corp. common stock.

MBNA Corp. has been formed to conduct the credit card business presently conducted by MBNA America Bank, N.A.

MNC Financial will sell 100 percent of its MBNA Corp. holdings in the offering and MBNA Corp. will sell additional shares.

MNC Financial announced on Oct. 25, 1990, that it had retained an investment banking firm to solicit bids for the sale of MBNA America. Today's filing was made to expand MNC's options with respect to the disposition of MBNA America. The offering will not proceed if MNC Financial reaches an agreement for the sale of MBNA America.

The planned offering, which will be made only by prospectus, is structured as a dual syndicate, with 36 million shares of common stock to be offered in the United States and 9 million shares to be offered concurrently outside of the United States. MBNA Corp. has granted the underwriters an option for 30 days to purchase up to an additional 6.75 million shares. Goldman, Sachs & Co. will lead manage the United States offering and Goldman Sachs International Limited will lead manage the international offering. MNC Financial has indicated that it will ask the underwriters to offer shares to MNC Financial shareholders. Prior to this offering, there has been no public market for the common stock of MBNA Corp.

Immediately prior to completion of the offering, MNC Financial will contribute to MBNA Corp. the credit card and certain related banking assets and liabilities of MBNA America and certain other subsidiaries of MNC Financial. Certain assets and liabilities which are not related to the credit card business will be excluded as will a participation interest in a portfolio of credit card receivables owned by another subsidiary of MNC Financial which had a balance of nearly $500 million at Sept. 30, 1990.

MBNA America is a leading nationwide issuer, marketer and servicer of premium and standard bank credit cards. The company markets primarily through professional, fraternal, educational and special interest associations that endorse the company's credit cards to their affinity group members.

CONTACT: Daniel G. Finney (media), 301-547-4038, or David W. Spartin (investors), 301-547-4410, both of MNC Financial.

#90344p1837 12/10/1990 ~PR Newswire

SASKATOON, Saskatchewan (DEC. 10) PR NEWSWIRE - Develcon Electronics Ltd. today announced its audited results for the year ended Aug. 31, 1990 as follows (Canadian funds):

DEVELCON ELECTRONICS LTD.

Aug. 31	Year Ended 1990	Year Ended 1989
Sales and Customer		

Service Revenue	$9,738,000	$11,261,000
Loss Before Income Taxes, Unusual and Extraordinary Items	(2,866,000)	(4,212,000)
Unusual Item	837,000	1,248,000
Loss Before Income Taxes and Extraordinary Items	(2,029,000)	(2,964,000)
Extraordinary items	--	142,000
Net Loss	(2,029,000)	(2,822,000)
Loss Per Share Before Extraordinary Items	$(.36)	$(.80)
Loss Per Share After Extraordinary Items	$(.36)	$(.76)

Audited results for the year ended Aug. 31, 1990 indicate a net loss before and after extraordinary items of $2,029,000 or $.36 per share, compared to a net loss before and after extraordinary item of $2,964,000 and 2,822,000 or $.80 and $.76 respectively per share a year earlier. The $837,000 unusual item in 1990 represents a recovery of refundable Part VIII income taxes associated with the company's purchase of the outstanding shares of 272319 B.C. Ltd. reported in the previous year. Unusual items of $1,248,000 in 1989 included a write down of building costs and U.S. inventory as well as a write off of tax recovery, net of refundable Part VIII income taxes. The $142,000 extraordinary item in 1989 was attributed to the forgiveness of debt relating to interest on a debenture recorded in the second quarter of fiscal 1989.

The weighted average number of shares outstanding was 5,692,839 for fiscal 1990, and 3,697,003 for fiscal year 1989.

The company continues to experience working capital pressures. Management is emphasizing measures to increase revenues and contain costs throughout the organization. At the same time, the company is actively pursuing the identification of a strategic partner who would provide financial strength to the organization.

CONTACT: W.D. Vancoughnett, vice president-finance and chief operating officer of Develcon Electronics, 306-933-3300.

#90344p1848 12/10/1990 ~PR Newswire

MINNEAPOLIS (DEC. 10) PR NEWSWIRE - Ultra Pac, Inc. (NASDAQ: UPAC), a Rogers, Minn.-based manufacturer of recyclable food packaging using P.E.T., today reported continued growth during its third quarter ended Oct. 31, 1990. Net sales and net income increased 117 percent and 453 percent, respectively, compared to the third quarter last year.

Sales for the three months ended Oct. 31, 1990 totalled $3,360,846 compared to $1,548,392 reported last year. Net earnings increased to $242,933, or $.09 per share during the current period, up from $43,931, or $.02 per share during the same period last year.

During the nine months ended Oct. 31, 1990, Ultra Pac recorded net sales of $8,305,207, a 114 percent increase over the $3,884,030 reported for the comparable period one year ago. For the nine months ended Oct. 31, 1990, the company reported primary net earnings of $538,750, or $.24 per share, compared to $137,453, or $.07 per share last year.

Established in 1987, Ultra Pac, Inc. reported sales of $741,124 during the period from inception (February 1987) through Jan. 31, 1988. Net sales commenced in May 1987. The company reported sales of $2,791,496 and $5,474,038 for the years ended Jan. 31, 1989 and 1990.

Management attributed the increase in sales to the company's overall expansion of marketing and distribution channels, as well as the introduction of new products, including its recently introduced deli packaging product line.

During the third quarter this year, cost of goods sold decreased to 70.3 percent of net sales from 74.0 percent during the same period last year. Marketing and sales expense, as a percentage of net sales, decreased to 14.5 percent in the third quarter compared to 15.3 percent in the third quarter last year. Shareholders' equity increased from $777,623 on Jan. 31, 1990 to $1,902,672 on Oct. 31, 1990, due to retained earnings and as a result of the net proceeds from the sale of common stock and the exercise of certain common stock options and warrants totalling $568,299.

During the nine-month period, the company entered into a new lending agreement which refinanced all current and term notes payable and certain capital lease obligations. The new agreement increased the company's term loan facility by $1,000,000 and revolving credit facility by $450,000. This lending agreement, which bears interest on the remaining balances at 1-1/2 percent over prime rate (11.5 percent at Oct. 31, 1990), replaces previous lending agreements, including accounts receivable financing, which were at substantially higher interest rates.

Ultra Pac, Inc. designs, manufactures and markets recyclable plastic packaging for the food industry and premium CD packaging for the music industry. Ultra Pac, Inc. common stock is traded on NASDAQ under the symbol "UPAC."

CONTACT: Cal Krupa of Ultra Pac, 612-428-8340; or Tom de Petra of First Financial Investor Relations, 612-338-7630, for Ultra Pac.

SAN FRANCISCO (DEC. 10) PR NEWSWIRE - AT&E Corp. (AMEX: ATW) announced today that as part of its continuing effort to streamline its organization and reduce operating expenses, it has implemented a plan to reduce its total workforce by approximately 40 percent by early January 1991.

Although the workforce reduction program reduces the company's operating expenses, AT&E requires a cash infusion in order to continue operations and implement its new strategic plan. As stated in AT&E's Form 10-Q Quarterly Report for the quarter ended Sept. 28, 1990, the company is currently negotiating with Seiko Corp. and potential strategic partners to raise additional capital. AT&E is also exploring the sale of the company and merger or other business combination opportunities with third parties.

In view of the company's plan to function primarily in a supporting role with respect to the implementation and operation of the RECEPTOR (TM) Personal Communications System, Charles Skibo has decided to resign as president and chief operating officer of the company. As part of its restructuring effort, AT&E has consolidated the operations of its Network Services Division and AT&E Laboratories Inc. under the direction of Michael J. Park, senior vice president of AT&E and president of AT&E Network Services. In connection with this reorganization, Dr. Ronald Foerster has resigned as senior vice president of AT&E and president of AT&E Laboratories Inc., but will remain as a non-executive director of the company.

AT&E's common stock is traded on the American Stock Exchange; its symbol is ATW.

#90344p1857 12/10/1990 ~PR Newswire

CHICAGO (DEC. 10) PR NEWSWIRE - Paul Dwight Doolen died Friday, Dec. 7 in Mt. Dora, Fla., at the age of 85.

Doolen was the former president and CEO of Bankers Life and Casualty Co., and chairman of the board of the John D. and Catherine T. MacArthur Foundation from its inception in 1978 until his retirement in 1984. In addition, Doolen was president of The Retirement Research Foundation in Park Ridge, Ill.

"Paul Doolen played a crucial role in the history of the MacArthur Foundation, providing strong, calm leadership in its early years," said President Adele Simmons.

Born Feb. 24, 1905 in Vernon, Ill., Doolen received his bachelor's degree in liberal arts from the University of Illinois in 1927, and his LL.B from Harvard Law School in 1931.

Early in his career, Doolen practiced law primarily in the northern suburbs of Chicago in the firm of Decker and Doolen. It was there that he handled some routine legal affairs for a walk-in-client -- John D. MacArthur. An enduring and close personal friendship developed, and years after that first meeting, MacArthur, without preamble, asked Doolen to accept the post of president of Bankers Life and Casualty. Doolen declined on the grounds that an executive within the company, someone more familiar with the insurance business itself, should be president. MacArthur persisted, and on Feb. 1, 1952, Doolen joined Bankers Life -- but in a planning position, not in a line office. The two men agreed on the positions of vice-chairman of the board and chairman of the newly created executive committee.

After retiring as vice-chairman and president of Bankers Life and Casualty in 1978, Doolen became chairman of the board of the MacArthur Foundation. He was also active in civic affairs -- as director and chairman of the Macon County Community Chest; director and chairman of the Aviation Committee of the Illinois State Chamber of Commerce; director of the Adult Education Council of Greater Chicago; Founding Trustee of Palm Beach Gardens, Fla.; and chairman and director of Retirement Research Foundation.

Doolen moved to Mt. Dora, Fla., from Barrington, Ill., in 1982. He was a member of the Mt. Dora Yacht Club and the Sapphire Valley Country Club, Sapphire, N.C. He is survived by his wife, Estine Lewis Doolen, of Mt. Dora; a son, Mark Lorimer Doolen, of Chicago; a daughter, Deborah Doolen Ittel, of Greenwich, Conn.; and two granddaughters.

#90344p1863 12/10/1990 ~PR Newswire

GREENVILLE, S.C. (DEC. 10) PR NEWSWIRE - At the annual meeting of shareholders of F.A. Computer Technologies Inc. (NASDAQ: FACO) held here Dec. 7, 1990, the shareholders voted to approve an amendment to the company's Restated Certificate of Incorporation providing for a change of its name to Gates/FA Distributing Inc.

Concurrent with the name change, to become effective on Jan. 1, 1991, the company's securities will trade in the over-the-counter market and will be quoted on the NASDAQ System under the new symbols: GAFA (common stock), GAFAW (warrants), and GAFAU (units).

The company was originally incorporated as F.A. Computer Technologies Inc. in April 1987. Upon the fall 1988 announcement of the merger with Gates Distributing Inc., the company began operating under the trade name Gates/FA Distributing. The use of the trade name in conjunction with the company's dissimilar stock symbols created some confusion among investors following the company.

In another matter presented at the annual meeting, the shareholders elected six directors to the company's board. These are Irwin Lieber, Eli Oxenhorn, Steven H. Owings, Dennis Gates, G. Robert Brownell, and Charles A. Luther.

Gates/FA Distributing is a national distributor of a select number of high-quality microcomputer product lines. Serving only the reseller, Gates/FA offers "Next Day/No Extra Cost!" delivery from its centralized- hub warehousing facility. The corporate headquarters are located in Greenville, S.C., at 803-234-0736. The national toll-free sales telephone number is 800-332-2222.

CONTACT: Steve Owings of Gates/FA Distributing, 803-234-0736; or Nancy Comstock of Comstock Communications, 415-799-7711

GREENVILLE, S.C. (DEC. 10) PR NEWSWIRE - Gates/FA Distributing (NASDAQ: FACO) today announced the appointment of Steven H. Owings as chairman of the board of directors and Philip D. Ellett as president. Owings remains the company's chief executive officer.

Ellett, who joined Gates/FA in October, 1989, as exective vice president, now assumes responsibility for the firm's day-to-day operations.

According to CEO Steve Owings, "Phil was originally brought on board with the intent to elevate him to the company's presidency. We believe this will be a smooth transition since as executive vice president he handled several similar responsibilities."

Ellett, who continues to report to Owings, will now oversee all company departments, which include sales, merchandising, marketing, finance, technical support and customer service. He remains the key contact for the firm's vendors.

As chairman of the board and chief executive officer, Owings will continue supervising corporate planning and acting as liaison between the corporation and its financial institutions and advisers, its principal shareholders and lenders.

Dennis Gates, former board chairman, will remain on the board of directors and the executive committee and will continue to work with the executive team as an adviser, and as a liaison to the investment community.

Gates/FA Distributing is a national distributor of a select number of high-quality microcomputer product lines. Serving only the reseller, Gates/FA offers "Next Day/No Extra Cost!" delivery from its centralized- hub

warehousing facility. The corporate headquarters are located in Greenville, S.C., at 803-234-0736. The national toll-free sales telephone number is 800-332-2222.

CONTACT: Steve Owings of Gates/FA Distributing, 803-234-0736; or Nancy Comstock of Comstock Communications, 415-799-7711

MOSCOW (DEC. 10) TASS - REBELS ARE PLUNDERING AFGHANISTAN'S NATIONAL HISTORIC AND CULTURAL VALUES AND NATURAL RESOURCES, SOVIET FOREIGN MINISTRY SPOKESMAN YURI GREMITSKIKH TOLD A BRIEFING HERE TODAY.

GREMITSKIKH SAID AFGHAN SECURITY FORCES RECENTLY CONFISCATED A BUDDHA SCULPTURE, ESTIMATED BY EXPERTS AT 100 MILLION U.S. DOLLARS, AND A UNIQUE COLLECTION OF 5TH-6TH CENTURIES ROLLS FROM IRRECONCILABLE OPPOSITION GROUPS IN KUNDUZ PROVINCE. REBELS WERE PLANNING TO SELL THEM ABROAD.

REBEL GROUPS HAVE MADE ILLEGAL EXPORTS OF PRECIOUS STONES AN IMPORTANT SOURCE FOR FINANCING THEIR ARMED UNITS AND FOR PERSONAL ENRICHMENT. ONLY AT THE SARE-SANG DEPOSIT, THEY HAVE EXTRACTED AND SOLD LAPIS LAZULI, WORTH SOME 20 MILLION U.S. DOLLARS, GREMITSKIKH SAID.

THE AFGHAN GOVERNMENT IS WORRIED WITH MISAPPROPRIATION OF THE NATIONAL RICHES. SCIENTISTS FROM VARIOUS COUNTRIES, WHO ATTENDED THE INTERNATIONAL SEMINAR ON PROBLEMS OF HISTORY AND CULTURE IN KABUL IN NOVEMBER, EXPRESSED INDIGNATION OVER THE ACTIVITIES OF THE IRRECONCILABLE OPPOSITION, MOVING UNIQUE CULTURAL VALUES FROM AFGHANISTAN.

VILNIUS (DEC. 11) TASS - "TENSION IN LITHUANIA IS MOUNTING," LITHUANIAN DEPUTY PRIME MINISTER ROMUALDAS OZOLAS TOLD REPUBLICAN TELEVISION.

SPEAKING ABOUT SOURCES OF TENSION INSIDE THE REPUBLIC, OZOLAS FIRST OF ALL TOUCHED UPON THE PROBLEMS OF EASTERN LITHUANIA, WHERE POLES CONSTITUTE AN ETHNIC MAJORITY.

HE RECALLED THAT THE ESTABLISHMENT OF A VILNIUS POLISH NATIONAL-TERRITORIAL REGION WAS PROCLAIMED THERE EARLY IN OCTOBER THIS YEAR AT THE SECOND CONGRESS OF DEPUTIES FROM ALL LEVELS IN VILNIUS AREA.

HOWEVER, THE REPUBLICAN PARLIAMENT HAS NOT OFFICIALLY EXPRESSED ITS OPINION ON THE ISSUE UP TO NOW. A SPECIAL WORKING GROUP IS CONSIDERING MATTERS CONCERNING A POSSIBLE STATUS OF POLISH AUTONOMY AND WILL SUBMIT ITS RECOMMENDATIONS TO PARLIAMENT FOR CONSIDERATION.

THE DEPUTY PRIMIER ALSO MENTIONED AS A SOURCE OF THE MOUNTING TENSION "THE SOVIET COMMUNIST PARTY (CPSU)'S DISRUPTIVE ACTIVITY IN LITHUANIA". "THE CPSU HAS LONG BEEN THE MAIN COORDINATOR OF POLITICAL SABOTAGE AND MILITARY BLACKMAIL IN LITHUANIA," OZOLAS SAID.

HE DESCRIBED AS A PARTICULARLY SIGNIFICANT EVENT IN THE REPUBLIC'S POLITICAL LIFE THE DISCUSSION, WHICH BEGAN AT THE LITHUANIAN PARLIAMENT SESSION LAST WEEK, OF THE ITEM CONCERNING "THE POLITICAL AND ECONOMIC SITUATION IN THE LITHUANIAN REPUBLIC".

THE PARLIAMENT ITSELF AND ITS LEADERSHIP WERE FOR THE FIRST TIME OPENLY AND STRONGLY CRITICISED DURING THE DISCUSSION.

AS OZOLAS PUT IT, THE DISCUSSION WAS "VERY INTERESTING AND VALUABLE."

HE POINTED OUT THAT "THE ORIENTATION TOWARDS PARLIAMENTARY IMMUNITY THAT HAS BEEN IN EXISTENCE SO FAR IS A REFLECTION OF THE CPSU'S IMMUNITY." AT THE SAME TIME HE EMPHASISED THAT NO ONE CAN BE ALLOWED TO DENY THE PARLIAMENT ITSELF OR SPEAK ABOUT RE-ELECTING IT.

OZOLAS DID NOT SHOW OPTIMISM WHEN TOUCHING UPON A MEETING, SCHEDULED FOR

DECEMBER 13, BETWEEN DELEGATIONS OF THE LITHUANIAN REPUBLIC AND THE SOVIET UNION, TO DISCUSS MATTERS OF PREPARATION FOR TALKS. HE BELIEVES THAT "THE QUEST FOR ACCORDS AT THE MEETING WILL APPARENTLY TURN INTO PUTTING FORWARD DEMANDS."

OZOLAS ALSO TOOK A PESSIMISTIC VIEW OF PROSPECTS FOR A MEETING, SCHEDULED FOR MONDAY, BETWEEN LITHUANIAN PARLIAMENT PRESIDENT VYTAUTAS LANDSBERGIS AND U.S. PRESIDENT GEORGE BUSH.

HAVING IN MIND, UNDOUBTEDLY, THE PROBLEMS OF RECOGNISING LITHUANIA'S INDEPENDENCE, OZOLAS SAID: "ONE CAN HAVE NO DOUBT THAT WHAT WAS NOT DONE DURING SEVERAL DAYS FOLLOWING MARCH 11 WOULD NOT BE DONE NOW THAT THERE IS THE THREAT OF A GULF WAR".

#90344t3449 12/10/1990 ~ts
KISHINEV (DEC. 11) TASS - MOLDAVIAN POLITICAL PARTIES, PUBLIC, RELIGIOUS AND CULTURAL ORGANISATIONS AND MOVEMENTS HELD A CONSULTATIVE MEETING HERE ON MONDAY ON THE INITIATIVE OF THE MOLDAVIAN COMMUNIST PARTY CENTRAL COMMITTEE.

PARTICIPANTS CALLED ON ALL POLITICAL FORCES IN THE REPUBLIC TO TAKE PART IN PREPARING A "ROUND TABLE" MEETING, SCHEDULED FOR JANUARY, 1991. A COORDINATION COMMITTEE HAS BEEN SET UP TO PREPARE THE MEETING.

PARTICIPANTS SUGGESTED THAT THE "ROUND TABLE" DISCUSS THE SITUATION IN THE REPUBLIC, THE ROLE OF PEOPLE'S DIPLOMACY IN REACHING ACCORD AND MOLDAVIA'S INTEGRITY, A DRAFT UNION TREATY, CIVIL CONSENSUS AND CONVENING THE CONGRESS OF PEOPLES OF MOLDAVIA.

REPRESENTATIVES OF THE MOLDAVIAN COMMUNIST PARTY, THE SOCIAL DEMOCRATIC PARTY, THE NATIONAL CHRISTIAN PARTY, THE KISHINEV EPARCHIAL DEPARTMENT OF THE RUSSIAN ORTHODOX CHURCH, THE MOLDAVIAN CHRISTIAN DEMOCRATIC WOMEN'S LEAGUE AND OTHER PUBLIC AND POLITICAL ORGANISATIONS EXPRESSED THEIR DEEP CONCERN OVER THE SOCIAL, ECONOMIC AND POLITICAL SITUATION IN THE REPUBLIC, SHARPENING INTER-ETHNIC RELATIONS AND THE DANGER OF DISINTEGRATION OF THE REPUBLIC.

-30- 1308
#90344u0028 12/10/1990 ~United Press International
(DEC. 10) UPI - Senior Saudi and Kuwaiti officials are denying a British newspaper report claiming Saudi Arabia and Kuwait's exiled government are holding secret talks with Iraq. The London newspaper The Independent reported the talks aimed at granting Iraq part of Kuwait's territory after Iraq withdrew from the emirate. But both Saudi and Kuwait strongly denied the report today.

Dan Quayle says Congress is playing politics with the Iraqi crisis. The vice

president says lawmakers have- in his words- ''the luxury of criticism without the burden of accountability.'' Quayle gave his gloves-off address today to an annual conference of Republican governors in North Carolina.

Soviet Foreign Minister Shevardnadze says he'll discuss humanitarian aid for his economically struggling nation in talks that will continue tomorrow with Secretary of State Baker in Houston. Shevardnadze says Moscow would appreciate ''food supplies.'' Baker says President Bush has been consider food and medical aid to the Soviet Union. The two diplomats will fly to Washington tomorrow night for a meeting with Bush the following day.

NASA administrator Richard Truly says he is looking forward to hearing tales from the crew of the shuttle Columbia. Truly says he wants to hear how the astronauts turned- in his words- ''such a shaky start into such a great success.'' The space agency is bringing the ship home one day earlier due to anticipated bad weather conditions at Edwards Air Force Base in California. The ship is expected to touchdown early tomorrow.

Diplomats say the U-N Security Council delayed again today a debate on whether to hold an international conference on the Middle East. The 15-nation council met formally for about three minutes this afternoon before suspending the session. Diplomats say the delay is designed to give NON-aligned nations time to devise a compromise resolution to quell U-S opposition.

#90344u0091 12/10/1990 ~United Press International

BEIJING (DEC. 10) UPI - Premier Li Peng said Monday a crucial Communist Party meeting this month would focus solely on the economy and suggested China would be ''lenient'' towards Tiananmen Spring dissidents charged with political crimes.

Li was speaking to reporters at the Beijing airport before departing with Foreign Minister Qian Qichen on a 10-day visit to Malaysia, the Phillipines, Laos and Sri Lanka.

The hard-line premier said the long-expected Communist Party plenary session would take place in the latter half of December, but that it would not address the controversial issue of the fate of deposed party chief Zhao Ziyang.

Zhao, ousted from all his posts last June for allegedly supporting the 1989 democracy protests, has been ''under investigation'' for more than a year but remains a party member.

''As far as I know, there will only be one item at the forthcoming meeting,'' Li said. ''That is discussions about the Eighth Five-Year Plan and the 10-year strategy for economic development. There will be no other item on the agenda.''

The party meeting had been scheduled for the fall but reportedly was postponed due to high-level bickering over the nature and pace of China's economic reforms over the next decade.

Although Li referred to the long-range economic plans as ''major events,'' little is expected from a lackluster party meeting, the result of a vague compromise apparently hammered out between reformists and conservative central planners.

Li refused to elaborate on the fate of political dissidents awaiting trial on charges of counterrevolution and sedition for their activities in spring 1989, but hinted they would not receive harsh sentences.

''So far as the party and government is concerned, the policies are very lenient towards these people,'' Li said.

Li was referring to democracy advocates such as student leader Wang Dan, one of a core group of students and intellectuals imprisoned for more than a year for allegedly masterminding the Tiananmen Spring democracy movement.

Two of the dissidents have been charged with sedition, a serious crime punishable in China by a lengthy prison term or even death in extreme cases.

At least nine jailed activists have been charged with ''spreading counterrevolutionary propaganda,'' a vaguely defined crime carrying prison sentences of five to 10 years.

#90344u0105 12/10/1990 ~United Press International

(DEC. 10) UPI - Secretary of State Baker says Iraq is NOT taking seriously the process of setting dates for high-level talks with the United States. The Bush administration has proposed the discussions be held in late December and early January. Baker suggested in an interview Sunday that Iraq's choice of later dates show the Baghdad government is NOT serious about the talks.

Officials results are expected to be announced Monday in Poland following the nation's first democratic presidential election. However, computer projections based on exit polls show Solidarity founder Lech Walesa took nearly 75 percent of the ballots cast. Walesa gave the familar ''V-for-victory'' Solidarity salute to about five-thousand chanting supporters who gathered under his window in Gdansk, waving Polish flags, balloons and torches.

NASA says the decision on when to bring the shuttle Columbia home is up in the

air- and will remain so until the space agency gets an updated forecast Monday morning. The shuttle and its seven-man crew is scheduled to make a rare nighttime landing Tuesday at Edwards Air Force Base in California. But forecasts call for high winds and rain in the Mojave Desert at the time of the planned touchdown, prompting thoughts of bringing the ship down one day early. NASA officials plan a morning meeting to make a final decision.

Regardless of when the shuttle returns, scientists are optimistic the astronauts will complete at least 160 or so of their planned 200 observations. The astronauts are studying X-rays and ultraviolet light from the most violent stars and galaxies in the universe... using a 150- Million-dollar battery of four ''Astro-1'' telescopes.

Police academy cadets had an unusual task in completing their final exam this weekend in Florida's Tampa Bay area. The cadets had to capture a dangerous prisoner- an ill-tempered, seven-foot alligator. Gater roping is NOT a particularly handy skill for most police forces, but it is for officers in Florida, where one cadet was heard to joke- ''and you thought New York was dangerous.''

-30- 2248

#90344u0156 12/10/1990 ~United Press International

(DEC. 10) UPI - Police in Indiana say an explosion and fire ripped through a housing complex at an Army base Sunday night, injuring as many as 11 people. Indiana state police say the blast caused flames that engulfed several buildings at Fort Benjamin Harrison, forcing the evacuation of ''numerous'' people. The base is a processing point for Midwest military workers en route to Saudi Arabia.

The shuttle Columbia's crew is working through the home stretch of an astronomy mission that has proved to be a success, despite a series of mishaps. The shuttle astronomers are confident of achieving at least 80 percent of their pre-launch objectives after dealing with a stopped-up sewage system and overheated computers. Scientists say the mission has provided the first detailed look at X-rays and ultraviolet light from deep space.

The third anniversary of the Palestinian uprising was marked by curfews, a general strike, bombings and death in the occupied terrorities. The military imposed a curfew on Bethlehem after homemade bombs exploded in the West Bank town, killing one Israeli soldier and injuring two others. In a Gaza Strip village, Israeli troops shot and killed a Palestinian who they say tried to stangle a soldier. But Palestinian sources say the Arab was killed while trying to flee soldiers beating him.

A New York jury will begin an 11th day of deliberations in a Central Park rape trial amid speculation that is is nearing a verdict. On Sunday, the panel asked about how one of the defendants was treated by police between his first

and second videotaped confessions. The defendant's attorny claims his client is innocent and was tricked into making incriminating statements.

President Bush showed some wear Sunday after six weeks of heavy travel. The White House announced Bush was cancelling plans Sunday night to participate in the taping of an annual holiday show, describing Bush as ''tired.'' Bush returned this week from a tour of South America. During two years in office, Bush has visited nearly the same number of nations that former President Reagan set foot in during eight years in office.

(DEC. 10) UPI- Two of the NHL's stars returned from an absence Sunday night and, even though they brought varying impact, both their clubs emerged with a victory.

Goalie Ron Hextall rejoined Philadelphia's lineup after a lengthy injury and helped the Flyers to a 5-4 victory over the Buffalo Sabres.

Boston winger Cam Neely returned from a five-game suspension and, in an even bigger impact, scored the winning goal in the Boston Bruins' 3-2 triumph over the Buffalo Sabres.

''I may have a short memory, but this is as tired as I've ever felt,'' said Hextall, who stymied Chicago's comeback bid with 24 saves in the last two periods. ''I'm not thrilled about my performance, but we won. I'm ready to go.''

Sidelined since Oct. 27 when he strained a knee ligament against the New York Islanders, Hextall didn't learn of the starting assignment until early Sunday morning when the club arrived from Minneapolis.

Coach Paul Holmgren sidestepped questions about his immediate goaltending plans. Hextall, Pete Peeters and Ken Wregget give the Flyers what Tochett called ''the best goaltending in the league,'' but their collective $1.4 million salary is likely to put Wregget on the trading block.

''Some of the goals against him (Hextall) tonight won't go in when he's sharp '' Holmgren said. ''But his abilities to handle the puck and get it out of the defensive zone gave us a lift.''

Neely had been suspended for a stick-swinging incident against the Hartford Whalers' Randy Ladouceur on Nov. 23. The Bruins went 2-3 in his absence.

''As the game went on I felt a lot better,'' Neely said. ''At the start of the game I was a little anxious, a little excited. Maybe I was trying to do a little bit too much.''

Neely made it 3-0 with his 12th goal at 4:22 of the third. With a penalty

coming up to Buffalo, Neely converted the rebound of a shot off the post through a maze of players from 25 feet.

In the only other NHL game, Calgary downed Edmonton 3-2.

-- AROUND THE NHL --

Flames 3, Oilers 2

At Edmonton, Alberta, defenseman Al MacInnis scored two goals and goalie Mike Vernon stopped 24 shots, leading Calgary. MacInnis, leading scorer on the Flames, blasted a pair of slapshots past Oilers goalie Bill Ranford in the second period. His first, at 32 seconds, came on a hard shot from the point that Ranford got a pad on but could not stop. During a powerplay at 13:17, a loose puck went to MacInnis near the blueline, and he beat Ranford cleanly.

(DEC. 10) UPI - Given the choice, Milwaukee Coach Del Harris would like to believe the Bucks' success at home is not coincidence.

''We have a quiet crowd,'' Harris said Sunday night after the Bucks defeated the Seattle SuperSonics 105-99 at the usually serene Bradley Center. ''We don't have a homecourt advantage here. Our guys are just working their tails off.''

Ricky Pierce scored 14 of his 24 points in the fourth quarter and sank two free throws with 10 seconds left to help the Bucks improve their record to 10-0 at home, tying a club record for consecutive victories at the start of a season set in 1984-85.

The Bucks and Detroit, 8-0 at home, are the only NBA teams unbeaten at home.

''We feel we're playing pretty good, but we can play a lot better,'' said Dan Schayes, who had a season-high 17 points.

Derrick McKey, who had 19 points, hit two free throws and Sedale Threatt scored on a layin to bring Seattle, which has lost 12 of 14, within 100-95 with 36 seconds to go.

''We went to the trap late in the game and that got us back into the game somewhat,'' Seattle Coach K.C. Jones said. ''But the damage already had been done.''

Jay Humphries followed with two free throws with 29 seconds left to give the Bucks a 102-95 lead. Shawn Kemp, who had a career-high 31 points, scored on a dunk but Alvin Robertson, who had 19 points, hit a free throw to give the Bucks a 103-97 advantage wih 16 seconds left.

After Kemp scored on another dunk with 12 seconds to go, Pierce hit two free throws to give Milwaukee the victory.

''I'm getting the opportunity to shoot and to get the ball down low,'' Kemp said. ''I have to learn to stay in control and let the game come to me.''

Pierce sparked a 15-4 run to open the fourth quarter by hitting a jumper that gave Milwaukee the lead for good, 73-72. Pierce reeled off 8 points in the streak. Schayes capped it with two free throws with 7:44 left, giving the Bucks an 86-76 lead.

Eddie Johnson, obtained from Phoenix on Friday along with two draft choices for Xavier McDaniel, scored 6 points in his debut with Seattle. Harris returned to the Milwaukee bench after missing Friday night's game at Atlanta due to illness.

In the only other game Sunday night, the LA Lakers held off Washington 106-99.

Lakers 106, Bullets 99

At Inglewood, Calif., James Worthy scored 20 points and Magic Johnson added 19 points and 14 assists to lead Los Angeles to its ninth win in its last 10 games, despite 40 points from Bullets forward Bernard King and 17 rebounds from Washington guard Darrell Walker. The Lakers never trailed from 8 minutes into the game on.

#90344u0253 12/10/1990 ~United Press International

(DEC. 10) UPI - Week 14 of the NFL season clarified the postseason picture in two ways. The New York Giants clinched the NFC East and the Buffalo Bills

secured an AFC playoff berth.

That leaves eight playoff spots - five in the AFC and three in the NFC - unfilled with three weeks remaining in the season. At least 13 teams are in the running for those berths.

The picture could improve after next week, but then again it could become cloudier. That's the NFL for you. Parody at its finest.

The Giants broke a two-game losing streak by defeating the Vikings 23-15 at East Rutherford, N.J. Minnesota, which led for more than three quarters, lost for the first time in six games and fell into a group of four NFC teams struggling for playoff survival at 6-7.

Ottis Anderson scored his second touchdown of the game during a fourth-quarter rally for the Giants, who improved to 11-2 after losses to Philadelphia and San Francisco. Anderson also became the eighth player in NFL history to rush for 10,000 yards.

The Bills made the playoffs for the third straight season by pounding the Colts 31-7 at Indianapolis and improving their AFC-best record to 11-2. Buffalo led the AFC East by one game over Miami.

Buffalo has faded the last couple of Decembers, losing three of its last four games each of the past two seasons. The incentive to earn home-field advantage throughout the conference playoffs should keep Buffalo hungry. But tough games against the Giants, the Dolphins and the Redskins could also produce another late dive.

''This win is a big confidence builder for us,'' Bills linebacker Cornelius Bennett said. ''People count us out in December. The more we win, the more we make them look like a big jackass.''

In other games it was: San Francisco 20, Cincinnati 17 in overtime; Pittsburgh 24, New England 3; Houston 58, Cleveland 14; New Orleans 24, LA Rams 20; Washington 10, Chicago 9; Kansas City 31, Denver 20; Seattle 20, Green Bay 14; Phoenix 24, Atlanta 13; and Miami 23, Philadelphia 20 in overtime. The LA Raiders play at Detroit Monday.

Sunday's results left a three-way tie for first in the AFC Central between Cincinnati, Pittsburgh and Houston (all 7-6). The Redskins, 8-5, took a big step toward securing a wild-card berth, while Seattle and New Orleans kept their postseason hopes alive. Green Bay and the Rams were the big losers. Los Angeles fell to 5-8, while the Packers dipped to 6- 7, a mark shared by Dallas New Orleans and Minnesota.

''I think we proved today we're not ready for that hearse,'' said New Orleans Coach Jim Mora. ''We're not dead. We're still in the hunt.''

-- AROUND THE NFL --

49ers 20, Bengals 17 (ot)

At Cincinnati, Mike Cofer kicked a 23-yard field goal with 57 seconds left in regulation to tie the score and then kicked another 23-yarder 6:12 into overtime. San Francisco, with the best record in the NFL at 12-1 and already NFC West champion, extended its NFL record for consecutive road victories to 17.

Steelers 24, Patriots 3

At Pittsburgh, Merril Hoge scored two touchdowns and led a rejuvenated rushing attack with a career-high 117 yards to help Coach Chuck Noll earn his 200th career victory. Tim Worley added 83 yards as Pittsburgh rushed for 251 yards. The Patriots fell to 1-12.

Oilers 58, Browns 14

At Houston, Lorenzo White scored four touchdowns and Warren Moon threw two TD passes to power an Oilers rout that sent Cleveland to its eighth straight loss. Houston's 58 points set records for both teams - the most scored by the Oilers and the most allowed by the Browns in a regular-season game. Cleveland dropped to 2-11.

Saints 24, Rams 20

At Anaheim, Calif., Steve Walsh passed to Eric Martin for the go- ahead score and New Orleans survived a last-second scare. The game's final play began with the Rams on the New Orleans 9 and no time showing after the Saints were called offside on the previous play. The Rams received a second chance because a game can't end on a defensive penalty, but Jim Everett, under heavy pressure, threw an incompletion.

Redskins 10, Bears 9

At Washington, Chip Lohmiller kicked a 35-yard field goal with 2:14 left and the Redskins overcame Mark Rypien's five interceptions to beat Chicago. The Bears, who have already clinched the NFC Central title, fell to 10-3.

Chiefs 31, Broncos 20

At Kansas City, Mo., Steve DeBerg threw three scoring passes and Barry Word forced his way in for another touchdown to boost the Chiefs to their fourth consecutive victory. Kansas City, 8-4, holds a half game lead in the AFC West, pending the Raiders' game Monday night. Denver, 3- 10, lost its sixth consecutive game and blew a halftime lead for the eighth time this season.

Seahawks 20, Packers 14

At Milwaukee, Derrick Fenner rushed for 112 yards and a touchdown to propel Seattle to its third straight victory. Each of the Seahawks' previous five games were decided on the last play. This game wasn't as tight, but Seattle did see a 20-point lead dwindle to 6 after Blair Kiel relieved Anthony Dilweg in the third quarter and threw two touchdown passes.

Cardinals 24, Falcons 13

At Atlanta, Marcus Turner scored on a 47-yard interception return, the second of three second-half Phoenix interceptions, to lead the Cardinals. Phoenix, 5-8, recorded its third straight victory. Atlanta, 3-10, suffered its sixth straight loss.

Dolphins 23, Eagles 20

At Miami, Pete Stoyanovich kicked a 39-yard field goal 12:32 into overtime to hand the Eagles their second straight loss. The Dolphins' winning drive was set up when Eagles punter Jeff Feagles muffed a low snap and kicked the ball while it was laying on the ground.

#90344u0255 12/10/1990 ~United Press International
(DEC. 10) UPI - Around the world... Around the clock... the latest news from U-P-I.

Cheers and happy tears greeted a private plane carrying a load of former hostages to Houston yesterday. Former Texas Governor John Connally helped arrange the freedom flight welcomed by several hundred cheering spectators. The plane carried 19 former hostages, three employees of the U-S Embassy in Kuwait, two other men trapped in Kuwait and seven of their relatives.

Another plane carrying another group of Americans released by Iraq is expected to land in the Washington, D-C, area today. The State Department estimates 175 Americans were on the Iraqi airliner that carried about 300 people to Frankfurt, Germany... where the group is spending the night.

A gas leak is believed to have set off an explosion and fire last night at Fort Benjamin Harrison in Indianapolis. Police say as many as 11 people were injured and many others evacuated from the base which serves as a processing point for Midwest military workers on their way to Saudi Arabia.

The official results from Poland's first popular presidential election will be announced today, with Lech Walesa expected to be named the winner. Exit polls show the founder of the Solidarity trade union took nearly 75 percent of the

vote in Sunday's election.

Israeli curfews confined about one-Million Palestinians to their homes in parts of the occupied territories, while a general strike shut down the rest. But the curfews and work stoppage did NOT prevent violence that killed an Israeli and an Arab on the third anniversary of the Palestinian uprising.

In Washington, visiting Israeli Prime Minister Yitzhak Shamir is rejecting the idea of an international peace conference on the Arab-Israeli conflict. Shamir says the only way to achieve peace is through negotiation, and- in his words- ''an international conference would only try to impose a solution.''

Chinese Premier Li Peng says a Communist Party meeting this month will focus on the economy... and NOT on the fate of deposed party chief Zhao Ziyang. Zhao has been ''under investigation'' for more than a year. He was ousted in June, allegedly for supporting the 1989 democracy protests.

The Philippine military reports today that at least 21 people were killed in clashes during the weekend between troops and communist rebels. In an encounter yesterday, rebels ambushed troops who were investigating killings 130 miles southeast of Manila.

#90344u0285 12/10/1990 ~United Press International

NEW YORK (DEC. 10) UPI - The Daily News and nine unions striking the newspaper have agreed to meet with a federal mediator in Washington, D. C., in a last-ditch attempt to reach a settlement to the bitter labor dispute.

Meanwhile, the Tribune Company of Chicago, the paper's corporate parent, was scheduled to hold a quarterly meeting of its board of directors on Monday, The New York Times said.

The strike has taken an unexpected financial toll on the once-robust company. Tens of millions of dollars have been lost and the expense was unexpected, the paper said.

Some Wall Street investment analysts have speculated that the Tribune's 14-member board might decide to cut the company's losses and close the paper, The Times said.

Such a closure would be consistent with the hard-nose style of Charles Brumback, the parent company's chief executive, the paper said.

But several Tribune officials familiar with Brumback's long-range strategy said the fate of the News would likely be decided in the spring, after Brumback has given the paper's publisher, James Hoge, a chance to bring back its advertisers and make it cost-efficient again.

The union was expected to receive a show of support Monday in a rally outside of the newspaper's midtown headquarters, where Roman Catholic Archbishop Cardinal John O'Connor and the Rev. Jesse Jackson were due to appear.

News management and union officials Sunday said they had been asked to meet by the director of the Federal Mediation and Conciliaton Service, Bernard DeLury, in the nation's capital. The meeting was to be arranged on Monday.

''It's our intent to fully and completely cooperate with his request, '' said News spokeswoman Lisa Robinson.

George McDonald, president of the Allied Printing Trades Council, the umbrella group for the nine striking unions, said, ''I feel optimistic that if we can sit down - all nine unions with the publisher and management - and get into common issues, we can make some headway.''

McDonald added, however, that he thinks management will only agree to talk with each union separately in an attempt to lower the strikers' resolve.

Lawyer Theodore Kheel, an advisor to the unions, said he does not think the federal mediation session will take place before Wednesday.

DeLury met informally in Manhattan Wednesday with Newspaper and Mail Deliverers union president Mike Alvino and other union leaders.

Alvino said his union, generally considered the most powerful of the nine striking unions and the first to walk out, was willing to give the News ''relief'' if he was shown areas in which personnel cuts could be made.

On Tuesday, Sen. Howard Metzenbaum, D-Ohio, is scheduled to hold hearings in New York on his bill to outlaw the hiring of permanent replacements during strikes.

Meanwhile, more violence was reported early Sunday as more than a dozen trucks were set on fire or vandalized at a Bronx paper company that delivers large rolls of paper to the strikebound tabloid, police said.

There were no injuries, and officers made no arrests.

Nine Daily News unions struck the paper, once the nation's largest circulation tabloid, starting Oct. 25. The bitter walkout has been marred by violence and more than 125 arrests.

#90344u0371 12/10/1990 ~United Press International

WARSAW, Poland (DEC. 10) UPI - Lech Walesa, who doggedly led the Solidarity

trade union in a decadelong battle that ended communist rule, won Poland's first popular presidential election with 73.25 percent of the vote, unofficial results showed Monday.

The State Election Commission said emigre Canadian businessman Stanislaw Tyminski, who upset Prime Minister Tadeusz Mazowiecki in the election's first round Nov. 25, took 26.75 percent in the election Sunday.

The commission said 9.7 million Poles cast ballots for Walesa and 3.5 million for the dark-horse candidate Tyminski as the presidential contest that has split the Solidarity movement came to an end.

The official results were to be released Monday afternoon, the commission said.

Some 27.5 million Poles were eligible to vote in the runoff, but it appeared the turnout was lower than the 61 percent showing on Nov. 25.

The winner of the presidential election will replace former Communist Party leader Gen. Wojciech Jaruzelski, the architect of martial law that attempted to crush Solidarity in 1981.

Jaruzelski stepped down one year into a six-year-term because of growing social pressure in the fledgling democracy that began coming to life last year as communism crumbled in Eastern Europe.

Computer projections based on exit polls were released Sunday evening showing Walesa had won overwhelmingly. Some 5,000 cheering supporters chanting, ''Lech Walesa, Lech Walesa'' and waving Polish flags, balloons and torches gathered on the crisp wintry night outside his campaign headquarters in the Baltic seaport of Gdansk.

''I want to be your biggest servant, not your president,'' he said in a brief address out a window, waving and giving the familiar ''V-for- victory'' Solidarity salute.

Tyminski said late Sunday he would protest the election results on the grounds that trade union leader's supporters conducted a fear campaign.

''There's been a lot of violence,'' Tyminski said. ''Even some of my friends did not want to know me before these elections because of the fears of the ax of Mr. Walesa.''

The two rounds of elections were the first wholly free balloting in Poland since before World War II. Parliamentary elections were held in June 1989 that eventually swept Solidarity into office, but the voting was only partially free.

Walesa's months-long campaign to replace Jaruzelski has split Solidarity into

two opposing camps of Walesa supporters and Mazowiecki supporters.

When Mazowiecki felt forced to run against Walesa to defend his program, he failed to realize the depth of public resentment against his economic stabilization policies, which has dropped the standard of living nearly 40 percent in his 14 months in office.

Tyminski, dubbed ''the man from nowhere,'' returned to Poland in September after 21 years to run for the nation's highest office.

His surprise showing in the first round was attributed to voter dissatisfaction with Mazowiecki's policies and with the fight within Solidarity, which for nearly a decade had been united in its opposition to the Communist Party.

Tyminski was hurt in the second round by revelations his campaign organization included many former communist elite and secret police, and his popularity slid dramatically in the final week of the campaign according to opinion polls.

-30- 3580

#90344u0409 12/10/1990 ~United Press International

(DEC. 10) UPI - Hundreds of Westerners, including nearly 200 Americans, left Iraq and Kuwait over the weekend after Saddam Hussein's decision to free all hostages. The State Department said last week about 750 Americans were hostage or trapped in Kuwait and Iraq.

Secretary of State James Baker and Soviet Foreign Minister Eduard Shevardnadze meet in Houston today to prepare for a summit. The Persian Gulf crisis will be important in their talks.

Computer projections show Solidarity founder Lech Walesa has won about 75 percent of the vote for Polish president. His opponent in yesterday's election was Stanislaw Tyminski.

Space agency managers will decide today whether threatening weather over the Mojave Desert in California means the shuttle Columbia will have to land today. It is scheduled to land tomorrow.

President Bush canceled a television taping appearance last night. A White House spokesman said Bush became tired after playing tennis, but is not seriously ill. Bush has had a busy travel schedule lately.

-30- 1189

#90344u0487 12/10/1990 ~United Press International

(DEC. 10) UPI - Space agency managers are expected to decide this morning whether to bring the shuttle Columbia back today or let it remain in space

until its scheduled landing time tomorrow. The problem is increasingly bad weather in the landing site in the Mojave Desert in California. High winds and rain are expected tomorrow. The astronauts have overcome their problem with a balky toilet tank, something that also had threatened an early return.

President Bush's busy schedule finally got to him yesterday and he took a rest. Bush has been on the go for six weeks. Early last month he campaigned for fellow Republicans. Then he visited Europe and the Middle East. This month he visited South America, getting back Saturday. Yesterday Bush played tennis and a spokesman said he wasn't feeling well. He canceled plans to tape a television Christmas show last night.

Two Philippines labor leaders were killed today when rebels burst into a workers' meeting near Manila and opened fire. A third labor figure was wounded. Police said one of the slain labor leaders was a former leader of the Philippines' Communist Party. The Philippines military reports that 21 people were killed during the weekend in clashes between the army and communist guerrillas.

Exit surveys show Polish voters picked Lech Walesa for president overwhelmingly in yesterday's run-off election. The second candidate, Stanislaw Tyminski, was getting only about 25 percent of the vote. He was hurt by disclosures that prominent former communists and secret police were active in his campaign organization.

An explosion and fire at an Army housing area at Fort Benjamin Harrison in Indianapolis, Indiana, injured 11 people last night, most of them from burns. Officials believe a gas leak was responsible. Soldiers were evacuated from the area. The fort is used for processing Midwest military personnel en route to join the Operation Desert Shield force.

Wrestler turned actor Mike Mazurki died yesterday in a Glendale, California, hospital. His age was listed as either 80 or 82. Mazurki was a professional heavyweight wrestler through the 1930s. A movie director spotted him and hired him for the 1941 film ''The Shanghai Gesture.'' He appeared in 150 films, including ''Some Like it Hot'' and ''A Pocketful of Miracles.''

Authorities in Boynton Beach, Florida, have charged three people in a strange case they call ''the couch potato murder.'' They say a man was shot to death by his family because he was grouchy and watched television most of the time. The man's wife, his 15-year-old daughter and the girl's boyfriend have been charged. The daughter told police- ''I didn't really want him dead. I just wanted him to stop being miserable.''

(DEC. 10) UPI - Secretary of State James Baker opens a meeting today in Houston today with his Soviet counterpart, Eduard Shevardnadze. They will lay the groundwork for a summit between President Bush and Mikhail Gorbachev.

The shuttle Columbia and its seven astronauts may touch down today in the California desert- a day early. Winds and rain are expected at the scheduled landing time tomorrow. The space agency will decide this morning.

A five-year-old girl is missing after a gas explosion and fire in a housing area at the Army's Fort Benjamin Harrison in Indianapolis, Indiana. Seven people were critically injured.

The State Department says about 540 Americans are left in Kuwait and Iraq. That's about 210 fewer than last week. The first Westerners to be freed under Saddam Hussein's order flew out over the weekend.

OPEC's oil ministers hold their year-end meeting Wednesday in Vienna. But with the Persian Gulf crisis, OPEC has little control over oil production and prices. U-S observers say they are meeting just to show OPEC still exists.

Israeli Prime Minister Yitzhak Shamir says a U-N conference on Palestine is NOT the way to solve the problem. Shamir says an international conference will try to impose a solution. He wants negotiations involving two parties.

New York City's private garbage collectors struck yesterday over wages. The collectors pick up about 40 percent of the city's trash. A Teamsters' official says the workers will stay out until they get ''a fair offer.''

Gas prices remained steady over the last three weeks. The Lundberg survey says the average price was one dollar 46 cents. But that's the pump price which includes a new five-cent tax, so sales prices actually have fallen.

The Philippines energy board reduced gasoline prices today. Higher prices caused by the gulf crisis had outraged Filipinos. President Corazon Aquino also fired her chief aide who was responsible for energy policy.

Chinese Premier Li Peng says a Communist Party meeting this month will NOT consider the fate of ousted party chief Zhao Ziyang. Li says the only issue at the meeting witll be China's economy.

The New York Daily News and nine striking newspaper will meet with a federal mediator in Washington to try to solve the dispute. The strike began October 25th and has been marred by violence and more than 125 arrests.

Federal officials say a man was killed by a polar bear in northwest Alaska Saturday. The officials say it is the only known case in recent history. The man was strolling with his girlfriend when the bear attacked unprovoked.

Actor Mike Mazurki, a former wrestler whose mashed face made him ideal for gangster roles, died yesterday in Glendale, California. He was in his 80s. Mazurki's films included ''Some Like It Hot'' and ''Requiem for a Heavyweight.''

(DEC. 10) UPI - Stock prices on the Tokyo Stock Exchange closed higher for the fourth straight session in slow trading Monday, buoyed by prospects for lower interest rates in the United States and the Japanese yen's rise against the dollar.

The key Nikkei Stock Average of 225 selected issues, which gained 969.39 points Friday, added another 262.18 points to 23,784.67.

The broader-based Tokyo Stock Price Index of all listed major issues gained 16.68 points to 1,757.02.

Advances outnumbered declines 755 to 209, while 117 issues remained unchanged.

An estimated 400 million shares changed hands, down from 588 million shares Friday.

Elsewhere in Asia, stock prices slipped in active trading on the Hong Kong Stock Exchange as the market consolidated after a 5 percent gain last week.

The benchmark Hang Seng Index shed 14.56 points to 3,149.13. The loss followed a gain of 36.90 points Friday and broke a five day rally that boosted the market more than 198.00 points.

Among the narrower indexes, financials shed 21.00 points, utilities fell 27.53 properties dropped 43.21 and industrials sank 22.16 points.

Volume amounted to 961 million shares, down from 1.59 billion Friday.

In Singapore, stock prices on the Singapore Stock Exchange retreated across the board as profit-takers moved in following last week's rally sparked by prospects of a peaceful solution to the Persian Gulf crisis.

The Straits Times Industrial Index, which jumped 44.65 points Friday, fell 17.98 points to 1,179.87 while the broader-based All Singapore Index fell 4.83 points to 327.15.

Volume amounted to about an estimated 44.2 million shares, well below the 121.2 million Friday.

Elsewhere around the region, banks, businesses and financial centers in Bangkok, Thailand were closed for Constitution Day. Trading will resume Tuesday.

In Australia, stocks closed lower on the Sydney Sharemarket in the wake of recession fears in the United States.

CINCINNATI (DEC. 10) UPI - Paul Brown, 82, general manager and founder of the Cincinnati Bengals, was in fair condition Monday at Christ Hospital where he was admitted for treatment of a blood clot in his leg.

Brown, who missed the Bengals loss to San Francisco Sunday, the first game he has missed in the 22-year history of the franchise, may be released early this week, said Dr. Robert Heidt Jr., Bengals team physician.

''Paul doesn't want to discuss this with the media, but he said it was all right to release the information that he had a blood clot in the leg,'' said Heidt. ''It's not an unusual condition in older people.

''There was no pain, just some swelling,'' he said. '' What you do in a situation like this is to put the person to bed for a few days and give them some medication. The clot disappears and it's over. Overall, he is in excellent health.''

Assistant General Manager Mike Brown said his father was admitted to the hospital late last week.

''He's doing fine,'' said Brown. ''He'll be out of the hospital in a day or so. His condition is good and we don't think there's anything to worry about.''

(DEC. 10) UPI - A Japanese television reporter and two Soviet cosmonauts landed safely this morning in a snow-covered field in Asia. They descended in a Soyuz space capsule. The reporter had been in space for eight days. The cosmonauts were on the Mir space station since August.

National Security Adviser Brent Scowcroft says Iraq is ''playing games'' in setting a date for talks with the United States. Scowcraft said on a television appearance the January 12th date proposed by Iraq is too late. An Iraqi official replied that another date can be picked.

A five-year-old girl is missing at Fort Benjamin Harrison in Indiana after a gas explosion and fire in an Army housing area. The girl is the daughter of a serviceman stationed at the base. Seven people were critically injured. The base processes soldiers going to the Persian Gulf, but NONE of these troops were affected.

The New York Daily News, nine striking unions and a federal mediator are arranging a meeting in Washington to try to settle the dispute. The strike has lasted since October 25th. The New York Times says the board of directors of the News' owner, the Tribune Company, meets tomorrow. It quotes analysts as

speculating it may close the paper.

Jurors in the Central Park jogger trial asked questions yesterday about how a defendant was treated between making two videotaped statements. They also asked how much time passed between the two. In the first statement, defendant Kharey Wise said he witnessed an attack on a woman. In the second, he admitted taking part himself.

Two leaders of a Philippines workers' group were killed today by gunmen who burst into a workers' meeting near Manila. Another labor leader was wounded. About 200 workers attending a labor seminar saw the attack. Police could NOT identify the gunmen. They say one slain man was a former communist official.

An Israeli soldier on patrol in the West Bank town of Bethlehem was killed last night when two homemade bombs exploded. The occupied areas were tense because of teh third anniversary of the Palestinian uprising. A Palestinian was shot and killed in a confrontation with soldiers in the Gaza Strip.

Pop singer-dancer Paula Abdul suffered back and neck pain yesterday in a minor traffic accident in Los Angeles. Police say her car ran into a car in front of her and that car hit another. Abdul is a former Los Angeles Lakers cheerleader who became a singer and dancer.

#90344u0642 12/10/1990 ~United Press International

(DEC. 10) UPI - A cold front creeping down from the Great Lakes brought cooler temperatures to the Midwest and parts of the South Monday while Oregon had 2 inches of rain.

Pleasant weather again prevailed in the Rocky Mountain area, where temperatures were expected to range as high as the 70s in Colorado, but wintery weather was expected in Montana by midweek.

Rain continued to fall in parts of Oregon through the night as a slow-moving cold front pushed into the valleys in the western part of the state. The town of Brookings had 2 inches of rain a 24-hour period and Eugene had 1 1/2 inches.

Windy, colder weather was destined for New England, where temperatures were expected to fall into the teens and 20s, and parts of the Midwest. A weak cold front stretched from eastern Nebraska through southern Iowa and into central Illinois in the morning, pushing out mild air and keeping high temperatures in Iowa in the 30s and 40s.

Indiana Kentucky, Pennsylvania, West Virginia, the Carolinas also were due for cooling temperatures as the front moved down from the Great Lakes but no precipitation was expected.

TOKYO (DEC. 10) UPI - The Japanese Parliament, or Diet, which opened Monday, is expected to pass an amendment extending copyright protection to foreign records and compact discs.

The Copyright Council of the Education Ministry issued a report Nov. 30 proposing an amendment to the Copyright Law which would extend copyright protection to foreign-made records released since 1968.

The amendement is almost certain to be adopted by the Diet, said Kunio Yamashita, assistant director general of the Japan Phonograph Record Association.

The proposed amendment would give copyright protection to all recordings of foreign artists made since 1968.

In recent years there has been a boom in Japanese sales of bootleg compact discs and tapes of foreign artists made from recordings pressed outside of Japan, said the report by the Copyright Council.

The current law only protects records and discs of foreign artists if they were pressed in Japan and only those made since 1978, the report said.

Under the current law it is legal to make and sell copies of foreign- pressed records without paying the artist, composer or foreign record company.

The bootleg discs sell for less than half the price of imported discs and foreign discs produced under license by Japanese record companies.

The amendment will also include a provision requiring the payment of royalties to foreign artists, composers and record companies for the rental of records, tapes and discs.

Most Japanese video rental shops also rent compact discs, but are not required under the current law to pay royalties for those rentals unless the record was made by a Japanese company, the report said.

The United States has been pushing Japan to extend copyright protection to foreign recordings.

U.S. officials praised the proposed amendment, saying it addresses most of their concerns.

#90344u0674 12/10/1990 ~United Press International

PROVIDENCE, R.I. (DEC. 10) UPI - Reputed New England mob boss Raymond ''Junior'' Patriarca says an alleged Mafia induction rite held last year should have been off limits to investigators, just as a meeting of the NAACP or the Hell's Angels would be.

Patriarca has asked a federal court to bar a government tape of the meeting from being introduced as evidence at his racketeering trial. The reputed mobster contended that the tape violated his constitutional rights to free association.

''The interception of six hours of conversations at an alleged 'La Cosa Nostra' indoctrination ceremony constituted an intolerable intrusion into a core area of First Amendment protection,'' Patriarca said in pretrial motion filed recently.

Patriarca, 46, of Lincoln, R.I., did not admit belonging to La Cosa Nostra, if such an organization ''indeed exists.'' He said, however, that even if he did belong the government has acknowledged that would not be a crime in and of itself.

Patriarca argued that organizations, no matter how unpopular, have the right to assemble and associate freely. The courts have upheld the right by limiting information that was collected on groups such as the NAACP and the Hell's Angels, he said.

Even if La Cosa Nostra were portrayed at its worst, the group would ''pale in comparison'' to ones such as the Ku Klux Klan and the Nazi Party, the reputed

mob boss said. Patriarca said the KKK and Nazis are ''far more heinous'' than the Mafia ''yet unquestionably protected organizations.''

Vincent Blasi, a professor of First Amendment law at Columbia University, said in Monday's Providence Journal-Bulletin that Patriarca's claim is not necessarily without merit. He added, however, that the government can defend its surveillance if it shows it had reason to believe it would gain criminal evidence.

Floyd Abrams, a New York lawyer specializing in First Amendment issues, said Patriarca's challenge has a certain ''charm'' but added that the right to free association was never intended to be a shield for criminal activity.

John Voorhees, a former federal prosecutor of organized crime, said the First Amendment gives La Cosa Nostra, the Nazi Party, and the KKK the right to ''march down the street'' but not the right to break the law.

The alleged Mafia induction rite occurred Oct. 29, 1989, at a home in Medford, Mass. Investigators said it was a highly secret blood oath in which inductees promised to kill anyone who threatened La Cosa Nostra or its members.

Patriarca was arrested in March along with 21 other reputed mobsters in New England. He is being held without bail.

#90344u0713 12/10/1990 ~United Press International

(DEC. 10) UPI - Secretary of State James Baker opens a two-day meeting in Houston today with Soviet Foreign Minister Eduard Shevardnadze to prepare for a summit meeting. The Soviet news agency Tass says the talks are in Houston to keep them ''far from the madding crowds.'' Tass says the meeting will include regional problems, which includes the gulf crisis. The United States and Soviet Union are in close agreement on policy.

Hundreds of Westerners, including some Americans, got out of Iraq and Kuwait over the weekend. They were the first to leave after Saddam Hussein ordered an end to keeping them hostage. Yesterday the Voice of America fadvised U-S citizens in occupied Kuwait to go to the airport to board a flight to Frankfurt, Germany. The State Department says about 540 Americans are left in Iraq and Kuwait- compared to 750 last week.

Japanese television journalist Toyohiro Akiyama, whose employer paid 12-Million dollars to send him into space, returned to earth today in a Soviet Soyuz space capsule. Two Soviet cosmonauts who were on the Mir space station since August were with him. Akiyama was a chain smoker who quit cold turkey so he could make the space trip. From space he said the first thing he wanted when he returned was a cigarette.

The Soviet newspaper Pravda says although Moscow grocery shelves are bare, 300 railroad cars full of food are standing in freight yards in Moscow. Pravda said there is a shortage of trucks and drivers- NOT food and other consumer goods. The food includes 101 cars with meat sent from abroad. On Saturday, Moscow's deputy mayor said the food shortage is so critical some Soviet cities will need foreign economic help at least until spring.

It's still NOT official but Poland's election commission says Solidarity leader Lech Walesa has been elected president. The other candidate in yesterday's run-off, Stanislaw Tyminski, got only about 27 percent of the vote. Official results will be announced later today. The winner replaces former Communist Party leader Wojciech Jaruzelski.

At least 17 people were hurt, six critically, in a gas explosion last night in an apartment complex at an army base in Indianapolis, Indiana. A five-year-old girl whose father is stationed at Fort Benjamin Harrison is missing. A building containing ;four apartments burned to the ground and a nearby building was damaged. A gas leak was detected earlier and people began evacuating the area before the blast.

Libby Averyt, a reporter for the Corpus Christi, Texas, Caller-Times, was freed from jail last night. She was jailed Friday when she refused to answer questions about an interview with a murder suspect. Averyt was let go when the parties involved agreed to drop contempt proceedings. A defense lawyer wanted information she had NOT published.

#90344u0796 12/10/1990 ~United Press International

PARIS (DEC. 10) UPI - Heavy snow triggered a rockslide that crushed a carful of skiers returning from a weekend alpine run, killing two and injuring three in a wintry blast that struck much of France, officials said Monday.

Another motorist was killed on an icy road in a separate accident, more than 100,000 homes lost electrical power, and some train service was canceled.

Firemen said two skiers were killed and three others injured when heavy snow set off a rockslide close to the French-Italian border in the southeast corner of France, crushing their car as they returned from the weekend Alpine jaunt.

The three injured were taken to a hospital at Bordighera, Italy, for treatment following the accident Sunday night between Breil-sur-Roya and Vintimille, said the firefighters.

All five were French citizens. They were still wearing their skiing clothes when the rocks rumbled down onto their Toyota automobile. The dead were a young man and a young woman sitting in the back seat of the vehicle.

At Val-de-Vesle, in the Marne area near the city of Reims in northeast France, a motorist's car skidded on an icy highway and slammed into a tree, killing him instantly, police said.

Some 140,000 homes remained without electricity in the Rhone-Alpes region following the inclement weekend weather.

Three high-speed TGV trains scheduled to travel from Paris to Geneva, Chambery and Annecy were canceled Monday morning.

The Mont Blanc tunnel was closed to motorists as were the Alpine Lyon to Grenoble and Lyon to Chambery routes.

But ski station managers were jubilant at the early snowfall, which they said would assure them booming Christmas business.

-30- 1892

#90344u0837 12/10/1990 ~United Press International

(DEC. 10) UPI - The hostage ordeal is finally ending for nearly 200 Americans and hundreds of other Westerners just freed by Iraqi President Saddam Hussein. U-S officials say a U-S-chartered Iraqi airliner carrying about 175 Americans is due to land at Andrews Air Force Base outside Washington, D-C, this afternoon. The jetliner arrived in Frankfurt, Germany, last night from Baghdad.

Secretary of State Baker and Soviet Foreign Minister Eduard Shevardnadze sit down for face-to-face talks today in Houston, Texas. Topping the agenda will be the Persian Gulf crisis and the dates of a superpower summit. A proposed January date for the next meeting between President Bush and Soviet President Gorbachev will most likely have to be changed because of high- level diplomacy to get Iraq to leave Kuwait.

Wholesale gasoline prices have come down but motorists woN'T find any difference at the pump. They've gone down just as federal taxes placed on gasoline head up. The latest national Lundburg Survey of 13-thousand gasoline stations shows average prices almost unchanged from three weeks ago at one dollar 46 cents a gallon. That includes the five cent a gallon increase in federal taxes, meaning that actual wholesale prices have come down.

In the Philippines, President Corazon Aquino today sacked her chief aide. Executive Secretary Catalino Macaraig handled the country's energy affairs and has been blamed for the government's failure to cope with the oil crunch brought on by Iraq's invasion of Kuwait. Meanwhile, the energy board, in a bid to appease outraged Filipinos, eased its steep hikes last week in gasoline prices. The board had more than doubled gas prices with two hefty increases in two days.

Alleged New England mob chief Raymond Patriarca is asking a federal court to keep the government from introducing a tape of an alleged Mafia induction rite at his trial. The 46-year-old Patriarca says the recording of the six-hour meeting violates his constitutional right of free association. Patriarca denies belonging to any crime organization and says that even if he did that would NOT be a crime in and of itself.

One more attempt is being made at ending the bitter labor dispute against the New York Daily News. It comes even as board members of the corporate parent plan to hold a quarterly meeting tomorrow. Some Wall Street analysts speculate the board might decide to cut its losses and close what was once the largest

circulation tabloid in the nation. The Daily News was hit October 25th by a strike of nine major unions. The unions and company representatives are to meet today with a fedral mediator in Washington.

-30- 2832

#90344u0838 12/10/1990 ~United Press International

HOUSTON (DEC. 10) UPI - Domestic drilling increased slightly last week, while offshore drilling declined in most areas, industry monitors reported.

A total of 1,179 rotary rigs were working in the United States last week, compared with 1,175 the week before and 1,058 the same week a year ago, Baker Hughes Inc. said Sunday.

In the Gulf of Mexico, two fewer rigs were working than the week before and one rig was moved to the North Sea, Offshore Data Services reported. The change left 149 of the 211 mobile offshore drilling units under contract, for a utilization rate of 70.6 percent.

At 211 rigs, the Gulf of Mexico drilling fleet is smaller today than at any time since mid-1983, ODS said. The gulf fleet peaked at 257 in the summer of 1985.

''The fleet downsizing has occurred due to the oil price collapse in 1986 and the trend for oil companies to move their exploration and production activities oversease,'' ODS said.

The company said up to 10 more rigs may leave the area in the coming months. Despite its shrinking fleet size, Gulf of Mexico rig utilization remains substantially lower than other areas of the world, ODS said.

In European waters, the number of working rigs dropped by one to 127 out of a fleet of 138, for a utilization rate of 92 percent.

Worldwide, 556 rigs were under contract, three less than a week ago, for a utilization rate of 83.2 percent.

Other relevant rig counts included Louisiana, 151 rigs last week, 158 the week before and 166 the same week a year ago; New Mexico, 65, 68 and 47; Oklahoma, 147, 153 and 149; Texas, 432, 418 and 342; and Canada, 187, 189 and 165.

#90344u0870 12/10/1990 ~United Press International

PONTIAC, Mich. (DEC. 10) UPI - An attorney for the retired pathologist charged with murder for helping an Oregon woman commit suicide plans to file a two-part motion seeking to quash charges against his client.

Geoffrey Fieger said the actions of Dr. Jack Kevorkian in helping Janet Adkins take her own life June 4 were not a crime under Michigan law. He said Oakland County Prosecutor Richard Thompson is guilty of misconduct that has deprived Kevorkian of his right to a fair trial.

Fieger's motion was expected to be heard Wednesday by Oakland County Circuit Judge Gerald McNally.

Kevorkian has acknowledged that he helped attached Adkins, who suffered from Alzheimer's disease, to the ''suicide machine'' that he invented. Adkins activated the machine by pushing a button that released a fatal poison into her system.

The case sparked a national debate over medical ethics and the right to die.

Thompson filed a civil action to block Kevorkian from using his machine again and last week announced criminal charges.

Fieger said the murder charge is inappropriate because ''facilitating suicide is not a crime'' in Michigan. He said the medical examiner's autopsy report on Adkins said she died by her own hand.

#90344u0872 12/10/1990 ~United Press International

WASHINGTON (DEC. 10) UPI - The Supreme Court Monday agreed to decide if a journalist promising confidentiality in exchange for information has entered into a legally binding agreement with a news source.

The court will decide whether Minnesota's two largest newspapers, the Star Tribune of Minneapolis and the St. Paul Pioneer Press Dispatch, are liable for damages for reneging on a 1982 agreement made with a source.

At issue is whether the First Amendment can be used to uphold such actions on the one hand, while remaining the basis for the traditional claim by reporters that a pact with a source is sacrosanct and cannot be compromised even by a court order.

In the waning days of Minnesota's 1982 gubernatorial race, the newspapers obtained information about Democratic lieutenant governor candidate Marlene Johnson involving legal troubles from a dozen years earlier. The tip came from Dan Cohen, then working for Wheelock Whitney, the Republican candidate for governor.

Cohen gave the information to a political reporter from each newspaper, but only after they agreed not to use his name in connection with the information or ask where he obtained it.

However, the newspapers published information about Johnson's past the next day and identified Cohen as its source.

Cohen, a former president of the Minneapolis City Council, was fired from his job with an advertising firm that day, and the Star Tribune, in a column and through an editorial cartoon, criticized him for supplying the ''last minute campaign smears.''

Cohen sued the newspapers for breach of contract and misrepresentation, and a jury awarded him $200,000 in compensatory damages and $500,000 in punitive damages.

The Minnesota Court of Appeals struck down the misrepresentation finding and the $500,000 punitive damages award, but upheld the verdict of breach of contract and the compensatory damages.

By a 4-2 vote, the Minnesota Supreme Court reversed the $200,000 compensatory damages award as well, ruling that the newspapers' actions were protected fully by the constitutional guarantee of freedom of the press.

In his appeal to the Supreme Court, Cohen's attorney wrote that the case ''presents explicitly the question of whether the First Amendment permits a media organization to deliberately violate an undisputed and unambiguous promise of confidentiality.''

The newspapers contend the events surrounding the incident were extraordinary, and argued the case poses no risk to the confidentiality of news sources in general.

A reporter for the Star Tribune, investigating Johnson's court records the day of the Cohen tip, found they had lain dormant for years before being scanned by a Whitney supporter the day before.

That supporter, when contacted by the reporter, said he had reviewed the records ''for Dan Cohen.''

The newpapers also learned Johnson's criminal past consisted of a 1969 arrest for unlawful assembly for protesting the city's alleged failure to hire minority workers on construction projects, a charge that was later dismissed, and a 1970 petit theft conviction, vacated a year later, for leaving a store with $6 in sewing materials.

Editors for the Star Tribune, noting a need to present balanced political coverage, decided to publish Cohen's name and identify him as the source of

the information. Pioneer Press Dispatch editors reached the same decision independently.

The Minnesota Supreme Court found that a journalist-source pact clearly is more of a clandestine ''I'll-scratch-your-back-if-you'll- scratch-mine'' accommodation than a legal contract.

The court also rejected the contention that the legal doctrine of promissory estoppel - which equates a promise to a contract - applied.

''The potentiality for civil damages for promises made in this context chills public debate, a debate which Cohen willingly entered albeit hoping to do so on his own terms,'' wrote Minnesota's highest court. ''In this context, and considering the nature of the political story involved, it seems to us that the law best leave the parties here to their trust in each other.''

In a dissenting opinion, Justice Lawrence Yetka called the majority decision ''deplorable.''

''The result of this is to carve out yet another special privilege in favor of the press that is denied other citizens,'' wrote Yetka. ''It is unconscionable to allow the press, on the one hand, to hide behind the shield of confidentiality when it does not want to reveal the source of its information; yet, on the other hand, to violate confidentiality agreements with impunity when it decides that disclosing the source will help make its story more sensational and profitable.''

A decision in the case is expected sometime next year.

INDIANAPOLIS (DEC. 10) UPI - Searchers Monday found the body of a 5-year-old girl in the rubble of an apartment building leveled in an explosion and fire that also injured 17 people at Fort Benjamin Harrison.

The blaze began about 9:20 p.m. Sunday as firefighters and utility workers were investigating a natural gas leak in the Harrison Village housing development.

The girl had been listed as missing until her remains were found Monday morning. Sgt. Maj. Ken Harley of the fort's public information office said the victim was the daughter of one of the men injured in the blast. The father was released after hospital treatment, Harley said.

The girl lived in the apartment with her family, Harley said.

Army spokesmen said the blast injured at least 17 people, seven of them critically burned. Hospital officials later downgraded the severity of some patients' injuries to serious. Another 10 people were treated at Hawley Army Community Hospital on the post and released.

Harrison Village is family housing quarters for enlisted soldiers assigned to Fort Harrison, not for any reserve or national guard forces called up for Operation Desert Shield. The development's 210 families were immediately evacuated following the explosion. They were housed overnight in other military housing on post and in area motels.

The flames burned one four-unit apartment building to the ground and slightly damaged an identical one nearby.

Firefighters fought two hours to contain the blaze.

Lawrence Mayor Thomas Schneider said investigation of a possible gas leak had begun about 7 p.m. and people had begun evacuating the area before the blast occurred.

An Army spokesman said Citizens Gas & Coke Utilty workers had gone to the complex about 7 p.m. and had shut down two lines in the area of a suspected gas leak a block away from where the explosion later occurred.

There are 240 apartment units in the 60 buildings of the complex, each building having two ground-floor and two second-story units.

About 1,400 Army Reservists and National Guardsmen are housed elsewhere on the base.

WASHINGTON (DEC. 10) UPI - The Supreme Court Monday refused to grant an emergency appeal that would have halted a Jan. 22 special election in Los Angeles County meant to help remedy years of voting discrimination against Hispanic residents.

The court did not announce whether it will hear a requested appeal on the merits of the case, and could still decide to take the case when it returns from its holiday recess early next month.

The county wants the court to review a decision that it must change its voting precincts to facilitate the election of a Hispanic to the five-member Board of Supervisors, even though more than half of the county's Hispanic adults cannot vote.

The court is being asked to decide if the 9th U.S. Circuit Court of Appeals was correct when it ruled the Voting Rights Act of 1965 requires immediate redrawing of one district to correct discrimination problems dating back decades.

The 9th Circuit and a federal district court specifically found the last redistricting plan adopted in 1981 fragmented the Hispanic community, violating both the Voting Rights Act and the equal protection clause of the 14th Amendment.

The election of a supervisor for District 1, originally scheduled for Nov. 6, was postponed. The district court scheduled a special primary election using new districting lines for Jan. 22, 1991.

On Nov. 30, Los Angeles County and three members of the Board of Supervisors asked the high court to issue a stay of the district court- ordered special election pending a final decision by the high court on whether the county violated the law.

The application, presented to Justice Sandra Day O'Connor and referred by her to the full court, was rejected without comment.

The county contends Section 2 of the Voting Rights Act, which was cited by the court, should not apply in this case.

Section 2 was written in part to prevent jurisdictions from drawing legislative boundaries to diminish the voting power of minorities. But the county claims the drawing of legislative districts should be based on the number of eligible voters - not population.

Because of the number of illegal aliens and other non-citizens, only 42 percent of the adult Latinos in Los Angeles County are eligible to vote, compared to 97 percent of blacks and 95 percent of whites.

The planned redistricting would allow Hispanics to compose a voting majority in one of the five voting precincts with near equal population but less than half the registered voters of a neighboring precinct.

California law requires supervisorial districts that are near equal in population.

But the result of the planned redistricting is that a single vote in the mostly Hispanic district, in effect, would have twice the political value of a vote in a neighboring district were the population is the same but there are twice as many voters.

#90344u0950 12/10/1990 ~United Press International
JERUSALEM (DEC. 10) UPI - The military Monday lifted most curfews imposed to prevent violence on the third anniversary of the Palestinian uprising, but declared the Gaza Strip a closed military area and prohibited journalists from entering.

In the West Bank town of Bethlehem, Chief of Staff Dan Shomron, Defense Minister Moshe Arens and other military officials visited the area where a 19-year-old Israeli soldier was killed when homemade bombs exploded Sunday. Two soldiers also were slightly wounded in the explosions.

Shomron said he did not believe the attack signaled the start of a new phase in the Palestinian uprising as it entered its fourth year, but when examining the ''background of the extremism here in the field, the relation to what happens in the world, including in the Persian Gulf, we cannot not consider the possibility of change.''

''Even though there is no (change) presently, ... the fear, the possibility exists,'' Shomron said.

Curfews imposed on Bethlehem and surrounding villages after the attack remained in place Monday.

While lifting curfews on most major West Bank towns, the military maintained curfews imposed before the uprising anniversary on more than 10 West Bank Palestinian villages and refugee camps. All curfews in the Gaza Strip, except on one village, were lifted, but the army declared the strip a closed military area and prohibited journalists from entering.

Commenting on Sunday's attack in Bethlehem, Shomron said the Israeli army would ''continue with all means available to fight that murderous violent core'' that attacks Israeli soldiers and Palestinians suspected of collaboration.

Curfews imposed before the explosions Sunday in an effort to prevent violence during the uprising anniversary confined approximately 1 million Palestinians to their homes. A general strike called to commemorate the Palestinian uprising, known in Arabic as the intifada, shut down the rest of the Gaza Strip, West Bank and East Jerusalem.

''The intifada is a popular revolution that came to prove to Israel and the world that the Palestinians totally reject all kinds of occupation and one day they will have their state,'' said Awni Neman, a Gaza City businessman.

''The intifada will continue as strong as it is until those (U.N.) resolutions

will be completely applied,'' Neman said, referring to resolutions calling for Israeli withdrawal from the territories it captured during the 1967 Israeli-Arab war.

The uprising erupted Dec. 9, 1987, after four Palestinians were killed in a traffic accident in Gaza involving an Israeli. Rumors spread the accident was intentional, sparking widespread rioting in the Gaza Strip that spread to the West Bank and East Jerusalem.

More than 20 Israeli soldiers and civilians have been killed in the occupied territories since the uprising began, military statistics show. B'Tselem reports another 21 Israeli civilians and three tourists killed in uprising-related violence within Israel's pre-1967 borders.

The military reported more than 620 Palestinians were killed by Israeli soldiers and an estimated 300 Palestinians were killed by other Palestinians because they were suspected of collaboration or immoral behavior.

The Israeli human rights organization, B'Tselem, places the figure of Palestinians killed by security forces and Israeli civilians at 750.

Army statistics estimate the cost of maintaining Israeli troops in the territories during the uprising at approximately $750 million.

#90344u0954 12/10/1990 ~United Press International

LONDON (DEC. 10) UPI - Former British middle distance runner Sebastian Coe officially launched London's bid for the 2000 Summer Olympics Monday with a promise that the Games would not cost the taxpayer a penny.

Industry and commerce would foot the bill, Coe insisted before the first meeting of his coordinating committee.

England national soccer team captain Gary Lineker backed Coe's sentiments, adding that London was the only city in Britain with a realistic chance of staging the Games. Lineker has joined sporting, commercial, parliamentary, police, transport and tourism representatives on the committee chaired by Coe.

Their meeting Monday came nine days before the British Olympic Association gathers to decide whether it will sanction any bid.

Birmingham's effort to stage the 1992 Olympics and Manchester's bid for the 1996 Games received little support when the International Olympic Committee made its decision.

Coe, the Olympic 1500 meters champion in Moscow in 1980 and Los Angeles in 1984, produced the torch which lit the 1948 Games in London as he opened the

campaign to return the Olympics to Britain.

''London is the right venue from which to launch a new century of sport,'' he said. ''It has many of the venues required already in place, the advantages of being a major commercial center and all the history attached to the Olympic movement.

''The days of the Games being a burden on local taxpayers are long gone. These will not be a drain on the public purse. Britain has lost too much of its standing in world sport. This is the perfect opportunity to put our feet back on the world platform.''

Coe, who will bid to become the Conservative member of parliament at the next British general election, rejected suggestions that London's transport problems would be too great.

''Los Angeles was not easy, Barcelona in 1992 will have more problems than us, and Atlanta in 1996 will also find it difficult,'' he said.

Melbourne, Berlin and Beijing are among the other cities expressing an interest in hosting the Games in 2000.

#90344u0965 12/10/1990 ~United Press International

WASHINGTON (DEC. 10) UPI - After six weeks of heavy travel that took him from the hot sands of Saudi Arabia to the cool mountaintops of South America, President Bush finally ran out of gas.

''He's tired,'' a White House spokesman said Sunday in announcing the president had canceled plans to participate in the taping that evening of NBC-TV's annual Christmas show.

''He played tennis earlier today. He doesn't feel well. Nothing serious,'' she said.

Bush, puffey-eyed and tuckered out, returned late Saturday from a grinding, five-day, six-nation goodwill tour of South America. The week before, he spent a couple of days in Mexico.

''I think we were all a little discombobulated,'' White House press secretary Marlin Fitzwater said Monday of the whirlwind tour. Fitzwater added, however, that the president had been recharged and is ''ready to go again.''

Speaking to White House reporters, Fitzwater said, ''Get your bags packed.''

Last month, Bush went to Europe and the Middle East, spending Thanksgiving Day with U.S. troops in the Persian Gulf. Earlier in November, he criss-crossed

the country, campaigning for fellow Republicans.

Bush, 66, appears en route to becoming the most well-traveled U.S. president ever.

Thus far, during two years in office, he has visited three dozen nations and 45 states. The figures nearly match the number of nations and states Ronald Reagan set foot in during eight years in office.

But it looks like Bush is about plant himself more firmly in one place, at least until the Persian Gulf crisis cools down.

The president has canceled plans to spend much of the Christmas holidays in his adopted home state of Texas and appears ready to push back his superpower summit with Mikhail Gorbachev, which was to be held next month in Moscow.

Other planned winter and spring presidential travel to Australia and Japan also were being shelved pending events in the gulf so Bush can spend more time in Washington.

Bush has a busy schedule this week in Washington, though.

He is to greet a parade of foreign visitors, including Lithuanian President Vytautas Landsbergis on Monday, Israeli Prime Minister Yitzhak Shamir on Tuesday and Soviet Foreign Minister Edward Shevardnadze on Wednesday.

On Thursday, Bush will make a short quick trip.

He is to go to the Ellipse, the oval-shaped park across the street from the White House, to participate in the annual lighting of the national Christmas tree.

#90344u0988 12/10/1990 ~United Press International

JOHANNESBURG, SOUTH AFRICA (DEC. 10) UPI - Anti-apartheid activists expressed concern Monday over the International Olympic Committee's decision to send a delegation to South Africa, fearing it is a possible prelude to readmitting the country to the Olympics.

IOC officials announced Sunday during a three-day meeting of the ruling Olympic body in Lillehammer, Norway, a five-member delegation led by Senegalese Judge Keba Mbaye would be dispatched to South Africa in April to investigate progress in dismantling apartheid.

Mbaye was quoted saying that South Africa, which was expelled from the Olympics after the 1960 Games, could be readmitted by the 1992 Summer Games in Barcelona.

Sports officials responded skeptically to the announcement. The anti-apartheid National Olympic and Sports Congress said it was awaiting formal notification of the IOC decision but that it found the reports ''surprising.''

Moss Mashisi, NOSC spokesman, said it had been agreed following talks in Harare last month that a special commission would monitor South Africa's compliance with two demands before readmission to the Olympics - the dismantling of apartheid and desegregation of sport.

''If the IOC does send a delegation to South Africa, we will meet and cooperate with them,'' Mashisi said. ''But it also is important to add that an impression must not be created that the lifting of the sports moratorium will be determined by the international bodies.

''It will depend on South Africans themselves.''

Even the South African National Olympic Committee reacted cautiously. SANOC Director Doep du Plessis said it was clear apartheid had to be abolished and sports desegregated and unified under single bodies before the sports moratorium would end.

''While we welcome the IOC's decision to send a delegation to South Africa, we must warn people that they should not see this as a deviation from the Harare guidelines. SANOC at this stage supports the sports moratorium.''

''We nevertheless welcome the decision by the IOC as a genuine attempt to help South Africa cross the last two remaining hurdles,'' du Plessis said.

#90344u1005 12/10/1990 ~United Press International

NEW YORK (DEC. 10) UPI - In another sign of a weakening local real estate market, the average sales price per room of a Manhattan co-op or condominium dropped to $80,435 last month from $83,100 the previous month, The Halstead Property Co. said Monday.

The real estate concern, which issues monthly surveys of the Manhattan apartment market, said sellers got 73 percent of the asking price for Manhattan properties in November, down from 74 percent in October.

Despite the weak market, buyers still are trying to unload high-priced properties, Halstead reports. The company said there currently are 919 apartments for sale in Manhattan with asking prices of more than $1 million.

Clark Halstead, head of the company, said the steep decline in prices during November reflected the fact that "the market has been falling like a stone."

NEW YORK (DEC. 10) UPI - Latest metal market prices as quoted Monday by the American Metal Market, authoritative metals publication:

Aluminum, New York Merchants, 99.7 percent pure ingots 70.00-72.00 c- lb.

Antimony, domestic, refined in alloy, $2.00 lb.

Copper, electrolytic wirebars, delivered U.S. (Warrenton Refining Co.) 117.63-120.00 c-lb.

Lead, common, U.S. primary producers 37.00-45.00 c-lb.; U.S. non- primary (secondary) producers 40.00-45.00 c-lb.

Magnesium, 99.8 percent, ingot 163.00 c-lb.

Manganese, 99.9 percent, boxed regular 91.00-95.00 c-lb.

Mercury, $192.00-$210.00 76-lb. flask.

Nickel, briquettes delivered to customers, merchant, N.Y., $4.50-4.75 per pound.

Palladium, N.Y. Am. Met. Mkt. dealer $94.00-$96.50 per troy ounce.

Platinum, soft, 99.5 fine, producer - $426.00-$431.00; dealer-approx. , $427.00-$450.00 per troy ounce.

Steel, No. 1 heavy melt scrap - Pittsburgh $105.00-$109.00 per gross ton

(consumer buying price); Am. Met. Mkt. composite scrap price $105.67 per ton.

Tin, N.Y. Am. Met. Mkt. ex-dock - 274.75 c lb.

Titanium, aircraft quality, 8 1/8 inch round rotating billet, f.o.b. shipping point $7.80-9.59 lbs., domestic sponge 99.3 percent, domestic and imported duty-paid $5.00-5.50 lb.

Tungsten powder (H-Red), 99.9 percent minimum pure $10.00 per lb.

Zinc, prime western, U.S. 80.00 c-lb.

#90344u1089 12/10/1990 ~United Press International

(DEC. 10) UPI - More freed American hostages are heading home across the Atlantic today in a flight that will take them to Andrews Air Force Base outside Washington. They were among the estimated 300 foreigners carried to Frankfurt, Germany, aboard a chartered jetliner from Baghdad. A second jet carried 161 Italians to Rome last night and a third jet chartered by the British is to leave Baghdad later today. One American aboard the Frankfurt plane, teacher Matthew Allen, fought back tears while telling of the burned cars and heaps of garbage that litter the streets of Kuwait's capital.

The Persian Gulf crisis and possible timetables for a superpower summit will be among topics of discussion today as Secretary of State Baker meets his Soviet counterpart, Eduard Shevardnadze, in Houston. The city was chosen to get the two as far away from their respective capitals as possible. Two meetings are set today, three tomorrow. Shevardnadze will then head to Washington on Wednesday for meetings with President Bush.

President Bush is back at the White House after six weeks of heavy travel. It took him to Europe, the Middle East, Thanksgiving with U-S troops in the Persian Gulf, a visit to Mexico and then a five-day, six- nation goodwill tour of South America. This week's schedule is just as filled. Bush meets today with Lithuanian President Vytautas Landsbergis , Israeli Prime Minister Yitzhak Shamir tomorrow, and on Wednesday with Soviet Foreign Minister Eduard Shevardnadze.

Deteriorating weather in California is sending the shuttle Columbia out of orbit and back to earth one day early. Ground control radioed up the final decision this morning and Columbia's crew will spend the rest of this day preparing for a late night landing at Edwards Air Force Base in California. The early end to what was to be a 10-day mission comes on forecasts of high winds and rain during what was originally to be the scheduled end to the 38th shuttle mission.

The Supreme Court will decide whether a journalist promising confidentiality

in exchange for information from a news source has entered into a legally binding agreement. The justices will hear arguments in a case involving Minnesota's two largest newspapers, the Minneapolis Star Tribune and the St. Paul Pioneer Press Dispatch... and decide whether the papers are liable for damages for reneging on a 1982 agreement made with a source.

In other action, the justices today refused to grant an emergency appeal that would have halted a special election in Los Angeles County meant to help remedy years of voting discrimination against Hispanic residents. The court didn't say whether it will hear the county's appeal on the merits of the case, and could still decide to take the case when it returns from its holiday recess early next month.

The Israeli military today lifted most curfews in the occupied territories. The clampdown was imposed in the West Bank and Gaza Strip to prevent violence on the third anniversary of the Palestinian uprising. But curfews were lifted on most major West Bank towns, except on more than 10 Palestinian villages and refugee camps. In the Gaza Strip, all curfews, except on one village, were lifted, but the army declared the strip a closed military area and prohibited journalists from entering.

#90344u1100 12/10/1990 ~United Press International

CORPUS CHRISTI, Texas (DEC. 10) UPI - A newspaper reporter jailed for refusing to answer questions about her interviews with a capital murder suspect was freed because a judge was convinced no amount of jail time would change her mind.

Jorge Rangel, an attorney for the Corpus Christi Caller-Times, said Monday he called together the presiding judge, prosecutor and defense attorney Sunday night, convincing them to agree to release reporter Libby Averyt.

Averyt, 26, who had been handcuffed and taken to the Nueces County jail Friday after being cited for contempt of court, was freed Sunday night.

''I told them that Libby was not going to change her mind and she was not going to answer the questions, and that any further confinement would not make her change her mind,'' Rangel said.

Averyt had refused at pretrial hearings to answer questions about information she did not include in published accounts of her interview with a capital murder suspect.

Rangel said the suspect's attorney ''basically says he doesn't want her to testify'' about that information, but that he wanted the right to question her should the district attorney's office ask about the information.

Even though she has been freed, the subpoena the district attorney's office issued still is pending, so the question still could be posed during the capital murder trial Jermarr Arnold that begins Wednesday.

#90344u1104 12/10/1990 ~United Press International

NEW YORK (DEC. 10) UPI - A stubborn jury resumed its 11th day of marathon deliberations Monday in the Central Park rape-beating trial by concentrating on readbacks of testimony about events surrounding the videotaped confession of one of the two youths charged.

The jury in State Supreme Court in Manhattan had deliberated throughout the weekend, asking for readbacks of testimony on the videotaped confessions of Kharey Wise, 18.

The statements are the strongest evidence against Wise, who is on trial with Kevin Richardson, 16, for their alleged involvement with a gang of youths in a random crime spree in Central Park on April 19, 1989.

Each youth is charged with 13 criminal counts, including rape and attempted murder for an attack on a woman jogger.

Monday, the jury asked to hear again testimony about conversations between Wise and Detective John Hartigan during the time between the youth's last written confession and his first videotaped confession.

The jury appeared to be concentrating on how Wise was treated by police during his interrogation after his arrest.

Wise's lawyer, Colin Moore, maintains he is innocent and was tricked into making incriminating statements.

In his first videotaped statement to police, Wise recounted the vicious attack on the jogger in graphic detail but claimed he watched from behind a tree and was not involved.

In his second videotaped statement, Wise admitted participating in the violence, saying he ''played with her leg'' while the rape was underway. He told Assistant District Attorney Elizabeth Lederer, who questioned him on the tape, ''This is my first rape.''

In his summation to the five-man, seven-woman jury, Moore said that by the end of the first videotape, Wise was exhausted after a sleepless night in the police precinct.

He said Hartigan pressured Wise to make another videotape, to ''put himself in it,'' and promised to reward him by sending him home, Moore said. Soon

afterward, Moore said, Wise made the second statement.

In a note sent out Sunday, the panel asked a series of questions about what occured between the end of the first tape and the beginning of the second tape.

In response to three specific questions, Justice Thomas Galligan told the jury that one hour and 20 minutes lapsed between the two tapes, that Wise spoke only to Hartigan and that there was no testimony about whether he ate or slept between the two tapes.

-30- 2644

#90344u1111 12/10/1990 ~United Press International

PARIS (DEC. 10) UPI - France will increase its contingent in Saudi Arabia by at least 1,000 men by Jan. 15 to beef up the artillery firepower facing Iraqi forces and provide additional tank and air power, sources said Monday.

''A decision of principle at the highest level has been taken concerning reinforcements that for a long time have been requested to assure the maximal security of our forces under all hypotheses that can be envisaged,'' Defense Minister Jean-Pierre Chevenement told a news conference at the end of a ministerial meeting of the Western European Union.

Full details of the reinforcement would be made known in coming days after the French chief of staff has studied the logistics, Chevenement said.

Defense Ministry sources said about 1,000 artillery gunners will be sent to Saudi armed with between 18 and 24 155mm cannons.

Also expected to be sent are AMX 30 heavy tanks to bolster the lightly armored French force of some 5,500 men already in place in Saudi Arabia, and some additional warplanes, said the sources.

-30- 1249

#90344u1118 12/10/1990 ~United Press International

MEXICO CITY (DEC. 10) UPI - The new controlling interest holders of Mexico's giant telephone company will have six years to improve efficiency and expand services, the government's Official Gazette said Monday.

The Official Gazette, or Diario Oficial, said that ''if these conditions are not met at the completion of this six-year period, the government reserves the right to sell more concessions of the company to interested parties.''

On Sunday, the government said an international consortium that includes St. Louis-based Southwestern Bell, an affiliate of France Telecom and Mexico's Grupo Carso will buy controlling interests in Telefonos de Mexico, known as Telmex. The consortium will pay $1.76 billion.

A stipulation in the agreement stated that the controlling interest holders have a period of six years to improve national and international long distance service, expand the service and improve the efficiency of the company, the Official Gazette said. Another stipulation stated that no party would be given the right to directly or indirectly monopolize Telmex.

Jaques Rogozinski, who coordinated the government's withdrawl from Telmex, told reporters Sunday that the international consortium's bid of $1.76 billion was 4.2 percent more than the second highest bid of $1.69 billion from a group made up of GTE Telephone Corp., Telefonica de Espana (Spanish Telephone Co.) and brokerage firm Acciones y Valores de Mexico. They were followed by Grupo Gentor, a Mexican investment group, which offered $700 million.

Grupo Carso, a Mexican consortium of industrial companies, along with Southwestern Bell and France Telecom, will acquire 20.4 percent of Telmex, Rogozinski said.

The telephone company's total value has been estimated at $8 billion.

''There were no significant differences in the technical aspects of the bids so the amount offered was the final variable that determined the winner,'' Rogozinski said.

''In the next few days, a general director will be named and stock representing 20.4 percent of the company will be handed out to the group, giving it administrative control of Telmex,'' he said.

The government will later place the remaining Telmex shares on Mexican and international stock exchanges, Rogozinski said.

He said the group was notified Friday they had won the bid. Under guidelines for privatization of the company, Grupo Carso must control 10.4 percent of the group's shares to ''keep the company in Mexican hands,'' he said.

The administration of President Carlos Salinas de Gortari announced its intention to privatize the state-owned telephone company in August 1989. But resistance from the 50,000-member powerful telephone workers union blocked an early sale of the company, observers said.

The Mexican Finance Ministry said the government signed an agreement with the labor union Sunday that gives workers a chance to buy up to 4.4 percent of the company's shares. Rogozinski said the government would provide workers a $325 million credit to buy into the company.

WASHINGTON (DEC. 10) UPI - The Supreme Court ruled Monday that collective bargaining agreements specifying grievance procedures between companies and their employees do not automatically bar workers from court action.

The court reversed a decision of the 6th U.S. Circuit Court of Appeals that a collective bargaining pact containing specific non-court grievance steps precludes workers from bringing suit if that process fails to work.

The 6th Circuit had ruled that, under the Labor Management Relations Act of 1947, legal action could not be taken, even if a worker's contract did not specifically restrict lawsuits.

The Supreme Court, in a unanimous decision, held that the 6th Circuit was wrong.

The case involved Ring Screw Works, a Michigan automobile parts manufacturer, and two former employees backed by Local 771 of the United Auto Workers union.

The company in 1987 fired Arthur Groves for allegedly excessive, unexcused absences. It fired another employee, Bobby Evans, for allegedly falsifying company records.

Both men claim they were fired without due cause in violation of the collective bargaining agreement.

After invoking other grievance procedures, the company decided not to call for arbitration and the union opted not to exercise its right to strike, bringing the case instead to court.

The 6th Circuit ruled that the collective bargaining agreement indicates a ''strike, or other job action, is the perceived remedy for failure of successful resolution of a grievance absent agreed arbitration.''

The Supreme Court Monday ruled a union should not be forced to call a strike.

''The company argues that the union has agreed that if the voluntary mediation process is unsuccessful, then the exclusive remedy that remains is either a strike or a lockout, depending on which party asserts the breach of contract '' Justice John Paul Stevens wrote for the court.

''According to this view, the dispute is not whether there was 'just cause' for the discharge of Groves and Evans, but whether the union has enough muscle to compel the company to rehire them even if there was just cause for their discharge.''

In briefs to the court, the Chamber of Commerce of the United States and the Motor Vehicle Manufacturers Association of the United States Inc., claimed a reversal of the 6th Circuit could force thousands of such cases into court

each year.

89-1166 Arthur Groves, Bobby J. Evans et al., vs. Ring Screw Works, Ferndale Fastener Division

#90344u1136 12/10/1990 ~United Press International
MOSCOW (DEC. 10) UPI - Mikhail Gorbachev wished Lech Walesa success as Polish president Monday in a message that did not congratulation him on his victory but did urge improved relations between the two countries.

''History and life prove convincingly the need to develop cooperation and interaction between our states and peoples,'' Gorbachev said in a message carried by the Soviet news agency Tass.

''I hope that friendly and good-neighborly relations between the Soviet Union and Poland will develop in the interest of the two peoples and the construction of a new Europe,'' the message said. ''I wish you, Mr. President, success in your activities.''

The telegram to Walesa, who as leader of the unofficial Solidarity union waged a 10-year battle to end Soviet-backed Communist rule in Poland, did not specifically congratulate him on the victory as is common in such a message.

A Soviet Foreign Ministry spokesman was similarly restrained in his reaction to Walesa's overwhelming victory in Sunday's election.

''Polish voters have made their choice, and we are taking into consideration the results of the Polish elections,'' Foreign Ministry spokesman Yuri Gremitskikh said.

Gremitskikh said the Soviet Union ''above all is interested to know how Soviet-Polish relations will develop in the future.''

''We are neighbors that have always cooperated, and our cooperation has been steadily developing,'' Gremitskikh said.

Walesa won Poland's first popular presidential election with 73.25 percent of the vote over businessman Stanislaw Tyminski, unofficial results showed Monday.

#90344u1143 12/10/1990 ~United Press International
MOSCOW (DEC. 10) UPI - Mikhail Gorbachev warned top-ranking Communists on Monday against a breakup of the Soviet Union and said their embattled party must provide the glue to keep the country together.

Gorbachev, addressing a plenum of the party's Central Committee, bitterly attacked ''diehard militant nationalism'' that has fueled secessionist drives from the northern Baltic republics to the southern Transcaucasian region.

The official Tass news agency branded as ''baseless'' speculation that Gorbachev would use the plenum to give up his post as the party's general secretary in order to concentrate on his duties as Soviet president.

''The party is in favor of keeping and radically renewing the union,'' he said. ''This is not a tactical move or a concession to anyone under the pressure of circumstances, but rather the party's principled stand.''

The Central Committee, trimmed down to just 250 members at the 28th Party Congress in July, convened with little of the fanfare that surrounded past meetings of the once all-powerful body.

Pravda, the official party newspaper waging a fall subscription drive to bolster its shrunken circulation, did not mention the plenum on its front page which just a few years ago would have been dominated by such a conference.

In remarks carried by Tass from the closed session, Gorbachev asked the Central Committee members to endorse a union treaty he wants to underpin a rejuvenated Soviet Union and to weigh the party's future amid increased competition at the polls.

Gorbachev, noting his attempts to separate government functions from Communist structures, urged support of the treaty as ''a state document, not a party one.''

The accord, which would replace the 1922 pact that formally established the Soviet Union, will provide a foundation for the movement to a market economy, he said.

''The union is also necessary for our peoples as a reliable guarantee of their security and as the basis of international prestige,'' Gorbachev said.

The 1990 Nobel Peace laureate said ''there is no danger in the country greater than'' extreme nationalism and accused separatists of ''ambitious public straining after portfolios.''

Tass struck a defensive note in its report on the plenum.

''Although the Soviet Communist Party has practically become the opposition in many republics following election results, it remains as before the only political force of an all-union scale,'' Tass said.

''This uniting and consolidating element today is an essential tool for Mikhail Gorbachev in his attempt to preserve the union while at the same time

giving new content to the understanding of (local) sovereignty,'' it said.

The two-day plenum was expected as well to choose several new members of the ruling Politburo, which was also overhauled in July to include Gorbachev, his new deputy general secretary, the party chiefs from each of the 15 Soviet republics and seven other functionaries.

The first secretaries in Byelorussia and in the Transcaucasian republics of Armenia and Georgia recently left their posts, and their replacements must be formally accepted into the Politburo.

''Despite changes in the arrangement of political forces in the country ... a great deal depends on the outcome of today's meeting,'' Tass said.

#90344u1149 12/10/1990 ~United Press International

TORONTO (DEC. 10) UPI - The Israeli government is suing a Canadian publisher and two authors of a best-selling book on its intelligence service, the Mossad.

The lawsuit asks for $2 million in punitive damages and all revenues from the sale of the book 'By Way of Deception,'' by former agent Victor Ostrovsky and journalist Claire Hoy.

The lawyer representing the Israeli government could not be reached for comment.

A spokesman for the book's publisher, Stoddart Publishing Co. Ltd. of Toronto, said the lawsuit is an admission that information in the book is true and accurate.

Stoddart spokesman Angel Guerra said the Israelis first denied Ostrovsky's claim that he was a former Mossad agent, then modified that to say he was not privy to sensitive agency information.

Ostrovsky, a Mossad agent from 1984 to 1986, claimed the Israeli government knew in advance of the 1983 terrorist suicide truck bombing that killed 240 Marines in Beirut but did nothing to stop it because it wanted to sour American-Arab relations.

Guerra said the Israeli lawsuit, filed with the Ontario provincial court in Toronto Oct. 9, claims Ostrovsky had access to ''protected information and wrongfully appropriated documents.''

A similar lawsuit has been launched in the United States.

The Israelis say Ostrovsky violated a contract prohibiting him from revealing information. Ostrovsky has said the agreement is not binding because he was

exposing criminal behavior by the Mossad.

Ostrovsky has said he does not possess documents that Israeli lawsuit claims he has.

The book gained worldwide fame in mid-September when the Israeli government blocked its publication by launching court actions in Toronto and New York.

An injunction against the book was lifted in New York and Israel subsequently withdrew the ban it won in Canada, saying the damage had already been done.

The book became the No. 1 seller on the New York Times non-fiction list in September and topped bestseller lists in Canada.

Ostrovsky, who lives outside Ottawa with his wife and two children, went into hiding when the initial furor erupted after receiving what he claimed were threats from Israeli agents who visited him.

#90344u1151 12/10/1990 ~United Press International

FORT LAUDERDALE, Fla. (DEC. 10) UPI - Doctors conspired to keep the Cleveland Clinic out of the Fort Lauderdale area through intimidation and threats of an illegal boycott, according to an 18-month investigation by the Federal Trade Commission.

The efforts violated federal antitrust laws designed to foster competition, according to FTC documents obtained by the Fort Lauderdale Sun-Sentinel and reported Monday.

The FTC alleges the Broward County doctors, who usually compete against each other, acted together to keep Cleveland Clinic doctors out of their hospitals. The doctors feared the added competition, the FTC said.

As a result, residents were deprived of the ''price and quality benefits'' of free competition, the FTC said.

The commission alleges that a conspiracy began in the 1980s, when doctors learned their hospitals were negotiating with Ohio's Cleveland Clinic, which wanted to build a satellite in Broward County.

To create a satellite in the area, the clinic needed access to a hospital. Discussions with Broward General Medical Center and Holy Cross Hospital faltered, in part because of objections from local doctors.

In late 1987, the clinic applied to build its own hospital, but the state rejected the plan because of a glut of hospital beds.

The clinic contracted with North Beach Hospital for a place to treat its patients and later bought it. But because that hospital did not have facilities for heart surgery, the clinic again looked to Broward General and Holy Cross.

Investigators said doctors at the two hospitals were concerned that the clinic would disrupt patient referrals, the lifeblood of their practices.

At Broward General, the FTC said, doctors threatened to send their patients to other hospitals to coerce the North Broward Hospital District Board, which oversees the hospital, not to affiliate with Cleveland Clinic.

Later, the doctors illegally blocked the applications of clinic physicians who wanted to work at the hospital, investigators said.

At Holy Cross, the FTC said, doctors threatened a boycott to persuade the hospital not to affiliate with the clinic. The doctors also refused to give clinic doctors applications to work at the hospital and later refused to process them, investigators said.

Doctors at both hospitals said they turned away clinic doctors because the clinic planned eventually to build a hospital that would compete for patients with their institutions.

Last month, the FTC gave doctors at Broward General and Holy Cross the option of stopping illegal behavior and signing an out-of-court settlement without a trial, or challenging the findings in a hearing before the commission.

As part of the settlement, Broward General's chief of staff, Dr. Diran Seropian, would be forced to give up his position and could not hold a leadership post for five years.

Holy Cross doctors would be required to strike a question about whether a doctor works for the clinic from their application for hospital privileges.

Doctors are considering the options. If they sign the proposed out- of-court settlements, they will acknowledge the FTC's findings without admitting to unlawful conduct. If they ask for a hearing, the medical staffs could face hefty fines.

FTC officials would not comment. The outcome of their investigation does not become public until the parties and the agency agree to a settlement or take the matter to a hearing.

Regardless what the doctors decide, the FTC findings could open the door for the Cleveland Clinic to sue the doctors for the business the clinic may have lost as a result of the alleged restraint of trade.

#90344u1160 12/10/1990 ~United Press International
WASHINGTON (DEC. 10) UPI - Manufacturers' after-tax profits averaged 4.1 cents for every dollar of sales during the third quarter, down 0.6 cent from the second quarter, the Commerce Department said Monday.

During the third quarter, manufacturers reported after-tax profits of $29.3 billion, down 10.2 percent from the $32.6 billion earned in the previous quarter.

After-tax profits rose slightly for makers of non-durable goods. Printing and petroleum companies posted increased profits, while makers of textiles, paper and rubber goods reported declines. Food and chemical company profits were unchanged.

Profits for makers of durable goods were down 40.4 percent, or $6.3 billion, during the third quarter from the second quarter, as all industry categories except electrical machinery posted declines. About 60 percent of the falloff came from makers of transportation equipment.

Manufacturers' sales rose 2.9 percent, or $19.9 billion, to $709.6 billion in the third quarter.

Sales for makers of non-durable goods rose primarily from a $12.8 billion increase in petroleum, 19.1 percent higher than the second quarter. Most other non-durable goods makers posted flat sales.

Sales among makers of durable goods, those big-ticket items designed to last more than three years, were down during the quarter. The government attributed the decline to an 11.1 percent, or $10.5 billion, drop in sales among makers of transportation equipment.

The annual rate of return, after taxes, on stockholders' equity at manufacturing corporations fell to 11.2 percent in the latest three months from 13.6 percent in the second quarter and 13.4 percent in the year-earlier third quarter.

#90344u1166 12/10/1990 ~United Press International
ANN ARBOR, Mich. (DEC. 10) UPI - The threat of harsh punishment does little to improve collection of billions evaded annually in federal taxes, University of Michigan research indicated Monday.

Studies suggested, on the other hand, that such positive measures as streamlined Internal Revenue Service taxpayer contacts may be as effective as increasing the number of audits or imposing stiff fines. A person's peers may

have the most influence of all on tax compliance.

The government lost nearly $85 billion to income-tax cheaters in 1987, according to the latest figures available from the IRS.

''Many people who regularly pay their taxes need few or no incentives to comply,'' said Joel B. Slemrod, University of Michigan professor of business economics and public policy. ''These taxpayers act honestly even though it is not in their own self-interest.

''The habitual tax evaders will find ways to cheat, and deterrents may have little effect on them.''

Although sums evaded total about 40 percent of the federal deficit, Slemrod said suggestions to quickly trim it through beefed-up enforcement might be in vain.

''Simply because the amount of taxes not paid because of cheating is a big number doesn't mean the government can make a big dent in it,'' he said. ''It's like oil reserves. They are there, but whether they are economically recoverable is a different matter.''

Slemrod organized a conference sponsored by the Office of Tax Policy Research of the U-M School of Business Administration Dec. 7-8. It included results of 12 research projects on various aspects of tax evasion and tax-law enforcement.

Individual cheaters have a negative attitude toward the tax system, and believe that others are equally dishonest, Slemrod said.

''Objective changes - whether the amount of taxes you pay goes up or down - apparently have little effect on an individual's attitude toward compliance. The subjective element matters - whether you believe the '' you believe the

One research project analyzed feelings of taxpayers before and after the 1988 tax season, the first time the main effects of the 1986 Tax Reform Bill were felt by individual taxpayers.

''The attitudes of other individuals with whom taxpayers discussed their taxes had the biggest effect,'' Slemrod said. ''What mattered most was who you talked with on a personal level. If you talked with people at a cocktail party and everybody said they were cheating, you were more likely to cheat.''

Auditing suspected cheaters may increase, rather than lessen, cheating. ''More audit coverage does deter evasion,'' Slemrod said. ''But if audits are seen as unfair and create negative attitudes between taxpayers and the IRS, they may backfire because more people with negative attitudes means more evasion.''

The IRS now audits fewer than 1 percent of all returns, down from a high of close to 6 percent. Slemrod said the IRS can use alternate means, including computer checks, simplifying the tax system, and ''conducting business in a more professional manner with a standard of service akin to a bank or other large financial institution.''

Research using previously untapped data from the IRS Taxpayer Compliance Measurement Program on small- and medium-size corporations showed that more than two-thirds of all corporations fail to report part of current-year income. Average unreported profits amounted to about 12 percent of average reported profits.

Public corporations tend to have a better record than private firms because they are forced to share information with shareholders, Slemrod said. Profits also affect how the firms comply.

''High-profit companies can shave off a portion of their income and still look successful without looking suspicious,'' he said. ''At the opposite end, one of the first places some companies in trouble may try to save money is to avoid paying taxes.''

#90344u1184 12/10/1990 ~United Press International

WASHINGTON (DEC. 10) UPI - The smoldering fire from the fight over the civil rights bill promises to ignite again in the next session of Congress as the politically charged issue of racial quotas begins to creep into hearings.

The issue of racial quotas came up Monday - not at a hearing on a new civil rights bill, but at a House Education and Labor Committee hearing on federal funding for historically black colleges and universities.

In the just completed session of Congress, opponents of the Civil Rights Act of 1990 contended the measure would have forced employers to hire minorities to fill quotas. President Bush used the same argument when he became only the third president to veto civil rights legislation.

Supporters, however, said the bill included no provision setting racial quotas and claimed opponents were using that argument to kill the bill.

The ensuing fight spilled over into the re-election campaign of Sen. Jesse Helms, R-N.C., whose strategy of railing against racial quotas succeeded in defeating Harvey Gantt, who is black.

And incoming Republican National Committee Chairman William Bennett, who wrote about the ills of racial quotas some 10 years ago, promises to use the issue to the GOP's advantage in upcoming races.

Rep. William Gray, D-Pa., the lead-off witness at the House hearing, followed up on a comment by Rep. Charles Hayes, D-Ill., about the racial overtones of the Helms campaign.

Gray urged investment in black colleges and universities as a way to avoid any need for quotas, which he says he opposes.

''I'd say to those who take advantage of fear - I would challenge them to stop dividing this country ... and begin to address the fundamental problem and invest in these people ... and give them an opportunity to attend these schools .. and then they will have the tools to compete and you won't have to use quotas,'' Gray said.

Apparently referring to Bennett's reported intention to use racial quotas as a campaign issue, Gray said it may secure some short-term political gains.

''But there's going to be a terrible price to pay in the long-term of this nation if we don't stop that,'' he said. ''I am very discouraged about what I see taking place.''

Rep. Dale Kildee, D-Mich., said the Helms campaign ''should cause the nation the deepest concern,'' noting the ''divisive technique'' used by the Republican senator to turn the tide in his favor.

Rep. Steve Gunderson, R-Wis., who voted against the civil rights bill because he felt it was quota bill and a ''full employment bill for plaintiff lawyers '' warned Gray, the No. 3 Democrat in the House, that the ''rhetoric and partisanship'' voiced in the last civil rights debate will repeat itself if the Democrats, as expected, reintroduce the bill.

''If the Democrats are going to introduce last year's civil rights bill as HR-1 and make it their highest partisan priority, then they will be the ones who made the decision to make the issue partisan,'' Gunderson said in an interview after the hearing.

''It is clear to me that the momentum around here is to play 1992 politics, rather than resolve discrimination,'' he said, adding that Bennett's decision to use the issue is based on Democrats' continued support of the civil rights measure.

Meanwhile, presidents of black universities told the House panel of the need to adequately fund their institutions, which represent just over 5 percent of all four-year higher-education institutions, but graduate about 40 percent of all black undergraduates. There are 117 such institutions.

The reathorization of the Higher Education Act will be debated in 1991.

''Our institutions have earned the assistance that the federal government has

provided. However, the level of support should be maintained or increased, not reduced or frozen and certainly not eliminated,'' said Robert Albright, president of Johnson C. Smith University in Charlotte, N.C., speaking on behalf of the United Negro College Fund.

William Harvey, president of Hampton University in Hampton, Va., said, ''Increased investment in these vital resources is an investment in our nation for their value is indisputable. We cannot afford the immediate and long-term cost of relegating their continued viability to a place of lesser importance.''

-30- 4563

#90344u1189 12/10/1990 ~United Press International

RIO DE JANEIRO, BRAZIL (DEC. 10) UPI - Thousands are expected to crowd a tiny Amazon town for the trial of two ranchers accused of killing ecologist Francisco ''Chico'' Mendes Filho, a deed that dramatized international concern over the future of the rain forest, officials said Monday.

Officials estimated more than 5,000 people would be at the trial Wednesday in Xapuri, a town of barely 4,000 inhabitants 1,850 miles northwest of Rio de Janeiro deep in the Amazon rain forest.

The Brazilian telecommunications company said 300 journalists from the United States, Europe, Asia and local media have asked for help in transmitting the trial of rancher Darly Alves de Silva, 56, and his son, Darci Alves, 26.

They are charged with fatally shooting Mendes, a leader of the rubber-tappers who won a United Nations Global 500 prize for promoting rational uses of the Amazon rain forest.

Mendes, 44, denounced local ranchers' burning of the forest for grazing land and became an international martyr when he was killed by shotgun fire at his home on Dec. 22, 1988.

Days earlier, Mendes told reporters that Darly Alves da Silva was planning his death and asked for protection from the authorities.

President Fernando Collor de Mello said he would fly to Xapuri to oversee about 200 federal policemen sent from Brasilia to enforce security at the trial, Federal Police Chief Romeu Tuma said.

Thousands of rubber-tappers were also expected to stand watch at the trial. The Catholic Church estimates about 1,500 tappers have been killed in Xapuri and the surrounding are since 1987.

Rubber-tappers extract the basic liquid for rubber from the trees in the rain forest much as farmers tap maple trees in the United States to produce maple sugar.

Lawyers were making final preparations Monday for the court battle.

Defense lawyer Rubens Lopes Torres said he wants his clients to wear hoods.

''I want to preserve the image of my clients,'' he said. ''They have already been very exploited'' by the press, Lopes Torres said.

But presiding Judge Adair Jose Longuini said he will not allow the defendents to appear hooded.

''If so, they are going to look like the Ku Klux Klan, the U.S. terrorist organization,'' Longuini said.

Lopes Torres said he also hoped to postpone the trial because the elder Alves has an ulcer. ''If it gets worse, we are going to postpone it. The ideal would be to have the trial in March,'' he said.

The star witness, Genesio Ferreira de Silva, 15, accompanied by police and journalists, was moved from Rio de Janeiro to Xapuri on Sunday, according to prosecuting lawyer Marico Thomaz Bastos.

Bastos, 54, the president of the Brazilian Lawyers Association, has said he has ''no doubt the accused in the trial will be found guilty.''

''The proof gathered in the investigation is solid,'' Bastos said. He said he is confidenr ''the punishment of the accused will be a mark to put an end to the violence of the region.''

Arson forest fires destroyed an area the size of Britain, or about 600,000 square miles, of Amazon rain forest in 1989, according to official figures.

Mendes gained national fame fighting to preserve the forest by promoting natural, non-destructive uses of the Amazon, such as rubber- tapping.

#90344u1201 12/10/1990 ~United Press International
BAY CITY, MICH. (DEC. 10) UPI - A 19-year-old man who allegedly stole Greyhound bus and then repeatedly rammed it into a restaurant where he worked as a cook faces felony charges of malicious destruction, motor vehicle theft and resisting arrest.

Police said they had not determined the motive for the bizarre incident, which occurred early Sunday morning while the Brass Lantern Restaurant was closed. It was not immediately known whether the man was intoxicated at the time.

Reports indicate the man, a Bay City resident, stole the bus by breaking one of its windows at about 3 a.m. Sunday. The man allegedly drove the bus three blocks to the Brass Lantern and ramming it.

''One witness said he backed up and rammed the building about 20 times,'' police office Thomas Toth said Monday.

Toth said officers found the suspect hiding in a doorway about two blocks from the restaurant, bleeding from his right hand. He claimed to have been in a fight.

''The guy was real violent. He spit at officers, threatened officers, '' Toth said. The man was restrained in leg irons before he was taken to the Bay County Jail.

Authorities said the bus sustained $10,000 in damages and the building about $15,000.

A man reached at the Brass Lantern Monday, asked to describe the scene, would only say the building was ''all patched over.''

#90344u1202 12/10/1990 ~United Press International
MADRID, SPAIN (DEC. 10) UPI - Spanish Prime Minister Felipe Gonzalez warned the Basque separatist organisation ETA Monday against attacking the Barcelona 1992 Olympic games and said his government would not bow to terror.

''Such a terror offensive would in no way change the government's determination not to negotiate with the separatists,'' Gonzalez told reporters Monday after a meeting of the Spanish Parliament.

''Government policy is not going to change whatever is on the horizon - the Olympic games or the world exhibition in Seville,'' the Socialist premier said.

He said an ETA car bomb attack Saturday outside a soccer stadium near Barcelona, in which six police officers were killed by a 66-pound explosive, was ''a despicable act.''

''What we have to get across is that government policy is not going to change. The terrorists are deceiving themselves. There are not going to be any political negotiations of any type,'' Gonzalez said.

''If they don't want to take any notice, then now and again we will suffer the knock of terrorism. But they will pay. Those who have done this will pay,'' he added.

Police spokesmen said they feared that ETA had a terrorist squad in place in Barcelona and that the car bomb was the start of a terror campaign directed at the city, which is to host the Summer Olympics in 1992.

The ETA group is fighting for an independent Basque homeland and has been blamed for more than 650 killings in the 20 years the organization has battled the Spanish government

#90344u1204 12/10/1990 ~United Press International
DALLAS (DEC. 10) UPI - Americans can ''stick it to Saddam'' with a voodoo doll that looks like the Iraqi president.

Advertising executive Madelyn Miller came up with the Saddam Hussein Voodoo and says it is becoming a hot item with holiday shoppers.

''I was really just sitting around with some friends talking about how frustrating all of this is,'' Miller said of the Persian Gulf crisis. ''It's so far away and there's nothing you can do about it.''

As a means to work off some of the anger, Miller came up with the Saddam doll

for $10.

''Stick it to Saddam,'' the label reads. ''Stick him in the head and puncture his plans. Puncture his stomach - but beware, it's full of poison gas. Jab Saddam in the legs and bring him to his knees. Don't waste time stabbing Saddam's heart, he has none.''

Miller had a friend with artistic talent draw the Iraqi president in his military fatigues. The image was silk-screened on cloth and the cloth doll stuffed with polyester.

So far, 5,000 dolls have been produced and are on sale at a few stores in Texas and Oklahoma and at one national video store chain. Miller's distributor is negotiating with national chain stores and talking about shpping 30,000 dolls by Christmas.

Susan Frensley, co-manager of one Dallas outlet, said her store had sold about 150 dolls in the past month.

''They're hot,'' she said. ''People are sending them all over the country. They're sending it to the troops in Saudi Arabia.''

Reaction at one suburban Dallas store, however, was so negative the manager had to remove them from the shelves. People complained that the dolls promoted witchcraft and violence, the manager said.

#90344u1212 12/10/1990 ~United Press International

ATHENS, Greece (DEC. 10) UPI - Three people were killed and four wounded in two weekend attacks by Kurdish separatist guerrillas in southeastern Turkey, officials said Monday.

One attack occurred late Sunday in a house in Akarsu, a village near Mardin, 475 miles southeast of Ankara. Kurdish guerrillas shot and killed three members of a single family before slipping away under cover of darkness, provincial officials said.

The victims were identified as Selim Elmas, his wife and teenage daughter. Officials said leftwing Kurds have been known to single out people who cooperate with authorities against rebels in the region.

The second attack, also on Sunday, occurred near Sirnak, 560 miles southeast of Ankara, where a bomb believed to have been planted by left- wing Kurdish guerrillas wounded four people, including three policemen and one passerby.

One policeman was said to be in a critical condition. The provincial authorities gave no further details.

Left-wing Kurds, led by the Marxist-Leninist Kurdish Workers Party, have been active in southeastern Turkey since August 1984 when they swore to set up an independent Kurdish state on Turkish soil.

The government in Ankara has since boosted its forces in the area, which borders Iran, Iraq and Syria.

#90344u1223 12/10/1990 ~United Press International

LONDON (DEC. 10) UPI - Stock prices closed slightly lower in thin trading Monday on the London International Stock Exchange in the wake of last week's collapse of the global GATT trade talks.

Stocks also eased slightly in Frankfurt.

London's blue-chip Financial Times 100-stock index, which added 5.9 points Friday, slipped 0.9 points to 2,182.5. The narrower top 30 industrial average eased 2.3 points to 1,721.5.

Volume amounted to around 317 million shares well below the 525 million shares changing hands Friday.

The effective collapse of world trade talks last week in Brussels meant the world economy faced the threat of trade wars and deepening recession, analysts said.

Analysts noting the featureless trading said professional investors were unwilling to commit funds ahead of Tuesday's disclosure of the share-allocation in newly privatized British electricity companies.

Kleinworth Benson Ltd., bankers to the government, announced after the market closed the privatization of 12 regional electric companies was 10.7 times overscribed by the general public, triggering a ''clawback on share allocations to both foreign investors and domestic institutions.''

According to a statement issued by the banking group, ''12.75 million applications from individual investors were received,'' the highest ''eived,'' the higheston

The offering covered a total 2.16 billion shares in the 12 electric companies for an aggregate value of around $9.85 billion.

Terms of the clawback will boost the percentage of the shares available to the general public to 54.6 percent from the minimum of 34.4 percent that was set initially, the bank said.

The 12 companies scheduled to begin trading on Tuesday include, Eastern Electricity, Manweb, Midland Electricity, Northern Eklectric, Norweb, Seeboard Southern Electric, South Wales Electricity, South Western Electricity and Yorkshire Electricity.

Meanwhile on the local news front, two key economic reports, retail sales and producer prices had little impact on investors.

Britain's retail sales volume fell a provisional 0.5 percent in November from October and was down 0.8 percent from November 1989, according to the Central Statistical Office.

Market forecasters were expecting November sales to slip 0.2 percent from October.

The government agency also reported producer output prices, or prices of manufactured goods, rose 0.2 percent in November from October, while producer input prices, or prices of raw materials and fuels purchased by manufacturing industry, fell an unadjusted 0.2 percent in November.

On the trading floor, among the most widely traded stocks, Berisford International, the foods conglomerate, plunged 10 cents to 43 cents a share after reporting a pretax loss of around $188.3 million for the year ending September 30.

Associated British Foods surged 46 cents to $8, after purchasing Berisford International's British Sugar company.

Brewers Scottish and Newcastle added 10 cents to $7.07 on its favorable annual profits report and planned expansion.

Pharmaceutical company Wellcome PLC gained 16 cents to $8.26 amid a buy recommendation from James Capel and Barclays de Zoete Wedd.

Oil shares were slightly lower with peace prospects growing in the Persian Gulf. British Petroleum slipped 6 cents to $6.23 and and London Scottish & marine Oil shed 12 cents to $7.53.

In Frankfurt, stock prices on the Frankfurt Stock Exchange closed slightly lower in light trading.

The closely watched German Stock Index, which gained 8.17 points Friday, eased 8.04 points to 1,504.80.

WASHINGTON (DEC. 10) UPI - President Bush will seek a major overhaul of the

nation's banking laws when Congress reconvenes next month and will make it a ''top priority'' of his new legislative agenda, a spokesman said Monday.

White House press secretary Marlin Fitzwater confirmed a published report that Bush plans to propose reforms of what Fitzwater called the ''weak'' U.S. banking system.

''We hope to have proposals in January to reform the banking system,'' he said adding the administration is ''looking into'' various recommendations.

''We've been concerned about the credit crunch,'' in which banks have tightened up their standards for making loans, Fitzwater said.

Last week, White House chief of staff John Sununu said the administration would propose ''fine tuning'' the banking laws, but it appeared that there would be a much larger effort to revamp the system, from top to bottom, with the Treasury Department expected to work up a set of recommendations for the president.

Under proposals now being drafted, according to a Washington Post report, the laws that have governed U.S. banks - including the amount of their reserves - as well as savings and loans, brokerage houses and insurance companies for the last half a century would have to be rewritten.

Some of the regulations would be dropped and some would be strengthened under the plan under consideration.

One of the proposals would impose new limits on federal deposit insurance that would return the program to its original purpose: protecting small savers.

The Post said that Depression-era barriers erected between banking and other businesses established after the 1929 stock market crash would be removed. Banks would be allowed to act as brokers in stock transactions, sell insurance and underwrite bonds.

In addition, the newspapper said that state lines would no longer be a barrier to banks and that banks would be allowed to buy other banks and to open branches anywhere. The Post said the easing of such restraints could lead to the creation of the first nationwide banks.

The Post said that the Treasury had decided to go beyond its original mandate and ''to link deposit insurance changes to a sweeping overhaul of the financial industry.''

The newspaper also said that experts agree the banking system today is the weakest it has been since the Great Depression.

William Seidman, the Federal Department Insurance Corp.'s chairman, has

indicated growing concern over the depleting of the FDIC's insurance fund. The Post said that the banking industry is not as in bad shape as savings and loan institutions were when they began collapsing.

Whether Congress is ready to go along with the revisions is open to question. The lawmakers are not likely to want to tamper with the $100, 000 insurance coverage set for depositors' accounts.

#90344u1255 12/10/1990 ~United Press International

(DEC. 10) UPI - A U-S chartered Boeing 747 is to set down this afternoon at Andrews Air Force Base in Maryland with the latest group of Americans to get out of Iraq. The freedom flight stopped earlier in Frankfurt, Germany, on a journey from Baghdad. A second U-S charter is to leave Baghdad tomorrow but White House news secretary Marlin Fitzwater says that even after it arrives, other Americans are expected to still be trapped in either Kuwait or Iraq.

In Paris, defense ministry sources say France will increase its contingent in Saudi Arabia by at least one-thousand men by January 15th. The sources the government also will send more heavy tanks and some additional warplanes. They say the move is aimed at beefing up the artillery fire, tank and air power facing Iraqi forces. France has some 55-hundred troops already in place in Saudi Arabia.

What was to be a 10-day shuttle mission is ending a little early on orders from Houston. NASA controllers are uncomfortable with reports of increasing winds over the Edwards Air Force Base landing site in California and they are ordering Columbia and its crew in one day early . The unusual nighttime landing will end a mission beset with a number of problems. But the crew members did manage to accomplish at least 80 percent of their set goals to study X-ray and ultraviolet light emissions that are blocked from view by Earth's atmosphere.

The Supreme Court has reversed an earlier court ruling and the nation's highest court now says unions and their members still have the right to a court hearing if contract-approved grievance procedures doN'T work. The court ruled against an earlier decision that indicated the only avenue open to a union was to strike if it did NOT get satisfaction from grievance procedures set out in its contract.

A reduced 250 member Central Committee of the Soviet Communist Party met in Moscow today without the usual fanfare that such a meeting once brought. But there were still fireworks observed. Some came from Soviet President Mikhail Gorbachev as he warned against ''diehard militant nationalism'' that threatens to tear the Soviet Union apart. The official Tass news agency reported that Gorbachev urged endorsement of a new union treaty to replace the 1922 version that created a unified country. He said the new version will provide the

foundation to change to a market economy.

In Oslo, Norway, the Soviet Deputy Foreign Minister today accepted the Nobel Peace Prize on behalf of Soviet President Gorbachev, who couldn't make the ceremony because he was too busy at home dealing with domestic crises. Gorbachev was awarded the prestigious prize by the Norwegian Nobel Committee for his crucial role in dismantling communist regimes in Eastern Europe, and for helping to end the Cold War.

#90344u1258 12/10/1990 ~United Press International

NEW DELHI (DEC. 10) UPI - A Hindu militant party Monday closed shops and businesses in the southern city of Hyderabad where Hindus and Moslems clashed for a fourth day that left five people dead, raising the number of people killed to more than 75.

Tension remain high with authorities expanding curfews to new areas and soldiers patrolling on foot and vehicles, state-run television and the Press Trust of India news agency said.

Residents reached by telephone from New Delhi said shops and businesses remained closed in Hyderabad and there were few vehicles on roads in response to a strike called by the militant Hindu Bharatiya Janata Party.

The Hindu party called the one-day strike to protest the killing of the people.

Violence again erupted in the Moslem-dominated old sections of Hyderabad with groups of Hindus and Moslems defying a curfew and attacking homes and shops, residents and police said.

They said groups dispersed before soldiers could reach the scene.

Police said five bodies were recovered overnight and at least five people were killed on a fourth day of communal clashes Monday in Hyderabad, raising the death toll in the city 800 miles south of New Delhi to more than 75.

Most of the dead were victims of stabbings and police firing.

Another 40 people died and an unspecified number people were wounded in the Hindu-Moslem clashes over the past four days in the northern Uttar Pradesh town of Aligarh, the Press Trust of India news agency said.

It said fresh violence broke out in several areas of Aligarh following the publication of a news report Monday that a group of people entered the Jawaharlal Nehru Medical college and killed some patients.

The news agency quoted authorities as denying the news report as baseless.

Authorities enforced a curfew across the town.

In Hyderabad, authorities took into custody several legislators of the Andhra Pradesh state assembly and city corporators, the Press Trust of India news agency said.

Steel-helmeted soldiers atop military vehicles patrolled the deserted streets, said residents.

Groups of Hindus and Moslems have been attacking each other's homes and shops, looting valuables and setting homes ablaze.

The violence occurred as hundreds of Hindu militant activists pressed ahead with their campaign to relocate a 16th century mosque and build in its place a temple for a key Hindu god in the Hindu town holy of Ayodhya in northern Uttar Pradesh state.

Hundreds of Hindu volunteers since Thursday defied a government ban on religious processions and offered themselves for arrest in Ayodhya.

Hindu militants claim that a Moslem emperor 470 years ago demolished a temple and built a mosque in its place. Moslem religious groups, however, say there was never a temple on the site.

The dispute led to communal violence across the country in October and caused the collapse of the government of Prime Minister V.P. Singh. The Bharatiya Janata Party withdrew its parliamentary support to Singh's government when its president, L.K. Advani, was arrested and stopped from pressing ahead with his campaign for the temple construction.

Prime Minister Chandra Shekhar has vowed to find a peaceful solution to the shrine dispute.

#90344u1277 12/10/1990 ~United Press International

VIENNA (DEC. 10) UPI - OPEC oil ministers began arriving in Vienna Monday for a year-end meeting at which they were expected to withhold decisions on oil production quotas and prices until the Persian Gulf crisis is resolved.

As the ministers gathered in the Austrian capital, officials of the Organization of Petroleum Exporting Countries said the 13-member cartel was likely to extend a suspension of oil quotas and price caps until the situation in the Middle East returns to normal.

The ministers, who last met in Vienna Aug. 26 through Aug. 29, suspended a 24.5 million barrel-a-day production ceiling for the second half of 1990, allowing individual members to make up the 4.2 million barrels a day lost

after the United Nations imposed an embargo on Iraqi and Kuwaiti oil.

Iraq invaded Kuwait Aug. 2.

''We have every expectation that the suspension will simply be extended at the annual ministerial (meeting),'' an OPEC official said. ''There is basically no alternative to such an outcome.''

With the field of action limited for the moment, some OPEC ministers have begun to consider the possibility of a sharp drop in oil prices if Iraq is forced to withdraw from Kuwait and oil production from both OPEC nations returns to the world market.

Apparently reflecting this worry, Iranian Petroleum Minister Gholamreza Aghazadeh told a news conference in Teheran Monday that maintaining oil prices next year will be one of the main topics at the Vienna meeting.

He said the ministers will discuss the gulf situation in private and work to defend the ''unity and integrity'' of the organization, which has been badly damaged by the crisis.

Most of the oil shortfall caused by the U.N. embargo has been made up by Saudi Arabia, which was estimated to have pumped 7.9 million barrels a day in November, just 300,000 barrels a day more than in October. Saudi output is sharply higher than the 5.6 million barrel-a-day quota the kingdom was assigned by OPEC in July.

The increased production from Saudi Arabia and Iran, which pumped 3.3 million barrels a day last month, raised estimated OPEC output in November to 22.9 million barrels a day, its highest level since May, according to the Paris-based International Energy Agency.

In Vienna OPEC ministers will find a dramatically different situation from the one they faced in May, when they held an emergency meeting in Geneva in an effort to curb production and increase prices, hovering at the time at about $18 a barrel.

When they gathered again in July for their regular mid-year session, the price of a barrel had risen to $21, and the ministers set an overall production ceiling of 22.5 million barrels a day in the hope of supporting that price level.

But since Iraq invaded Kuwait, the price of a barrel of oil has gone as high as $40, with prices dropping back to under $30 a barrel after the U.N. Security Council set a Jan. 15 deadline for Iraq to evacuate Kuwait and Iraqi President Saddam Hussein decided to release all foreign hostages.

''I'm not expecting much at the meeting,'' John Lichtblau, president of

Petroleum Industry Research Foundation, said in New York. ''OPEC isn't functioning, the meeting can't decide anything.

''I think the only reason they're holding the meeting is to show OPEC is still alive,'' he added.

OPEC officials said they expected all 13 oil ministers to attend, including those from Iraq and Kuwait. They pointed out that both Iraq and Iran were present at all cartel meetings during their eight-year war.

''OPEC recognizes 13 members,'' a cartel official said. ''But we do not expect a long meeting.''

The OPEC gathering comes after a weekend meeting in Mexico City at which non-OPEC oil producers vowed to step up cooperation with the cartel in an effort to stabilize the world oil market.

OPEC Secretary-General Subroto, who attended the meeting as an observer, said a meeting between OPEC and non-OPEC producers was possible. He said OPEC alone cannot stabilize world oil prices, particularly since non-OPEC producers pump more oil than the cartel.

#90344u1285 12/10/1990 ~United Press International

CHICAGO (DEC. 10) UPI - Jurors in the racketeering and fraud trial of 10 Chicago Board of Trade soybean traders began deliberations Monday after listening to more than three months of testimony.

Deliberations in the complicated case were expected to be lengthy.

The defendants face charges ranging from violation of commodities trading rules, to mail fraud, conspiracy and racketeering. They are among 48 people indicted as a result of FBI undercover investigations at the CBOT and the Chicago Mercantile Exchange, the world's largest and second-largest futures exchanges.

The government contends brokers, who trade on behalf of customers, recruited so-called local traders in the CBOT soybean pit to absorb losses from mistakes made while executing customers' orders.

Brokers are personally accountable for those losses, but prosecutors said the locals - who trade mostly for their own personal accounts - were recruited to eat the losses. They allegedly were repaid by the brokers in the form of profitable prearranged trades at off-market prices - trades that came at the expense of clients.

Defense lawyers argued that the defendants engaged in standard, legal

practices that helped them handle the high volume of orders that come during volatile periods in the market and that no one was hurt by the alleged trading irregularities. They said customers bought at the prices they specified and sold at the prices specified.

But prosecutors noted the law requires brokers to get customers the best possible price when executing orders - and that the price specified in orders is not necessarily the best price.

''I submit to you, ladies and gentlemen, that concealing that you can't do your job properly, when the customer pays for that job, is fraud,'' Assistant U.S. Attorney Ira Raphaelson told jurors in his final rebuttal Friday.

Raphaelson also said pre-arranged trades denied traders in the pit - and their customers - market opportunities and potential profits.

''One order could have moved the market, we don't know how much,'' Raphaelson said.

The defendants, all of whom live in the Chicago area, are:

-Bradley Ashman, 29, charged with racketeering and and violating the Commodities Exchange Act.

-William Barcal III, 36, charged with mail fraud and and violating the Commodities Exchange Act.

-Charles Bergstrom, 43, charged with racketeering, racketeering conspiracy, mail fraud, wire fraud and and violating the Commodities Exchange Act.

-Edward Cox III, 29, charged with racketeering conspiracy, mail fraud, wire fraud and and violating the Commodities Exchange Act.

-Martin J. Dempsey, 53, charged with racketeering conspiracy, mail fraud, wire fraud and and violating the Commodities Exchange Act.

-Joel J. Fetchenhier, 50, charged with racketeering conspiracy, mail fraud, wire fraud and and violating the Commodities Exchange Act.

-Thomas P. Kenney, 36, charged with racketeering conspiracy, mail fraud, wire fraud and commodities fraud.

-John Ryan, 50, charged with mail fraud, wire fraud and violating the Commodities Exchange Act.

-Sheldon Schneider, 47, charged with racketeering, mail fraud and violating the Commodities Exchange Act.

-John A. Vercillio, 45, charged with racketeering conspiracy, mail fraud and violating the Commodities Exchange Act.

The trial before U.S. District Judge George Marovich is the second resulting from the FBI probes. A third trial involving CME yen traders began its fourth month Monday.

If the first trial is any indication, deliberations could take a while. Thattrial involved three CME Swiss franc traders and ended in July when, after 11 days of deliberations, jurors delivered a partial verdict and said they were hopelessly deadlocked on the remaining charges.

Two defendants were found guilty on lesser commodity fraud counts, but most of the more serious charges - including mail fraud and racketeering - were left undecided. All three defendants will be retried next year on the remaining counts.

#90344u1326 12/10/1990 ~United Press International

NEW YORK (DEC. 10) UPI - The 1990 United Press International All-America college football team, listing position, name, school, height, weight, class and hometown:

First Team

Offense

Wide receivers - Raghib Ismail, Notre Dame, 5-10, 175, junior, Wilkes-Barre, Pa.; Herman Moore, Virginia, 6-5, 197, junior, Danville, Va.

Tight end - Chris Smith, Brigham Young, 6- 4, 230, senior, La Canada, Calif.

Linemen - Antone Davis, Tennessee, 6-4, 310, senior, Fort Valley, Ga.; John Flannery, Syracuse, 6-4, 301, senior, Pottsville, Pa.; Joe Garten, Colorado, 6-3, 280, senior, Placentia, Calif.; Ed King, Auburn, 6-4, 284, junior, Phenix City, Ala.; Stacy Long, Clemson, 6-2, 275, senior, Griffin, Ga.

Quarterback - Ty Detmer, Brigham Young, 6-0, 175, junior, San Antonio.

Running backs - Eric Bieniemy, Colorado, 5-7, 195, senior, West Covina, Calif.; Darren Lewis, Texas A&M, 6-0, 220, senior, Dallas.

Kicker - Philip Doyle, Alabama, 6-1, 190, senior, Birmingham, Ala.

Defense

Linemen - Moe Gardner, Illinois, 6-2, 250, senior, Indianapolis; Russell Maryland, Miami, 6-2, 273, senior, Chicago; David Rocker, Auburn, 6-4, 264, senior, Atlanta; Chris Zorich, Notre Dame, 6-1, 266, senior, Chicago.

Linebackers - Maurice Crum, Miami, 6-0, 222, senior, Tampa, Fla.; Michael Stonebreaker, Notre Dame, 6-1, 228, senior, River Ridge, La.; Alfred Williams, Colorado, 6-6, 236, senior, Houston.

Defensive backs - Darryl Lewis, Arizona, 5- 9, 186, senior, West Covina, Calif.; Todd Lyght, Notre Dame, 6-1, 184, senior, Flint, Mich.; Ken Swilling, Georgia Tech, 6-3, 230, junior, Toccoa, Ga.; Tripp Welborne, Michigan, 6-1, 201, senior, Greensboro, N.C.

Punter - Brian Greenfield, Pittsburgh, 6-1, 170, senior, Sherman Oaks, Calif.

Second Team
Offense

Wide receivers - Lawrence Dawsey, Florida State, 6-1, 195, senior, Dothan, Ala.; Manny Hazard, Houston, 5-9, 172, senior, Daly, Calif.

Tight end - Kirk Kirkpatrick, Florida, 6-2, 223, senior, Valrico, Fla.

Linemen - Dean Dingman, Michigan, 6-2, 292, senior, East Troy, Wis.; Mike Heldt, Notre Dame, 6-4, 267, senior, Tampa, Fla.; Eric Moten, Michigan State, 6-3, 285, senior, Cleveland; Greg Skrepenak, Michigan, 6-6, 320, junior, Wilkes-Barre, Pa.; Mike Sullivan, Miami, 6-4, 272, senior, Chicago.

Quarterback - Shawn Moore, Virginia, 6-2, 210, senior, Martinsville, Va.

Running backs - Greg Lewis, Washington, 5-11, 202, senior, Seattle; Mike Mayweather, Army, 5-8, 184, senior, St. Louis.

Kicker - Chris Gardocki, Clemson, 6-2, 193, junior, Stone Mountain, Ga.
Defense

Linemen - Mitch Donahue, Wyoming, 6-3, 260, senior, Billings, Mont.; Huey Richardson, Florida, 6-5, 244, senior,
Atlanta; Kenny Walker, Nebraska, 6-4, 240; senior, Crane, Texas.

Linebackers - Darrick Brownlow, Illinois, 5-10, 233, senior, Indianapolis; Mike Croel, Nebraska, 6-3, 225, senior, Sudbury, Mass.; Levon Kirkland, Clemson, 6-2, 230, junior, Lamar, S.C.; Scott Ross, Southern Cal, 6-2, 235, senior, El Toro, Calif.

Defensive backs - Jesse Campbell, North Carolina State, 6-3, 210, junior, Vanceboro, N.C.; Richard Fain, Florida, 5-11, 186, senior, North Fort Myers, Fla.; Eric Turner, UCLA, 6-1, 207, senior, Ventura, Calif.; Will White, Florida, 6-1, 204, sophomore, Tallahassee, Fla.

Punter - Cris Shale, Bowling Green, 6-0, 190, senior, Beavercreek, Ohio.

#90344u1338 12/10/1990 ~United Press International
(DEC. 10) UPI - Environmental factors besides cigarette smoking may be playing a significant role in boosting cancer rates in industrial nations to an all-time high, a new report suggested Monday.

A greater percentage of people appear to be developing cancer and dying from the disease in developed countries than ever before, concluded a 345-page study released by The New York Academy of Sciences.

Cancer currently causes about 2.3 million of the 11 million deaths reported annually in industrial nations. About one in four deaths in the developed world are due to cancer today, compared with about one in five deaths in 1968, said Devra Lee Davis, co-editor of the report comprised of studies by 24 researchers from 11 nations.

Smoking remains the largest single, preventable cause of cancer in developed nations, accounting for about 30 percent to 40 percent of cancer deaths, primarily from lung cancer, Davis said.

However, even when lung cancer is excluded, deaths from all other types of cancer have risen about 9 percent in men since 1950, Davis said. The cancer death rate also went up among women, but the increase was not as great and a few nations like France even reported a decrease, she said.

An Italian study found cancer was to blame for nearly 40 percent of deaths among people under age 70 in that nation's heavily industrialized Bologna region, and cancer deaths have steadily increased in the area over the past three years.

''It is very important that as we continue our efforts against smoking ... we ask what other causes of cancer there are so we can figure out how to prevent those cancers,'' said Davis, who is an epidemiologist and toxicologist with the National Academy of Sciences in Washington.

Among the cancers that have been on the rise, particularly among older people, are breast cancer, brain cancer, a cancer of the blood called multiple myeloma a skin cancer called melanoma, non-Hodgkin's lymphoma and kidney cancer.

''The question has to be asked 'What could be causing these increases?''' Davis said. ''The fact these cancers are increasing simultaneously throughout the industrial world, in both men and women, suggests it would be foolish not to look for their causes.''

In his study, Alan Lopez of the World Health Organization said longer life

expectancies, improved diagnosis and better record keeping may be partly responsible for the growing number of cancer deaths.

But Lopez added: ''It is quite probable that the increase in death rates largely reflects a real increase in cancer risk.''

In the report, Bernard Goldstein of the Robert Wood Johnson Medical School in Rutgers, N.J. argues that exposure to low levels of benzene, a chemical found in gasoline and industrial solents, elevates the risk of contracting blood cancers like multiple myeloma.

A mathematical analysis of lung cancer among non-smokers in the United States, Japan and Italy found the rate has risen over the past 30 years, and aU.S. women who does not smoke currently faces a greater lung cancer risk than her smoking counterpart in 1955. However, American Cancer Society researchers attacked that conclusion, reporting in another chapter that their data showed no increase of lung cancer among non-smokers.

Davis emphasized that the search for possible cancer-causing factors in the environment should not focus only on chemicals. ''It could include aspects of modern transportation, modern lighting, and it certainly could prove to be very complicated,'' she said.

To underscore the need to step up efforts to pinpoint non-smoking carcinogens, Davis noted that researchers wasted precious time by attributing the rise in lung cancer in the 1940s to better diagnosis rather than the real cause - increased smoking.

John Bailar of McGill University in Montreal agreed that new strategies are needed to combat cancer.

''Taken together, these sets of trends indicate that the worldwide effort to control cancer has failed to attain its primary objective - substantial reduction of the overall cancer death rate,'' said Bailar, who urges an emphasis on cancer prevention rather than treatment.

#90344u1340 12/10/1990 ~United Press International

BEIJING (DEC. 10) UPI - A Chinese man studying in Texas returned to his homeland Monday to demand an ''open and fair'' trial for a leading dissident accused of plotting to overthrow the communist government.

Ge Xun, 31, said he was not afraid to risk arrest for standing up for the jailed dissident and went so far as to demand that the hardline government protect his own freedom of expression.

''What I'm going to do will be perfectly legal,'' said Ge, a doctoral

candidate in physics at Texas A&M University in College Station, Texas.

''My friend Wang Juntao is going to be tried,'' Ge told reporters upon arriving at Beijing's Capital Airport. ''I want to listen to the court and be witness to the fairness of the court.''

Wang, a 32-year-old editor and jailed dissident, faces trial on serious political charges of counterrevolution and sedition for his participation in the 1989 Tiananmen Spring democracy movement.

Chinese authorities singled out Wang as a mastermind of the massive 1989 protests, officially branded a ''counterrevolutionary rebellion.'' There has been no word as to the date of Wang's trial or whether it would be open to the public.

Ge, who has studied in Texas for four years and intends to return to finish his degree, contacted western news agencies in the United States to inform them of his mission on behalf of Wang, who he said he met in 1982.

But no sooner had Ge begun to speak to reporters at the Beijing airport than a Chinese man who appeared to be Ge's friend began dragging him away.

''Let's go, let's go,'' the man cried hysterically, at one point putting his hand over Ge's mouth to prevent him from speaking.

As a puzzled crowd gathered, the man pulled Ge out of the terminal and into a taxicab.

The bespectacled Ge appeared overwhelmed by the crush of people but said he felt there ''probably'' was a real possibility he could be arrested for his outspokenness.

''But I'm not really afraid of that,'' Ge told reporters in English as onlookers jostled for a glimpse.

Ge's wife, Lu Jin, contacted by telephone in Texas, said Ge came to Beijing bearing a letter written on his behalf by U.S. Rep. Joe Barton, R-Texas. The letter requests Chinese authorities to guarantee Ge's safety in Beijing and his return to the United States in February.

Lu said she supports her husband's move but is concerned about his whereabouts.

''He was supposed to call immediately (upon arrival) but he hasn't,'' Lu said several hours after her husband's arrival in China.

Ge prepared a statement before his departure declaring the purpose of his mission and requesting fair treatment.

''Based on my observation, I believe Mr. Wang and others are innocent,'' Ge wrote on Dec. 7. ''Their behavior did not violate current law in mainland China.''

The defiant scholar called for ''open and fair'' trials for Wang and other dissidents, describing himself as a Chinese citizen and concerned observer eager to exercise his right to speak out.

''I reserve my right to express my opinion about the court procedure and the fairness of the trial,'' Ge wrote.

''I request the related department of the Chinese government to respect my rights as a Chinese citizen and protect my freedom of travel and freedom of expression.''

#90344u1359 12/10/1990 ~United Press International

WASHINGTON (DEC. 10) UPI - Yields fell on 13-week and 26-week T-bills Monday at the government's weekly auction.

The Treasury Department auctioned $10.09 billion of 13-week bills at an average discount of 6.86 percent, down from 7.06 percent last week and the lowest since July 18, 1988, when the auction yielded 6.76 percent.

The Treasury also sold $10.01 billion of 26-week bills at an average of 6.74 percent, down from 6.96 percent last week and the lowest since July 5, 1988, when the yield stood at 6.71 percent.

The investment rate was 7.08 percent on the 13-week bills at an average price of $9,826.60 per $10,000 face value. The rate on the 26-week bill was 7.07 percent at $9,659.30.

#90344u1373 12/10/1990 ~United Press International

HOUSTON (DEC. 10) UPI - Secretary of State James Baker and Soviet Foreign Minister Eduard Shevardnadze met Monday in the first of five planned sessions to discuss the Persian Gulf crisis, humanitarian aid for the Soviet Union and possible dates for a superpower summit.

The two days of talks primarily are aimed at setting the groundwork for an arms pact to be signed next year by President Bush and Soviet President Mikhail Gorbachev.

But Baker and Shevardnadze also were expected to discuss the Persian Gulf crisis, possible aid to the Soviets and other issues.

Speaking with reporters before the meeting, Shevardnadze said humanitarian aid for his economically struggling nation would be discussed.

''We would appreciate it, probably some food supplies. That is the most key problem and, of course, efficient economic operations,'' Shevardnadze said through an interpreter.

Baker said Bush has been considering food and medical aid to the Soviets.

''He (Bush) also has expressed an interest, and indeed a willingness, to be of assistance to the Soviet Union as they make this transition from one (economic) system to another,'' Baker said. ''It's a transition that's not simple. It's indeed quite difficult. It's something that hasn't been done before.

''I know the president will be very forthcoming in assistance and trying to help.''

But Baker noted legal restrictions dating back to just after World War II limit economic aid the United States can provide to the Soviets.

Monday's opening meeting was to be followed by a tour of Johnson Space Center. A decision by NASA to bring the shuttle Columbia home Monday night apparently ended plans for a telephone hookup between the two leaders and the astronauts.

At the White House Monday, Bush signed measures to implement treaties between the United States and the Soviet Union to limit underground nuclear weapons tests.

Bush expressed hope that the action will ''lead to even more important advances in arms control and the preservation of world peace and security.''

Bush and Gorbachev signed the treaties at their summit in Washington last spring, and Baker and Shevardnadze are to exchange the so-called instruments of ratification Tuesday, thus putting the pacts into effect.

A second face-to-face meeting between Baker and Shevardnadze was planned Monday afternoon, with three meetings scheduled Tuesday. Baker and Shevardnadze were expected to fly to Washington Wednesday for an afternoon meeting with Bush.

''We have a lot of work ahead of us,'' Shevardnadze said Sunday. ''We have to discuss the Persian Gulf situation and to seek ways for a peaceful settlement of this most acute conflict in our time.

''In this city, which was the birthplace of U.S.-Soviet cooperation in space, I hope we shall further solidify our cooperation on Earth.''

If Baker and Shevardnadze agree on the arms treaty, which would reduce U.S. and Soviet long-range nuclear bombers, missiles and submarines, a date for the next superpower summit could be announced.

But high-level diplomacy to get Iraq to leave Kuwait, including a possible Baker trip to Baghdad in January, has made the proposed January date for the next Gorbachev-Bush meeting in Moscow unlikely.

Iraq told the United States Saturday it wants Iraqi Foreign Minister Tariq Aziz to travel to Washington to meet Bush Dec. 17, and Baker to meet with Iraqi President Saddam Hussein in Baghdad Jan. 12 - three days before a U.N.-imposed Jan. 15 deadline for Iraq to leave Kuwait or face the possibility of removal by force.

White House press secretary Marlin Fitzwater said the administration rejected the Jan. 12 date, and that it wants Baker and Saddam to meet in late December or early January. The United States has recommended Baker and Saddam get together Dec. 20, Dec. 21, Dec. 22, or Jan. 3.

#90344u1378 12/10/1990 ~United Press International

NEW YORK (DEC. 10) UPI - The top analysts of No. 1 U.S. brokerage firm Merrill Lynch & Co. asserted Monday that the economy is in a recession which will bottom out in the middle of 1991 before shifting into a relatively slow recovery.

"In our view the recession we are in will continue through the first half of 1991," Merrill Lynch economist Bruce Steinberg said at the Wall Street firm's annual economic and investment outlook press briefing.

Assuming the recession started in late summer, Steinberg said, "it will last roughly a year - about average for a recession." He said Federal Reserve moves to bring down interest rates are the key to the recovery.

But because of high levels of consumer debt and distress in the U.S. banking system, the economist said, there is likely to be "a more muted recovery than you'd normally see at the end of a recession." Pressed on whether some unpleasant surprises might loom, he added, "I just don't see this turning into a cataclysmic recession right now."

The Merrill Lynch forecast saw a steep decline in the current quarter, with a contraction of three percent in the U.S. gross national product, moderating in the first quarter of 1991 to a negative 1.6 percent GNP change.

But by the second quarter of 1991 growth was expected to be modestly positive with a 0.4 percent GNP expansion, rising to GNP gains of 2.2 percent and 2.7 percent in the third and fourth quarters, respectively.

Merrill Lynch chief market analyst Robert Farrell said he believes the stock market "has had its first step down" to a plateau. But, he cautioned, "there is another step down .. before we have a final bottom."

He called the October 1987 stock market crash a "set-up" which was severe but short with few lasting effects on portfolios and the real economy. The current decline, Farrell said, goes much deeper and will last longer. This means we will "probably stretch the corrective process out into 1991 and not start another bull market until the end of 1991."

He said investors looking to catch that market in late 1991 should by then be about half in government securities and half in growth stocks. They must look for companies with "growth niches" in a mainly sluggish market.

When the recovery has begun, Farrell said, the emphasis will be on investing in the real economy - he gave construction engineering and oil services as two likely winners - vs. financial assets and real estate in the 1980s.

Chief investment strategist Charles Clough said that the driving force of the economic scene in the months ahead will be debt. For consumers and companies alike, he said, "the great postwar debt expansion is unwinding."

The squeeze already seen on financial and legal professionals, as well as the media, and become even more broadly based as indebted companies are forced to cut back. "Leverage will continue to be a killer," he said.

All this will mean, for companies, a shortage of income and growth, so shrewd investors should lock in solid returns by buying high-quality bonds with long maturities, and dividend-paying utility stocks. Technology, engineering, heavy construction and oil stocks will be the best bets, he said.

Bond strategist Thomas Sowanick said investors' focus should be on safety and steady, incremental gains. As the Fed eases interest rates, investors should move into intermediate-term maturities to lock in higher rates.

Mortgage-backed securities have outperformed U.S. Treasury bonds so far this year, Sowanick said. Such issues, backed by the government, will continue to do well in 1991, he predicted. Investors may also want to hold some high-quality, long-date municipal bonds offering higher yields.

Chief international equity strategist Thomas Robinson said that with the U.S. dollar likely to weaken further in 1991 - to as low as 1.35 German marks and 110 Japanese yen - the main opportunity for U.S. investors is overseas, where foreign exchange gains bolster income and capital gains.

Robinson said his favorite foreign markets for stock investments are France, Great Britain, and Spain, which he called "strong valuation stories." Japanese

stocks, though more fairly priced now, offer little advantage, he said.

#90344u1379 12/10/1990 ~United Press International

(DEC. 10) UPI - 156 former American hostages in Iraq began the final leg of their freedom flight today. A U-S-chartered Pam Am 747 carrying the hostages left Frankfurt, Germany, today and is to arrived at Andrews Air Force Base outside Washington this afternoon. The Americans are among the first wave of Westerners released under Iraqi President Saddam Hussein's new order.

A British newspaper reports that Saudi Arabia and the exiled Kuwait government are holding secret talks with Iraq. The paper says the talks envisaged granting the Iraqis part of Kuwait after Iraqi troops withdraw. But senior Saudi and Kuwaiti officials deny the report, saying there will be NO bargaining or surrendering of Kuwaiti territory.

Soviet President Gorbachev today warned top-ranking Communists against breaking up the Soviet Union. Addressing a plenum of the party's Central Committee, Gorbachev bitterly attack ''diehard militant nationalism'' that has fueled secessionist drives in several republics. He said the embattled party must provide the glue to keep the country together.

The astronauts aboard the shuttle Columbia are stowing their gear and packing up for an early return home. NASA ordered the shuttle crew members to close out their astronomy mission one day early because of windy weather barreling toward the ship's desert landing site in California. The crew was scheduled to return tomorrow night.

Cosmonaut Toyohiro Akiyama returned safely to Earth today... making history as both the first Japanese and the first journalist in space. Akiyama spent eight days in space, six of of them in orbit aboard the Soviet space station Mir. He and two Soviet cosmonauts landed in a Soyuz T-M-10 space capsule in the Soviet Union.

Advertising executive Madelyn Miller has come up with a way Americans can work off some anger over the Persian Gulf crisis. Miller says Americans can ''stick it'' to Saddam'' Hussein with her voodoo doll that looks just like the Iraqi president. The doll is becoming a hot item with holiday shoppers.

#90344u1402 12/10/1990 ~United Press International

WASHINGTON (DEC. 10) UPI - The American Electronics Association said Monday the nation's electronics industry made major gains this past year in correcting its unbalanced trade with the rest of the world. The AEA said the U.S. electronics trade deficit for 1990 should be about $1.9 billion, down more than 80 percent from the $9.6 billion deficit in 1989.

"Progress made this year in correcting the negative U.S.-world trade balance in technology products and services is a remarkable accomplishment for our industry," said J. Richard Iverson, president and chief executive officer of the group, which represents about 3,500 high technology companies in the United States.

"Much of the improvement was due to a surge in exports by U.S. electronics firms," Iverson said. "I am encouraged that next year the U.S.-world trade balance will be positive for the first time since 1983." But Iverson said the U.S. industry's efforts to penetrate Japanese markets fell "short of being acceptable."

The trade group said the U.S. electronics trade deficit with Japan decreased about ten percent this year to $18.2 billion, down from $20.2 billion in 1989.

"The balance between our imports and exports of electronic products and services with Japan has not improved significantly since 1979," Iverson said.

The AEA said full-year estimates project trade balance improvement in four of six industry categories. The only segments not expected to show improvement are "computers and related products" and "instrumentation products." The group's projections for U.S.-Japan electronics trade show improvement in all categories but "instrumentation."

#90344u1406 12/10/1990 ~United Press International

NEW YORK (DEC. 10) UPI - Mounds of bagged garbage and trash built up Monday on the city's sidewalks as private sanitation workers began a strike marked by violence.

Some 2,100 members of Teamsters Local 813, who pick up 40 percent of the city's trash, walked out late Sunday night after rejecting a new contract offered by approximately 250,000 city businesses, including restaurants, hotels, office buildings, stores, and hospitals.

The metropolitan area's first garbage collection strike in nine years also affects private trash collection in suburban Westchester, Nassau, and Putnam counties. Residential pickups were not affected.

A citywide emergency was avoided in 1981 because freezing weather kept towering piles of garbage from rotting and attracting rats, which reportedly outnumber the city's population. Temperatures soared to the low 50s in the first day of the current strike.

Businesses scurried to find alternative ways to dispose of their garbage, urging tenants by leaflet to cut down on paper use and "double bag" perishable rubbish. Forty operators at the city's Department of Sanitation staffed an emergency phone number to take calls from the public relating to garbage buildups that may present a health hazard.

"We're getting hundreds of calls asking who is going to pick up the trash and how the problem is going to be handled," reported one of the operators, Cathy Moss. "We are sending Police and Fire department inspectors to places that report health problems, hospitals first."

In emergency situations, the city "will arrange garbage pickup on an overtime basis" by its sanitation crews and charge businesses "the same as private carters would," said Jim Hart, a Sanitation Department spokesman. "One of the big problems is that garbage bags break open and there is the possilibilty of attracting vermin."

Police reported that tires on 16 Sanitation Department trucks were slashed at a Manhattan parking lot hours after the strike began. In addition, two men were arrested for disorderly conduct at a trash hauling company after an altercation with three replacement workers hired by the company, according to police spokeswoman Officer Janice Swinney.

A fight with baseball bats between a striker and a non-union worker at a Bronx hauling company also was reported, but no arrests were made, Swinney said.

Marty Adelstein, recording secretary for the Teamsters local representing about 2,100 garbage carters, said the workers "intend to stay out until they get a fair offer from the employers." He said he had sent pickets to three "vital" stations - recycling centers in the Bronx and Brooklyn and the Staten Island landfill.

"The men were very disappointed in the final offer made by the hauling firms for a three-year contract featuring a pay freeze until June 1, 1991, followed by a $10-a-week increase until Dec. 1, 1991," Adelstein said. "After that date workers would have gotten a $30-a-week pay increase until Dec. 1, 1992, then another $30 a week in the third year of the contract.

"Initially we were looking for a $60-a-week increase. Our final demand was for a $25-a-week increase in the first year, a $35-a-week raise in the secondand a $35-a-week increase in the third." He added: "Essentially, we were off by about $25." The haulers, who currently make about $40,000 a year, also want improved pension plans and other benefits.

Two large hauling company associations - Allied Sanitation and the Private Carting Industry Association, representing about 65 companies - were the main targets of the strike. Harry Daley, a spokesman for Allied, claimed it sent out a full fleet of 50 trucks Monday manned by about 100 union personnel.

"We've hired security guards to escort these trucks," said Joe Lamigino, one of the hauling company owners. "We pay our men more than union contract. They know the union is being unreasonable in its demands."

Lamigino said a major union motive in calling the strike was to get a share of the traffic in recycled trash that is taken to out-of-state dumping sites by non-union truckers. He said the Teamsters is demanding a $48 contribution to its "kitty" from hauling firms for each out-of-state haul.

#90344u1441 12/10/1990 ~United Press International

(DEC. 10) UPI - In the face of a collapsing construction market, Lone Star Industries Inc., a long-ailing cement maker, sought Chapter 11 bankruptcy protection Monday.

The Stamford, Conn.-based company, which filed in U.S. Bankruptcy Court in White Plains, N.Y., said it plans to remain in operation, to continue selling assets and to "emerge from Chapter 11 as a viable operating entity."

Lone Star said Chapter 11 will allow it to "restructure around its core business operations" while taking the steps necessary to improve its financial structure.

The company said in a statement it plans to sell "certain of its assets" but did not say which ones or whether it had agreements for such sales. Also, Lone Star said it had rebuffed offers to buy the company from two foreign investors but the board of directors "concluded that shareholders would be better off if the company availed itself of Chapter 11."

News of the filing sent the company's stock plunging $2.675 a share to $2.125 by midday on the New York Stock Exchange.

An analyst, Jonathan Goldfarb, who followed the company for Merrill Lynch & Co. for many years until abandoning coverage last year because of what he believed was a negative outlook, said persistent sales of valuable profitable assets have been a prime source of the company's problems.

"It had been selling off its assets to raise cash to continue paying a big dividend payment despite buckets of red ink," Goldfarb said. "The dividend kept the stock price high enough to prevent someone else from coming in and taking the company over," he said.

"This used to be a fine company," Goldfarb said, "but it was managed into the ground in the 1980s." Goldfarb acknowledged the entire cement industry is in a cyclical downturn but he said many of the other companies are still making money.

Company spokesmen did not respond to repeated telephone inquiries. The company statement suggested that unfair foreign competition was a prime cause of its difficulties.

The Lone Star statement said its board "noted that many countries sell cement in the U.S. at less than they charge at home... Recently the U.S. Government found Mexican producers guilty of dumping," or the sale of a product below the cost of production.

-30- 2470

#90344u1447 12/10/1990 ~United Press International

WASHINGTON (DEC. 10) UPI - The Supreme Court Monday entered the private world of journalists and their news sources, agreeing to decide whether a swap of secret information for a pledge of anonymity is a legally binding agreement.

The court will decide whether a reporter who promises anonymity to a source can be sued if he fails to keep that promise.

The court will determine if Minnesota's two largest newspapers, the Star Tribune of Minneapolis and the St. Paul Pioneer Press Dispatch, are liable for damages for reneging on a 1982 agreement made with a source.

A Minnesota trial court ruled they were guilty of breach of contract and misrepresentation, and a jury ordered them to pay $700,000 in compensatory and punitive damages to the source.

But by a 4-2 vote, the Minnesota Supreme Court reversed the award, ruling that the newspapers' actions were fully protected by the First Amendment guarantee of freedom of the press and there was no legal agreement to breach.

The Supreme Court's decision is expected next year.

''There's a good deal at stake,'' said Jane Kirtley, executive director of the Reporters Committee for Freedom of the Press.

She said the Supreme Court appears ready to ''in my view drastically reduce

the protection that the First Amendment has given to journalists ... the right to make your own news judgments, which is really what this case is about.''

During Minnesota's 1982 gubernatorial race, Dan Cohen was working for the Republican candidate for governor when he provided information about past legal troubles of the Democratic candidate for lieutenant governor.

He gave the information to a political reporter from each newspaper after they agreed not to use his name or ask where he obtained the information.

But the newspapers both identified Cohen as the source of the information they published in the next day's editions. Cohen lost his advertising job as a result.

The newspapers contend the circumstances in this case were unusual because of the political campaign and Cohen's apparent effort to leak information that - on second glance - was not as damaging as it appeared.

The newspapers also talked to the person who initially uncovered the information, and he claimed to have done it at Cohen's behest.

The Minnesota Supreme Court found that a journalist-source pact is an ''I'll-scratch-your-back-if-you'll-scratch-mine'' agreement where both sides benefit - not a legal contract.

In his appeal to the Supreme Court, Cohen's lawyer wrote that the case ''presents explicitly the question of whether the First Amendment permits a media organization to deliberately violate an undisputed and unambiguous promise of confidentiality.''

Courts are occasionally involved in the issue of reporters and sources, but normally only when judges order journalists to reveal the identity of a source deemed important in a trial.

If the court were to rule that a reporter-source agreement is legally binding, it could unintentionally help some journalists who face contempt of court for refusing to reveal their sources , but probably only in civil cases, Kirtley said.

''That's a very high price to pay to get very little,'' said Kirtley.

The decision to review the case comes just weeks after the court refused to halt a prior restraint against Cable News Network, barring it from airing tapes of deposed Panamanian dictator Manuel Noriega.

#90344u1459 12/10/1990 ~United Press International

PARIS (DEC. 10) UPI - At least 11 people died when an early snowstorm swirled through Britain, France and Spain, paralyzing traffic, knocking out electricity in tens of thousands of households and making Paris resemble Monday a scene from the opera ''La Vie Boheme.''

Among the casualties were two skiiers and three others who were injured when heavy snow set off a rockslide near the French-Italian border, crushing their car as they returned from a week-end Alpine jaunt, firemen said.

The injured skiiers were taken to a hospital at Bordighera, Italy, for treatment following the accident Sunday night between Breil-sur-Roya and Vintimille, said the firefighters.

All five were French citizens. They were still wearing their skiing clothes when the rocks rumbled down onto their Toyota. The dead were a young man and a young woman sitting in the back seat.

At Val-de-Vesle, in the Marne area near the city of Reims, another motorist died when his car skidded on an icy highway and slammed into a tree, killing the driver instantly, police said.

About 140,000 homes remained without electricity in the Rhone-Alpes region following the week-end weather.

Three high-speed TGV trains scheduled to travel from Paris to Geneva, Chambery and Annecy were canceled Monday morning.

The Mont Blanc tunnel was closed to motorists as were the Alpine Lyon to Grenoble and Lyon to Chambery routes.

Ski station managers were jubilant at the early snowfall, which they said would assure them booming Christmas business. Snow swirled through Paris all day Monday, making many ancient quarters of the City of Light recall a set off the classic opera ''La Vie Boheme'' - the tragedy about life in the winter among impoverished Bohemian artists in the popular neighborhood of Montmartre.

Chestnut salesman and newspaper vendors shivered in scarves, berets and mufflers. Tramps sought refuge on subway benches.

Residents in England and Wales dug out from a week-end blizzard that killed at least eight people.

The storm, described by meteorologists as the worst December snowfall in nearly a decade, appeared to be waning Monday, a spokeswoman for the London Weather Service said.

''Things seem to be getting warmer in much of the country and we are not expecting any real bad weather over the next few days,'' said Alison McLure, a

meteorologist with the Weather Service.

The sudden onslaught of arctic conditions, which began late Friday, stranded travelers at airports, railway stations and in their cars and cut off dozens of rural villages.

Rescuers combed the moors and fields of north and central England and parts of Wales for people who may have been buried in snow drifts, reported to be as deep as 12 feet in some places.

A farmer in North Yorkshire, cut off as he tried to bring his sheep to a lower pasture, stayed alive by building a makeshift igloo and remaining in it for 27 hours in freezing conditions. Rescuers found Howard Stevenson, 56, buried in the snow as they searched with long poles. A Royal Air Force helicopter was called in to airlift him to a nearby hospital.

One crewman described Stevenson as ''very, very cold'' when he was found but said his condition improved dramatically after a thermal blanket was wrapped around him.

One man was found dead in his car in Nottinghamshire, 128 miles north of London, while awaiting rescue. Road accidents claimed at least one life and an 83-year-old woman died of head injuries when she was blown off her feet by a gust of wind.

More than 50 motorists on a road near Durham, 252 miles north of the capital, were rescued after spending up to 24 hours trapped in their cars.

#90344u1460 12/10/1990 ~United Press International

CHICAGO (DEC. 10) UPI - Soybeans, corn and wheat closed slightly higher Monday on the Chicago Board of Trade. Oats were narrowly mixed.

Trading was choppy for much of the day with conflicting reports helping drive prices higher and lower. Reports that the United States is more likely to give medical rather than food aid to the Soviet Union prompted selling. But later reports that the USSR has asked for food and other help, and that Secretary of State James Baker promised a sympathetic response prompted buying.

Steady basis levels and light country movement contributed to the strength across the floor.

Gains in soybeans were tempered by limited trading of soymeal overseas.

Corn rallied from session lows on light commercial buying.

Wheat was higher on professional and commission house buying, and on reports

that Morocco bought 100,000 tons of optional-origin wheat. Algeria also said it has rebid for 100,000 tons of bonus wheat.

At the close, corn was up 3/4 to 2 1/2, wheat was up 1/4 up 1 1/4, soybeans were up 1/2 to 3 and oats were off 1/4 to up 1/2.

#90344u1475 12/10/1990 ~United Press International

LOS ANGELES (DEC. 10) UPI - Western banking giant Security Pacific Corp., hit by problem loans and seeking to bolster reserves, announced Monday that it would post a fourth-quarter loss of between $320 million and $360 million.

The nation's fifth-largest bank holding company, in an announcement that could be the precursor to similar moves by other large U.S. banks, said it would also get out of merchant banking and focus on its more profitable retail banking operations and consumer and business finance companies.

"Security Pacific has very strong core businesses in California, in the Pacific Northwest, and in our nationwide consumer and business finance companies," said Robert Smith, chairman and chief executive officer. "With this organizational and financial restructuring, we will allocate more of our capital to those strong and very profitable basic businesses."

Smith said Security Pacific said it would add about $850 million to its reserves, most of that due to problem loans. A total of $600 million will be added to reserves for credit losses "due to recent economic deterioration in a number of international and domestic markets." However, management said it plans to maintain the current quarterly dividend at its current level of 63

cents.

The moves had been expected by some analysts, since Security Pacific had announced Friday that it was withdrawing its $100 million note offering one day after the notes were sold.

Banking analyst Tony Howard of Crowell Weedon & Co. of Los Angeles said that the withdrawal of the offering probably came after management realized that it could have significant legal problems by selling the notes prior to announcing the reserve addition and fourth-quarter loss. "Making the offering first was very bad timing," Howard said. "I'd say it was a real blunder."

Security Pacific spokeswoman Deborah Lewis said Monday that the offering had been withdrawn because of the restructuring announcement but would not elaborate.

Howard said many major U.S. banks will probably announce fourth-quarter losses through similar moves, but not until next month. "A lot of banks will probably be using the fourth-quarter as a clean-up quarter," he said. "What Security Pacific is doing is putting a lot of problems behind them."

Howard also said the restructuring would be a positive move because Security Pacific will be ridding itself of the low-profit merchant bank, which arranges credit financing. The merchant bank's return on assets was 0.32 percent for the first nine months of this year, compared with 1.96 percent for the retail bank, not including unallocated corporate items.

Howard estimated that the merchant bank will contribute about ten percent to total earnings. "Future profitability should increase, with the increased focus on business and retail banking," Howard said.

Security Pacific said that its 1990 earnings will be in the range of $160 million to $200 million. For the first nine months, it earned $518.9 million, or $4.18 a share.

Security Pacific's reserve level had been about 47 percent of loans not accruing interest in the third quarter, lower than many other major banks. The addition to reserves should boost that to about 60 percent, Howard said.

In the announcement, Security Pacific said that the reserve to cover the costs of restructuring merchant banking would result in a charge of about $200 million in the fourth quarter.

"We expect to sell, downsize, or completely withdraw from many of our European and Australian activities, due to dramatic and continuing changes in economic and financial markets," Smith said.

Smith also indicated that further cutbacks may be coming. "The plan includes

the consolidation of traditionally profitable wholesale banking units into other parts of the corporation, with the elimination of underperforming units, and those which do not fit well with our consistently profitable core business activities," Smith said.

Smith, noting that the bank had already boosted its reserve for credit losses this year by 60 percent over the prior year to a total of $541 million, the fourth-quarter provision will be in the range of $600 million. "This provision is expected to be approximately $275 million in excess of anticipated fourth quarter loan losses," Smith said.

Smith also said that Security Pacific is also establishing an additional reserve of $50 million for accelerated disposition of commercial real estate acquired through foreclosure.

NEW YORK (DEC. 10) UPI - A strike delegation went to Chicago Monday to attend a Tribune Co. board meeting at which the fate of the company-owned New York Daily News, in the seventh week of a financially disastrous walkout, may be decided.

Armed with proxies so they can attend the closed quarterly board meeting on Tuesday, representatives of the striking Newspaper Guild and pressmens unions, the AFL-CIO and Local 1199 of the Drug, Hospital and Health Care Workers will present arguments for continuing publication of the tabloid.

Their aim is "not only to keep the paper alive, but to get management to actively negotiate," said Vincent Lee, a spokesman for the guild. "We haven't even talked about economic issues yet. When we do meet for negotiations, management just comes in for ten minutes, then leaves."

Lee said a representative of the hospital workers union, a strong supporter of the News walkout, has worked up a financial report on the ailing News that shows how it could be made a viable operation.

The News, the nation's largest newspaper a decade ago, with a circulation of almost two million, saw its sales drop to about one million copies prior to the Oct. 25 strike, which has cost the parent Tribune Co. an estimated tens of millions of dollars. Wall Street sources said the company's 14-member board may want to cut the company's losses and close the News.

Meanwhile, Local 100 of the Transport Workers Union, representing subway and commuter railroad personnel, called a meeting with News strikers to discuss a response to a federal court order allowing hawkers to sell the News on subway and railroad platforms.

Jim Gannon, a spokesman for the TWU, said the unions would not contemplate a slowdown in train service at the request of George McDonald, head of the Allied Printing Trades Council. McDonald recommended against "a war on the riding public" because many mass-transit riders are union members.

#90344u1487 12/10/1990 ~United Press International

BOGOTA, COLOMBIA (DEC. 10) UPI - A slate of candidates headed by a former guerrilla leader won a plurality in an election for 70 members of a constituent assembly that will rewrite Colombia's constitution, according to figures released Monday with 91 percent of the votes counted.

But another rebel group announced it would renew its war with the government.

Antonio Navarro, a former leader of the M-19 rebels, headed the list of

assembly candidates of the Democratic Left Alliance, which in balloting Sunday won 925,795 votes, or 27 percent of the 3,438,418 vote total.

Nineteen people aligned with the former guerrilla organization were elected to the legislature, but despite the strong showing the former rebels will not be the dominant force in the assembly, which is to meet for 150 days beginning Feb. 15 to draft changes in the 100-year old constitution.

President Cesar Gaviria has said the constitution must revised with specific articles against violence and the perpetrators of violence.

Apart from the possible changes in the constitution, the voting shows that the once-ostracized M-19, which has vaguely socialist and nationalist goals, has become a mainstream political force in Colombia within a few months of its legalization.

Different factions of the incumbent Liberal Party, if the delegates from different slates under individual leaders were added up, were assured of 26 seats and conservative factions 20 seats.

The M-19 rebels, once one of the most violent in Latin America, surrendered their weapons in March 1990 following a negotiated peace agreement with President Virgilio Barco.

The agreement allowed the rebels to form a political party and pardoned them for crimes committed while rebels.

The surprising results Sunday were marred by a record absentee rate of 75 percent.

Voting centers in Bogota and other cities were relatively deserted for much of the day, despite prodding by virtually all political leaders to get out the vote.

Even a message by Gaviria was ignored by most of the 14 million Colombians over 18 and thus eligible to vote.

One of those most discouraged by the results was former Interior Minister Carlos Lemos, elected to the assembly on the Liberal Party ticket.

Lemos said the voting showed disfavor with Gaviria and he called for the resignations of all cabinet members to allow a reorganization of the government.

''If nothing is done, we will be facing a situation of a country going in one direction and a government going the other way,'' Lemos said.

In the field, the Colombian Revolutionary Armed Forces, the country's largest

and oldest guerrilla group, announced Monday a resumption of war after the military launched an all-out assault against the rebel headquarters in the mountains.

Gaviria's ''intolerance'' and army attacks ''caused a resumption of a war that will have grave consequences for the country,'' said Alvaro Leyva, a deputy-elect to the Constitutional Assembly and leader of the group known as FARC for its Spanish initials.

#90344u1501 12/10/1990 ~United Press International

CAIRO, EGYPT (DEC. 10) UPI - Kuwait's exiled Emir Sheikh Jaber al Ahmad al Sabah accused Iraqi occupation troops of indiscriminate killings of Kuwaiti adults and children and arresting Kuwaiti nationals at random as part of a terror campign.

In a speech marking Monday's anniversary of the U.N. declaration on human rights, Jaber accused Iraqi President Saddam Hussein of a campaign of terror to force Kuwaitis to abandon their country.

''The Iraqi regime is carrying out acts of terrorism against hundreds of thousands of (Kuwaiti) citizens and expatriates, with the aim of forcing them to leave after seizing their valuables and homes,'' Jaber said in a televised speech from his home in exile in the Saudi hill resort of Taif.

The Kuwaiti Emir charged Saddam with trying to change his country's demographic nature and fill the tiny emirate with Iraqis and other Arabs sympathetic to the Iraqi leader.

Jaber urged the world community to stand firm against the ''tyrant and the brutality of Saddam's regime'' against the Kuwaiti people.

''We call upon the world community for further cohesion to repulse the tyrant and the brutality of Saddam's regime against the Kuwaiti people,'' he said.

''Human rights and dignity are daily being violated in Kuwait. This is represented by the executions, mass killings of the children, torture and the indiscriminate arrests,'' the billionaire emir said.

Kuwaiti officials and human rights organizations estimate that Iraqi troops have killed or arrested 6,000 to 7,000 Kuwaitis since Saddam invaded the oil-rich emirate four months ago.

#90344u1514 12/10/1990 ~United Press International

WASHINGTON (DEC. 10) UPI - Philip Morris Cos. and General Motors Corp. each scored double whammies Monday as consumer groups awarded their annual "lemons" for the top ten most deceptive or misleading advertisements.

The giant tobacco company and the car manufacturer, along with six other companies selling everything from fast food to air travel, were cited for "the most misleading, unfair or irresponsible" ad campaigns of 1990 by a coalition of national consumer, public health, and environmental organizations.

"Advertisers have developed a seemingly boundless ability to dupe, deceive, and mislead the American public," said Bruce Silverglade, legal director for the Center for Science in the Public Interest, a nutrition and consumer advocacy group that organized the awards.

"It's about time we started asking what we are getting for the $125 billion that is spent on advertising each year," Silverglade said, "useful information or a barrage of misleading hype?"

Two of the "lemon awards," a victory statuette holding a lemon, went to the Oldsmobile division of General Motors Corp. for television commercials.

In one of the ads, GM claimed to have "pioneered the air bag," but, in awarding the auto maker a lemon, the Center for Auto Safety said in fact the company only briefly produced some full-size cars with air bags in the 1970s and went on to lobby against government regulations requiring air bags. GM now equips fewer of its models with airbags than either the Ford Motor Co. or

Chrysler Motors Corp., according to the group.

Another GM ad was cited by the Safe Energy Communication Council for promoting the Oldsmobile Cutlass Supreme model as "fuel efficient" even though it gets lower gas mileage than most of the automaker's other models.

The coalition cited Philip Morris print ads for implying that the Virginia Slims Superslims cigarette can help women stay thin; and for print and television commercials championing the Bill of Rights "as part of a public relations effort to defeat governmental restrictions on tobacco promotion."

At a news conference announcing the awards, Texas Assistant Attorney General Steve Gardner said the winners represented "a primary adage in the advertising business which is if you can't make it better, make it up."

Sen. Joseph Lieberman, D-Conn., said the need for more government regulation to prevent deceptive advertising "is even greater today as our economy slips into recession.

"The deception we're talking about here cons people into wasting their hard-earned money," Lieberman said, adding the Federal Trade Commission "can and must be more aggressive" in going after false advertisers.

In their sixth year, the lemon citations are officially called the Harlan Page Hubbard Memorial Awards, after the man who pioneered national advertising techniques in the 1890s, largely for such quack medicines as "Lydia Pinkham's Vegetable Compound."

Lieberman said a Kellogg Co. commerical for Special K cereal amounted to "a 1990s version of the Lydia Pinkham ads." Kellogg received a lemon from Silverglade's group for "falsely claiming that protein in its Special K cereal can help women maintain healthy muscle tone while dieting."

Most of the advertisements cited by the coalition were created by contracted advertising agencies and four were from a single agency, Leo Burnett Co. Inc. of Chicago.

Asked to comment on what Gardner called "the commemoration of sleaze," Carla Michelotti, Leo Burnett senior vice president and associate general counsel, defended the work of the agency.

"We and our clients have the necessary substantiation for all claims in our ads," Michelotti said. "Advertising will only work if it's truthful and substantiated and that is the basis on which all the Leo Burnett ads are created." Leo Burnett created both of the GM ads, the Virginia Slims ad and the Special K commercial. The other winners of lemons for "worst" ads of 1990:

- Pan American Airlines for claiming its trans-Atlantic fleet "is among the

youngest in the air." Pan Am made the claim by counting its recently overhauled aircraft as new, even though some had been manufactured more than a decade earlier, according to the Aviation Consumer Action Project.

- Coors Brewing Co. for Coors Light commercials encouraging beer drinking to celebrate Halloween, a traditional children's holiday.

- Burger King for "misleadingly promoting membership in its 'Kids Club' to young children."

- Fabulous Hawaiian Sweepstakes for telemarketing techniques using automatic dialing machines and $6 900-number toll calls.

#90344u1568 12/10/1990 ~United Press International

GUATEMALA CITY (DEC. 10) UPI - Guatemalan rebels said Monday the country's powerful military is prolonging Central America's longest civil war by refusing to participate in peace talks.

In a statement published in Prensa Libre newspaper, the rebels said the government's armed forces are taking a stubborn and recalcitrant posture, thereby impeding a solution to the civil war that has lasted three decades and claimed about 100,000 lives.

The members of the Guatemalan National Revolutionary Union, known by its Spanish initials as URNG, said the miltary refused to participate in the peace initiatives established by Central American presidents in 1987 or the foundations for peace set forth earlier this year in Olso, Norway.

Officials of URNG, an umbrella organization of four guerrilla groups, and representatives of Guatemala's various political parties, religious groups, union and business organizations signed an accord in Norway in March to promote peace talks aimed at finding a political solution to the country's armed conflict.

A military spokesmen denied the allegations and said, ''The military is continuing in the spirit of the peace accords but refuses to negotiate with elements of society that continue to use armed aggression to achieve their political goals.''

URNG representatives said they were using aggression to bring about political change because the military refuses to cooperate in the peace talks.

On July 10, Guatemalan guerrillas accused the government of doing nothing to stop the army from its ''scorched-earth'' bombardment of rural villages in what they described as a campaign of terror.

#90344u1576 12/10/1990 ~United Press International

EDWARDS AIR FORCE BASE, Calif. (DEC. 10) UPI - The shuttle Columbia's astronauts stowed their telescopes and packed for a rare night landing Monday to close out a ''fantastic'' astronomy mission one day early because of windy weather.

After getting off to a rocky start, Columbia's seven-man crew had hoped for a full-duration 10-day mission to gather as much priceless data as possible about some of the most violent stars and galaxies in the cosmos.

But with a windy cold front barreling toward the ship's Mojave Desert landing site, NASA managers ordered Columbia home one day early for a touchdown at 9:51 p.m. PST on concrete runway 22 at Edwards Air Force Base to close out the year's sixth and final shuttle mission.

''You all have had a fantastic mission but all good things have got to come to an end and you're coming home tonight,'' astronaut Story Musgrave radioed the astronauts early Monday from mission control in Houston.

''OK, Story, very good. We'll start getting ready,'' replied Columbia skipper Vance Brand.

Brand, 59, co-pilot Guy Gardner, 42, John ''Mike'' Lounge, 44, Robert Parker, 53, Jeffrey Hoffman, 46, and civilian astronomers Ronald Parise, 39, and Samuel Durrance, 47, immediately began packing up for the hour- long glide back to Earth.

Earlier in the day, two Soviet cosmonauts and a Japanese television reporter landed in a snow-covered field in the Soviet central republic of Khazakhstan to close out a successful eight-day visit to the Mir space station by the first journalist in space.

In Houston, Secretary of State James Baker and Soviet Foreign Minister Eduard Shevardnadze visited NASA's mission control center to congratulate the Columbia astronauts on a successful mission.

''I think what you are doing in space is very important,'' Shevardnadze told the crew by radio. ''You are paving new roads in space and I very much believe you are paving those roads for the benefit and for the happiness of all of us on Earth. Let me wish you good luck and a very good landing.''

''We agree with your sentiments,'' Hoffman replied. ''We congratulate you on the good work done by the Mir and Soyuz cosmonauts and we look forward to continued work by nations of all the Earth in developing space, which is so important for the future of humankind.''

Despite the early landing and a string of glitches, officials said data from Columbia's mission will revolutionize knowledge about the structure and evolution of exploding stars, especially violent galaxies and enigmatic quasars, strange objects the size of a solar system that outshine entire galaxies. It may also help prove the existence of as- yet-unseen black holes.

''I consider this mission as nothing less than a total success,'' said Lennard Fisk, NASA's associate administrator for space science and applications.

Deputy mission scientist Eugene Urban said the crew made 220 observations of 140 X-ray and ultraviolet targets during the course of the nine-day flight, ranging from Jupiter and its moons to Comet Levy, interstellar dust clouds and a smorgasbord of other high-priority stars and galaxies.

While 200 astronomical targets were scheduled before launch, NASA officials said the crew's 70 percent success rate was more than acceptable, especially given the unprecedented nature of the observations.

Calling the ''Astro-1'' mission ''a true scientific success story,'' elated astronomers praised Columbia's crew for opening a new window on the invisible universe, giving scientists their first detailed look at X-rays and ultraviolet light from deep space that is blocked by Earth's atmosphere.

''What we're after is understanding how galaxies change with time in the universe,'' said astronomer Susan Neff. ''What we are getting here is more pieces to the big puzzle ... pieces we have never gotten before. ''

Few missions have had as much trouble getting off the ground as Columbia's and once in orbit, the astronauts had to improvise around a variety of potentially crippling technical problems.

Running six months behind schedule because of elusive hydrogen fuel leaks, Columbia blasted off at 1:49 p.m. EST Dec. 2 on its fifth launch try since May 30 and right off the bat, the astronauts ran into problems getting their Spacelab observatory up and running.

After working around problems with a $50 million European-built telescope pointing system, the second of two critical telescope control computers overheated and burned out, leaving the crew with no way to aim the ultraviolet telescopes at their targets.

But in a remarkable display of teamwork and ingenuity, flight controllers and the astronauts improvised a plan allowing engineers on the ground to radio commands to the shuttle to aim the telescopes in the general direction of a given target.

After that, the astronauts, using a joystick hand controller, were able to zero in on the target and keep it centered in the telescopes' field of view as

the shuttle raced along through space. Scientists said the new operating procedure was almost as effective as the original.

#90344u1577 12/10/1990 ~United Press International

WASHINGTON (DEC. 10) UPI - Last September a government advisory panel of marine scientists proposed banning shrimp trawlers from operating in Gulf of Mexico waters for three months a year.

The purpose of the restriction "is to begin rebuilding stocks of fish that are depleted" as a result of becoming entangled and dying in shrimp nets, said Terry Leary, a marine biologist with the Gulf of Mexico Fishery Management Council.

The group advises the National Marine Fisheries Service on conservation measures. But Congress and the Bush administration have ensured that the panel's recommendation will not be implemented until at least 1994.

In a hurried maneuver last October, at the behest of Sen. John Breaux, D-La. and other Gulf-state lawmakers, Congress approved an amendment to a marine fisheries bill that bars the government from imposing conservation measures to protect red snapper, trout, catfish, and other salt water fish water if those efforts adversely effect the shrimp industry.

President Bush signed the law that in essence strips his Commerce Department - which has jurisdiction over the National Fisheries Service - from taking any action until 1994.

"Unfortunately, many Gulf fish populations don't have three or more years before their collapse," said Harry Upton, fisheries director of the Center for Marine Conservation, a Washington organization that promotes marine wildlife conservation.

Representatives of the $374 million-a-year shrimp industry had urged Breaux, chairman of the Commerce Committee's Merchant Marine Subcommittee, to adopt protectionist legislation, saying that any restrictions would pose a serious hardship to shrimpers.

They noted that recent regulations requiring shrimpers to carry devices keeping turtles away from their in nets has already hindered shrimpers. They also contended that the three-month restriction was arbitrary and came at a time when shrimpers were harmed by higher fuel prices.

Breaux, who is up for re-election in 1992, inserted an amendment that directs the National Fisheries Service to collect data for three years on the effects of trawling. Meanwhile, the gulf management council has already assessed mortality stock rates and come to some alarming conclusions.

An estimated ten pounds of fish are snagged and discarded for every pound of shrimp caught in the Gulf of Mexico, marine biologists say. The annual bycatch or volume of fish that die in the process, exceeds one billion pounds, according to Scott Nichols, a marine biologist with the National Fisheries Service. "We provided this information before the amendment was adopted," Nichols said. "The results indicate that the (stocks) are severely depleted."

Nichols and other scientists are particularly concerned about the diminishing stock of red snapper, which until two years of age are vulnerable to trawlers because they are the approximate size of shrimp. The management council estimates that 12.5 million pounds of the premature red snapper are caught and die each year in shrimp trawlers.

The council became so concerned over the dwindling population of red snapper that it proposed changes in commercial and recreational fishing patterns to stem the high losses.

In fact, the National Fisheries Service recently adopted restrictions on commercial fishermen that beginning in January will reduce the annual allowable catch of red snapper from 3.1 million pounds to 2 million pounds.

The National Fisheries Service, with the approval of the Commerce Department, also reduced to two pounds from six pounds the volume of red snapper that recreational fishermen can catch per day.

But it was the proposed three-month shrimping ban that alarmed Breaux. That recommenation, Upton said, was the final blow that catapulted the shrimping industry into action and brought about the Breaux amendment. "It's a play to his constituents that makes it impossible to take any action that might be necessary," Upton said.

LOS ANGELES (UPI) - Actor Corey Feldman pleaded no contest Monday to three drug possession charges and was placed on four years probation, fined $5,000 and ordered to complete his stay at a live-in drug rehabilitation program.

Feldman, 19, whose voice is heard in the film ''Teenage Mutant Ninja Turtles '' and who appeared in the movies ''Stand By Me,'' ''Goonies'' and ''Lost Boys '' entered the pleas before Los Angeles Superior Court Judge Gordon Ringer.

The three drug possession charges - two for heroin, one for cocaine - stemmed from two arrests earlier this year, one in March and the other in September. In both arrests, Los Angeles police had stopped Feldman because of traffic violations, then found drugs.

Ringer ordered Feldman to finish his stay at the Cry Help live-in drug rehabilitation program, which the actor began three months ago. He is scheduled to complete the program in April, spokesman Michael Levine said.

In addition to the $5,000 fine, Feldman was also ordered to pay $150 for drug-testing charges, Los Angeles District Attorney's spokeswoman Sandi Gibbons said.

He will also be required to register with law enforcement authorities as a narcotics offender and was ordered not to drive with any measureable amount of alcohol within his system, Gibbons said.

Two other drug possession charges were dismissed as part of the plea agreement Gibbons said.

Monday's plea agreement stemmed from a Dec. 7 arrest in which Feldman was taken into custody for driving without a license after Los Angeles police officers who stopped him discovered a warrant for an unpaid traffic vioaltion.

Levine said that Feldman believes that the sentence he received is fair. He also said Feldman, although not required to do so, plans to participate in making anti-drug public service announcements once he has completed the stay at Cry Help.

#90344u1619 12/10/1990 ~United Press International
SAN SALVADOR, EL SALVADOR (DEC. 10) UPI - The Jesuit order in Central America said Monday it will not be satisfied with the trial of nine members of the Salvadoran armed forces accused of slaying six priests and two others because it means others will go unpunished.

''We reject any tendency to reduce responsibility for the crime to only those who have been implicated,'' the Society of Jesus said in a statement.

A court resolution moving the controversial case from the investigation stage to the trial stage was read publicly Monday by a secretary in San Salvador's Fourth Penal Court. The resolution states that a colonel, three lieutenants and five soldiers will stand trial on charges of murder and terrorism in the killings of the priests, their housekeeper and her teenage daughter Nov. 16, 1989.

In addition, a lieutentant colonel will be tried on charges of destroying evidence.

Observers have characterized the Jesuit trial as a test case for the Salvadoran government's ability to impose justice and civilian control on a politically powerful military that has traditionally been above the law.

The arrest almost a year ago of eight members of the military implicated in the case was heralded by U.S. officials as a ''historic step'' for the administration of justice in El Salvador.

But a year later the Roman Catholic Church and human rights groups said that the army, with help from the U.S. government, had limited the number and rank of officers implicated in the slayings.

The Jesuits maintained that, ''The dimensions of the crime, the number of members of the armed forces that participated in it, the ring of protection that the killers had during the crime still say to anyone with eyes and intelligence that this was a military operation that was carefully planned, organized and backed by a larger group of military officers, undoubtedly including some of high rank.''

Jose Maria Tojeira, head of the Jesuit order in Central America, told reporters he still hopes the trial will lead to new information ''that would get us closer to the intellectual authors'' of the killings.

''This case is contributing to the Salvadoran reality in the sense that it touches on the impunity of some groups that have acted with impunity in this country for too long,'' Tojeira said. ''It helps to clarify the Salvadoran situation, the injustice of war, the suffering of so many people, the number

of murders. But that is not to say that it has been a success from the legal point of view.''

Tojeira denounced the ''lack of real cooperation from the armed forces, reflected in the numerous contradictions and lies found in the declarations of the many members (of the military) who have testified'' during the year-long investigation.

''We also denounce the lack of cooperation from the Bush administration in the United States, whose intelligence agencies refuse to hand over documents dealing with the murder of our colleagues,'' the Jesuits said.

Outrage over the killings led members of the U.S. Congress to withhold half of the $85 million in 1991 military aid that President Bush had requested for El Salvador. But the administration, which opposed the measure, is already considering release of the aid due to an increase in offensive military operations by El Salvador's leftist rebels.

The United States has pumped $4 billion into El Salvador over the past decade in an attempt to stop rebels of the leftist Farabundo Marti National Liberation Front, or FMLN, from taking power. About a quarter of the aid has gone directly to the military that ruled El Salvador for half a century and has been slowly giving up power to civilian governments over the past decade.

#90344u1629 12/10/1990 ~United Press International
NEW YORK (DEC. 10) UPI - American investors in the Persian Gulf appear to have held firm in the face of the region's crisis and, outside Kuwait, are largely able to conduct business as usual, regional experts heard Monday.

Donald DeMarino, a former deputy Commerce Department assistant secretary, told political and economic experts at a conference "reassessing" doing business on

the Arabian Peninsula that he was not aware of any disinvestment by American companies and that they may now enjoy an advantage over other outside investors as a result of American "political stock" being so high in the region.

He added that he expected the price of oil to settle at $30 a barrel or lower in the near term and that this would provide a budget surplus for Saudi Arabia.

However, DeMarino, now the U.S. representative for the India-based TATA group of companies, warned U.S. investors not to expect oil proceeds to be available for business investment, due to Saudi Arabia's increasing financial aid to other countries in the Middle East and beyond.

There might be pressure in the future for Saudi Arabia to bankroll the Palestinians, a cause the Saudis has traditionally supported, although their relations have been strained by Palestinian support for Iraq during the crisis over Iraq's Aug. 2 invasion of oil-rich Kuwait, he said.

When the present crisis has passed, he said, the whole region may see much greater economic cooperation to the extent that "we might be able to look at the Gulf as an integrated market."

The Saudis' two major industries will remain oil and the military, DeMarino said, and the "interdependence" between the United States and Saudi Arabia will deepen as newly discovered reserves of Saudi crude oil come on line and U.S. reserves dwindle.

He said potentially huge new fields of crude near Riyadh, the Saudi capital, could total between five billion and 30 billion barrels, allowing the country to sustain a production of ten million barrels a day.

Prospects for business in Saudi Arabia are improved by a healthy outlook for its political stability, said Walter Cutler, a former U.S. ambassador to the country.

He said the nation's conservative social traditions, seen in such practices as women not being allowed to drive, still enjoy substantial support despite the large presence of foreign troops in the country. This may reflect in part, he said, the fact that fewer young Saudis are now being educated outside the country.

Elsewhere in the region, business in the United Arab Emirates, about 500 miles south of Kuwait, is proceeding more or less normally, said Charles Heath, director of the Trade and Tourism Board in Dubai, the second-largest of the UAE's seven emirates.

However, he named banking, plastics, insurance, advertising, shipping and tourism as businesses that been been adversely affected by the Iraqi invasion

of Kuwait. Still, Heath called Dubai a "safe haven" for business that had continued to attract overseas investment since the invasion.

American companies setting up in Dubai since Aug. 2 have included Texaco Inc., Dell Computer Corp. and Smith Kline & French Laboratories, Heath added.

Earlier in the conference, Michael Sterner, former U.S. ambassador to the UAE, said he believed the international economic embargo on Iraq was "beginning to bite" and should be given more time to work. "My view is that sanctions are hurting Iraq and that we can afford to be patient," he said.

He said a prolonged military conflict would run the risk of alienating many Middle Eastern countries currently sympathetic to American goals in the region.

Even if war does break out, Sterner said, there is little chance that oil exports from the Persian Gulf will be seriously affected because Iraq does not have the means to interrupt supplies. The conference was sponsored by International Executive Reports, publisher of the monthly magazine Middle East Executive Reports.

#90344u1630 12/10/1990 ~United Press International

WASHINGTON (DEC. 10) UPI - The solvency of the insurance industry came under scrutiny Monday as a Senate panel opened hearings to determine whether insurers are heading for the same fate as the beleaguered savings and loan industry.

For the past year, various insurance industry observers have warned that major insurance companies, thanks to the collapsing real estate market, are facing serious questions of solvency.

"If we have learned anything from the S&L crisis, we have learned that to a large degree it was preventable. The warning signs were clear, but unfortunately they were ignored," said Sen. Howard Metzenbaum, D-Ohio, and chairman of the antitrust subcommittee of the Senate Judiciary Committee.

"We must not ignore some of the same signs in the insurance industry - lax regulation, outdated accounting methods, overvalued assets and, in some instances, low capital requirements."

Metzenbaum said he asked six life insurance companies to appear before the panel. All turned the invitation down. "Life insurance companies cannot hide from the American public," Metzenbaum said. "Their failure to appear here today sends a loud and clear message - they cannot stand the tough scrutiny that the public demands and deserves."

Metzenbaum said federal lawmakers have put the insurance industry "on a

pedestal" and sheltered it from taxes, antitrust laws, and federal regulation "on the assumption that state regulators could do a better job of protecting the interest of the public. "We have been wrong."

Insurance companies have grown into a major force in the financial services industry, controlling about $1.9 trillion in assets. A recent study prepared by the IDS Life Co. of Minneapolis showed that 20 percent of the nation's 2,400 life insurance companies could fail in a major economic downturn or decline in equity markets.

Last year alone, 44 insurance companies failed nationwide, said Thomas Borman, commissioner of the Minnesota Department of Commerce. Borman told the panel that the growing involvement of insurance companies in real estate, junk bonds and lower grade municipal bonds during the past decade "materially increased their investment risk."

But the problems that crippled the savings and loan industry are not the same as those facing the insurance industry, Borman said. "I have avoided comparing the situation facing insurers with that of the savings and loan industry," he said. "I have done so because I don't believe the level of risk facing the insurance industry is anywhere near that facing the savings and loans."

#90344u1700 12/10/1990 ~United Press International

WEST LAFAYETTE, IN (DEC. 10) UPI - A. Charlene Sullivan, associate professor of management in Purdue University's Krannert School of Management, has been elected to the board of the Federal Reserve Bank of Chicago.

One of nine directors of the Chicago board, Sullivan said she was elected to the position because of her research on finance and consumer credit. Her three-year term begins Jan. 1.

Sullivan said board members are responsible primarily for representing the varied interests within the Chicago Federal Reserve Bank district, which encompasses all or parts of Illinois, Indiana, Wisconsin, Michigan and Iowa, to the Federal Reserve System. The 12 regional reserve banks, along with the Board of Governors in Washington, D.C., constitute the nation's central bank.

It is the responsibility of the board members to give the president of the Federal Reserve Bank of Chicago enough information to make a recommendation on

such matters as the discount rate, or the amount banks pay when they borrow money from the Fed.

While the discount rate is not tied directly to interest rates charged nationally, Sullivan said it usually confirms the direction the Fed is taking in monetary policy.

Sullivan, a native of Flaherty, Ky., earned her bachelor's degree in home economics from the University of Kentucky in 1971. She received her master's degree in management in 1975 and her doctorate in finance and accounting in 1978, both from Purdue.

She received the Outstanding Undergraduate Teaching Award from the Krannert school in 1988, and a Purdue University Outstanding Undergraduate Teaching Award in 1989.

#90344u1727 12/10/1990 ~United Press International

SACRAMENTO, Calif. (DEC. 10) UPI - A former state senator was sentenced Monday to 12 years in federal prison, the second time this year a former legislator has been sent to prison for political corruption.

Paul Carpenter, 63, stood silently and showed no emotion as U.S. District Judge Edward Garcia handed down the sentence that was a bit less than the 15 years that prosecutors had recommended.

On its face, the sentence was nearly twice the 6 1/2 years given to former Sen. Joseph Montoya, the first lawmaker sent to prison as the result of an elaborate three-year FBI sting investigation aimed at Capitol corruption.

However, Carpenter will be eligible for parole after four years, and Assistant U.S. Attorney John Panneton, who prosecuted Carpenter, estimated he would be released after serving four or five years.

Montoya was sentenced under a different law because his crimes were committed at a later date. Montoya will have to serve about 5 1/2 years of his sentence.

Carpenter was convicted on Sept. 17 of four counts of racketeering, extortion and conspiracy.

According to testimony at this trial, Carpenter accepted a $20,000 campaign contribution in 1986 from a company that wanted his help on a bill. The company, Gulf Shrimp Fisheries, had been created by the FBI as part of its undercover operation.

He also was convicted of extorting or attempting to extort campaign contributions from the California Correctional Peace Officers Association, lobbyists for the Western Growers Association, the Drew University School of Medicine in Los Angeles and Hamilton Test Systems.

In sentencing Carpenter, Garcia said he wanted to set aside the belief that Carpenter was convicted of selling access to his office by making it easier for contributors to get into his office to see him.

''This is not a case of access. This is the proven acceptance of bribe money '' Garcia said.

He noted that lobbyists for the correctional peace officers testified that they believed they were ''shaken down'' by Carpenter. They visited his office to enlist his support for a bill, but instead of discussing the legislation, Carpenter demanded to know why they hadn't contributed to his campaign.

Later, they gave him $1,000.

Carpenter was silent in court and as he left the courtroom.

''On advice of counsel, I do not wish to make a statement,'' Carpenter told the judge.

But his lawyer, Gerard Hinkley, said Carpenter still believes he is innocent.

''He knows he did not extort that money,'' Hinkley told the judge. He argued that an aide John Shahabian, demanded the money from an undercover FBI agent, then told Carpenter he had found a campaign contributor.

Panneton called Carpenter's attitude arrogance.

''Since his conviction, he has shown no remorse,'' Panneton said. ''Even to this day, he doesn't believe he did anything wrong.''

In arguing for a 15-year sentence, Panneton blamed the passage in the November election of Proposition 140, which strictly limits legislative terms, in part on Carpenter.

''People in this state are fed up with the likes of this man,'' Panneton said.

Carpenter, a Democrat from Norwalk, left the Senate after 14 years in the Legislature in 1986 for a Board of Equalization seat.

#90344u1740 12/10/1990 ~United Press International

NEW YORK (DEC. 10) UPI - The dollar strengthened across the board Monday in New York currency dealings, helped by year-end caution and what appeared to be widening sentiment that the dollar is bottoming out and now stands to gain.

Dealers said the dollar began weak under follow-through selling on what Bank Brussels Lambert vice president for corporate trading Andrew Hodge described as "horrendous, breadline" U.S. unemployment data. The dollar was also hit by a Federal Reserve lowering of short-term interest rates.

But the dollar showed resilience - "market confirmation of signs (by monetary

authorities) about the dollar having fallen far enough," Hodge said.

In late New York dealings, the dollar was at 1.4720 German marks, up slightly from 1.4715 marks Friday, and at 132.20 Japanese yen, up from 130.65. The British pound slipped to $1.9435 from $1.9540.

Other New York dollar rates: 1.2610 Swiss francs, up from 1.2535; 5.0050 French francs, ahead from 4.9990; and 1,112 Italian lire, up from 1,110.75.

Manufacturers Hanover vice president Graham Broyd contended that the dollar "is undervalued and has bottomed out against the deutsche mark." Participants are worried central banks will intervene if it falls more.

Though the U.S. economy is in recession, with interest rates falling, Broyd said, "All the bad news is already discounted in the market." Noting that over the past three years the dollar has hit its annual lows near year-end, Broyd concluded, "I think 1991 may well be a mirror of 1990," with the dollar on a recovering trend as the New Year develops.

In Europe, the dollar closed lower on expected further cuts in U.S. interest rates and higher chances of a peaceful Gulf resolution.

The dollar weakened in particular against the German mark. Players looked for the Bundesbank's policymaking panel to hike central rates Thursday to increase the yield differential between the two currencies.

In Frankfurt, the dollar declined to 1.4696 German marks vs. 1.4830 Friday. It also fell in Zurich, to 1.2580 Swiss francs vs. 1.2640. In London, the pound slipped to $1.9455 from $1.9510.

Dealers said U.K. retail figures showing a 0.5 percent slump in November hurt sterling, boding an interest rate cut before Christmas.

The dollar declined in Paris, Brussels and Milan, at 4.9950 French francs vs. 5.0375, 30.46 Belgian francs vs. 30.61 and 1,110.50 Italian lire vs 1,119.

Earlier, the dollar plunged against the yen in Tokyo Monday on expectations of further declines in U.S. interest rates.

The dollar closed at 130.55 yen, down 1.62 yen from Fridays closing rate of 132.17 yen, the Bank of Japan said.

There were expections that the U.S. Federal Reserve Board might be thinking of reducing the official discount rate following Friday's cut in the Federal funds rate, a foreign exchange dealers said.

In Zurich, gold closed higher at $373.65 an ounce vs. $371.50. London gold closed higher, at $374.25 an ounce from $371.

Silver in Zurich closed lower at $4.05 an ounce against $4.15, and in London silver closed unchanged at $4.15 an ounce.

Republic National Bank in New York closed cash gold at $373.50 an ounce, up from $369.75 Friday. The New York Commodity Exchange settled gold contracts at $374.20 an ounce, ahead from $370.30.

Republic closed cash silver at $4.065 an ounce, down from $4.075 last week. Comex silver ended dealings at $4.05 an ounce, down from $4.055.

PINEHURST, N.C. (DEC. 10) UPI - Vice President Dan Quayle charged Monday that Congress has the ''luxury of criticism'' on the handling of the Persian Gulf crisis ''without the burden of accountability.''

In a gloves-off address to the Republican Governors' Association Annual Conference, Quayle said ''Congress has not even sworn in its new members, yet already it is playing politics'' by holding hearings on the administration's gulf policies.

He told the governors they ''can deliver the president's message yourselves, instead of relying on congressional hearings or interpretation by the media.''

''As all of you know, in recent weeks Congress has felt obliged to have hearings on the Persian Gulf,'' he said.

''They felt compelled to have hearings, but not compelled to allow the full Congress to vote on the actions taken by the president. After all, Congressmen like hearings because they are allowed the luxury of criticism without the burden of accountability.''

He told the governors ''we need your able assistance'' to pass on the administration's stand.

''Then you, in turn, can deliver the president's message yourselves,'' he said ''instead of relying on congressional hearings or interpretations by the media.''

There have been reports that the administration was preparing to kick off a campaign against Capitol Hill critics who are urging the administration to permit time to let the economic sanctions work against Iraq's Saddam Hussein.

Quayle's remarks appeared to be in line with the new stratgegy.

He said a majority of American people bleieve that the United States ''should

take all action necessary, including the use of military force, to compel Iraq to withdraw from Kuwait.''

''Once again, the American people are ahead of Congress,'' he declared.

Quayle said that the American people ''know that unless he (Saddam Hussein) is stopped today, a nuclear armed Iraq will control the bulk of the world's energy supply tomorrow, thereby holding a gun to all of our heads.''

The vice president scoffed at those who have counseled patience. ''George Bush is cautious,'' he said. ''But patience at any price would be a failed policy.''

He said tha Bush ''recognizes that there must be limits to our patience.''

Furthermore, he contended that ''rightly or wrongly the world would attribute such patience to a lack of resolve. Unlimited patience with Saddam would lead to appeasement of Saddam,'' he declared. ''This is unacceptable.''

Quayle also said that Bush ''is not about to enter into negotiations with Iraq - protracted or otherwise.''

WASHINGTON (DEC. 10) UPI - As part of an overhaul of the nation's space program, NASA should build a new unmanned rocket to take over many of space shuttle's duties and shrink the proposed space station, a White House report urged Monday.

The shuttle, the centerpiece of the U.S. space program, is too expensive and too risky for the nation to depend on and is unnecessary for many goals of space exploration, such as building a space station, the report said.

Instead, NASA should spend several billion dollars to develop a new launch system that could carry cargo into space for less money and without the risk of losing human life, and perhaps eventually be modified to carry astronauts, it said.

The recommendations came from the 12-member Advisory Committee on the Future of the U.S. Space Program, which was formed in July at the request of the White House to perform a comprehensive review of NASA.

The review came amid a storm of criticism of the space agency sparked by the embarrassing discovery that the long-awaited $1.5 billion Hubble Space Telescope was defective and fueled by the grounding of the space shuttle fleet by hydrogen leaks.

Although the committee resisted calls for a radical restructuring of the agency, the panel concluded NASA has been ''trying to do too much'' with not enough money or time.

''America's civil space program is at a crossroads,'' panel chairman Norman Augustine said. ''NASA is neither as troubled as some would suggest but not nearly as good as it will have to be to carry out the kind of space program that we recommended.''

NASA should focus on two goals - a ''Mission to Planet Earth,'' which would involve launching a set of satellites to study Earth's environment, and a ''Mission from Planet Earth,'' which would involve exploring Mars, the panel said.

As such, the controversial proposed space station Freedom, which Congress ordered NASA to redesign, should be made less complex and expensive and should focus on helping prepare for long space flights and microgravity research.

The panel also suggested a number of bureaucratic changes, including implementing a new personnel system and perhaps how it operates centers around the country to avoid counterproductive competition, the report said.

In calling for reducing the role of the shuttle, the panel concluded what NASA has previously acknowledged - that there is a strong likelihood that a shuttle will explode again as it did in the 1986 Challenger disaster.

In hindsight, the panel said it was a mistake to risk seven human lives and one-fourth of the shuttle fleet to place a communications satellite in orbit - the primary goal of the Challenger mission.

Humans should continue to travel into space, but only when necessary, the panel said.

''We're concerned that the space shuttle may be the thin reed that supports our entire civilian space program,'' said Augustine, chairman of the Martin Marietta Corp. in Bethesda, Md.

''We can't count on not losing another space shuttle in the not-too- distant future,'' he told a crowded news conference. ''In fact it would not be at all surprising to us that we would lose at least another shuttle before the space station is on orbit. Because of that, I think we need to prepare ourselves both emotionally and in terms of hardware and infrastructure.''

NASA Administrator Richard Truly, stressing the space program is as safe as possible but ''it's a risky business,'' said his agency would take ''each of the recommendations most seriously.''

Vice President Dan Quayle, who heads the National Space Council, said the

panel would meet in six months to determine what progress NASA had made on the recommendations, which Quayle said would give NASA a ''needed shot in the arm.''

#90344u1825 12/10/1990 ~United Press International

WASHINGTON (UPI) (DEC. 10) UPI - Lithuanian President Vytautas Landsbergis Monday asked President Bush for ''some sort of political protection'' to help Lithuania in its quest for independence from Soviet rule.

Landsbergis told reporters, ''I have reason to believe the president will take action.''

The Lithuanian leader was on a private trip to the United States after meeting with leaders in Canada. During the 30-minute Oval Office meeting, he said, ''The president promised he would consider various options after consultations with his advisers.''

Landsbergis said he would like the United States ''to make very clear statements'' regarding the sovereign rights of Lithuania, and he noted that in 1920 the Soviet Union affirmed those rights in a treaty.

But in 1940, Moscow annexed Lithuania, Latvia and Estonia. However, the United States has never recognized the annexation of the three Baltic states and views them under occupation.

''My meeting today with President Bush has given me a great deal of confidence with the United States,'' he said. ''The Republic of Lithuania is being attacked by the Kremlin through various means. We are being threatened with economic catastrophe and military action against us. Therefore, the purpose of my trip was to ask for some sort of political protection.''

White House press secretary Marlin Fitzwater said in a written statements that Bush ''reaffirmed United States policy pertaining to th Baltic States'' and told Landsbergis the United States supports ''the right of Lithuania and the other Baltic states to self determination.''

''The president added that the United States has never recognized the forcible incorporation of the Baltic States into the U.S.S.R. and assured President Landsbergis that this policy would not change,'' Fitzwater said.

He added that Bush indicated that he and other senior administration officials had made this point directly on more than one occasion to senior Soviet officials.

Fitzwater also stressed the United States wants a peaceful solution to the problem between the Baltic States and the Soviet Union.

#90344u1833 12/10/1990 ~United Press International

UNITED NATIONS (DEC. 10) UPI - The U.N. Security Council delayed again Monday a debate on whether to hold an international peace conference on the Middle East because of U.S. opposition, diplomats said Monday.

The 15-nation council met formally for about three minutes Monday afternoon and suspended the session to see if further negotiations between American and non-aligned diplomats can devise a compromise resolution on the conference.

The council met Saturday night after U.S. Ambassador Thomas Pickering and Malaysian Ambassador Ismail Razali held day-long negotiations on a resolution to be voted on, but the vote was postponed until Monday because the document was not ready.

Pickering and Razali, who negotiates on behalf of four non-aligned countries, were unable to produce a resolution when the council reconvened Monday afternoon, diplomats said.

In addition, diplomats in general saw no urgent need to convene the conference because of the gap between Israelis and Arabs.

They said the Security Council's next meeting on the Middle East conference may take place Wednesday, a day after President Bush and Israeli Prime Minister Yitzhak are to meet in Washington. They said they wanted to wait also for results of meetings in Houston Monday between Secretary of State James Baker and Soviet Foreign Minister Eduard Shevardnadze.

The Soviet Union's U.N. ambassador, Yuliy Vorontsov, said there have been Middle East problems for 40 years and a ''few more days'' of discussions are needed. He said negotiations between Pickering and Razali made progress but he did not elaborate.

Other diplomats, who asked for anonymity, said the council was not ready to discuss the convening of a conference to resolve the Arab- Israeli conflict.

At issue is a draft resolution supported by Malaysia, Cuba, Colombia and Yemen the four non-aligned in the council, that was submitted for a vote in early October. The draft seeks more protection for Palestinians in the Israeli-occupied West Bank and Gaza Strip since the Oct. 8 riots on the Temple Mount. At least 17 Palestinians were killed by Jerusalem police who intervened to stop rock-throwing Palestinian demonstrators.

The council delayed action on the draft because the United States opposes a U.N.-organized Middle East conference with the participation of the Palestine Liberation Organization. Washington is reluctant to veto the draft because it needs the Arab coalition to fight Iraqi President Saddam Hussein, whose troops invaded Kuwait Aug. 2.

Diplomats said several options were discussed to break the impasse in the debate on the Middle East conference. One is to call for the international meeting but defer it at a later date, or have it announced by the president of the council instead of including it in the resolution, which has for effect to

be less effective and non-binding on all U.N. member states.

The non-aligned wanted Secretary-General Javier Perez de Cuellar to appoint a commissioner for the West Bank and Gaza Strip, a move strongly opposed by Israel.

#90344u1837 12/10/1990 ~United Press International

(DEC. 10) UPI - 156 American hostages released by Iraq are due to land shortly at Andrews Air Force Base outside Washington. The Americans are among hundreds of Western hostages freed by Saddam Hussein four months after Iraqi tanks invaded Kuwait.

President Bush today finally acknowledged to being a bit tired and said he's been hit with ''a touch of the flu.'' The admission follows six weeks of heavy travel that took him from Massachusetts to California, from Europe to the Persian Gulf and from South America to the White House tennis court.

The Food and Drug Administration today approved a new contraception option for women for the first time since the birth control pill. The implantable birth control device called Norplant lasts up to five years and appears as safe and effective as the pill.

A new report suggests environmental factors other than cigarette smoking may play a significant role in boosting cancer rates in industrial nations. It says a greater percentage of people appear to be developing cancer and dying from the disease in developed nations than ever before.

A San Antonio judge today dismissed an obscenity charge against a Texas record store owner for selling a copy of an album by the controversial Miami rap group 2 Live Crew. David Risher had been charged with promoting obscene material.

In Los Angeles, actor Corey Feldman pleaded NO contest today to three drug possession charges. The 19-year-old, who appeared in ''Stand By Me, '' ''Goonies'' and ''Lost Boys,'' was placed on four years probation, fined five-thousand dollars and ordered to complete his stay at a live- in drug rehabilitation center.

#90344u1855 12/10/1990 ~United Press International

WASHINGTON (DEC. 10) UPI - Navy Secretary Lawrence Garrett said Monday three senior Navy officers had trouble with the idea of telling senior Pentagon officials bad news about their aircraft program.

One admiral was ordered to retire, a second was censured and transferred and a

third was censured and given a different reporting chain of command following the revelation that the A-12 Avenger was at least $1 billion over budget and 18 months behind schedule. Defense Secretary Dick Cheney had said development of the plane was on time and within its budget.

Garrett, testifying to the House Armed Services Committee about a major embarrassment both for Cheney and the Navy, said the officers had access to data that warned of problems with the plane, under development by General Dynamics and McDonnell Douglas and designed to replace the carrier-based A-6 bomber.

''It was a human error in judgment. ... There was raw data that was received from the contractors ... that properly outlined and properly reported ... that we had a serious problem,'' said Garrett.

''The problem is we have developed over many years a system that is almost adversarial and at the same time it creates advocacy. It is very hard to push bad news up to the top,'' said Garrett.

He told the panel that ''people are very reluctant if they think their program is going to be harmed ... they bring forward the best face on the situation at hand.''

As a result of the probe into the program's problems, the head of the Naval Air Systems Command, Vice Adm. Richard Gentz, was ordered to retire. Rear Adm. John Calvert, the A-12 program executive, and Capt. Lawrence Elberfeld, the program manager, were censured and will be reassigned.

Elberfeld was in line to become an admiral, and Garrett opted to let him get the promotion. But at the hearing, Rep. Andy Ireland, R-Fla., said he has asked President Bush to deny the promotion to Elberfeld.

WASHINGTON (DEC. 10) UPI - The Federal Reserve Board Monday approved the acquisition of DeNovo Florida Federal Savings Bank, of Tampa, Fla., by a unit of NCNB Corp., of Charlotte, N.C.

DeNovo has been formed to acquire the assets as assume the liabilities of two branches of American Savings and Loan Association, of Miami. NCNB, with assets of $69.2 billion, operates banking subsidiaries throughout the Southeast and is the fifth-largest banking concern in Florida.

The two American branches to be acquired by NCNB control $24 million in deposits in Hernando Country. The Fed said the acquisition would not have a significant adverse effect on bank competition in Florida.

#90344u1900 12/10/1990 ~United Press International

WASHINGTON (DEC. 10) UPI - With memories of horror and tears of joy, 156 former American hostages returned to the United States Monday, among the first Westerners freed under Saddam Hussein's order to release all ''guests.''

Hundreds of family members, many waving American flags and wearing yellow ribbons, cheered as a U.S.-chartered Boeing 747 jumbo jet carrying their loved ones landed at suburban Andrews Air Force Base, Md. , at 4:45 p.m. EST.

''This is wonderful,'' exclaimed Ann Daher of Delmont, Pa., whose son, George Daher, 50, had hid out in Kuwait since Iraq's Aug. 2 takeover of the oil-rich nation.

The former hostages were initially greeted on the plane by State Department officials and then taken by bus to an athletic complex at the Air Force base. They are to spend the night at area hotels.

''I loved leaving Kuwait,'' said Paul Brown of Columbus, Ohio, who had holed up at the U.S. Embassy in Kuwait for more than three months.

Daher and Brown were among those Americans who came out of hiding so they could return home. They left Kuwait and Baghdad on Sunday and flew to Frankfurt, Germany, before beginning the final leg of their freedom flight Monday.

They left Iraq aboard a U.S.-chartered Iraqi Boeing 747, but switched planes in Frankfurt to a U.S.-chartered Pan Am 747 for the eight-hour trip to Washington.

White House press secretary Marlin Fitzwater spoke in reserved terms about the release and declined to predict when an estimated 575 other Americans would be permitted to return home.

''We remain cautious and concerned until everyone of them is on our soil because we have no control of what they (the Iraqis) might do,'' Fitzwater told reporters.

Fitzwater said the administration had no indication that Iraq was trying to delay the release, but said, ''It remains to be seen if this pace of release continues.''

A second U.S.-chartered Boeing 747 is to leave Baghdad on Tuesday, but Fitzwater said even after this one arrives, other Americans are expected to still be in Kuwait and Iraq.

State Department officials have said that some Americans may have not yet

received the word from Voice of America broadcasts to come out of hiding and to report to the airports in Kuwait and Baghdad. Others may choose to stay, they said.

A State Department spokesman said there were 156 Americans on the chartered plane to Andrews Monday. They were joined by 32 other Westerners.

Fitzwater said he had no indication that any Americans were still being held by Saddam as ''human shields,'' but refused to rule it out.

Saddam announced last week that he was freeing the hostages and hoped that all would be home by Christmas. Fitzwater said, ''The president's initial statement - 'I'll believe it when I see it' - still stands.''

The press secretary said, ''We will continue to take people out as fast as we can, as fast as we are allowed.''

The Americans who left Kuwait and Iraq Sunday were joined by hundreds of other Western hostages headed home. They came from more than half dozen nations, including Italy, Japan, Canada, Great Britain and Holland.

The former American hostages cheered and cried as they stepped off their plane in Frankfurt late Sunday and into the arms of joyous relatives.

American Matthew Allen fought back tears as he described the burned cars and garbage heaps that littered the streets of the Kuwaiti capital.

WASHINGTON (DEC. 10) UPI - House and Senate delegations are heading for Saudi Arabia this week to meet with American service personnel as well as Saudi Arabian, Israeli and Egyptian leaders.

Rep. Anthony Beilenson, D-Calif., is leading a 19-member bipartisan House delegation. They will leave Tuesday and return Dec. 15.

The House members plan to meet with U.S. and Saudi forces in Saudi Arabia and meet with leaders in Saudi Arabia and Israel.

The eight-member Senate delegation will be led by Senate Democratic leader George Mitchell of Maine. They plan to leave Thursday and return Dec. 20.

''It is important for members of Congress to have first-hand knowledge of the serious issues in the Persian Gulf. Through meetings with our allies, briefings with U.S. military commanders and discussions with our servicemen and women in Saudi Arabia, I am hopeful that this trip will increase our understanding of the issues in the Middle East,'' Mitchell said.

The senators will travel to Jeddah, Saudi Arabia, where they are scheduled to meet with King Fahd. Following military briefings and meetings with service personnel in Dhahran, the delegation plans to travel to Cairo, where they are scheduled to meet with Egyptian President Mubarak and other officials. The senators also plan to travel to Jerusalem to meet with Israeli officials.

The House delegation includes Democrats Beilenson, Butler Derrick of South Carolina, Barbara Kennelly of Connecticut, Thomas Lantos of California, George Darden of Georgia, Mel Levine of California, William Richardson of New Mexico, Wayne Owens of Utah, Michael McNulty of New York, Donald Payne of New Jersey, William Sarpalius of Texas and J. Glen Browder of Alabama.

The House Republicans, lead by Henry Hyde of Illinois, are David Dreier of California, Herbert Bateman of Virginia, James Saxton of New Jersey, Barbara Vucanovich of Nevada, Elton Gallegly of California and James Inhofe of Oklahoma.

The Senate delegation, all of whom are Democrats, include Mitchell, Max Baucus of Montana, Richard Bryan of Nevada, Bob Graham of Florida, Herbert Kohl of Wisconsin, Charles Robb of Virginia, Richard Shelby of Alabama and Paul Simon

of Illinois.

#90344u1944 12/10/1990 ~United Press International

WASHINGTON (DEC. 10) UPI - The former U.S. Customs Service chief, defending actions by the Keating Five senators, told a Senate panel Monday members of Congress should be able to do anything they want to pressure executive branch officials as long as it is ''not unlawful.''

On the 15th day of hearings before the ethics committee, William von Raab, customs commissioner from 1981-89, was one of several witnesses who testified on behalf of Sen. Dennis DeConcini, D-Ariz.

The committee must decide whether Sens. Alan Cranston, D-Calif., DeConcini, John Glenn, D-Ohio, John McCain, R-Ariz., and Donald Riegle, D-Mich., improperly pressured bank regulators to benefit indicted former savings and loan operator Charles Keating Jr., who made $1.3 million in political contributions to the lawmakers. Cranston and DeConcini increasingly have become the focus of allegations of improriety.

Countering testimony from several of the regulators who accused the senators of improper conduct, von Raab defended the right of elected representatives to oppose vigorously decisions of executive branch and regulatory agencies.

''Whatever the approach the senator took - as long it was not unlawful - was acceptable to me,'' von Raab testified.

''If someone tried to bribe me or tried to get a constituent to pay me, that would certainly be too much. ... I've had it all. I've had vulgar language. I've had obscenities. I've had 'I'm going to get you fired.' I've had everything and I know that (as an agency head) I have the ultimate decision.''

Von Raab said he scrutinized notes of an April 9, 1987, meeting between the five senators and four regulators, one of two 1987 meetings that form the backbone of the case against the lawmakers.

''I have been through exercises similar to this many, many times,'' von Raab testified. ''I didn't think they were improper when I was (the customs commissioner) ... and I don't see what was improper here.''

Von Raab also indirectly criticized a fellow Reagan administration official, former Federal Home Loan Bank Board Chairman Edwin Gray, who was an important witness against the senators.

Gray met with the senators on April 2, 1987, but said he was unable to answer detailed questions by the senators about a continuing investigation of Keating's troubled Lincoln Savings and Loan of Irvine, Calif. One week later,

Gray sent four subordinates to meet with the Keating Five to provide further information.

''It is the agency head's responsibility to deal with members of Congress,'' von Raab testified. ''So I think it is inappropriate and unfair, if not somewhat cowardly, to pass a hot potato to a subordinate. ''

Later, former Keating employee David Stevens, former tax director for Lincoln's parent company, American Continental Corp., testified that he believed McCain had not intended to reimburse the ACC for thousands of dollars in air fare for family members on flights on corporate jets in the mid-1980s.

Stevens said McCain reimbursed the company for his own air fare, but made reimbursements for the family members' fares only after an ''onslaught of adverse publicity.'' McCain has paid ACC $15,433 in reimbursements. Stevens estimates the total reimbursements should have been about $16,870.

Stevens later testified he had no way of knowing McCain's true intentions and indicated he had a grudge against the senator, saying, ''From my perspective, Senator McCain left at the first sign of trouble. '' McCain had a falling out with Keating in March 1987 after Keating called the senator a ''wimp,'' witnesses have said.

Lincoln failed in 1989, becoming the largest collapse in the nation's S&L scandal and costing taxpayers some $2 billion to bail out. Keating has been indicted on state securities and fraud charges in California and is the target of a continuing federal grand jury probe.

#90344u2012 12/10/1990 ~United Press International

MANAGUA, Nicaragua (DEC. 10) UPI - The government devalued the cordoba currency by 7 percent against the U.S. dollar, pushing prices for gas and other petroleum products higher, the Central Bank said Monday.

But the bank did not devalue the new cordoba oro currnecy, which remains fixed at a one-for-one exchange rate with the dollar.

The cordoba was devalued to 2.3 million to the dollar from theprevious exchange rate of 2.14 million, the bank said.

One dollar on the black market bought 2.5 million cordobas Monday, up from earlier rates of between 2.22 million and 2.4 million cordobas.

The Central Bank said the devaluation increased prices of petroleum products by an average of 7 percent.

The price for a gallon of gasoline rose to 5.4 million cordobas, or $2.35,

while diesel and kerosene prices rose to 3.3 million cordobas, or $1.45, a gallon.

#90344u2027 12/10/1990 ~United Press International

CINCINNATI (DEC. 10) UPI - Eagle-Picher Industries Inc. said Monday three plaintiffs in a personal-injury asbestos suit have filed a petition to force the company into involuntary bankruptcy.

The company called the action, filed in U.S. Bankruptcy Court in Cincinnati ''totally without merit.'' The company said it was meeting all of its obligations to vendors, creditors and lenders on a timely basis.

''The company does not believe that any of the three have standing to bring the petition because one has already been paid and the other two have not submitted the releases which are a condition to payment,'' Eagle-Picher said in a statement.

''We believe that this filing is an act of desperation on the part of certain members of the plaintiffs' bar, whose goal is to sabotage efforts currently under way for a class-action solution to the litigation,'' said Chairman Thomas E. Petry.

''This class action would break the massive backlog of asbestos personal injury claims that is choking this country's state and federal judicial systems,'' he said.

Petry said the company intended to ask for an expedited ruling on the filing and seek court-ordered reimbursement for costs and damages to the business that may be incurred because of the petition.

#90344u2040 12/10/1990 ~United Press International

WASHINGTON (DEC. 10) UPI - Navy Secretary Lawrence Garrett said Monday three senior Navy officers had trouble with the idea of telling senior Pentagon officials bad news about their aircraft program.

One admiral was ordered to retire, a second was censured and transferred and a third was censured and given a different reporting chain of command following the revelation that the A-12 Avenger was at least $1 billion over budget and 18 months behind schedule. Defense Secretary Dick Cheney had previously said development of the plane was on time and within its budget.

Garrett, testifying to the House Armed Services Committee about what has become a major embarrassment both for Cheney and the Navy, said the officers had access to data that warned of problems with the plane, under development

by General Dynamics Corp. and McDonnell Douglas Corp., the St. Louis-based contractors on the A-12 program. The plane is designed to replace the carrier-based A-6 bomber.

''It was a human error in judgment. ... There was raw data that was received from the contractors ... that properly outlined and properly reported ... that we had a serious problem,'' said Garrett.

''The problem is we have developed over many years a system that is almost adversarial, and at the same time it creates advocacy. It is very hard to push bad news up to the top,'' said Garrett.

He told the panel that ''people are very reluctant if they think their program is going to be harmed. ... They bring forward the best face on the situation at hand.''

As a result of the probe into the program's problems, Vice Adm. Richard Gentz, head of the Naval Air Systems Command, was ordered to retire.

Rear Adm. John Calvert, the A-12 program executive, and Capt. Lawrence Elberfeld, the program manager, were censured and will be reassigned. Elberfeld was in line to become an admiral, and Garrett opted to let him get the promotion.

But at the hearing, Rep. Andy Ireland, R-Fla., said he has asked President Bush to deny the promotion to Elberfeld.

COLLEGE PARK, Md. (DEC. 10) UPI - The NCAA will not further punish the University of Maryland for infractions committed by Coach Gary Williams and some members of his basketball staff, the governing body said in a letter the school received Monday.

Williams and some of his assistants watched a preseason pickup basketball game during the fall semester of 1989, and issued practice equipment during the summer of 1990. Both acts are violations of NCAA rules.

As self-punishment, the staff involved were reprimanded and this season's opening of practice was delayed for five days until Oct. 20.

In a letter signed by David Berst, the NCAA's assistant executive director for enforcement, said: ''Please note that the committee (NCAA committee on infractions) has accepted the university's actions as appropriate in this matter and concluded that no additional penalty should be imposed by the committee.''

University President William Kirwan said ''the actions of the athletic department in taking decisive measures in the face of violations has resulted in this positive report from the NCAA.''

Said Athletic Director Andy Geiger: I am most pleased by the NCAA's action. It is good news, but it is also time to move forward with the ''

The Maryland Terrapins already are on probation this basketball season because of violations committed before Williams took over as head coach on June 13, 1989. Maryland cannot appear on television and is barred from receiving an NCAA tournament berth.

''All concerned have been given the message of the importance of knowing and complying with the rules and regulations governing our activities,'' Geiger said.

#90344u2057 12/10/1990 ~United Press International

MIAMI (DEC. 10) UPI - The Miami Dolphins have clinched their first playoff berth since 1985, and they are not only pleased with the return to postseason play, but how they did it.

''I just got word that we're in. Yea,'' said Coach Don Shula with a grin. ''Of course, that was our first goal going into the season. We've now accomplished that, so we were all pretty happy when that news came.''

The NFL office figured out late Sunday night, hours after Miami's 23- 20 overtime victory over the Philadelphia Eagles that the win coupled with Cincinnati's loss to the San Francisco 49ers assures Miami of a wild-card playoff berth.

The Dolphins, 10-3, are still only a game behind Buffalo for the lead in the AFC East and play the Bills, 11-2, at Buffalo Dec. 23. The winner of the AFC East seems certain to wind up with the best record in the conference. That will mean a bye in the first round of the playoffs and the home field advantage throughout.

''All of us know what the importance is of what goes on the last three ball games and the competition with Buffalo for the home field advantage,'' Shula said. ''We'd much rather play here than travel.''

Miami finishes its schedule by playing Seattle at home Sunday, Buffalo on the road and Indianapolis at home in the regular-season season finale. Buffalo plays at the New York Giants Sunday and then after the game with the Dolphins, plays at Washington.

Miami put itself in position to overtake the Bills with a Dan Marino- led rally that began in the last half of the last quarter Sunday night.

The Eagles took a 20-10 lead with 10 minutes to go, but Miami roared back with a six-yard touchdown pass from Marino to Mark Duper and a 34- yard field goal by Pete Stoyanovich to tie the score in regulation.

After an exchange of three punts, Miami took the ball down to the 22 where Stoyanovich kicked a 39-yard field goal.

''It was such a good game. It makes it much more enjoyable that we clinched a playoff spot,'' said receiver Jim Jensen, who had key catches in both the drive to tie and the winning drive in overtime.

There was more to the win than winning a playoff spot. The Dolphin players took a great deal of pride in beating a team from the NFC that most people consider to be a tough, physical opponent. The Dolphins' losses have been to the New York Giants, the Washington Redskins and the Los Angeles Raiders.

All have been able to run the ball up the middle on the Miami defense and to shut down the Dolphins' running game.

''This was a big victory because our previous losses were to physical teams,'' veteran running back-receiver Troy Stradford said. ''Not only did we beat a physical team, but we won it in overtime in an important game.''

#90344u2062 12/10/1990 ~United Press International

(DEC. 10) UPI - 156 former American hostages returned home late today... in an emotional arrival at Andrews Air Force Base outside Washington. They had flown from Frankfurt, Germany aboard a U-S-Chartered Pan Am 747 among the first wave of Westerners released under Saddam Hussein's new order. Among those returning was Paul Brown of Columbus, Ohio. Brown said- ''I loved leaving Kuwait.'' Brown had holed up at the U-S Embassy in Kuwait since shortly after Iraq's August 2nd invasion.

A White House reports recommends a major overhaul of NASA. The report says that as part of the changes, the space agency should build a new unmanned rocket to take over many of the space shuttle's duties. It says the shuttle is too expensive and too risky. It also suggests NASA shrink the proposed space station. The report comes amid a storm of criticism of NASA including crippling hydrogen leaks and the embarrassing discovery that the long-awaited BILLION-dollar Hubble Space Telescope was defective.

Garbage is piling up in New York amid a strike by more than two- thousand sanitation workers. The members of Teamsters Union local 813 walked off the job late last night after rejecting a new contract. It's the Big Apple's first

garbage collection strike in nine years. Businesses today scurried to find alternative ways to handle their garbage, urging tenants by leaflet to cut down on paper use and ''double bag'' perishable rubbish.

In Los Angeles, seven deputies were convicted today in the worst corruption scandal to hit the L-A County Sheriff's Department. Six were convicted of stealing seized drug money... and a seventh was found guilty of laundering thousands of dollars. A federal jury returned the guilty verdicts on its seventh day of deliberations in the case. The jury acquitted three deputies on three counts involving the alleged theft of more than a half-Million dollars from drug traffickers.

The Food and Drug Administration has approved an implantable birth control device for women that lasts up to five years. The F-D-A's long- awaited action on Norplant was hailed by family planning groups as a major step towards widening the contraceptive options available to American women. The F-D-A says the device appears as safe and effective as birth control pills.

#90344u2063 12/10/1990 ~United Press International

SPRINGFIELD, Ill (DEC. 10) UPI - Illinois corrections officials said Monday they will resume selling inmate-produced tax-free cigarettes to counties for resale to their prisoners, reversing an earlier decision.

The cigarettes, nicknamed ''states,'' are made by inmates at the Menard Correctional Center. For years, county jails such as St. Clair and Madison have purchased 75 to 100 cases of the smokes annually.

The state had stopped selling the tobacco products to the jails because the U.S. Bureau of Alcohol, Tobacco and Firearms advised the Corrections Department it could try to collect more than $450,000 in back taxes if the state continued its sale of the tax-free tobacco products.

''Several weeks ago, on the advice of our attorneys, we stopped selling them to counties,'' said Corrections spokesman Nic Howell.

That had some sheriffs fuming.

''What you have is the federal government trying to tax the state,'' said St. Clair County Sheriff Mearl Justus. ''That's nuts. One taxing body taxing another is like the Internal Revenue Service investigating the post office. Who do you root for?''

A non-smoker himself, Justus worried the lack of cigarettes in ''the cooler'' might cause county jails to heat up.

''Cigarettes take the edge off. You have people coming in here who are already

on edge, and a cigarette works like a a tranquilizer for them. If we take them away, I think we're inviting trouble,'' Justus said.

Cigarettes were purchased with money from the inmates' commissary.

Howell said attorneys with the Corrections Department have taken another look at the issue.

''There's a new opinion. It says we can go forward,'' Howell said. ''We've got documentation from ATF that says we can.''

Howell added state prison industries produce dozens of items, which are usually sold to the Corrections Department, other state agencies, other governmental agencies and a few non-profit groups.

The cigarettes carry the names ''Pyramids'' and ''Southern Lights'' and Madison County Sheriff Sheriff Bob Churchich said they are not worth a trip to jail, even at 45 cents a pack.

''If you have the guts enough to smoke those things, you ought to be in jail '' Churchich said of the ''states,'' which he said are bought for their price - not their flavor.

#90344u2183 12/10/1990 ~United Press International

(DEC. 10) UPI - Amid tears of joy today, 156 former American hostages landed at Andrews Air Force Base outside Washington this afternoon with hundreds of family members cheering and waving American flags and wearing yellow ribbons. Ann Daher of Delmont, Pennsylvania, whose son George had hid out in Kuwait, exclaimed- ''This is wonderful.'' The former hostages were taken by bus to an athletic complex at the Air Force base and will spend the night at area hotels.

The U-N Security Council has delayed again a debate on whether to hold an international peace conference on the Middle East because of U-S opposition. Diplomats say the 15-nation council met formally for about three minutes this afternoon and suspended the session to see if further negotiations between U-S and non-aligned diplomats can devise a compromise resolution on the conference.

Lithuania is asking the United States for ''some sort of political protection'' to help the Baltic republic in its quest for independence from the Soviet Union. Lithuanian President Vytautas Lansbergis told reporters in Washington- quote- ''I have reason to believe the president will take action.'' The Lithuanian leader met with President Bush for 30 minutes in the Oval Office. He said Bush promised he would consider various options after consultations with his advisers.

In Houston, federal officials say nine men have been indicted for their

alleged roles in a cocaine smuggling ring that brought more than 11 tons of the drug into the United States. Officials say the ring also allegedly laundered more than 30-Million dollars in drug proceeds in the United States. Officials say the cocaine was smuggled from Mexico into the Rio Grande Valley, where it was kept in a ''stash house'' until it could be moved to Houston. From there, the drug was distributed throughout the country.

A federal judge in Sacramento, California, today sentenced a former state senator to 12 years in federal prison for political corruption. 63-year-old Paul Carpenter stood silently and showed NO emotion as U-S District Judge Edward Garcia handed down the sentence. It was a bit less than the 15 years that prosecutors had recommended. But it was nearly twice the six-and-one-halfyears given to former Senator Joseph Montoya, who was sent to prison in an F-B-I sting investigation aimed at Capitol corruption.

#90344u2197 12/10/1990 ~United Press International

SAN FRANCISCO (DEC. 11) UPI - The Pacific Stock Exchange, faced with a declining volume of business said Monday that it is taking steps to reduce operating costs in 1991, including cutting as many as 40 jobs from its staff.

The PSE, which operates trading floors in Los Angeles and San Francisco, said that the cost savings will be achieved through cuts in general operating expenses, additional efficiencies through new technology, and a 7 to 9 percent reduction in the PSE's 436-employee staff, through attrition and lay-offs.

''The securities industry has been hard-pressed by lower trading volumes since 1987,'' said PSE Chairman and Chief Executive Officer Lee Korins.

The PSE has reported a nine-month loss so far this year of more than $1 million.

The exchange's year-to-date options volume is 24 percent below 1989 trading activity. Its equities volume has fallen 8 percent, but the value of stocks traded is off 15 percent.

''In many ways, we've fared better than other exchanges and most Wall Street firms under these conditions,'' Korins said. ''But as we look ahead, the realities of the 1990s dictate lean, efficient operations to remain competitive.''

#90344x0865 12/10/1990 ~Comtex
WASHINGTON (DEC. 10) UPI - Vice President Dan Quayle attended the Redskins-Bears football game at RFK Stadium, and said he was rooting for Washington despite his Midwest heritage.

Quayle, along with wife Marilyn, sat in the mezzanine-level box of Redskins owner Jack Kent Cooke.

Asked Sunday who he was cheering for, the vice president said during halftime, ''the Redskins,'' even though his home town of Huntington, Ind., is just 130 southeast of Chicago.

Washington beat the Bears, 10-9, rallying from a 9-0 halftime deficit.

Accompanying Quayle to the game were two police sharpshooters perched below a bank of lights along the rim of the stadium.

Also a guest of Cooke's was Virginia Gov. Douglas Wilder.

#90344x0977 12/10/1990 ~Comtex

LANDOVER, MD (DEC. 10) UPI - The Washington Bullets Monday waived guard Larry Robinson, who had been on the injured reserve list since Nov. 27 with tendinitis in his left ankle.

Robinson was moved to the injured list when guard Ledell Eackles, who missed training camp and the beginning of the season in a contract dispute, returned to the team.

Robinson, who started 10 of the Bullets' 19 games, averaged 6.7 points per game and 2.4 assists for Washington.

''It is with great reluctance that we waive Larry Robinson,'' said Bullets General Manager John Nash. ''He has a great work ethic, a fluid style of play and the potential for an NBA career. But with the return of Ledell Eackles, we were forced to make a roster move.''

While at Centenary College in Louisiana, Robinson was the Trans America Athletic Conference's 1989-90 Most Valuable Player after leading his team to its first conference championship.

Another change on the roster looms for the Bullets. Forward John Williams is still on the suspended list. Williams skipped all of training camp in a dispute with the team over rehabilitation of a knee he injured in December 1989. He missed the rest of last season, gained at least 40 pounds and is not expected to get into playing shape until next month.

Once he is ready to return, the Bullets will have to move someone off the roster.

#90344x1747 12/10/1990 ~Comtex

NEW YORK (DEC. 10) UPI - CBS has reshuffled its Friday night schedule, cancelling ''Bagdad Cafe,'' putting ''Over My Dead Body'' and ''Uncle Buck'' on hiatus, and replacing them with ''Guns of Paradise'' and the long-delayed ''Sons and Daughters,'' it was announced Monday.

''Bagdad Cafe,'' starring Whoopi Goldberg and Jean Stapleton, had its last broadcast Nov. 23, ''Uncle Buck'' is already off the air and ''Over My Dead Body,'' starring Edward Woodward, goes off after Dec. 21.

The network announced that ''Body'' and ''Buck'' would return at a future date.

''Guns of Paradise,'' the family western starring Lee Horsley, returns for its third season Friday, Jan. 4, 8-9 p.m. Eastern time.

''Dallas'' shifts to its old 9-10 p.m. slot on that date, making room at 10-11 p.m. for ''Sons and Daughters,'' a family comedy-drama starring Lucie Arnaz, Rick Rossovich and Don Murray. The show about the Hammersmith family was to have premiered in the fall at the start of the 1990-91 television season.

NEW YORK (DEC. 11) BUSINESS WIRE - Times Mirror (NYSE/PSE:TMC), expecting the advertising slowdown to continue in the months ahead, remains cautious about its outlook for 1991, said Chairman and Chief Executive Officer Robert F. Erburu at Tuesday's PaineWebber Media Outlook Conference in New York.

Erburu noted that expectations for the fourth quarter and 1991 remain highly favorable for Times Mirror's non-advertising-dependent businesses, particularly its professional information and book publishing and cable television operations.

However, overall company performance likely will continue to be weakened by the impact of the most severe slump in more than a decade on the company's advertising-related revenue base. In the fourth quarter to date, Times Mirror has seen further deterioration in advertising revenues.

Times Mirror, a Los Angeles-based media and information company, publishes the Los Angeles Times, Newsday and New York Newsday, the Baltimore Sun newspapers, The Hartford Courant, The Morning Call, The (Stamford) Advocate and Greenwich Time. The company also has interests in professional information, book and magazine publishing, cable and broadcast television.

SAN DIEGO (DEC. 11) BUSINESS WIRE - Ventura Software Inc. Monday announced the establishment of a Pacific Rim headquarters in Sydney, Australia.

Designed to offer localized contact and support for Ventura Software's family of desktop software products, the office will be responsible for marketing, managing and controlling distribution, technical support, education and training. The office will serve users in Hong Kong, Singapore, New Zealand, as well as Australia. Pacific Rim General Manager Named

Effective immediately, Graham Hobbs has been named general manager for Ventura Software Inc. Pacific Rim.

Reporting directly to Patrick Linehan, Ventura Software Inc.'s senior vice president sales and marketing, Hobbs has more than 20 years experience in publishing systems and software.

Most recently, Hobbs worked with Rank Xerox as manager of electronic publishing, supporting sales and marketing in the Pacific Rim. Prior to his tenure with Xerox, Hobbs spent 18 years with Compugraphic Corp. as regional director of the Pacific Rim business unit, where he pioneered the development of the international market for Compugraphic publishing products. Ventura Software Extends Worldwide Presence

The formation of the Australian office brings the number of worldwide Ventura Software headquarters to four, including the United States, Canada, Europe and the Pacific Rim. Pricing and Product Availability

Ventura Publisher Gold Series (DOS/GEM, Windows 3.0, Macintosh and OS/2 1.3 Editions) and FormBase 1.1 are immediately available in Pacific Rim countries.

Additionally, distributors have been signed and include: MegaVision in Australia; Xicon in New Zealand; and Imagineering, servicing Hong Kong and Singapore.

Ventura Software Inc., a Xerox company, is a leading supplier of publishing, forms processing and database software solutions. Ventura Publisher is available in DOS/GEM, Windows 3.0 and Macintosh versions. An OS/2 Edition, based on IBM Corp.'s OS/2 version 1.3, will be released by year end.

In 1991, Ventura Publisher will also be offered for the UNIX platform running under OPEN LOOK. FormBase is currently available for IBM PCs and compatibles running under Windows 3.0. The company markets its software solutions through a worldwide dealer network of more than 6,000 outlets.

Ventura Software Inc., formerly Xerox Desktop Software, has its headquarters in San Diego.

#90345b0026 12/11/1990 ~Business Wire

SAN FRANCISCO (DEC. 11) BUSINESS WIRE - McKesson Drug Co. Tuesday announced that it plans to construct a new 235,000-square-foot $14 million distribution center in Delran Township, N.J.

The new center will be constructed on a 16-acre parcel in Swedes Run Business Center which is located on Route 130, six miles from Camden. Construction is scheduled to commence in the spring of 1991 and become operational in early 1992. The center will replace a 120,000-square-foot facility at 231 Luzerne St., Philadelphia, which the company has operated since 1961. Dale Boychak is the general manager of the McKesson facility.

McKesson Drug Co., the nation's leading pharmaceutical and health care distributor, does business in the Philadelphia area under the name West Wholesale Drug Co. The new center will be one of 45 centers throughout the country and will serve McKesson's retail pharmacies and hospital customers throughout the tri-state Delaware Valley.

In the past two years, McKesson Drug Co. has opened five new distribution centers: Cincinnati, Tampa, Oklahoma City, Salt Lake City and St. Louis, bringing the company's total warehouse space to nearly 5 million square feet. All 45 centers are linked by satellite communications to a modern computer center near Sacramento where daily orders from retail pharmacies and hospitals throughout the country are processed.

McKesson Drug Co. is the major operating division of McKesson Corp., headquartered in San Francisco, America's leading distributor of pharmaceuticals and other non-durable consumer goods to pharmacies, supermarkets and mass merchandisers.

The company is also the leading distributor of bottled drinking water in the western United States, the leading maker of automotive appearance chemical products and the nation's largest manager of prescription drug benefit programs. McKesson's net income in its last fiscal year was $98 million on revenues of $7.8 billion.

#90345b0034 12/11/1990 ~Business Wire

SAN FRANCISCO (DEC. 11) BUSINESS WIRE - McKesson Corp. will open four new pharmaceutical distribution centers totaling 800,000 square feet, the company announced Tuesday.

The new facilities, located near Camden, N.J.; Atlanta; St. Louis and Phoenix, will double capacities in each market and will cost a total of $55 million.

At the same time, the company announced that it is embarking on a $10 million program to install automated order-picking equipment in the new Camden, Atlanta and St. Louis facilities. The high-speed order-picking equipment, representing state of the art materials-handling technology, is more than four times faster than semi-automated systems currently in use by the company.

Conversion of other facilities to the new high-speed automated equipment is planned.

When the four new distribution centers become operational, McKesson Drug Co. will have approximately 5 million square feet of warehouse space in 45 facilities throughout the country. McKesson is the nation's largest wholesale distributor of pharmaceuticals and health and beauty aids products to retail pharmacies and hospitals.

The new $13 million, 234,000 square foot St. Louis facility will become operational in early 1991. It is located on a 15-acre site in the city of O'Fallon, approximately 25 miles west of St. Louis. McKesson Drug Co. has operated an 86,000 square foot warehouse at 2825 S. Third St. in St. Louis since 1966. The distribution center general manager is Charles George.

The 235,000 square foot New Jersey distribution center will be constructed on a 16-acre parcel in Delran Township, six miles from Camden. The $14 million facility will serve McKesson's customers throughout the Pennsylvania/New Jersey/Delaware Valley area. The center will replace the company's 120,000 square foot Philadelphia operation which opened in 1961. McKesson does business in this market under the name of West Wholesale Drug Co.

In Atlanta the new $15 million distribution facility will be located on a 17-acre parcel in the Avalon Ridge area northeast of Atlanta. The center will also be 235,000 square feet and will replace the 134,000 square foot McKesson Drug distribution facility in Norcross, Ga., which has been in use since 1979.

In Arizona the new $10 million distribution center will be built in Goodyear, west of Phoenix. The new 180,000 square foot facility will replace an 85,000 square foot unit in Phoenix from which McKesson has served the Arizona market for the past 30 years.

The St. Louis distribution center will be operational early in 1991. When the new centers in New Jersey, Georgia and Arizona are completed in 1992, McKesson

will have increased to eight the number of new centers it has opened in the past four years at a total investment of $83 million. The others are located in Cincinnati, Tampa, Oklahoma City and Salt Lake City.

All 45 centers are linked by satellite communications to McKesson's computer center near Sacramento where daily orders from retail pharmacies and hospitals throughout the country are processed.

McKesson Drug Co. is the major operating unit of McKesson Corp., headquartered in San Francisco. McKesson Corp. is the nation's leading distributor of pharmaceuticals and other non-durable consumer goods to pharmacies, supermarkets and mass merchandisers.

McKesson Corp. is also the leading distributor of bottled drinking water in the western United States and is the nation's largest manager of prescription drug benefit programs. Its Armor All Products subsidiary is the leading maker of automotive appearance products. McKesson's net income in its last fiscal year was $98 million on revenues of $7.8 billion.

#90345b0035 12/11/1990 ~Business Wire

IRVINE, CA (DEC. 11) BUSINESS WIRE - The Infant Special Care Unit (ISCU) at the University of California, Irvince (UCI) Medical Center has begun the first clinical use of the NICU-Link.

An innovative hospital data management system, the NICU-Link will reduce the amount of time used to perform tedious manual charting by as much as 40 percent.

Until the system debuted on Nov. 1, 1990, nurses at the UCI ISCU spent nearly five hours of each 12-hour shift manually entering vital statistics, caloric intake and medicine dosages to the charts of critically ill newborns.

As the health care industry enters into an era of cost containment, hospital administrators must devise a way to deliver efficient treatment without occupying the critical care staff's time with clerical work.

Five years ago, Dr. Jack Sills, assistant adjunct professor of neonatology and director of the ISCU, addressed this issue when he proposed that the hospital acquire a data management system that would automate birth-to-discharge data collection and documentation.

Sills wanted to improve patient care by eliminating the need for manual documentation by nurses, respiratory therapists and other critical care staff.

Data could be automatically collected from bedside equipment, such as physiologic monitors, IV pumps, syringe pumps and ventilators.

The UCI Medical Center ISCU created a special task force to work in conjunction with several computer equipment and software companies to develop an innovative system to help save the lives of critically ill newborns.

A year later, the hospital was chosen as the test site for the Corometric's NICU-Link.

Corometric Medical Systems Inc., a perinatal instrumentation company, had been working with the UCI Medical Center on a number of other projects and was interested in developing a system for collecting and archiving neonatal patients' records.

Recognized as a leader in neonatal intensive care instrumentation, Corometric developed a partnership with Trinity Computing Systems, a vendor of software for adult ICU electronic documentation. That software was adapted to the very demanding requirements and environment of the ICU ISCU.

The UCI Medical Center's infant special care unit admits approximately 90 critically ill newborns each month. Many of these lives depend on the speed in which hospital personnel can determine their condition and administer care. By having precise reliable information available, the UCI Medical Center's NICU-Link will help save many lives.

SUNNYVALE, CA (DEC. 11) BUSINESS WIRE - Poqet Computer Corp. Tuesday announced that, effective immediately, the suggested retail price of The Poqet PC is $1,450.

The Poqet PC is a one-pound, MS-DOS PC that runs for up to 100 hours on two AA-size alkaline batteries.

In addition to Ingram Micro D, The Poquet PC and other Poqet products are distributed in the United States by Intelligent Electronic's Franchise Division, which provides products to Connecting Point, Entre and TCBC dealers. Poqet also works directly with value-added resellers, providing products ranging from auto insurance claims adjustment systems to ruggedized, portable military computers.

Poqet (pronouced ''pocket'') Computer Corp., founded in 1988, is the leading designer, manufacturer and marketer of high-performance, truly portable

personal technology products. The company's first product, The Poqet PC, received the 1989 PC MAGAZINE Technical Excellence Award for Portable Computers and the 1989 BYTE MAGAZINE Award of Distinction.

The privately held company is jointly owned by its founders, employees and Fujitsu Ltd. Headquartered in Sunnyvale, Poqet has operations and offices in Monterey, Calif.; Westborough, Mass.; Dallas; Atlanta; Rye, N.Y.; Newport Beach, Calif.; Seattle; and Hoffman Estates, Ill. Poqet also has international offices in Paris and Sophia Antipolis, France; Langley, England; Frankfurt; Rome and Amsterdam.

SHERMAN OAKS, CA (DEC. 11) BUSINESS WIRE - Olson Industries Inc. announced that its only operating subsidiary, Dolco Packaging Corp., intends to file a Plan of Reorganization early in 1991.

Dolco, which has been involved in a reorganization under chapter 11 of the Bankruptcy Code since May 1989, expects confirmation of its plan by April 1991.

Richard E. Matthews, Dolco's chairman and chief executive officer, stated that meetings with the official creditors' committee regarding the structure of a plan have been proceeding well and he hoped for final committee endorsement of the plan in January.

As part of its reorganization, Dolco will consolidate manufacturing operations in its four existing plants in Texas, Indiana, Georgia and Washington. Dolco will retain its sales, customer service, warehouse and distribution operations in Southern California, but will cease manufacturing there.

A search for a new manufacturing location for the Western area will begin after the reorganization is complete.

Dolco will continue its emphasis on environmental protection and recycling programs. The company was recently named as one of the three industry recipients of the 1990 E.P.A. Stratospheric Ozone Protection Awards ''in recognition of exceptional contributions to global environmental protection.''

#90345b0045 12/11/1990 ~Business Wire
SAN FRANCISCO (DEC. 11) BUSINESS WIRE - Bank of America will expand an electronic tax filing service to 215 branches in nine Northern California counties, announced John Conover, senior vice president and head of Bay Area Region consumer banking.

The bank initially introduced electronic tax filing at 25 Santa Clara County branches last January.

During 1991, electronic filing will be offered at all BofA branches in the following counties: Alameda, Contra Costa, Marin, Monterey, San Benito, San Francisco, San Mateo, Santa Clara, and Santa Cruz.

Taxpayers must be due a federal tax refund to use the service, according to Conover. In addition, they must either have, or establish, a Bank of America checking or savings account, since IRS refunds are automatically deposited to a customer's bank account.

''Automatic deposit of tax refunds is a real boon for customers,'' said Conover. ''It eliminates the risk and worry of refund checks being stolen or lost in the mail, and customers can immediately begin earning interest when their tax refund is deposited in a BofA account.''

Federal returns taken to BofA branches will be transmitted by computer to the IRS. Bank customers will receive their tax refunds much faster, within two to three weeks of filing, compared to six to eight weeks required for standard processing of returns.

''Computerized tax filing is a valuable addition to BofA's automated banking services,'' added Conover. ''Our customers will be able to streamline the time-consuming task of doing their annual federal tax return.''

Electronic Filing Centers, Inc. of Farmingdale, New York, is providing the tax service at the Bank of America branches. Computer software developed by the firm checks returns for common errors that frequently delay tax refunds.

BofA branches will charge $40 for the tax service.

EL SEGUNDO, CA (DEC. 11) BUSINESS WIRE - International Rectifier Corp. (NYSE/PSE:IRF) announced Bankruptcy Court approval of a $12.3 million payment to IR in the form of cash and notes from Siliconix Inc. as part of a reorganization plan submitted by Siliconix and by AEG Capital Corp., which acquires an 80.1 percent interest in Siliconix.

Payable over 18 months, the settlement arises from a Federal District Court ruling earlier this year in which five of IR's key power MOSFET patents were held valid and infringed by Siliconix.

Immediately following the decision, Siliconix filed for protection from creditors under Chapter 11 of the Bankruptcy Code. The two companies subsequently agreed to an interim royalty-bearing license under IR's patents and a $12 million settlement. The Court order approving the plan and settlement and extending the license for the life of the patents is scheduled to become final Dec. 21, subject to fulfillment of certain conditions.

To date, five companies have entered into royalty-bearing licenses under IR's power MOSFET patents: Hitachi, Toshiba, Siliconix, Matsushita, and Unitrode. Originally the exclusive licensee to IR's power MOSFET technology, Unitrode now shares in a portion of royalties paid to IR by other companies under those patents.

International Rectifier's HEXFET brand pioneered the commercial use of power MOSFETs and continues to lead that fast-growing market. Penetration of the available $2 billion power MOSFET market by power MOSFETs is rising steadily, from 20 percent in September 1988 to 30 percent in September 1990, according to reported industry statistics.

International Rectifier Corp. is a major worldwide supplier of power

semiconductors and the international leader in power MOSFETs with its HEXFET line.

SANTA ANA, CA (DEC. 11) BUSINESS WIRE - Novadyne Computer Systems Inc. introduced its newest service option -- Business Partnering -- offering more flexible services and a value added service solution to OEMs, VARs and VADs and their own customers, at DEXPO West 90.

Through its Business Partnering capability, Novadyne is poised to provide a service solution directly to OEMs and reseller's customers on their behalf, providing them the freedom to concentrate on manufacturing and distributing products.

A total-solution field-service company, Novadyne delivers national on-site maintenance from more than 125 field offices. Included in its Business Partnering package is the same comprehensive range of services offered to end users today such as on-site service and warranty repair, software support and depot repair.

Also featured at the DEXPO West 90 show in Booth No. 773 is Novadyne's traditional third- and fourth-party services. One of the largest independent field-service organizations in the United States, Novadyne is a single source for quality repair and maintenance service on mainframes, minis, CAD/CAM workstations, micros, peripherals and communications networks.

With more than 1000 trained technicians, support engineers and staff personnel Novadyne provides the flexibility necessary in designing programs to meet the customer's requirements.

Services are marketed nationwide to companies in all facets of commerce including retailing, transportation, distribution, communications, health care educational organizations and federal and local government agencies.

To handle such a diverse clientele and product offering, Novadyne operates three depot centers located in Irvine, Calif., Norristown, Pa., and Dallas, in addition to the 125 service centers located in all the major metropolitan areas in the United States.

All the repair centers utilize the latest technologies in fault isolation, repair and certification to insure the highest quality of spare-parts availability.

The Irvine facility also houses a large Class 100A Cleanroom and state-of-the-art servo writers for sealed head disk assembly repair.

In addition to depot service, Novadyne provides on-site repair service where field engineers use laptop computers to reference product documentation, closeout calls and locate parts when necessary. More than 200 manufacturers' products are maintained by Novadyne today and preventive maintenance checks are always performed per the manufacturer's specifications or recommendations.

Since 1967 Novadyne has grown into one of the largest support organizations in the nation, with 1000 professionals in over 125 locations. Revenues in 1989 exceeded $100 million.

CUPERTINO, CA (DEC. 11) BUSINESS WIRE - Apple Computer Inc. announced that it has recently promoted four Apple directors to newly created vice president positions.

Joseph S. Arena was promoted to vice president and corporate controller. Robert Saltmarsh, who has been treasurer since 1985, was promoted to vice president and treasurer. Jeanne Seeley was promoted to vice president, finance, for Worldwide Manufacturing, R&D and Product Marketing organizations. Joan Murosky was promoted to vice president, Human Resources, with continued responsibility for managing HR for Worldwide Product Marketing, Worldwide Manufacturing, and R&D.

Arena, 44, has been with Apple since 1984 as director of Internal Audit. In his new position, he will provide overall direction to Apple's day-to-day accounting and financial operations, working closely with administrative purchasing and financial systems development in IS&T.

Reporting to Arena will be: the group/divisional controller, corporate accounting functions, corporate G&A finance, consolidations, forecasting, planning and Apple Database.

Prior to joining Apple, Arena worked for Xerox Corporation's Information Products Division in Los Angeles, as well as for its Corporate Audit group in Rochester, New York. He also spent eight years with Peat Marwick in their auditing and consulting department. Arena will continue to report to Joseph A. Graziano, executive vice president and chief financial officer.

Saltmarsh, 40, is responsible for managing a broad range of external relationships including Apple's worldwide money and banking activities, tax,

credit, and investor relations departments. Saltmarsh joined Apple in November 1982 where he skillfully managed all foreign exchange activities and made Apple a pioneer in the use of currency options among corporations.

Prior to Apple, Saltmarsh worked for several years at Data General Corporation in both Westboro, Massachusetts and Paris, France. He continues to reports to Graziano.

As vice president of finance, Seeley, 41, is responsible for managing the financial aspects of Apple's Worldwide R&D, Original Equipment Manufacturing and Worldwide Product Marketing organizations. She joined Apple in 1981 as financial controller for the Peripherals Group in Southern California, and in 1986 began managing Worldwide Manufacturing Finance.

Prior to Apple, Seeley worked for several years as financial controller for the Digital Products Group at Teradyne, Inc. in Boston, Massachusetts and in Southern California. She reports to Arena. Murosky, 37, is responsible for managing human resources for Worldwide Product Marketing, Worldwide Manufacturing, and R&D. She is a member of the corporate HR staff, as well as the senior management teams of these organizations.

Murosky has been at Apple seven years in several management and leadership capacities. She was director of human resources for the Apple Products division, Apple Pacific. Prior to this, she managed human resources activities for Worldwide Operations, with responsibilities for manufacturing plants in Singapore, Cork, Ireland and Fremont, California. Murosky joined Apple in 1983 and reports to Kevin Sullivan, senior vice president, Human Resources.

#90345b0079 12/11/1990 ~Business Wire

OXNARD, CA (DEC. 11) BUSINESS WIRE - Network Research Tuesday announced that FUSION Network Software Version 3.4 for VAX/VMS has been certified to run with the ORACLE relational database management system (RDBMS).

Using FUSION and Oracle's SQL Net, users can distribute and access the ORACLE database across different system platforms in a multivendor TCP/IP environment. A unique service and support arrangement between the two companies gives ORACLE users on a FUSION network a single point of contact for front-line support.

FUSION Version 3.4 for VAX/VMS features QIO, a standard interface for VMS that links Oracle's SQL Net networking software to the TCP/IP network protocols.

SQL Net makes the connection transparent to ORACLE users, who can access DBMS data from different computers on the TCP/IP network independent of where that data resides.

These include VAX/VMS systems, IBM mainframes, UNIX workstations such as those from Sun Microsystems, DECstations running Ultrix, Hewlett-Packard HP-UX systems, and PCs running DOS, UNIX and Xenix.

Each company has the ability to reproduce in its labs any problem that users may experience, and each has a designed technician as a contact to help resolve the problem. Service and support technicians at Network Research's labs will reproduce problems users may experience, and then work with Oracle to quickly provide a solution to the customer.

In addition to telnet and virtual terminal capabilities, ORACLE users can enjoy all of the new networking features in the recently released Version 3.4 of FUSION Network Software. These include support for DECwindows, an SNMP agent for network management, and support for networked printers.

Network Research recently announced a new strategy that goes beyond TCP/IP software-only solutions to include connections to DEC LAT networks, to wide-area networks, and to local and remote users (including those travelling with portable PCs.) It includes X.25 gateway support for LAN to WAN connections, support for DECwindows and for Sun Microsystems' NFS protocol on PCs. It also provides network management and a transition scheme to OSI.

Network Research develops and markets hardware and software products offering users a wide range of networking solutions for multivendor environments. Its FUSION Network Software provides transparent multi-protocol connectivity in heterogenous computing environments. FUSION hardware products provide network management and server solutions for remote users and connections to wide area networks.

Network Research is a worldwide organization with five sales offices in the United States, a subsidiary in Japan, and multiple distributors in Europe, Asia and Canada.

ALAMEDA, CA (DEC. 11) BUSINESS WIRE - Barneyscan Corp., manufacturer and marketer of the Color Imaging Systems family of color desktop tools and prepress products, Tuesday announced a major price move on its CIS-3515 35mm color slide scanner, reducing the suggested retail price to $4,495.

Citing increased consumer demand for color desktop tools, Barneyscan announced its intent to increase its leadership position in the color scanning market by expanding its market presence and opening a larger manufacturing facility.

Barneyscan is one of the few high-tech suppliers that has always manufactured its hardware and software in the United States. The new 15,000 square foot facility is scheduled to open in January 1991 in San Leandro, Calif. Barneyscan's new plant will streamline, upgrade and expand its production capability, creating the cost efficiencies associated with increased volume.

Barneyscan officials said the new plant can increase production capacity by as much as 300 percent.

The CIS-3515 is the successor to the world's first 35mm desktop slide scanner, originally called the Barneyscan. The CIS-3515 for the Macintosh, formerly priced at $9,495, included CIS-ColorAccess, calibrated color separation software, CIS-XP, photo retouching software and QuickScan, Barneyscan's highly-acclaimed scanning software.

The CIS-3515 at $4,495 is bundled with CIS-XP and QuickScan for the Macintosh and PC Scan for PC/AT compatibles. For customers needing color separation, a $500 cash rebate promotion on CIS-ColorAccess will be offered to scanner purchasers between now and March 31. The suggested retail price of CIS-ColorAccess is $1,995.

The CIS-3515 scans 35mm color or black and white slides for use with Macintosh or PC/AT compatibles. Users of the CIS-3515 use scanned images in conjuntion with presentation, animation, hypermedia and page layout software to create

published materials such as books, magazines, and advertising materials, as well as presentation slides, overhead transparencies, interactive museum exhibits and electronic textbooks.

Color Imaging Systems from Barneyscan Corp. is a family of fully integrated hardware and software products designed to provide the publishing industry, and other strategic markets, with high-quality color prepress system capabilities at desktop prices.

Barneyscan Corp., founded in 1986, is an established developer and manufacturer of market-driven solutions that manage the integration of images into computer applications. The company is headquartered in Alameda.

BEVERLY HILLS, CA (DEC. 11) BUSINESS WIRE - American Airlines has awarded Litton a major contract to provide a material handling and control system at the airline's new maintenance base at Alliance Airport, Fort Worth, Texas.

The Litton system is scheduled for installation by August 1991 in American's 200,000-square-foot warehouse at the airport. Dollar value of the contract was not disclosed.

Under the contract, Litton's Material Handling division, Hebron, Ky., will design, produce and integrate the computerized dock-to-dock system for storage and tracking of all parts used in major aircraft maintenance.

The Litton installation will include a six-aisle automated storage and retrieval system, conveyers and automated guided vehicles. The system will be linked into American's SABRE network, which controls a number of business functions, including inventory.

Litton is a technology-based company providing advanced electronic and defense systems, resource exploration services and industrial automation systems to U.S. and world markets.

PORTLAND, ORE (DEC. 11) BUSINESS WIRE - Waggener Edstrom Tuesday announced that James Buchanan is the new chief operating officer for the company.

Buchanan has been with the firm, formerly known as The Waggener Group, for six years. The company also announced today extended responsibilities for agency Vice President Jody Peake.

Buchanan has more than 20 years of experience as a communications manager in technology industries, with both Fortune 500 companies and several start-up organizations.

To ensure the agency's ongoing leadership in public relations services, Peake will head a comprehensive agency training program in addition to managing her current responsibilities in client service, new business and agency management.

''Our agency's success is wholly dependent on the expertise and quality of our employees,'' said Peake. ''These new programs will complement the other new agency structures which have been identified to lead the agency into the next decade.''

Waggener Edstrom, formerly The Waggener Group, was founded in November 1983. The firm, with annual billings of more than $5 million, provides public relations counsel and services to a variety of high technology clients including Dell Computer Corp., Microsoft Corp., Sequent Computer Systems, Central Point Software, Logic Automation, CH2M HILL and Calera Recognition Systems.

BURBANK, CA (DEC. 11) BUSINESS WIRE - Buena Vista Home Video and Image Entertainment Inc. Monday announced that they have signed a full license agreement for the replication, marketing and distribution of all Buena Vista laser programming in the United States.

Buena Vista distributes Disney, Touchstone, Hollywood Pictures and Buena Vista video products worldwide. The agreement with Image is exclusive, with the exception of Buena Vista's direct accounts.

''This agreement is our next significant step in committing to fully developing the laser portion of our business. Image's dedicated focus to laser product development and aggressive marketing perfectly fulfills our need for this high-growth business at this time,'' comments Richard Cohen, executive vice president, Buena Vista Home Video Worldwide.

The Buena Vista/Image agreement will take effect immediately with two major hit titles being released in January. They are Touchstone's ''Dick Tracy'' (Jan. 8, 1991 CAV $49.99 S.R.P., CLV $39.99) and ''Pretty Woman'' (Jan. 15, 1991 CLV, $29.99 SRP).

Also, as a result of the agreement, many highly requested Disney titles not currently available on laser will be put back into distribution and marketed aggressively.

''Another goal of this agreement is to minimize the back-ordering of our titles on laser,'' continues Cohen. ''With Image's in-house pre- and post-production facilities and state-of-the-art replicating ability, this can be achieved.''

According to Lee Kasper, senior vice president of sales and marketing, Image Entertainment Inc., ''In addition to our dedicated focus on laser disc marketing and distribution we feel that our technical expertise allows us to bring an exemplary level of quality to each disc we replicate.

''We are delighted with the opportunity to expand Buena Vista's presence in the laser disc market and look forward to developing a long and successful relationship.''

Distribution of Disney and Touchstone laser discs was formally handled on a non-exclusive basis by several sources.

MOUNTAIN VIEW, CALIF (DEC. 11) BUSINESS WIRE - As part of a management reorganization following its recent acquisition of Ingres Corp., ASK Computer Systems Inc. Tuesday named Dennis McGinn vice president of worldwide sales and marketing.

Reporting directly to Sandra Kurtzig, chairman and chief executive officer of ASK, McGinn will have responsibility for the worldwide sales and marketing efforts for both the Application Products Division and Ingres Products Division of the company. The company also announced the promotions of two other ASK executives.

Kurtzig said McGinn will drive the worldwide distribution strategy for the unified company. ''Dennis brings a breadth of experience with markets, and direct and indirect distribution channels,'' she said. ''Today, partnerships with third-party suppliers, major accounts, OEMs, VARs and ISVs (independent software vendors) are important to an overall selling strategy.''

Prior to joining ASK, McGinn was general manager of Hewlett-Packard Company's Industry Marketing Group in Cupertino, Calif. where he developed HP's computer systems business in manufacturing, telecommunications, services industry and federal government markets.

A 20-year industry veteran, McGinn, 45, joined HP in 1969 as a computer sales representative. He rose rapidly from regional sales management positions, to

group marketing manager for the Peripherals Group and the Information Networks Group, general manager of the Advanced Manufacturing Systems Operation, and later operations manager of the Computer Networks Operation. McGinn holds a bachelor's degree in engineering physics and a master's degree in business administration from the University of Arizona in Tucson, Ariz.

ASK Computer Systems Inc., a leading supplier of management information systems, relational databases, and application development tools, recently completed its tender offer for Ingres Corp. of Alameda, Calif. With nearly $400 million in revenue, ASK is one of the ten largest software suppliers worldwide. The new corporation is poised to become the leading provider of software for client-server computing.

SAN JOSE, CA (DEC. 11) BUSINESS WIRE - Circadian Inc. (NASDAQ:CKDN), a leading supplier of non-invasive diagnostic and ultrasound imaging medical products for the physician's office market reported a net loss of $237,000, or 5 cents per share, on net sales of $3,368,000 for the first quarter of fiscal 1991, which ended Sept. 30, 1990.

The net loss was less than the net loss of $1,667,000 (36 cents per share), on net sales of $3,905,000 incurred during the like period of the prior fiscal year. The 1989 loss included a charge of $1,063,000 for non-recurring expenses related to the write-down of accounts receivable. No such charge was booked during the first quarter of fiscal 1991.

Dr. Peter H. Chang, president and chief executive officer, stated, ''While net sales were down 13.8 percent from the first quarter of fiscal 1990, gross sales were down less than 3 percent. Net sales are down because we sold some

of our in-house lease receivables to third parties during fiscal 1990 reducing the amount of lease income, and we have increased our provision for sales returns.''

Chang continued, ''Our Ultrasound Imaging products introduced in November 1989 continue to have strong sales. Our margins increased to 51.1 percent from 47.5 percent primarily because of the Ultrasound products. In addition, net sales for this quarter compared to the quarter ended June 30, 1990, were up 3.9 percent.''

The company's cash position increased to $1,301,000 as of Sept. 30, 1990, compared with $266,000 as of Sept. 30, 1989.

Circadian's products combine ease-of-use and competitive pricing and include ambulatory heart monitoring, ultrasound imaging, stress testing, vascular screening, and other non-invasive diagnostic systems. The corporate headquarters are in San Jose.

LOS ANGELES (DEC. 11) BUSINESS WIRE - Communications and Entertainment Corp. Tuesday announced the election of Patrick Wachsberger as president and chief executive officer of its subsidiary Odyssey Entertainment Ltd. and that Veronique Maingard has been elevated to the post of senior executive vice president of Odyssey Entertainment Ltd.

Communications and Entertainment Corp. also announced the resignation of J. David Marks as the president, chief executive officer and director, of the company and of Odyssey Entertainment Ltd., as a result of dissimilar business philosophies, thus enabling him to pursue other ventures. Jerry Silva continues as chairman of the board of ComEnt and was also elected its president and chief operating officer.

#90345b0178 12/11/1990 ~Business Wire

MENLO PARK, CA (DEC. 11) BUSINESS WIRE - Liposome Technology Inc. (LTI) (NASDAQ:LTIZ), a California-based pharmaceutical company, Tuesday announced the receipt of FDA approval to initiate Phase II clinical trials of its injectable amphotericin B colloidal dispersion (ABCD) antifungal drug, and Phase I/II studies of the company's inhaled liposome albuterol product.

LTI plans to begin Phase II trials in January 1991, testing the efficacy of its ABCD product in patients with disseminated coccidioidomycosis infection. During 1991, the company also plans to initiate Phase II trials in AIDS patients with cryptococcal Meningitis, and in bone marrow transplant patients with systemic fungal infections.

LTI's ABCD product is lyophilized, packaged in vials, and readily reconstituted with water prior to injection. Shelf life is estimated to be at least two years at room temperature. The product is claimed in a composition-of-matter patent issued by the U.S. Patent and Trademark Office in April 1989; additional patent applications are pending in the United States and abroad.

Phase I/II clinical trials have begun for LTI's inhaled liposomal albuterol product, and additional clinical studies are planned for 1991.

LTI's albuterol product utilizes Aerosome liposomes, specially formulated to prolong the therapeutic activity of the drug for 8 to 12 hours. The liposomal albuterol powder is packaged in metered-dose canisters, typically used to administer inhaled asthma drugs.

The company also announced that it expects to complete preclinical toxicology studies of liposomal doxorubicin (L-DOX) in the first quarter of 1991 and, shortly thereafter, to prepare and file a Notice of Investigational New Drug exemption (IND) with the FDA. L-DOX is a stable lyophilized powder that is readily reconstituted with water prior to injection.

With LTI's key products entering the clinical development phase, the company said that its R&D efforts are focused on the galenic development of its second-generation products utilizing proprietary Stealth liposomes. As previously announced, protective coatings on LTI's Stealth liposomes prolong circulation time to 24 hours or more and open new opportunities for value-added intravenous products. The company expects to begin NDA-oriented studies with pharmaceutical preparations of Stealth-encapsulated drugs during 1991.

LTI announced its plan to initiate Phase I/II experimental clinical studies of Stealth doxorubicin (S-DOX) in mid-1991, with the objective of demonstrating that Stealth liposomes selectively deliver the drug to tumors in man. One such study will evaluate tumor localization in patients with Kaposi's Sarcoma.

Located in Menlo Park, LTI's key products include injectable ABCD for systemic antifungal therapy, inhaled albuterol to treat asthma and bronchitis, and injectable doxorubicin for anticancer therapy. The company's second-generation product focus is on utilizing LTI's proprietary long-circulating Stealth liposomes to target injectable oncology drugs, including doxorubicin, to tumors and to deliver therapeutic proteins and

peptides.

NEWPORT BEACH, CA (DEC. 11) BUSINESS WIRE - John C. Warner, chairman of the board and chief executive officer of Quiksilver Inc. (NASDAQ:QUIK), Tuesday announced that Quiksilver and Na Pali S.A., have agreed to extend the expiration date of the letter of intent for the proposed acquisition of Na Pali S.A. to such time as Na Pali's preclosing audit has been completed.

Upon receipt of audited financials which are expected during January 1990, Quiksilver intends to proceed as rapidly as possible to consummate the transaction.

Na Pali, S.A. currently markets products under the Quiksilver name in 17 European countries including France, Germany, Italy, Spain, Great Britain and Greece as well as the French Colonies, representing a total market of more than 300 million people. For its fiscal year ended May 31, 1990, Na Pali reported sales of approximately $21 million (U.S.).

Quiksilver designs, arranges for the manufacture of, and distributes beachwear skiwear and casual clothing primarily for young men and boys under the Quiksilver label. The company's products are made primarily in the United States and sold in approximately 2,000 surf shops, specialty store and selected department store locations.

#90345b0192 12/11/1990 ~Business Wire
KIRKLAND, WA (DEC. 11) BUSINESS WIRE - Announcing a major step toward seamless cellular coverage throughout the Pacific Northwest, Kirkland-based McCaw Cellular Communications Inc. reported Tuesday that a network upgrade now being initiated by the company will provide cellular telephone users with cellular coverage that breaks down the ''Cascade Curtain'' and circumvents state and national boundaries.

The first step in this system conversion -- a significant milestone in McCaw Cellular Communications' efforts to create a seamless North American cellular

network -- occurred last week when McCaw's Cellular One operation in Spokane installed a new digital switching system. When similar upgrades are made early next year by Cellular One operations in Seattle and Portland, seamless coverage will be available through Snoqualmie Pass along 80 percent of the state's I-90 corridor.

Coverage also will be continuous along the I-5 corridor from Vancouver, British Columbia, to just south of Eugene, Ore. In total, Cellular One will offer 35 percent more cellular coverage in the Pacific Northwest.

Cellular One in Seattle, Portland and Spokane are affiliates of McCaw Cellular Communications, the leading provider of cellular services in the United States.

The importance of a seamless network is ease-of-use. A seamless network in the Pacific Northwest allows a cellular customer to make and receive calls regardless of where they are at any given time, without having to use cumbersome special access codes or roaming numbers.

Initially, system conversion in Seattle, Portland and Spokane creates a seamless network extending into British Columbia. The new network, however, will soon expand throughout Canada, where McCaw Cellular has reached an agreement with Rogers Cantel Inc. (Cantel) of Canada to integrate the two systems. Cantel has already developed a nationwide network that is compatible with the new Cellular One switch to be installed in Seattle.

Be virtue of this arrangement, a Cellular One customer based in Seattle who happens to be in Montreal, for example, can be reached by dialing the Seattle telephone number and it will ring in Montreal without using any roaming or access codes.

Indeed, as a result of the two-year-old Free Trade Agreement, trade with Canada is increasing significantly. Trade data comparing the first half of 1988 to 1989 shows that U.S. exports to Canada grew by over 20 percent to $41 billion. Washington state exports to Canada in 1989 totaled more than $4.3 billion. Oregon's trade with Canada totaled more than $558 million, making Canada the state's second-largest trading partner. And due to the state's proximity to British Columbia, Washington state business figures to reap the advantages of additional opportunities in Canada.

The new Cellular One digital switches will be located at its Mobile Telephone Switching Offices (MTSO) in Seattle, Portland and Spokane. The MTSO handles the routing of calls from one transmission cell site to another, and is the link between a cellular telephone and the conventional telephone system. Conversion of the switching system is being supplemented by the addition of 41 new cell sites in Washington state and Oregon state.

The new switches and cell sites are digital-ready in anticipation of a conversion to a fully digital cellular network. Digital technology is an

evolutionary improvement over existing analog systems because it provides unprecedented levels of voice quality and system capacity.

Because a digital system speeds transmissions while allowing the network to handle many more calls, the new network will also allow for an additional range of services -- such as data transmission via computer and fax.

Cellular One is the leading provider of cellular services in the Pacific Northwest.

SAN FRANCISCO (DEC. 11) BUSINESS WIRE - Pacific Bell and Groupware Authors announced Tuesday an agreement to jointly develop and market application software products that combine telephones, desktop computers and Integrated Services Digital Network (ISDN) to create low-cost solutions for distributed computing.

Under the agreement, Pacific Bell, which offers ISDN-based CENTREX IS service in major metopolitan areas throughout California, and Groupware Authors, an innovative new software developer, will combine their respective strengths in network services and distributed computing to provide a broad range of new capabilities for the electronic desk top of the future.

''Our agreement with Groupware Authors represents a significant step in Pacific Bell's plan to address the needs of the desktop computing market,'' said Jim Grivich, Pacific Bell director of ISDN sales integration. ''ISDN has the potential to revolutionize today's office environment. But, in order for this to happen, we must broaden the focus of our ISDN strategy to include not only voice and data transmission, but also integrated applications.

''The availability of ISDN technology in a ubiquitous network represents a tremendous opportunity to create a new class of software products that will allow both users and applications developers to view their telephones and their desktop computers as a single, powerful information device,'' said Brian McGann, managing partner at Groupware Authors.

The products developed by the two companies, the first of which is to be announced in early 1991, will merge the multichannel capabilities of Pacific

Bell's CENTREX IS with a unique distributed applications architecture developed by Groupware Authors.

Groupware Authors, located in Santa Cruz, Calif., creates quality software products for the desk top that enable real-time, multimedia interaction among geographically dispersed users of multivendor systems. The company was founded in 1989 by Brian McGann and Dennis Morrison who were also the co-founders of Touch Communications, one of the world's leading suppliers of OSI communications software.

Pacific Bell is a subsidiary of Pacific Telesis Group, a diversified worldwide telecommunications corporation based in San Francisco.

ISDN increases the efficiency of telecommunications systems by dividing a standard telephone line into as many as three digital channels, making a single line capable of simultaneously transmitting voice, data and video. At its foundation are standards for the telecommunications network of the future that eventually will be implemented worldwide.

JOPLIN, MO. (DEC. 11) BUSINESS WIRE - The Empire District Electric Co. Tuesday announced that it is offering 350,000 shares of its common stock, $1 par value, through Salomon Brothers Inc., A.G. Edwards & Sons Inc. and Edward D. Jones & Co.

The company is also offering $15 million aggregate principal amount of its First Mortgage Bonds, 9-3/4 percent Series due 2020, through Salomon Brothers Inc.

The proceeds of the offerings will be used to repay short-term indebtedness incurred in connection with the company's construction program.

Empire supplies electric service to a 10,000 square-mile area in southwest Missouri, southeast Kansas, northeast Oklahoma and northwest Arkansas. The company also provides water service in three incorporated communities in Missouri.

SACRAMENTO, CALIF (DEC. 11) BUSINESS WIRE - Robert J. Gore has been appointed vice president of communications for the Association of California Insurance Cos., ACIC President Thomas F. Conneely announced Tuesday.

Gore, a former reporter who has served the Deukmejian administration in a variety of key public affairs assignments, will join ACIC on Jan. 7, Conneely said.

''ACIC is pleased to have Bob join our team,'' Conneely said. ''ACIC's members have identified more active communications and dialogue with their customers as top priorities. Bob Gore will play a key role in helping us attain those objectives.''

Gore was Gov. George Deukmejian's press secretary in 1989-90. He worked as assistant director for public information in the departments of Transportation (1988-89) and Corrections (1984-88), and did public affairs consulting for the treasurer confirmation hearings of Daniel E. Lungren and for the Department of Insurance.

Before joining the administration, he was press secretary to former Los Angele County District Attorney Robert H. Philibosian and spent 14 years as a reporter for the Los Angeles Times and Long Beach Press-Telegram.

Gore, 40, lives in El Dorado County with his wife and daughter.

DALLAS (DEC. 11) BUSINESS WIRE - Central and South West Corp. (NYSE:CSR) Tuesday said its Central Power and Light Co. unit has received approval to increase its base rates by $120 million on Jan. 1, 1991, to begin recovering its costs for Unit 2 of the South Texas Project nuclear power plant.

The 2-to-1 decision by the Texas Public Utility Commission was consistent with a stipulated settlement reached between Central Power and Light and the majority of the intervenors in the rate case in March 1990.

The stipulated settlement called for Central Power and Light to increase its base rates by $264 million in two steps. A first-step increase of $144 million, to begin recovering costs for STP Unit 1, was approved as permanent rates by the Texas PUC last October. The Texas PUC's decision Tuesday affirmed the second and final increase.

As part of the settlement, Central Power and Light has agreed not to seek additional rate relief until after Dec. 31, 1994, except in the case of specified unusual circumstances. However, its fuel charges will continue to be adjusted according to PUC rules.

Central and South West Corp. is a Dallas-based public utility holding company. It owns Central Power and Light Co., Public Service Company of Oklahoma, Southwestern Electric Power Co., West Texas Utilities Co., Transok Inc. and five other subsidiaries.

#90345b0297 12/11/1990 ~Business Wire

SANTA CLARA, CALIF (DEC. 11) BUSINESS WIRE - Catalyst Semiconductor Inc. announced Tuesday the introduction of the industry's first 5-volt CMOS 512K Bit (64K by 8) Flash erasable and electrically reprogrammable memory, ideally suited for systems requiring on-board code updates.

The 512K-bit memory is divided into 32 sectors of 2K bytes each. The CAT28F512V5 features ''Sector Erase'' by which the user can selectively erase any one or all of the 2K byte sectors. This feature enhances system performance as the need for erasing the entire memory content is eliminated.

The CAT28F512V5 is pin compatible with EPROM devices and Read timings are fully compatible with EPROM operation. Programming and erase are performed through an operation and verify algorithm. The instructions are input via the I/O bus, using a two-write cycle scheme.

Address and data are latched to free the I/O and address bus during write

operation. The CAT28F512V5, available in commercial temperature, 32-lead plastic DIP and 32-pad PLCC packages, is $59.74 each in 1,000-piece quantities.

According to Krish Panu, Catalyst vice president of marketing and sales: ''Various applications require that a boot program be stored in certain sectors which should not be erased while changing data in other sectors.

''This approach can reduce the chip count, for bootstrap, in embedded code applications. This need created the Sector Flash memory. In some applications single 5-volt devices are important because a regulated second voltage (12 volts) is difficult and expensive to provide and takes board space.

''To fulfill this kind of need, we are introducing the Sector Flash memory, which uses a single voltage of 5 volts.

Catalyst Semiconductor Inc., a privately held company founded in 1985, is a technology leader in CMOS nonvolatile memories and is dedicated to the development of next generation memory products and their applications. The company's innovative products include: Smart Card microcomputers, CMOS NVRAMs CMOS E2PROMs, High Speed CMOS EPROMs, CMOS SRAMs, CMOS Flash Memories and BiCMOS analog products.

#90345b0611 12/11/1990 ~Business Wire

NEW YORK (DEC. 11) BUSINESS WIRE - New Line Cinema Corp. (ASE:NLN) and Showtime Networks Inc. Tuesday announced an agreement whereby Showtime has acquired the exclusive premium television rights to New Line Cinema titles for the next three years.

The agreement, jointly announced by Stephen Abramson, senior vice president of New Line Cinema and Jim Miller, senior vice president, Program Acquisition and Planning at Showtime Networks Inc., begins with 1991 theatrical titles and covers all of New Line's upcoming product for the three-year period.

The new agreement entitles Showtime to the pay television rights to those pictures released during a three-year period which are scheduled to include three of New Line's most successful sequel franchises; the sequel to ''Teenage Mutant Ninja Turtles'' which is scheduled to be released theatrically in March 1991, the sixth installment in the Nightmare on Elm Street series currently entitled ''Freddy's Dead: The Final Nightmare,'' and the sequel to ''House Party,'' which will again feature Kid N' Play.

Showtime also secures the rights to other 1991 New Line releases which are presently scheduled to include pictures such as: ''Hangin' With The Homeboys '' a hip ensemble comedy about four young men from New York, and a Friday

night that forever changes their lives; ''Suburban Commando,'' an action-adventure comedy featuring Hulk Hogan, as an intergalactic mercenary trying to avoid bounty hunters by renting a room with a typical Earth family -- also starring Christopher Lloyd and Shelly Duvall.

''The Rapture,'' a provocative, erotic vision of the end of the world which stars Mimi Rogers; ''Talkin' Dirty After Dark,'' the story of a day in the life of a comedy club deep in the heart of South Central Los Angeles, with Tone Loc and Martin Lawrence; and ''StepKids,'' the funny, poignant story of a 15-year-old girl whose parents have divorced and remarried so many times that she feels lost in a sea of step-kids, starring Griffin Dunne and directed by Joan Micklin Silver.

In April 1990 New Line and Showtime signed an exclusive agreement whereby Showtime acquired the rights to certain specific titles including, ''Teenage Mutant Ninja Turtles,'' ''House Party,'' ''Pump Up The Volume,'' ''A Nightmare on Elm Street 5: The Dream Child,'' ''Heart Condition,'' ''Texas Chainsaw Massacre 3,'' and the soon-to-be-released ''Book of Love.''

New Line's extended relationship with Showtime will further complement the growing list of studios and filmmakers that have signed exclusive agreements with Showtime Networks Inc. including Disney's Touchstone and Hollywood Pictures, Orion, Tri-Star Pictures, Imagine Films, Pathe Entertainment, Carolco Pictures, Castle Rock Entertainment, Nelson Entertainment and others.

New Line Cinema Corporation is a leading independent producer and distributor of theatrical motion pictures.

#90345b0613 12/11/1990 ~Business Wire

CHATSWORTH, CA (DEC. 11) BUSINESS WIRE - Two companies with complementary performance profiles have decided to join forces and work together in the hard disk drive spindle motor (HDD Motor) market.

Minebea Company Ltd., Japan, who is a world's leading manufacturer of precision miniature ball bearings and mechanical precision components with large manufacturing facilities in Thailand, and Papst-Motoren GmbH & Co. KG, Germany, a world renowned technology leader in electronically computated DC

motors and holding an impressive portfolio of patents and know-how, will form, effective Feb. 1, 1991, two joint venture companies: Papst-Minebea-Disc-Motor GmbH in Germany and Papst-Minebea-Disc-Motor (Thailand) Ltd.

Papst-Motoren GmbH & Co. KG and Minebea Company Ltd. will equally participate in the new joint venture.

The German joint venture company's task is to effect product and process development and to set up production facilities for application in Thailand and Singapore. In addition, medium-range and special series hard disk drive motors will be manufactured in Germany along with hard disk drive motors for which European local content is required.

The joint venture company in Thailand will be engaged in volume production of hard disk drive motors.

Sales and marketing of hard disk drive motors designed and manufactured by these joint venture companies will be handled by the Minebea Group of companies with the exception of Europe and Thailand, where the joint venture companies will be responsible.

The combination of development know-how, engineering expertise and patents of Papst with Minebea's large-scale production capabilities and manufacturing components in cost-competitive locations is expected to create synergy effects ensuring competitiveness of the new joint venture companies. This will enable them to obtain a leading position in the hard disk drive motor market.

Minebea Company Ltd. and Papst-Motoren GmbH & Co. KG will keep their present ownership and remain independent with their other activities.

All other Papst products, electronic cooling fans, blowers and micro motors will continue to be developed, manufactured and sold throughout the world by Papst-Motoren GmbH & Co. KG and sold in the United States by Papst Mechatronic Corp., Newport, R.I.

Minebea is the world's leading supplier of broad-based products for the computer market. NMB Technologies Inc. is the electronics marketing division of NMB (USA) Inc., the North American headquarters of the Minebea Group of companies.

Founded in 1951, Minebea Company Ltd. offers world markets a broad and diverse range of precision mechanical and electronic products in the automotive, aerospace, communications, computer, defense and manufacturing industries.

Through internal growth and strategic acquisitions, Minebea has become a multinational enterprise comprising 42 principal companies in eight countries, with 37 manufacturing plants and 64 sales offices and branches around the world.

#90345b0614 12/11/1990 ~Business Wire

MILPITAS, CA (DEC. 11) BUSINESS WIRE - NetFRAME Systems Inc. Tuesday unveiled the latest addition to its family of multiprocessor network computer systems, the model NF200.

Designed to meet the price/performance requirements of department and branch office local area network (LAN) environments, the NF200 is based on Intel's 80486 microprocessor technology, and runs popular industry standard network operating systems, NetWare 386 from Novell and Microsoft OS/2 LAN Manager.

It is best suited for environments where PC LANs are growing to support more users (typically up to 250) and evolving beyond file sharing and communications applications to encompass SQL database processing.

The NF200 incorporates the same leadership technology designed into the entire NetFRAME product family -- the models NF100, NF300 and NF400. Designed around a mainframe-like hierarchical bus architecture, the system is optimized to move large amounts of data quickly and efficiently.

Two separate input/output (I/O) buses combine with specialized memory and CPU data paths to achieve peak internal transfers up to 200 megabytes per second.

With expansion room for up to three I/O processor boards, the NF200 can connect three separate LANs, and scale in throughput to sustain data rates approaching 15 megabytes of data per second -- nearly twice what is possible on PC-class servers today.

More importantly, NF200 features such as parity checking on all data paths, error correcting memory, power module redundancy and automatic restart/retry ensure mainframe-class reliability and data integrity levels to support ''mission-critical'' LAN-based applications.

Packaged in an NF100-sized cabinet, the NF200 comes standard with eight megabytes of shared main memory and 380 megabytes of integrated disk. Also included is one I/O processor board with connections for SCSI-II, RS-232 (SDLC), RS-422 and either Ethernet or Token Ring LANs. The system can be configured with up to 32 megabytes of error correcting code (ECC) memory and up to 16 gigabytes of total disk storage.

In addition, the NF200 supports NetFRAME's network management and administration software tools, ''SAM'' and ''RCON.'' These tools, unique to NetFRAME systems, reduce the cost and complexity of network server maintenance and administration.

NetFRAME Systems Inc. is a privately held company started in 1987 by Carlton G. Amdahl, a veteran mainframe computer scientist, and Enzo Torresi, co-founder of Businessland, Inc. The company designs, manufactures and markets a family of multiprocessor network computers that run industry standard network operating systems for the PC-LAN environment.

#90345b0620 12/11/1990 ~Business Wire

MILPITAS, CA (DEC. 11) BUSINESS WIRE - NetFRAME Systems Inc. Tuesday announced that standard Microsoft OS/2 Version 1.21 for the NetFRAME family of multiprocessor network computer systems will be available in January 1991.

The NetFRAME with OS/2 will run LAN Manager 2.0 from Microsoft Corp. and all off-the-shelf applications designed for the LAN Manager environment.

LAN Manager on NetFRAME provides a platform for client/server applications and databases, as well as high performance file server solutions.

The state of Washington was one of the early users of OS/2 and Microsoft's LAN Manager 2.0 and SQL Server on the NetFRAME. Bill Gillman, computer information systems specialist for the state of Washington commented: ''The NetFRAME succeeded and excelled in every category. It is fast, simple, secure and best of all it does the job exactly as advertised.''

NetFRAME will bundle OS/2 v1.21 with NetFRAME's powerful network management and administration software products, ''SAM'' and ''RCON.'' These tools, unique to NetFRAME systems, reduce the cost and complexity of network server maintenance and administration.

''SAM'' (Server Activated Maintenance) is an intelligent diagnostic and maintenance tool that will allow a NetFRAME system to originate a phone call to network administrators reporting any system malfunction. Responding to SAM over a standard telephone line, network administrators can then complete diagnostic routines and perform routine maintenance activity.

''RCON'' (Remote Console Software) allows easy management of multiple NetFRAMEs from any MS Windows PC on the LAN. From any single non-dedicated PC on the network, network administrators can configure NetFRAMEs and install software.

Bundled together, OS/2 v1.21, ''SAM'' and ''RCON'' will be available for $1,295. LAN Manager 2.0 is available from Microsoft at a suggested retail price of $6,490 for unlimited users. NetFRAME Systems Inc. is a privately held company started in 1987 by Carlton G. Amdahl, a veteran mainframe computer scientist, and Enzo Torresi, co-founder of Businessland Inc.

The company designs, manufactures and markets a family of multiprocessor network computers that run industry standard network operating systems for the PC-LAN environments. NetFRAME's combine the high reliability, data integrity and computing power of mainframes with the manageability, flexibility and cost advantages of personal computers.

#90345b0622 12/11/1990 ~Business Wire

NEW YORK (DEC. 11) BUSINESS WIRE - Bank of America has named Joseph Guariglia a 30-year operations veteran, a senior vice president. He is the manager of BankAmerica International-New York (BINY) Operations and Domestic Money Transfer.

With the bank since 1961, he has managed the daily operations of BINY, including money transfer, trade finance, customer service, and BI branches located in Chicago and Miami since 1988. Guariglia is ''an excellent manager'' with ''an extensive background in product development,'' said Merrill Burns, president of BankAmerica International-New York.

Having begun his career at the bank in the BINY telecommunications department, Guariglia later worked in Cash & Securities as assistant cashier. He then moved through a broad range of assignments in which he was responsible for paying and receiving, deposits and securities, data processing, and systems development. He became a vice president in 1981.

Guariglia, 47, is a representative to the Committee on International Banking, and he also serves on the U.S. Council for International Business. He holds an associate degree in finance from Pace University.

#90345b0624 12/11/1990 ~Business Wire

LAS VEGAS (DEC. 11) BUSINESS WIRE - Apple Computer Inc. further strengthened its commitment to multivendor connectivity Tuesday by announcing it is now licensing its Apple Terminal Services (ATS) protocols to third-party

developers and corporate MIS departments.

The ATS protocols, which are based on Apple's current MacWorkStation product, consist of commands defined by Apple that pass between a mainframe computer and a personal computer. These protocols allow a developer to create mainframe or minicomputer programs that display and retrieve information on remote graphically oriented personal computers.

Under the terms of the license, developers can create and sell personal computer software, such as for IBM PCs and compatibles, that receives the ATS commands from a mainframe and displays the mainframe information on the personal computer's screen. Software can also be developed and sold to display mainframe information on UNIX-based workstations.

Prior to the licensing program, the ATS protocols could only be used to display information on Macintosh computers.

Now that the license is available a developer, for example, could create a hotel reservation system in which a central mainframe computer uses the ATS protocols to send out a guest's reservation to hotel clerks using different types of personal computers in various remote sites. Each clerk could print the reservation or make changes, and then return the new information to the central computer.

One of the first third-party companies to sign a license with Apple is United Data Corp., of San Francisco, which has created ATS protocol software for IBM personal computers and compatibles running the Microsoft Windows 3.0 operating systems. The software receives ATS commands from a mainframe and displays the mainframe information on the personal computer screen via the Windows 3.0 operating system.

Integrated Solutions Inc., of King of Prussia, Pa., has also signed a license with Apple. It is selling software that runs on UNIX workstations, such as those from Sun Microsystems Inc. This new software uses X.Windows to display information requested via ATS commands on the workstation screen. The information can be shown with a MOTIF or Open Look interface.

The ATS protocols go beyond traditional terminal screen protocols, such as Digital Equipment Corp.'s VT100 and IBM's 3270, by giving the mainframe programmer control of the personal computer's desktop user interface including windows, display boxes and icons. The protocol also supports printing and filing on the personal computer.

CUPERTINO, CA (DEC. 11) BUSINESS WIRE - Tandem Computers Inc. (NYSE:TDM) and Applied Communications Inc. (ACI) Tuesday announced that two mutual customers recently migrated ACI's BASE24 software to Tandem's NonStop Cyclone transaction processing mainframe.

Banc One Services Corp., Columbus, Ohio, and Nationwide Anglia, Swindon, England, converted their BASE24-atm to the new Cyclone platform and are currently in production.

Introduced late last year, the NonStop Cyclone computer addresses the needs of large businesses requiring high-performance, online processing. The NonStop Cyclone systems are ideal for the high-volume, online transaction, query and batch processing requirements of large banks and securities industry customers.

H.R. ''Tim'' Rosenbusch, manager, electronic banking, Banc One, said that the primary reason for upgrading ACI software to Tandem's NonStop Cyclone system was because of its volume capabilities.

On Nov. 5, Nationwide became the first BASE24 customer in Europe and the third worldwide to go live on the Cyclone system. According to Tony Beech, Nationwide's assistant general manager of technology support, Nationwide required additional processing capacity after launching the first interest-bearing checking account in the United Kingdom, and ATM volumes increased substantially.

ACI, a subsidiary of U.S. WEST of Englewood, Colo., is a leading international provider of computer software and integration services for banking, telecommunications and cross-industry applications. ACI products and services are used by 289 customers in 32 countries. The company is headquartered at 330 South 108 Ave., Omaha, Neb., 68154. The telephone number is 402/390-7600.

Tandem Computers Inc. manufactures and markets fault-tolerant computer systems online transaction processing systems and enterprise networks. The company headquarters are located at 19333 Vallco Parkway, Cupertino, Calif. 95014. The telephone number is 408/285-6000.

PROVO, UTAH (DEC. 11) BUSINESS WIRE - Rocky Mountain Helicopters Inc. (NASDAQ:RMHI) Tuesday announced record revenues of $4,027,300 for the month of

October 1990 in its Medical Division.

RMH management attributed this increased performance to the rapidly growing air medical marketplace. This division, which has been growing at 15-20 percent a year, accounts for 63 percent of RMH business activities.

''RMH has been a leader in the air medical industry since its inception and has pioneered the concept of hospital-based patient transportation,'' said Russ Spray, RMH vice president, Medical Division.

''This latest milestone indicates the marketplace is continuing to grow, and RMH continues to grow with it.''

RMH is the industry leader in air medical services, operating 47 air medical programs across the country. The company devotes nearly half of its 117 aircraft to air medical services.

ENGLEWOOD, CO (DEC. 11) BUSINESS WIRE - William J. Butters, the president of Source Venture Capital Inc. (OTC: SVCI), a Denver-based public company, Tuesday announced that an agreement has been reached with Blazo Corp. (OTC: BLAC) of Wooster, Ohio.

Blazo is a public company also trading in the pink sheets.

Butters said, ''The agreement calls for Blazo to purchase 350 million shares of Source Venture Capital common stock for a total consideration of $350,000.''

This would make Blazo the largest single shareholder in Source. The agreement also calls for an irrevocable voting proxy to Blazo on the shares now owned by Meyer Blinder, his family and assigns.

Butters said, ''This infusion of cash will enable Source, to expand the Able Trade Bindery, which was purchased by Source last week. Able, now makes Edison Press, Source's wholly owned subsidiary, a full service printing facility. Edison, already represented approximately 50 percent of Able's total volume.''

The deal with Blazo is expected to close just as soon as both companies have completed their due diligence.

Kenneth Jackson, the president and chief executive officer, of Blazo Corp.,

said that, ''Source, being a venture capital company, appears to be the right vehicle for Blazo to continue strengthening its base through mergers and acquisitions.''

He further stated that ''Source's ownership in Edison Press, which is reported to be the third largest printing company in the Denver area, promises to be a potential plus for Blazo's Vision Television Network.''

Vision is a wholly owned subsidiary of Blazo and is involved in the barter of television time. Jackson said, ''We are now a recognized force in the television barter business so what better place to expand our communication business than in the print area.''

HUNTSVILLE, AL (DEC. 11) BUSINESS WIRE - The first flight hardware for Space Station Freedom's modules and systems recently arrived in Huntsville at Boeing Defense & Space Group facilities.

The big milestone came wrapped in a small package. Tiny transistors and diodes, qualified to operate in the space environment for 30 years, were delivered from the Defense Electronics Supply Center in Ogden, Utah.

The transistors represent the first of approximately 200,000 electrical, electronic and electromechanical (EEE) parts that will arrive during the next several years. Boeing and its subcontractors will install those parts in

electronics subassemblies used on the orbiting laboratory.

The transitors and diodes in this first shipment will be used in the orbiting laboratory's environmental control and life-support systems. Boeing will provide them to subcontractors Perkin-Elmer and Life Systems.

John Berkebile is EEE parts manager. The EEE parts group tracks items such as diodes and transistors as part of the requirements for Boeing and its work package one subcontractors.

In addition to scoring the first flight hardware milestone, Berkebile's group is making improvements in its work methods:

NASA chose Boeing in 1987 to build Space Station Freedom modules and on-board systems. Astronauts will live and perform experiments in orbit aboard the space station by the late 1990s.

Boeing work, with headquarters in Huntsville, is accomplished by approximately 1,000 employees. The project is managed by Marshall Space Flight Center, also in Huntsville.

#90345b0645 12/11/1990 ~Business Wire

DALLAS (DEC. 11) BUSINESS WIRE - Texas Instruments Inc. Tuesday announced it has reached agreement with Toshiba Corp. on a 10-year broad-based semiconductor patent cross-license agreement to replace the five-year agreement that expires at the end of this year.

Beginning in 1991 and continuing throughout the life of the agreement, TI will receive royalty payments from Toshiba based on worldwide sales of Toshiba semiconductors.

The annual amounts payable under the new agreement are expected to greatly exceed the annual amounts received by TI under the agreement expiring at the end of 1990.

The new agreement, the terms of which are confidential, is subject to approval by the government of Japan.

The new agreement reinforces TI's belief that it has the opportunity to earn a significant ongoing stream of royalty revenues from its worldwide patent portfolio.

However, as TI has previously reported, high levels of research and

development and capital investment, along with lower memory prices and general weakness in the U.S. economy, will put additional pressure on TI's financial results in the near term.

Discussions continue with other companies whose licensing agreements with TI expire at the end of 1990. As previously stated, these negotiations by their nature are not predictable as to outcome or timing.

Results from negotiations may vary depending on the parties' relative patent positions, the use by each party of the other's patents, the volume of sales of each party, and other factors.

TI believes that appropriate valuation and compensation for use of a company's intellectual property is essential to global competitiveness because it protects, rewards and encourages investment in research and development. TI's technology has resulted in competitive products and a strong broad-based patent portfolio.

The royalties TI has received for use of its patents have helped the company invest more than $2 billion in research and development over the past five years. During this period, TI has received more than 2,000 patents for new technologies.

Texas Instruments Inc., headquartered in Dallas, is a high-technology company with sales and manufacturing operations in more than 30 countries. TI develops manufactures and markets semiconductors, defense electronics systems, software productivity tools, computer systems, industrial automation and control systems, electrical controls, metallurgical materials.

PHOENIX (DEC. 11) BUSINESS WIRE - Phoenix-based America West Airlines (NASDAQ:AWAL; PSE:AWA) reported November traffic rose to 919,924,000 revenue passenger miles, or 24.8 percent more than November 1989.

Available seat miles for the month rose 32 percent over last year to 1,608,445,000, producing a passenger load factPSKof 57.2 percent. Peter Otradovec, vice president of planning, said: ''We continue to experience very positive growth in our traffic. Although our monthly load factor was down from November 1989, we are pleased with the overall response from the traveling public.''

Otradovec continued: ''America West's year-to-date figures exceed 1989 figures

and we anticipate this trend to continue.''

America West, the nation's No. 1 carrier in on-time performance, operates the industry's most fuel-efficient fleet of 104 aircraft including Boeing 747s, 757s, 737s and de Havilland Dash 8s. The carrier recently acquired up to 118 Airbus A320s and will operate 16 of the new aircraft by mid-1991.

America West offers convenient service with more than 650 daily flights from coast to coast and across the Pacific to Hawaii.

The following is a summary of America West's November and year-to-date traffic for 1990 and 1989:

America West Airlines
November and Year-to-Date Traffic

CARLSBAD, CA (DEC. 11) BUSINESS WIRE - Vencor International Inc. (Bulletin Board: 3VNCO) Tuesday announced receipt of an initial order from Toys 'R' Us Inc., one of the nation's largest diaper retailers, for ''Didee Snugs,'' Vencor's 100 percent cotton cloth reusable diapers.

Marketing of the diapers by Toys 'R' Us will commence with a sales test at 83 stores nationwide. If the marketing test is successful, Didee Snugs will be sold at all Toys 'R' Us locations.

''This order is an important development for Vencor because, together with our retail agreements with Wal-Mart and Target, we will have established retail contact with an enormous number of American diaper buyers,'' commented James F. Althoff, president of Vencor. ''We are uniquely positioned to answer the growing call for reusable, high-quality and environmentally safe diapers.''

Vencor International already sells the patented cloth diapers through Wal-Mart and Target stores, as well as through other significant retail outlets across the United States. The U.S. market for diapers is estimated to be larger that $4 billion per year.

The company also plans to enter the adult urinary incontinence business, which the National Institutes of Health estimates to be a $10 billion market.

Vencor International is one of the few publicly traded companies that produce 100 percent cotton cloth diapers. Didee Snugs incorporate the advantages of disposables, including elasticized leg bands, an adjustable waist and a form-fitting design.

They improve upon disposables by being more economical to use, by featuring Velcro fasteners, and by being more durable and environmentally safe. Vencor is located in Carlsbad, Calif., with manufacturing centers in Mexico.

REDMOND, WA (DEC. 11) BUSINESS WIRE - In a continued effort to make Microsoft SQL Server available to an expanding customer base, Microsoft Corp. Tuesday welcomed 11 new companies into its two strategic ''SQL Server Partners programs.''

This represents participation growth of more than one hundred percent in these distribution programs in less than three months.

Matesys and mdbs have now joined Microsoft's exclusive SQL Business Partners Program.

In addition, today the following companies have joined the recently announced Microsoft SQL Solutions Partners Program:

o Aardeus Corp.
o Enfin Software Corp.
o Pansophic Systems Inc.
o Pioneer Software Systems Corp.
o Precision Software Inc.
o Software Publishing Corp.
o Software Products International
o SQLSoft
o Terminal Applications Group

These programs were designed by Microsoft to make SQL Server available through qualified companies. Companies who participate in either program work closely with Microsoft through joint advertising, bold end-user programs, cooperative sales calls, and so forth.

''These programs are designed to deliver complete client-server network solutions to customers,'' said Dwayne Walker, Microsoft senior product manager applications server group, network business unit. ''We are very pleased with the way that these two programs have taken off. They are truly benefiting customers and resellers by providing them with a large choice of solutions today.''

Microsoft Corp. (NASDAQ:MSFT) develops, markets and supports a wide range of software for business and professional use, including operating systems, network products, languages and application programs, as well as books, CD-ROM products and hardware for the microcomputer marketplace.

SAN JOSE, CA (DEC. 11) BUSINESS WIRE - H.B. Chan has been named corporate senior vice president and senior managing director -- Singapore Operations for Conner Peripherals Inc., (NYSE: CNR), it was announced Tuesday by William J. Almon, president and chief operating officer.

In this position, Chan will be responsible for Conner's manufacturing operations worldwide, including the company's successful new facilities in Irvine, Scotland and Penang, Malaysia, and its facility in San Jose. He had been managing director -- Singapore Operations since joining the company in May 1987.

''H.B. has effectively managed the tremendous growth of our Singapore manufacturing facility, and led the team that brought our Scotland facility on-line in just three months,'' said Almon. ''Fulfilling customer's needs faster, with greater levels of quality and efficiency, is our highest priority. H.B.'s skill and experience will be a great asset as we prepare for the next level of volume growth.''

Prior to joining Conner, Chan was managing director of the Singapore subsidiary of Printronix Inc. and was vice president of Far East Operations for National Micronetics Inc.

Reporting to Chan will be Patrick Ngo, vice president and managing director, Singapore Operations, and Patrick Yeo, vice president and managing director, Malaysia Operations. Ngo and Yeo previously were directors of their respective operations for Conner.

Conner Peripherals designs, manufactures and markets worldwide, high-performance 2.5- and 3.5-inch Winchester disk drives for workstations, fileservers, and the new generation of desktop, portable, laptop and notebook microcomputers. These systems are based on 16-bit, 32-bit and RISC-based microprocessors and require greater storage capacity, faster access time, lower power consumption and smaller size than previous disk drives.

SAN JOSE, CA (DEC. 11) BUSINESS WIRE - Conner Peripherals Inc. (NYSE: CNR) Tuesday announced the appointment of Hank Josefczyk, senior vice president, worldwide sales, and John Stacey, vice president, marketing.

The newly-created positions report to C. Scott Holt, executive vice president, sales and marketing.

Josefczyk will be responsible for sales to Conner OEM customers and distributors worldwide. Prior to joining Conner, Josefczyk was senior vice president, marketing and sales for NEC Electronics Inc.

Stacey will be responsible for product marketing, applications engineering, product advertising and public relations. Before joining Conner, Stacey was director of marketing and business development for Metaphor Computer Systems.

''The appointments of Hank and John add tremendous depth to our richly-experienced management team,'' said C. Scott Holt, executive vice president, sales and marketing, in making the announcements. ''We look to each to play an important role in the growth of this company, particularly in Asia and Europe.''

The company also announced the appointment of John Haughey, vice president Asia sales, and Bobby Toda, vice president, North America and Major Account sales. Prior to joining Conner, Haughey held a similar position at Seagate Technology. Toda previously was vice president, Asia sales, at Conner.

Conner Peripherals designs, manufactures and markets worldwide, high-performance 2.5- and 3.5-inch Winchester disk drives for workstations, fileservers, and the new generation of desktop, portable, laptop and notebook microcomputers.

PURCHASE, NY (DEC. 11) BUSINESS WIRE - IBM announced Tuesday the awarding of more than $3.5 million to help finance 21 child care and elder care projects in nine communities across the country where its employees live and work.

The announcement is part of IBM's comprehensive strategy to increase the supply and improve the quality of child care and elder care programs nationwide.

Funds are being awarded to projects in Burlington, Vt.; Charlotte and Raleigh/Durham, N.C.; Southern Connecticut; Dallas; Moline, Ill.; Montgomery County, Md.; Rochester, Minn., and Westchester County, N.Y.

The announcement represents the largest distribution from the $25 million IBM Funds for Dependent Care Initia- tives since the program was introduced last year. To date, IBM has awarded more than $4.5 million to support 45 pro- jects in 20 cities.

Major programs being funded include a child care center project near Raleigh, N.C. IBM and Quality Child Care Inc. will fund the construction and initial start-up costs of a child care center at the Research Triangle Park complex. The center, owned by Quality Child Care Inc. and operated by Resources for Child Care Management, will accommodate 100 to 125 children, including infants and toddlers.

IBM and Burroughs Wellcome will fund quality enhance- ments to other Raleigh area child care centers, finance a family day care campaign, as well as finance two elder care projects to expand respite care options for employed caregivers in the greater Raleigh area.

LOS ANGELES (DEC. 11) BUSINESS WIRE - The following is a statement from Michael A. Hammer:

My grandfather was a man of great vision and great energy. No sooner did he accomplish one goal than he was off pursuing a new and more distant dream, and he used his energy unsparingly in those pursuits.

His most recent - and by far his most ambitious - dreams have been to help bring about a lasting peace between the West and the East and to help find a cure for cancer.

In recent years, great strides have been made toward accomplishing these goals

and this legacy is a tribute, at least in part, to my grandfather's unyielding perseverance in the face of what seemed to be insurmountable odds.

My grandfather was very devoted to his family and his love and guidance will be greatly missed. We rejoice that he is at peace in heaven forever. Funeral arrangements will be announced when they are complete.

SAN JUAN CAPISTRANO, CA (DEC. 11) BUSINESS WIRE - Nichols Institute (ASE:LAB) and MAWD Medical Laboratories Inc. Tuesday announced that they have signed a definitive agreement with respect to the previously announced merger.

In the merger, the shareholders of MAWD will receive consideration to be paid for the business and covenants not to compete of $1.75 million in cash, future payments with a present value of $2.0 million, and a new class of preferred stock convertible into approximately 111,000 shares of Nichols Institute common stock.

Dependent on future events, preferred stock convertible into 35,700 additional shares of common stock may be issued and cash payments having a present value of $1.0 million may be made. The effective date of the merger is expected to be during the first week of January 1991.

MAWD serves physicians, hospitals and clinics in western Missouri and eastern Kansas. For the fiscal year ended June 30, MAWD's laboratory revenues were approximately $6.2 million.

Nichols Institute provides esoteric diagnostic testing to clients nationwide in the fields of endocrinology, genetics, immunology, microbiology, molecular biology, oncology, serology, special chemistries, toxicology and virology. It also has regional laboratories in California, the Pacific Northwest and in the Midwest that provide clinical testing to those markets.

The company also provides NIDA certified substance abuse testing to clients nationwide. Nichols Institute Diagnostics manufactures kits for the performance of medical diagnostic tests that are distributed worldwide.

RANCHO MIRAGE, CALIF. (DEC. 11) BUSINESS WIRE - StratAmerica Corp. announced it has selected SiBer Properties Inc., Portland, Ore., to identify and secure locations for its franchised ''Field of Dreams'' baseball card and sports memorabilia retail business.

The ''Field of Dreams'' retail store is an upscale approach to merchandising sports collectibles in high-traffic regional shopping malls.

StratAmerica's subsidiary, Sports Archives Inc., has been licensed by MCA, Los Angeles, to use the name ''Field of Dreams'' in the sports memorabilia business. The organizational and documentation process of the franchising program is expected to be completed toward the end of the first calendar quarter of 1991.

SiBer Properties Inc. was instrumental in site identification and procurement for StratAmerica when it was the majority owner of Shari's Management Corp. for Shari's Restaurants.

StratAmerica's management has previously been associated with the management of SiBer Properties in the development of a 1,100 unit restaurant chain. SiBer Properties management was responsible for the selection of about two-thirds of those locations. ''Field of Dreams'' retail stores are seeking 500-900 square-foot locations in high-traffic regional malls.

Earlier this month the second ''Field of Dreams'' company owned retail store was opened at the Fashion Mall in Indio, Calif. A third store is expected to open later this month at the Glendale Galleria; Glendale, Calif. ''Field of Dreams'' corporate development plans are directed toward building a network of baseball card and memorabilia retail stores coast to coast.

The primary focus to achieve that goal is the national franchise program, along with continuing to open company owned stores in the Southern California market.

StratAmerica's stock is traded on the NASDAQ system in the over-the-counter market with the symbol STCO.

SAN DIEGO (DEC. 11) BUSINESS WIRE - Silicon Beach Software Inc. Tuesday shipped Personal Press, the company's new, easy-to-use, full-featured page layout program for the Macintosh.

Developed for the casual user, Personal Press offers the power of desktop publishing with a minimum investment of time and money.

Personal Press pushes interface technology to the next step with interactive proxies. This technology provides constant, interactive graphic feedback to the user as an aid in the design and layout process.
  These graphic ''proxies'' let users know exactly what is going to happen to their document before it takes place.

Personal Press delivers ease-of-use with its unique AutoCreate feature. With AutoCreate, users can assemble text and graphics into one of the numerous predesigned templates provided with the program or easily expand the power of AutoCreate by designing and adding their own templates.

In addition to placing text created with many stand-alone word processors, Personal Press provides a full-featured word processor, with custom styles to allow users to create and edit text directly in their publication. The program also provides a spell checker and thesaurus, as well as the ability to do a search-and-replace on text, fonts, styles, and sizes.

Advanced users will find the extended capabilities of Personal Press extremely helpful. Plug-in modules allow scanning directly from within the program. Image controls allow for adjustment of scanned gray-scale images. Text and graphics can be rotated. The program also offers full color graphic import and display to accommodate gray-scale TIFF and 24-bit color PICT images for output to color printers or for printing spot color separations on black-and-white printers. In addition, advanced halftoning optimizes gray-scale image output to any black-and-white printer, even those without PostScript capability.

Other interface innovations include the Workbook, which works like a scrapbook but is separately attached to each document; Posted Notes, highlighted in yellow, for holding working notes, editing comments or reminders; Link Navigator which sequentially highlights the links in a text chain; and the

Equals Tool which quickly makes objects the same size.

Silicon Beach Software, a subsidiary of Aldus Corp., publishes a family of graphics, multimedia, and publishing software. The firm's other products include SuperPaint, a combined paint-and-draw program: Super3D, a 3D modeling and animation package; Digital Darkroom, a gray-scale image processing package and SuperCard, a multimedia authoring program.

Aldus Corp. (NASDAQ:ALDC) creates computer software that helps people throughout the world effectively communicate information and ideas. Aldus distributes all products through an international network of more than 16,000 authorized dealers and distributors.

FORT LAUDERDALE, FL (DEC. 11) BUSINESS WIRE - Encore Computer announced that it has signed an Agreement in Principle with Gould Inc., under which Gould will acquire, through an exchange of debt, $50 million of new Convertible Preferred Stock and $10 million of new Redeemable Preferred Stock.

President and Chief Executive Officer Kenneth G. Fisher said, "This expression of confidence by Gould in Encore's future is very important. We are clearly positioned for long term growth with this refinancing."

He added that, "This action, along with the introduction of our new 90 Series systems and over $25 million of shipments from our new Concept 32/2040 (Seahawk) System, makes Encore's market position exceptionally strong as we enter 1991."

In connection with the exchange of debt for equity, Gould and Encore will enter into a new revolving credit facility and Gould will receive a license which may entitle Gould to use Encore technology in three to five years.

The Convertible Preferred shares will be convertible into Common at $3.25 per share. If the new Convertible Preferred together with existing Preferred shares owned by Gould were fully converted, Gould's ownership of Encore's outstanding Common Stock would increase from approximately 32 percent to 52 percent.

The new Preferred Stock will be non-voting except the Convertible Preferred will be entitled to vote on an as-converted basis on any proposed sale or merger of the company.

Gould's President and Chief Executive Officer, C. David Ferguson, commented,

"Our commitment to Encore's future remains firm. We believe that the combination of good management, outstanding new products, and this additional financing, provides Encore the ingredients necessary for success."

Encore Computer Corp., an international company headquartered in Fort Lauderdale, Fla., provides cost-effective computer systems solutions for time-critical applications. Encore manufactures three families of parallel and distributed computer systems: the Encore 90, CONCEPT/32, and Mutlimax, and has a $1 billion installed base of over 8000 systems worldwide.

CONTACT: Encore Computer Corp., Fort Lauderdale, Charles S. Anderson, (305) 797-5605.

#90345b0670 12/11/1990 ~Business Wire

BURLINGTON, MA (DEC. 11) BUSINESS WIRE - Cognos (TSE/CSN; NASDAQ/COGNF) Tuesday introduced a new computer-aided software engineering (CASE) tool for Digital VAX systems that significantly advances the integration of design, code generation, documentation and maintenance support of business applications.

Cognos' PowerCASE is significant because it is the first CASE tool fully integrated within a fourth-generation language (4GL) environment -- PowerHouse -- and ANSI-standard SQL relational databases. According to Computer Intelligence, PowerHouse is the leading 4GL for VAX systems with a 28 percent market share.

PowerCASE enables users to create applications more quickly and easily than other CASE solutions by working completely within the PowerHouse application development environment, from design to documentation. By comparison, most competitive CASE solutions are stand-alone tools that only help analysts draw the logical picture of an application on paper.

PowerCASE takes analysts beyond conventional CASE tools. It provides the power to create comprehensive designs with tight integration between both the data and processes and actually generates the application as designed. Because it is integrated with PowerHouse, ANSI-standard SQL and RMS, PowerCASE can automatically generate menus, screens, reports and batch programs needed for high quality business applications. The mouse-driven, graphical user interface of DECwindows is used to increase user productivity.

PowerCASE is also distinguished by its ability to support ongoing maintenance of the application. As users develop applications with PowerCASE, the software automatically generates on-line documentation. The DECwindows interface allows for the display of different views of the application, ranging from data flow diagrams to PowerHouse 4GL and SQL code.

By contrast, applications developed with conventional CASE tools require programmers to manually document and maintain the software, a task which disconnects maintenance enhancements from the original local views of the application. Since such changes are rarely reflected in the original CASE model of the application, the inherent productivity gains of CASE are negated because maintenance programmers waste valuable time trying to make sense out of the un-documented application model.

This PowerCASE feature is important because maintenance is the biggest bottleneck in the application development industry. Industry analysts estimate up to 80 percent of all MIS programmers are involved in maintaining software, leaving few resources available to develop new applications. With PowerCASE's advanced maintenance environment, companies can continually evolve applications to keep up with current needs, while freeing up programmers to develop new applications.

Cognos markets application development software used on mid- range computers. The publicly-held company is headquartered in Ottawa, Canada, with worldwide sales, service and marketing operations in Burlington, Mass. Its PowerHouse product is used at over 16,000 installations in 68 countries.

WHITE PLAINS, NY (DEC. 11) BUSINESS WIRE - Every 16 seconds someone suffers a

head injury and many of those result in cognitive impairment or memory loss.(a)

The inability of persons with cognitive impairments to recall their family and friends or to recognize common household items can cause great difficulty in their daily lives.

IBM Tuesday introduced THINKable(b), a multimedia software program operating on the Personal System/2(b). THINKable is a state-of-the-art multimedia solution for cognitive impairment that therapists can use in treating the some 12 million people in the U.S. who suffer memory loss resulting from injury, developmental disabilities, substance abuse, degenerative disease and neurological disorders.

''THINKable helps a cognitively impaired person sharpen memory skills through the innovative use of computers,'' says Juan M. Sabater, IBM corporate director of community programs. ''IBM developed THINKable as part of an ongoing commitment to help individuals with disabilities achieve greater personal and professional independence through the use of technology.''

THINKable enables psychologists, occupational therapists, speech/language pathologists and doctors to assist the patient or client in working independently. The sense of the client's personal accomplishment is heightened and clinicians are able to work with more than one client at a time.

THINKable uses multimedia technology on the PS/2(b), including animation, photos and natural voice to prompt users through clinical practice sessions that help improve memory, attention, discrimination and sequencing. Sample tasks that can be performed using THINKable include responding to specific images that appear on screen, identifying pairs of images that are similar or dissimilar, and recalling the order in which images appear.

For example, voice and/or text can prompt the user to touch a target image like a chair and on the next screen to identify images that are different, say an ice cream cone or flowers.

Therapists can use sample practice strategies provided with THINKable or tailor practice sessions to meet individual client needs. IBM's latest solution for the disabled not only allows for cost efficiencies related to expanded clinical productivity, it also enables clinicians to easily generate graphic and tabular reports for case managers, doctors, families and insurers. With the U.S. cost for treating cognitively impaired individuals at approximately $25 billion per year, the need for documenting treatment is ever increasing and complex.

THINKable will be marketed by authorized remarketers to educational institutions; clinical professionals (psychologists, psychiatrists, neuropsychologists); speech, language and hearing professionals; occupational therapists and others in health-care and clinical institutions. Currently,

The Psychological Corporation in San Antonio, Texas, is the only remarketer certified to sell THINKable. IBM expects that other remarketers specializing in requirements of THINKable's intended market, also will be certified to market the product.

CAMBRIDGE, MA (DEC. 11) BUSINESS WIRE - Genzyme Corp. (NASDAQ:GENZ) Tuesday announced that Robert Carpenter, executive vice president of Genzyme and chairman and chief executive officer of IG Laboratories (Genzyme's 59 percent owned subsidiary) has resigned.

He will leave full-time employment with Genzyme in early January. He will remain as a director of IG Laboratories and will continue working closely with the company.

Robert Carpenter, executive vice president of Genzyme, said, ''I have accomplished the goals Henri Termeer, chairman and chief executive officer of Genzyme, and I set out together at the time of the merger of Integrated Genetics with Genzyme and have enjoyed working with him.''

Henri Termeer, chairman and chief executive officer of Genzyme, said, ''Bob Carpenter has been extremely instrumental in implementing a successful merger and in helping lay the foundation for the explosive growth of Genzyme Corp.'' He continued, ''we will continue working together on a case-by-case basis and we wish him the best of luck in his future endeavors.''

Genzyme Corp. is a diversified health care products company based on the development of novel therapeutic proteins and biomaterials. The company is currently engaged in the operation of its growing diagnostics products, pharmaceuticals and fine chemicals businesses. The company is headquartered in Cambridge and Framingham, Mass., and Maidstone and Haverhill, England, and an international sales and marketing office located in Tokyo, Japan.

LAS VEGAS (DEC. 11) BUSINESS WIRE - In addition to today's introduction of PowerCASE, Cognos (NASDAQ/COGNF; TSE/CSN) is also exhibiting at DEXPO West a variety of integrated software tools from its PowerHouse application

development environment.

This includes a new release of Cognos' InQuizitive reporting software.

InQuizitive is a powerful end-user reporting tool used to retrieve and analyze business information without the help of MIS professionals. The new release 6.0 provides features that increase InQuizitive startup speed by 400 percent, and processing performance by 30 percent. The package includes a pop-up menu interface to PowerHouse-supported files, extensive context-sensitive help, report painter and manager, basic business graphs, and the ability to transfer data to popular PC- based applications such as Lotus 1-2-3.

Other PowerHouse products exhibited this week at DEXPO West include: PowerHouse 4GL, the leading fourth-generation language on Digital VAX/VMS systems. According to Computer Intelligence, PowerHouse is the leading 4GL for VAX systems with a 28 percent market share. PowerPlay, an easy-to-use package for displaying and analyzing business information in colorful graphics on PCs running Microsoft Windows 3.0.

PowerHouse ARCHITECT, an automatic documentation and maintenance tool for PowerHouse-developed business applications. PowerHouse ARCHITECT 6.00.A, announced today, provides full compatibility with PowerHouse 6.0. PowerHouse StarBase, Cognos' VAX/VMS-compatible relational database management system.

In addition to exhibiting these products, Cognos is also featuring PowerCASE at DEXPO West. Announced today, PowerCASE is a tool for Digital VAX systems that significantly advances the integration of design, code generation, documentation and maintenance support of business applications.

Cognos' PowerCASE is significant because it is the first CASE tool fully integrated within a fourth-generation language (4GL) environment -- PowerHouse -- and ANSI-standard SQL relational databases.

Cognos markets application development software used on midrange computers. The publicly held company is headquartered in Ottawa, Canada, with worldwide sales, service and marketing operations in Burlington, Mass. Its PowerHouse product is used at over 16,000 installations in 68 countries.

#90345b0697 12/11/1990 ~Business Wire

NATICK, MA (DEC. 11) BUSINESS WIRE - Access Technology Inc., a CompuServe

company, Tuesday announced that it has begun shipment, on schedule, of a Novell PC network version of its ForComment Document Review Software.

ForComment, widely hailed as one of the first useful ''workgroup'' software tools for personal computers, enables organizations to take advantage of their LAN technology in order to streamline the document review process and enhance the quality and accuracy of the finished document.

The introduction of ForComment for Novell PC networks continues the entrance of Access Technology, an established vendor of group and personal productivity software tools, into the PC-LAN marketplace.

ForComment addresses the problem -- shared by everyone in an organization -- of needing input on written work. This work can vary from simple memos and agendas, to complex proposals, contracts and technical documentation, while the reviewers might be dispersed across departments, buildings and even time zones.

The traditional, inefficient method of collecting co-workers' input consists of distributing photocopied pages, then collecting handwritten scrawls, Post-It notes, and orphan electronic-mail messages. In contrast, ForComment automatically distributes a draft document, created in one of several popular word processors and editors, to a designated list of reviewers. The reviewers can then comment on the document -- and each other's comments -- on-line.

ForComment collects all the comments and suggested revisions -- freeing the document's author to focus on shaping the text, rather than chasing paper; and provides a permanent record of how the group arrived at the finished document.

ForComment reinforces an organization's investment in existing productivity tools, by building upon commonly used PC application software. ForComment can be used to review documents created with popular word-processing packages, such as WordPerfect and Microsoft Word, and utilizes electronic-mail systems such as cc:Mail to alert viewers to the beginning of a review process. A Logical Expansion of the Access Technology Product Family

ForComment was originally introduced by Broderbund Software in 1986. Access obtained an exclusive license to the technology underlying ForComment in 1989, in order to improve the product's utilization of PC-LANs, and to develop a version for Digital Equipment Corp.'s VAX/VMS computers, as well. Registered users of the Broderbund version of ForComment may upgrade to the new version of ForComment at a reduced cost by contacting Access Technology at 508-655-9191. Pricing and Distribution

The Novell PC-LAN version of ForComment is available now, at $1295 for a 10-user license, plus $100 for each additional registered user. Volume discounts are available.

ForComment is sold directly by the Access Technology sales force, and will also be sold through VARs, systems integrators, network-based resellers and OEMs.

Since September, Access Technology has also been shipping versions of ForComment that are designed for Digital Equipment Corp.'s VAX/VMS and ALL-IN-1 Office Software computing environments. Access Technology Inc.

Access Technology Inc., the largest component of CompuServe Inc.'s Software Products Division, was founded in 1980. The company maintains offices around the globe and is headquartered in Natick, Mass. Based in Columbus, Ohio, CompuServe is a wholly-owned subsidiary of H&R Block Inc.

With nearly one million users at more than 40,000 licensed sites, Access is one of the world's largest suppliers of group and personal productivity software tools. The company's family of products includes: 20/20, the leading spreadsheet for VAX/VMS, UNIX-based systems and a host of other workstations and minicomputers; 20/20 RealTime Spreadsheet; Vivid Presentation Graphics; ForComment Document Review Software; and several 20/20 add-in connectivity tools.

NEW YORK (DEC. 11) BUSINESS WIRE - Information Management Technologies Corp. (''IMTECH'') 1/8NASDAQ:IMTKA (common), IMTKU (units), IMTKW (warrants)3/8 Tuesday announced that its wholly-owned subsidiary, IMTECH Optical Systems, and Bell & Howell Document Image Products Company have signed an agreement which will allow Bell & Howell to private label IMTECH's ''COINS'' (Computer Output INformation System) PC-based optical data storage software.

COINS allows computer output to be stored, retrieved, and viewed or printed, eliminating the need for paper copies, computer output microfilm or expensive magnetic storage.

Under the terms of the agreement, Bell & Howell will offer COINS in their product line under the name ''Image Search Plus-5000'' computer output data storage solution. The product complements the Bell & Howell ''Image Search'' microfilm and optical disk based document management systems by allowing users to electronically access both scanned image and computer output documents.

Pierce Lowrey, Chief Executive Officer of IMTECH commented, ''Our agreement with Bell and Howell will enable COINS to further penetrate the computer output market which is a key element in our aggressive COINS marketing program. COINS is currently installed in the government, distribution,

banking, finance, hospitality, health care, transportation and manufacturing industries.''

The Bell & Howell Document Image Products Company, headquartered in Chicago, Illinois, provides micrographic and optical disk software and systems to a wide range of industries that require specialized document management techniques, retrieval and control.

''COINS'' is easily upgraded, growing from a single PC-based workstation to multiple workstations with multiple optical disk drives operating on a local area network. IMTECH believes its COINS product is uniquely positioned to capture a significant portion of the rapidly expanding optical information systems (''OIS'') market.

SUNNYVALE, CA (DEC. 11) BUSINESS WIRE - Poqet Computer Corp. Tuesday announced an agreement with Ingram Micro D Inc. for distribution of The Poqet PC.

Effective immediately, Ingram Micro D will stock and distribute all Poqet products including: The Poqet PC; The Poqet WorldPort 2400 modem; the Poqet Floppy Drive and PC Card-based software from leading publishers.

Ingram Micro D Inc. is the world's largest distributor of microcomputer products, marketing and distributing more than 8,000 products from over 500 of the world's top hardware manufacturers and software developers. It serves as a wholesale distributor to over 40,000 reseller customers in the United States Canada and Europe.

Ingram Micro D Inc. operates two international subsidiaries, Ingram Micro D Ltd. of Canada and Ingram Sofeurop of Belgium. The company is headquartered in Santa Ana, Calif., and achieved sales in excess of $1 billion in 1989.

Poqet (pronouced ''pocket'') Computer Corp., founded in 1988, is the leading designer, manufacturer and marketer of high-performance, truly portable personal technology products. The company's first product, The Poqet PC, received the 1989 PC MAGAZINE Technical Excellence Award for Portable Computers and the 1989 BYTE MAGAZINE Award of Distinction.

The privately held company is jointly owned by its founders, employees and Fujitsu Ltd. Headquartered in Sunnyvale, Poqet has operations and offices in Monterey, Calif.; Westborough, Mass.; Dallas; Atlanta; Rye, N.Y.; Newport Beach, Calif.; Seattle; and Hoffman Estates, Ill. Poqet also has international offices in Paris and Sophia Antipolis, France; Langley, England; Frankfurt; Rome and Amsterdam.

HUNTSVILLE, AL (DEC. 11) BUSINESS WIRE - SCI Systems Inc. (NASDAQ:SCIS) Tuesday announced that its board of directors has authorized the purchase, in open market and privately negotiated transactions, of up to $20 million (market value) of the company's 5-5/8 percent convertible subordinated debentures (''1987 debentures,'' NASDAQ:SCISG) due March 1, 2012.

The company said the timing and amount of 1987 debentures to be purchased from time to time, if any, would depend upon a number of factors, including market price. As of Nov. 30, 1990, the aggregate principal amount of 1987 debentures outstanding was $75 million.

SCI Systems Inc. designs, manufactures, markets and services electronic products and systems, primarily for the computer and office automation, aerospace, telecommunications, medical and banking industries, as well as for the U.S. Government.

WINSTON-SALEM, NC (DEC. 11) BUSINESS WIRE - R.J. Reynolds Tobacco Co. and its fellow members of the Tobacco Institute Tuesday announced new initiatives to discourage young people from smoking.

The new initiatives expand the system of voluntary restraints the tobacco industry has adhered to for nearly 20 years. The new initiatives include:

-- A national program to help retailers observe and enforce state laws prohibiting tobacco sales to youth. The store signage and education

campaign's theme is: ''It's the Law.''

-- Industry support for passage of new state laws setting a minimum age of 18 for cigarette sales in those states without a minimum age law or one lower than 18.

-- Industry support for new state laws requiring supervision of cigarette vending machines located in places frequented by minors.

-- Sharp new limitations on the distribution of product samples and premiums; requirements that billboard cigarette advertisements be at least 500 feet away from schools and playgrounds; and other new guidelines that supplement current industry codes.

-- Support materials for parents to use in encouraging their children to resist peer pressure to smoke. The materials will be promoted through a multi-million dollar advertising campaign.

The Tobacco Institute's program for the retail industry is designed to encourage strict adherance to state laws that prohibit the sale of cigarettes to minors. With the active involvement of retail organizations around the country, the program will reinforce the fact that tobacco products, in accordance with most state laws, should only be sold to those 18 years of age or older.

The theme of the campaign, ''It's the Law: We do not sell tobacco products to persons under 18,'' is availabe on point-of-purchase materials, including signs, decals, stickers and lapel buttons. In three states, the materials will indicate that the law sets 19 as the minimum age for the sale of cigarettes.

The program materials will also include tips for retail employees on complying with the law. Materials will be made available free of charge to retail outlets and will be promoted through advertisements in national and state retail publications.

RONKONKOMA, NY (DEC. 11) BUSINESS WIRE - Logitek Inc. (NASDAQ:LGTK) Tuesday received the first ''SUPERIOR QUALITY SUPPLIER'' Award from General Dynamics Corporation as part of a new program begun by General Dynamics approximately a year ago to identify superior quality suppliers from among its roster of suppliers throughout the United States.

The Award was presented to LOGITEK Inc., a Ronkonkoma, Long Island, electronics engineering and manufacturing company, to honor its management and staff for having attained a remarkable quality rating of 99.9 percent. LOGITEK, which has been a supplier to General Dynamics for more than 20 years, supplies power monitoring equipment and control devices used in General Dynamics' major electronics systems, such as the ground launch cruise missile, F-16, B1-B, C-17, and Trident submarines.

Commenting on receiving the first Award, LOGITEK President, Herbert L. Fischer stated, ''The recognition of the quality of our products that this honor represents is a major event for LOGITEK and a reaffirmation of the importance of quality to our long-term success. Our commitment to the highest degree of product integrity will continue to build confidence in us on the part of our customers, thereby cementing strong, long-term relationships,'' Fischer concluded.

The award was presented to LOGITEK today by James Coney, General Dynamics Vice President of Materiel; and Thomas Donnelly, District Quality Assurance Representative, at LOGITEK's Ronkonkoma, headquarters.

LOGITEK Inc. manufactures and markets electronic power monitors and controls and electronic power supplies for use in mobile systems such as aircraft and space vehicles, aboard ships, vehicular mobile communications and radar systems, off-shore rigs, and pipeline control stations. In addition, LOGITEK is engaged in contract manufacturing operations.

VALENCIA, CA (DEC. 11) BUSINESS WIRE - Airvision has signed an agreement with Air Holland to be the first carrier in the world to install Airvision's new generation of mutli-channel entertainment systems, announced Charles A. Bucks, president and CEO of Airvision, and John N. Block, president and CEO of Air Holland.

Airvision, a North American Philips company based in Valencia, is the pioneer of multi-channel inflight entertainment systems. The newest generation Model 400 Cabin Management Entertainment System offers the most advanced information and entertainment environment available. The entertainment portion of the system allows passengers to electronically select from as many as 12 video channels and up to 30 audio channels.

In addition, passengers can order beverages, indicate meal preferences, go ''tele-shopping'' with on-screen catalogues, make hotel reservations, car rental reservations, purchase duty free items and make direct-dial telephone calls from their individual seat.

Air Holland, the Dutch charter airline, is slated to install the system in the luxurious comfort class of two Boeing 767 aircraft in mid 1991. The seatback units will be positioned in new seats on aircraft with routing to the Caribbean and Kenya and other long distance destinations in Southern Europe and North Africa.

Airvision, in the interim, will provide Air Holland with Model 30 multi-channel seatback units which will offer five channels of hosted video programming in Dutch and German and an additional channel featuring ''Air Show.'' ''Airvision is extremely pleased to have Air Holland as the launch customer for our exciting new generation of entertainment and cabin management systems,'' stated Bucks.

North American Philips Corp., a wholly-owned subsidiary of N.V. Philips of the Netherlands, is one of the 100 largest industrial companies in the U.S. with operations in consumer products, lighting products, electrical and electronic components, medical diagnostic imaging systems, and other professional equipment marketed under many well known brands, including Philips, Magnavox, Norelco, Philco, and Sylvania audio-video.

HOUSTON (DEC. 11) BUSINESS WIRE - Enron Corp. (NYSE: ENE) announced Tuesday that John A. Urquhart has been elected to the corporation's board of directors.

With Urquhart's election, the number of Enron directors now stands at 16.

''Jack will bring significant contributions to all of our business units, but we are particularly pleased to be able to benefit from his extensive background in power generation,'' said Kenneth L. Lay, chairman and chief executive officer of Enron.

Urquhart is senior vice president of General Electric Co. and formerly headed General Electric's Industrial and Power Systems, the world's largest manufacturer that designs, produces, sells, constructs and services equipment and systems for the generation, transmission and distribution of electric power. General Electric builds or designs about half of the gas turbines used around the world.

Urquhart joined General Electric in 1949 and served in a number of assignments in the company's gas turbine, power generation sales, delivery, construction and engineering services businesses. He was named senior vice president and group executive of construction and engineering services in 1981 and executive vice president with responsibility for General Electric's international operations in 1982.

He became executive vice president with responsibility for the power systems sector in 1985 and was named senior vice presdient with responsibility for GE Industrial and Power Systems in 1986.

Urquhart is a graduate of Virginia Polytechnic Institute. He is a member of the American Society of Mechanical Engineers' Industry Advisory Board, the Advisory Board of the Wharton Center for International Management Studies, the British-North American Committee, the U.S. Council for Energy Awareness, and the American University of Cairo.

Enron Corp., America's leading natural gas company with approximately $11 billion in revenues and $9 billion in assets, operates the nation's largest natural gas transmission system; markets natural gas, gas liquids, crude oil and refined products nationally and worldwide.

Enron Corp. owns 84 percent of Enron Oil & Gas Co., one of the country's largest independent (non-integrated) natural gas exploration and production companies; and also is one of the largest independent producers of electricity in the United States, with extensive experience in combined heat and power installations.

NEW YORK (DEC. 11) BUSINESS WIRE - Allen F. Jacobson, chairman and chief executive officer of 3M Co., has been elected Chairman of the United States Council for International Business, it was announced Tuesday by the Council's trustees.

Jacobson, who succeeds Joseph E. Connor, chairman of Price Waterhouse World Firm, is an active participant in world business forums.

In accepting the council's chairmanship, he said, ''The Council plays a pivotal role in assessing key global business issues, and, most importantly, formulating policies and taking action to achieve solutions, particularly in light of today's momentous worldwide poltiical and economic events.

''At a time of both unprecedented competition and opportunity for American

business in global markets, and at a time when the future of global trade is being shaped in Geneva and Brussels, the work of the U.S. Council has never been more important than it is today.''

Jacobson identified three major concerns for global competition in the '90s: structural and technological changes, trade and investment protectionism, and responsible environmental actions.

The U.S. Council advances the global interests of American business both at home and abroad, with the objective of promoting an open system of trade, finance and investment. Its business policy positions, formulation in some 25 committees drawn from its membership of 300 multinational U.S. corporations, range from East-West relations and the European Community to worldwide trade and employment policies and protection of intellectual property rights.

Jacobson has spent his entire business career at 3M and was elected to his present position of chairman and CEO in 1986. Among his many other business and civic affiliations, Jacobson serves as a director of Mobil Corp., Northern States Power, Potlatch Corp., Sara Lee Corp., U.S. West, and Valmont Industries.

Jacobson is chairman of the Emergency Committee for American Trade. He serves on the board of overseers of the Executive Council on Foreign Diplomats. He is also a member of, among other organizations, the Advisory Committee for Trade Policy and Negotiations, the Conference Board, Business Council, Business Roundtable, and the U.S.-USSR Trade and Economic Council.

#90345b0748 12/11/1990 ~Business Wire

AMSTELVEEN, THE NETHERLANDS (DEC. 11) BUSINESS WIRE - KLM Royal Dutch Airlines announces changes to the KLM network.

BERLIN Effective March 31, 1991, the first day of the summer schedules, KLM will be operating to Tegel Airport in the western part of Berlin.

Services to Schoneveld Airport in former East Berlin will be suspended on the same date.

KLM currently operates two weekly return flights to Schoneveld.

The Schiphol-Tegel v.v. service will be three weekly flights until April 14,

1991. The service will then be upgraded to a daily return service by NLM CityHopper operating Fokker F28 aircraft carrying 80 passengers.

KLM has decided to operate to Tegel with its ultra-modern facilities partly because it is closer to the city center than Schoneveld.

KLM retains its rights to continue to operate to Schoneveld besides Tegel on the grounds of air-political agreements concluded with the former East and West German governments.

KANO Services to Kano, northern Nigeria, will be resumed on January 14, 1991, with two weekly flights from Schiphol. Final destination will be Accra in Ghana. The service will be operated with DC-10 aircraft.

Resumption of the Kano service comes several weeks after the national airlines of the two countries reached agreement on a number of air-political and commercial issues.

The Nigerian government has meanwhile given its approval. KLM had to suspend its Kano services on August 10 this year. Nigerian civil aviation authorities withdrew KLM's rights to operate to this destination with immediate effect on that date.

The three weekly services between Schiphol and the Nigerian capital, Lagos, have continued uninterrupted.

AMMAN Effective Jan. 3, 1991, KLM's services to the Jordanian capital of Amman will be stopped. This destination was served three times a week. The decision to halt services has been taken on commercial grounds in the light of the KLM drive to achieve permanently lower cost levels.

The continuation of KLM sales activities in Jordan is subject for further study. KLM will retain its rights to operate scheduled services to and from Amman.

NEW YORK (DEC. 11) BUSINESS WIRE - The Dun & Bradstreet Corporation announced Tuesday that Ron K. Glover has been named president, North America, Dun & Bradstreet Information Services, effective January 1, 1991.

Glover joined Dun & Bradstreet in March 1990 as president, Dun & Bradstreet Business Credit Services, which consists of U.S. Credit Services, Information Resources, Dun & Bradstreet Receivable Management Services and American Credit

Indemnity.

In his new position, Glover also will assume responsibility for Dun & Bradstreet Business Marketing Services and Dun & Bradstreet Canada, Ltd.

D&B Business Marketing Services consists of those D&B units that serve the information needs of business-to-business and education marketers, including Dun's Marketing Services, Market Data Retrieval and Compumark. Dun & Bradstreet Canada, Ltd. provides customers with information on nearly 700,000 Canadian businesses, as well as access to information on millions of firms outside Canada.

As previously announced, Dun & Bradstreet Information Services supersedes the company's Business Information Group, effective January 1, 1991, and will consist of D&B's worldwide commerical-credit, credit-insurance, receivable-management and business marketing services operations.

The Dun & Bradstreet Corporation is the world's largest marketer of business information and related services, with worldwide revenue of $4.3 billion in 1989.

NORWOOD, MA (DEC. 11) BUSINESS WIRE - Telco Systems Inc. (TELC:OTC National Market) announced Tuesday that sales for the first quarter of fiscal 1991 (ended 11/25/90) increased 18 percent to $22,625,000, compared with $19,137,000 for the same period last year.

Net income for the quarter increased to $1,670,000, or 18 cents per share, compared with $1,090,000, or 12 cents per share, a year ago. Average common shares and equivalents for the quarter amounted to 9,214,000, compared with 9,028,000 last year. The company's financial condition remained strong with cash and short-term investments at quarter end amounting to $20,527,000.

Paul D. Lazay, president and chief executive officer, said the record quarterly results reflected very strong performance in its Fiber Optic Transmission Equipment Division which posted a 34 percent sales increase over last year. The increased earnings also included improved gross margins in the company's two product areas which, combined with the higher sales volume, more than offset increased R&D spending and a higher effective tax rate.

Lazay said sales of a variety of fiber optic multiplexers and transmission systems increased sharply to several Bell Operating Company customers for local loop applications. In the Network Access Products Division, shipments

of DCB-24 and ROUTE-24 T1 access multiplexers exceeded last year, but the Division's sales were slightly below a year ago due to shipments of custom network products included in last year's first quarter.

New T1 development programs underway for frame relay applications and switched 56 kbps transmission service as well as recent new customer approvals offer excellent opportunity for market expansion of both the DCB-24 and intelligent ROUTE-24 access multiplexers. In the transmission area, Telco's FOX-2 and T-HUB fiber optic extension systems and other local loop products are providing outstanding price/performance for a number of telephone companies serving growing business demand for fiber optic service in metropolitan areas, suburban office parks, and rural communities.

The outlook remains positive for continued gains in total sales and earnings for the balance of the fiscal year. In the T1 multiplexer area, inventory adjustments by certain customers may lower near-term demand, however, good growth is expected for the full year. In the fiber optic transmission product area, the outlook is strong with revenues and earnings expected to continue ahead of plan. Telco Systems Inc., based in Norwood, designs and manufactures high-speed digital fiber optic transmission terminals, digital multiplexing equipment for telephone and other applications, and network access multiplexers for the customer premise T1 market.

CLEVELAND (DEC. 11) BUSINESS WIRE - Stouffer Hotel Co., a unit of Nestle Enterprises Inc., announced Tuesday it has purchased the Stouffer Nashville Hotel from Lloyds International Corp.

Terms of the transaction were not disclosed.

Stouffer has managed the 673-room hotel since its opening in August 1987. Lloyds International, a subsidiary of London-based Lloyds Bank PLC, acquired the hotel from its original developers in 1987 before construction was completed.

''This purchase strengthens our ties to Nashville and reaffirms our long-term commitment to this dynamic city,'' said William N. Hulett, president of Stouffer. ''We are proud to be in Nashville, a city we believe has a bright future.''

The 25-story hotel topped by six floors of office space, adjoins the Nashville Convention Center. The hotel contains 31,000 square feet of meeting space including a 17,900 square-foot grand ballroom and 14 other meeting rooms, two

restaurants, spa, indoor swimming pool, hydrotherapy pool, sauna and outdoor sundeck.

The top two floors have been designated as Club Floors, a Stouffer feature offering concierge service, private lounge, complimentary continental breakfast and evening hors d'oeuvres, and special in-room amenities.

There are 40 Stouffer hotels and resorts located throughout the continental United States, Hawaii, Mexico and the Caribbean. A 565-room hotel in downtown Chicago is scheduled to open in fall 1991, a 360-room resort will open on Tampa Bay in St. Petersburg in spring 1992 and a 400-room hotel at Hartsfield Atlanta International Airport is slated for completion in late summer 1992.

VANCOUVER, BRITISH COLOMBIA (DEC. 11) BUSINESS WIRE - Queenstake (TSE:QTR) is pleased to announce that Amax Gold Exploration Inc. has entered into an option agreement with the company to earn an interest in Queenstake's Snowsquall property in Nevada.

As consideration for the granting of the option Amax has paid Queenstake $100,000 and reimbursed property payments made since Sept. 7, 1990.

To earn a 60 percent interest, Amax is required to spend $1,000,000 over a four year period. After Amax has earned 60 percent, the parties will participate 60/40 in a joint venture on the property.

Should Queenstake decide not to participate in taking the property to feasibility, then Amax has the right to fund feasibility and earn an additional 10 percent interest. When a production decision is made, Queenstake again has the right to participate in funding or Amax may proceed alone and earn an additional 10 percent interest.

During the term of the option Amax will make all cash property payments and, within 30 days of a production decision on the property, Amax will make a cash payment of $200,000 U.S. to Queenstake. Should Queenstake decline participation at each optional funding stage it will retain a 20 percent working interest.

Snowsquall consists of 268 claims covering the southern half of the Farrell Mining District in Pershing County, Nevada. Previous exploration has outlined several areas of anomalous gold and trace element geochemistry associated with strong hydrothermal alteration which will be tested by Amax as part of their program.

The exploration target is a bulk tonnage heap leach hot springs gold deposit hosted by Tertiary silicic volcanics.

NEW YORK (DEC. 11) BUSINESS WIRE - Ehrlich Bober Financial Corp. announced Tuesday that Melvin Howard, retired vice chairman of the board of the Xerox Corp., was elected president and chief executive officer.

Burtt R. Ehrlich, 51, one of the firm's founders, remains as chairman.

Ehrlich Bober announced on Oct. 9, 1990 that its investment banking and broker/dealer subsidiary, Ehrlich Bober and Co., would cease its municipal operations. At that time the parent company indicated that it would consider alternative future operations.

Ehrlich said, ''With the windup of the municipal bond business essentially behind the firm, we can now focus on new opportunities. We view Melvin Howard joining the firm as a positive step in our reorganization efforts. We will

now sharpen our focus as we look at new opportunities for the company in the financial services industry.''

Howard added, ''I'm delighted to be associated with Ehrlich Bober. Our chief goal at this time is to rebuild a successful financial services business.''

Howard, 55, joins Ehrlich Bober after 20 years at the Xerox Corp. In addition to his post as vice chairman of the parent company, he was chairman and chief executive officer of Xerox Financial Services Inc. A graduate of the University of Massachusetts and the Columbia Graduate School of Business, Howard spent a number of years at the Ford Motor Co. and SCOA Industries Inc. Howard is a director of Goulds Pumps Inc. and a trustee of the Conference Board and the Norwalk Hospital.

#90345b0762 12/11/1990 ~Business Wire

ROCKY HILL, CT (DEC. 11) BUSINESS WIRE - Ames Department Stores Inc. (NYSE:ADD), Tuesday reported a loss of $183.2 million, or $4.97 per share, including restructuring charges of $129 million, for the third quarter ended Oct. 27.

For last year's third quarter, the restated loss was $1.6 million, or 9 cents per share.

Ames said the loss for the quarter before restructuring charges was $54 million, reflecting a significant improvement over the company's earlier expectations. The company's second-quarter loss, before non-recurring charges was $79.4 million.

The $129 million restructuring charge consisted principally of non-cash provisions to reflect the charges associated with the disposition of closed-store leases and owned real estate and property, as well as actions required for the previously announced closure of six stores. Adverse real estate market conditions caused extremely limited credit availability for potential buyers of retail properties and resulted in lower than anticipated sales of leases for many of the more than 200 stores closed in the second quarter, Ames said.

Ames reported total sales for the third quarter of $740.2 million. Comparable store sales declined 9.2 percent. The 1989 adjusted sales, excluding sales from 221 closed stores, totalled $838.3 million.

Ames filed for protection under Chapter 11 of the U.S Bankruptcy Code April 25. The company sought court protection to reorganize its business and

finances. Ames operates 461 discount department stores in 17 Northeastern states.

SCARSDALE, NY (DEC. 11) BUSINESS WIRE - Terminal Applications Group Inc. (NASDAQ: TAGI) Tuesday announced the formal release of it's ''Light Years Ahead'' STAR ALPHA SYSTEM version 1.0.

In addition, TAG announced its membership in the Microsoft SQL Solutions Partners program, a joint marketing alliance in which Microsoft will work closely with TAG. Under this agreement, Microsoft will provide TAG with sales and marketing support, technical support, and access to additional distribution channels.

The TAG STAR ALPHA SYSTEM is the first application for the distribution industries which is designed to take advantage of client/server architecture offered by the Microsoft SQL Server. STAR ALPHA is designed to meet the needs of medium to large businesses. It supports migration and downsizing from proprietary mini and mainframe based systems to the high performance open networked client/server architecture offered by SQL Server.

Sales order and quotation entry, invoicing, pricing, inventory management and purchasing, and all general accounting functions are comprehensive, yet easy to use.

TAG has provided computerized solutions for distributors since it was founded in 1969. The company markets software, hardware, support services, consulting and facilities management services to commercial businesses throughout the country.

REDONDO BEACH, CA (DEC. 11) BUSINESS WIRE - TRW Space & Technology Group's Federal Systems Division has been selected as a winner of the NASA/Goddard Excellence Award for Quality and Productivity for 1989-90.

The NASA/Goddard Excellence Award is designed to recognize the highest standards of performance among NASA/Goddard's aerospace industry contractors, subcontractors and suppliers. It is NASA's highest recognition for quality and productivity and achievement.

Awards were given this year in two categories: large and small companies. TRW was selected in the large company category. Key criteria in the selection process were performance, schedule, cost, quality and management commitment.

TRW's award was based largely on its track record on two programs: the Gamma Ray Observatory and the Tracking & Data Relay Satellite. Both are programs of national significance. The Gamma Ray Observatory will help NASA map gamma rays, an invisible form of energy that promises to reveal clues to the fate and the formation of the universe.

This 17-ton spacecraft is now awaiting launch in the spring of 1991. TDRS is NASA's communications workhorse, relaying information between Space Shuttles and scientific satellites in low earth orbit and the ground. Three TRW-built TDRS satellites are now in orbit providing continuous flawless service.

R. Gordon Williams, vice president and general manager of the Federal Systems Division, said, ''We are deeply honored by the NASA/Goddard Award for Excellence. Since its founding, TRW has engineered quality into its spacecraft, and we have focused our continued dedication to quality in the Total Quality Management program that was formalized in 1988.

TRW Federal Systems is a division of TRW Space & Technology Group, based in Redondo Beach, Calif. The group has built more than 175 communications, defense and scientific spacecraft; developed over 200 advanced space instruments; and integrated some 550 experiments into their spacecraft.

Over 90 percent of the TRW spacecraft delivered to U.S. government customers over the past 20 years have exceeded their design lives, providing about $5 billion in extra service.

NEW YORK (DEC. 11) BUSINESS WIRE - With the signing of a contract on Dec. 10, the planned investment in DHL Limited by Japan Airlines, Lufthansa and the Japanese trading company Nissho Iwai, first announced in May, is now official.

DHL is a worldwide door-to-door delivery company.

Under terms of the contract with DHL holding companies DHL International and Middlestown N.V., JAL and Lufthansa each took five percent shareholdings and Nissho Iwai 2.5 percent in both of the DHL companies.

The deal included options for shareholdings of up to 25 percent for both JAL

and Lufthansa and 7.5 percent for Nissho Iwai, to be taken up over the next 18 months.

JAL, Lufthansa and Nissho Iwai have also taken shareholdings in the U.S.-based DHL Corp. JAL and Lufthansa have taken one percent each and Nissho Iwai half a percent.

No monetary amounts were disclosed.

DHL's worldwide network of 1,350 depots in 184 countries handles 40 million packages a year, and revenues for the 1990 fiscal year are estimated at $1.9 billion.

CHICAGO (DEC. 11) BUSINESS WIRE - Kemper Capital Markets (KCM) Tuesday announced the formation of an executive committee at the firm.

The announcement was made by KCM President James Fitzgerald.

''The Kemper Capital Markets Executive Committee will be responsible for managing KCM as an entity, and for providing direction and focus for the firm '' Fitzgerald said. ''This committee represents our senior management team at KCM,'' he said. ''I am pleased and excited to be promoting these individuals to this important assignment.''

The KCM Executive Committee includes Fitzgerald and Robert Davis Jr., Peter Lahti, Richard Morton, Thomas Reedy, and J. Douglas Casey. Fitzgerald said in conjunction with the announcement, three of the members named had been promoted from senior vice president to executive vice president, and given expanded responsibilities at the firm.

Robert Davis Jr., a senior vice president who was co-director of the municipal bond department, was promoted to executive vice president and manager of that department.

Peter Lahti, KCM senior vice president and taxable fixed-income group national sales manager, was promoted to executive vice president and manager of all institutional sales and trading for taxable fixed-income products.

KCM Senior Vice President Richard Morton, who had been responsible for corporate bond trading, assumed the post of executive vice president with responsibility for all retail fixed-income trading, sales and marketing.

The other individuals promoted to the KCM Executive Committee are Thomas Reedy who heads up investment banking and fixed income research for KCM, and J. Douglas Casey, who is chief administrative officer of KCM, with responsibility for facilitating KCM activities within the Kemper organization, and addressing the needs of the KCM client base.

Kemper Capital Markets is a division of Kemper Securities Group Inc. (KSG). KCM supports the retail and fixed-income sales efforts of the five regional KSG brokerage divisions (Bateman Eichler, Hill Richards, based in Los Angeles; Blunt Ellis & Loewi, based in Milwaukee; Boettcher & Company, headquartered in Denver; Lovett Underwood Neuhaus & Webb, headquartered in Houston, and Prescott, Ball & Turben, based in Cleveland) through the distribution of taxable and tax-exempt fixed products to this brokerage network.

Kemper Capital Markets also manages institutional fixed-income sales activities for KSG, and supports those distribution efforts with extensive research and investment banking capabilities.

STAMFORD, CT (DEC. 11) BUSINESS WIRE - Re Capital Corp. (AMEX:RCC) (the ''company'') announced Tuesday that its board of directors approved an additional stock buy-back program to purchase for its treasury in the open market up to an additional $1,509,729 worth of its Common Stock.

The new stock buy-back program supplements earlier buy-back programs under which the company has repurchased 1,483,584 shares of its Common Stock at a price of approximately $15,700,000. $490,271 remains available from previously announced buy-back programs, in addition to the $1,509,729 authorized today. The funds for the new stock buy-back program will come from existing corporate funds. Thus, the buy-back program will not use capital of the company's principal subsidiary, Re Capital Reinsurance Corp. Purchases may be suspended from time to time or be discontinued.

In addition, the board of directors of the company announced the exercise on Dec. 10, by John Deere Insurance Co., of its warrant to purchase 750,000 shares of the company's previously unissued common stock for $9.33 a share. The proceeds ($6,997,500) will be used for general corporate purposes, including stock repurchases. This exercise of warrants increases ownership by the John Deere Insurance Group and its affiliates of the company's common stock to over 20 percent of the outstanding shares.

HOUSTON (DEC. 11) BUSINESS WIRE - The Tenneco Inc. (NYSE:TGT) board of directors Tuesday elected Kenneth W. Reese, currently an executive vice president and member of the board, to the new position of vice chairman of Tenneco Inc.

The board also elected Allen T. McInnes, an executive vice president, to membership on the board of directors.

Additionally, the board elected James K. Ashford, currently president and chief executive officer of J I Case, an executive vice president of Tenneco Inc. and a member of the board of directors. Ashford joins Ketelsen, Reese and McInnes as a member of the corporate office.

All the elections are effective immediately. Reese, McInnes and Ashford will continue to report to James L. Ketelsen, chairman and chief executive officer. Their executive responsibilities will not change.

Reese, 60, will remain responsible for Tenneco's pipelines, shipbuilding, automotive products and minerals businesses. McInnes, 53, will continue to be responsible for the packaging, chemicals and land businesses as well as operations technologies and international development.

Ashford, 53, will remain responsible for J I Case, Tenneco's largest division which produces agricultural and construction equipment. Ashford will continue to be located at Case headquarters in Racine, WI, for the present time.

Reese joined Tenneco as senior vice president and chief financial officer in 1975 from Firestone Tire and Rubber Co. He was named executive vice president in 1978 and was elected to the board of directors in 1983. He was graduated from the University of Houston in 1954 with a bachelor of business administration degree.

Both the University and the College of Business Administration have recognized him with their respective distinguished alumni awards. He is a member of the College of Business Administration Dean's executive advisory board. Reese is a director of Texas Commerce Bancshares, Fleming Cos. Inc., the Texas Medical Center, the Cotton Bowl Athletic Association, The Forum Club of Houston and the National Jewish Center for Immunology and Respiratory Medicine.

McInnes joined Tenneco in 1960 in the financial department and began a career that has included posts as director of financial evaluation and development, vice president for corporate planning and development, president of Tenneco West and senior vice president for international development. He was named executive vice president in 1982.

McInnes was graduated from the University of Texas with bachelor's and master's degrees in business administration and a doctor of philosophy degree in business. He is a director of NCNB Texas Corp., Ronald McDonald House, the American Graduate School of International Management, the Greater Houston Partnership and the National Minority Supplier Development Council. He also is a trustee of the Houston Contemporary Arts Museum and of Kinkaid School.

Ashford joined Walker Manufacturing Co., a division of Tenneco's automotive business, in 1958. At Walker, Ashford rose to become executive vice president finance and administration. He became executive vice president of Tenneco Automotive when that division was formed in 1977, and was next named president of Monroe Auto Equipment Co., another division of Tenneco Automotive, in 1978.

He was named a vice president of Tenneco Inc. in 1981 in charge of long range planning and development, and as chief executive officer of Tenneco Automotive in 1982. He was named to head J I Case in 1987. Ashford was graduated from Mississippi State University with a bachelor of science degree in accounting.

He is on both the External Research Advisory Council and the Development Foundation of Mississippi State. He is a director of Cummins Engine Co., the Equipment Manufacturers Institute, the Racine Area Manufacturers and Commerce Association, and the Associates of the National Agricultural Library.

#90345b0833 12/11/1990 ~Business Wire

FORT LAUDERDALE, FL (DEC. 11) BUSINESS WIRE - SWM Media Buying Group Inc., an established South Florida national media buying service, has created a niche in the media placement market.

Over the last several months, a number of clients in both business opportunity and employment services have created a demand for their media buying and tracking skills in providing a base to purchase national classified advertising space.

For those who don't understand the complexity of such a service, imagine having to deal with over 300 newspapers every week through individual classified personnel, buying five or six lines of classified space, inserting the order by fax and phone, tracking the costs and monitoring the number of confirmed and unconfirmed insertions, keeping track of all the tearsheet

confirmations and then providing the client a fully detailed report of all purchasing activity.

Donna West, media director and vice president stated, ''The most frustrating part is having to deal with phones and fax machines contantly ringing, and with most insertion costs less than $15, it's a media director's nightmare.''

Smiley Sansoni, marketing director for SWM Media, explained the reason for the success of SWM in this particular niche. ''We have found there exists a large number of companies for whom advertising in national classifieds is a major part of their resourcing of people, and also lead generation for any number of products and services.

''Classified advertising seems to be a very viable alternative for low cost national presence and results. What makes it even more attractive for our clients is that the cost to them for our services in most cases is paid for not by them, but rather by the newspapers.

''Most companies before utilizing our services were spending anywhere from 15-30 hours of people time, not to even mention fax, phone and accounting time.

''We represent a substantial savings to any client in all of these areas, because they provide us only with the typewritten ad and a newspaper list and we do the rest.''

It certainly appears that SWM has discovered an area of media placement that may not be as glamorous as most, but is definitely increasing in demand.

#90345b0862 12/11/1990 ~Business Wire

TINTON FALLS, N.J. (DEC. 11) BUSINESS WIRE - Concurrent Computer Corporation today announced that Concurrent's common stock will continue to be included for quotation in the National Association of Securities Dealer's Automated Quotations System (NASDAQ) via an exception from the capital and surplus requirement. NASD officials granted the exception following a review of Concurrent's recapitalization plans.

While Concurrent failed to meet this requirement as of June 30, 1990, the NASD has granted a temporary exception from this standard subject to Concurrent meeting certain conditions. While the company believes that it can meet these conditions, there can be no assurance that it will do so. If at some future date the company's securities should cease to be quoted on the NASDAQ System, they should continue to be quoted in the over-the-counter market. For the duration of the exception the company's NASDAQ Symbol will be CCURC.

Concurrent Computer Corporation, headquartered in Tinton Falls, New Jersey, is the leading supplier of high-performance, real-time computer systems worldwide. The company's products, marketed through the Commercial Markets, Simulation/Training and Real-Time Technical Systems Groups, provide real-time solutions to the financial, communications, public sector, technical, aerospace and simulation markets. Its common stock (CCURC) is traded on the NASDAQ National Market System.

#90345c0041 12/11/1990 ~Comtex

WASHINGTON (DEC. 11) COMTEX - The 8-K report filed at the SEC shows in February, 1989, the Internal Revenue Service (IRS) began a collection action against Media Development Industries Ltd.(TICKER: MDIL), the company reports, for alleged unpaid payroll and income taxes for certain periods during 1989 and 1990.

The company contends it filed appropriate tax returns during these periods, but the IRS claims monies owed with respect to the payment of the reported tax liabilities were never actually paid.

Certain returns also were not filed in a timely manner, according to the IRS.

The IRS is seeking approximately $163,000 with respect to income taxes and $234,000 with respect to payroll taxes, inclusive of interest and penalties through Oct. 29, 1990.

In other news, the company relocated its principal executive offices to 4770 South 900 East, Salt Lake City, Utah 84117, pursuant to an oral lease.

The company reports it intends to move the remainder of its operations to Salt Lake City, except for a limited sales administration staff which will be relocated to New York City prior to Jan. 15, 1991.

The company's landlord began an eviction proceeding against the company on Dec. 3, 1990, to recover the premises and for rent and utilities due from Nov. 15, 1990, in the amount of $21,000.

Media contends the security deposit originally paid to the landlord sufficiently covers the disputed rent and utilities.

Additionally, the company dismissed a total of 29 employees during the two-week period ended Dec. 5, 1990, due to a general restructuring of the company's business operations.

#90345c0044 12/11/1990 ~Comtex

WASHINGTON (DEC. 11) COMTEX - The 8-K report filed at the SEC shows Chattem Inc.(TICKER: CHTT) has accepted an initial order for a chemical product from a major U.S. pharmaceutical manufacturer under such circumstances that a major vendor relationship may be established.

The company reports it is not possible to quantify the effect of this possible relationship on sales and earnings, but that it expects the establishment of a continuing vendor relationship would make a positive contribution to profitability.

Additionally, the trustees of the company's defined benefit pension plan trust

have indicated an intention to utilize up to $500,000 to purchase shares of common stock of the company for the defined benefit plan, either in open-market purchases at prevailing prices in accordance with Rule 10b-18 promulgated under the Securities Exchange Act of 1934 as amended, or in privately negotiated transactions.

#90345c0073 12/11/1990 ~Comtex

WASHINGTON (DEC. 11) COMTEX - The 8-K report filed at the SEC shows RealAmerica Co.(TICKER: RACO), general partner of RealAmerica Partners Ltd., announced that Partners had entered a settlement agreement with John Karlton, terminating and settling a suit filed earlier in 1990 in Bernalillo County, New Mexico District Court against RealAmerica Partners, in which RealAmerica Co. owns a 93.75% interest.

Also named in the suit was the First National Bank (TICKER: MTCL) of Albuquerque, co-venturer with RealAmerica Partners in First Plaza Venture.

The two venturers in First Plaza were named as defendants in the suit along with Helmsley-Spear Inc. by John Karlton, sole shareholder of Capital Growth

Corp.(TICKER: CAGC) of New Mexico.

Capital Growth purchased the First Plaza office building and retail complex in Albuquerque, New Mexico from the venture in May, 1988 for $36.63 million in cash and seller financing, consisting of a loan of $1.50 million to Karlton by the venture.

The suit alleged misrepresentation on the part of defendants in the suit in connection with the sale of the property.

It also alleged breach of fiduciary duty in connection with such sale on the part of Helmsley-Spear.

The agreement provides for dismissal of the action with prejudice with respect to First National Bank and RealAmerica Partners, but reserves Karlton's rights to pursue his action contained in that same cause against Helmsley-Spear Inc.

The parties agreed to settle the action and dispute by a payment of $350,000 in cash by plaintiff Karlton to the venture, which payment has been accepted in full by the venture.

Additionally, a hearing on RealAmerica Partners' motion for dismissal pursuant to the agreement is anticipated to be held, the company reports, prior to Dec. 31, 1990.

WASHINGTON (DEC. 11) COMTEX - The 8-K report filed at the SEC shows on Dec. 1 1990, Care Plus Inc.(TICKER: CPLS) entered into an agreement and plan of reorganization with New England Critical Care Inc.(TICKER: NECC) (NECC) and its wholly-owned subsidiary, CP Acquisition Corp.

Pursuant to the terms of the agreement and the plan of merger and subject to the approval of stockholders, CPA will merge with and into Care Plus.

Care, as the surviving entity, will become a wholly-owned subsidiary of NECC.

At the effective time of the merger, each outstanding share of common stock of Care will be converted into .775 shares of common stock of NECC.

Additionally, Care and NECC entered a stock option agreement, whereby Care granted NECC the option to purchase up to 18% of Care's outstanding shares of common stock.

NECC granted Care an option to purchase up to 12% of NECC's common stock, at an exercise price per share equal to the closing price of the respective common stock as quoted on the NASDAQ National Market system on Nov. 30, 1990.

By MICHAEL STRAUSS - Comtex Washington Correspondent

WASHINGTON (DEC. 11) COMTEX - The chairman of a House task force overseeing the Resolution Trust Corp. expressed reservations today over the agency's recently proposed policy which provides it with $7 billion for the financing of its assets.

"The RTC is taking on risks the private sector considers too risky to make, said Rep. Bruce Vento (D-Minn.). "I remain skeptical that this financing scheme represents a greater financial risk simply recycling today's problem back to the American taxpayer tomorrow."

In order to obtain what it considered much need flexibility in its asset sales program, the RTC's Oversight Board agreed last Friday to a plan which provides $7 billion for the financing of all assets determined by the RTC to be illiquid. These assets include commercial real estate with low occupancy, distressed real estate loans and some types of junk bonds.

The action was taken because the RTC, created in 1989 to resolve failed thrifts, has had problems selling off assets at a time when buyers are pulling out of the market and the market is flooded with properties. As prices continue to fall, losses on the sale of assets rise, causing severe cash flow problems for the regulators.

"Seller financing is not my preference," Vento said. "I don't see how these policies won't put the RTC and taxpayers in hot water."

Peter Monroe, president of the RTC Oversight Board, conceded this is not an ideal method to dispose of assets but is necessary due to market conditions.

"If an asset can be sold for cash, that's the preferred way to do it," he said. "I agree with you. This is not the preferred method of doing business but it is in response to the toughening real estate market."

Vento fears that if the RTC finances its assets and prospective buyers default later on, then the RTC will be stuck with the assets again. He suggests a better strategy is to hire an asset manager to hold the assets until they can be sold later for cash.

But David Cooke, chief executive officer of the RTC, said the government is likely to receive more through financing than just selling through cash because a buyer is less likely to default if he has to put his own money upfront.

"Better off structuring a bulk sale transaction where a buyer has to put some of his money at risk rather than an asset manager who puts no money down," Cooke said. "The incentive for the buyer is not to lose on his investment."

"We are not going to jump into this thing willy-nilly," Cooke added. It's a judgment decision. We have to make sure we have procedures in place to try it. Only time will tell."

#90345c0093 12/11/1990 ~Comtex
By MICHAEL STRAUSS - Comtex Washington Correspondent

WASHINGTON (DEC. 11) COMTEX - The head of the government agency responsible for thrift oversight said today the economic slowdown, particularly in the real estate sector, will hinder the recovery of many ailing savings and loan

institutions fighting for their fiscal health.

"We find that the deterioration in economic conditions, especially in real estate, is adversely affecting the prospects for recovery of many institutions " said Timothy Ryan, director of the Office of Thrift Supervision (OTS). "Undercapitalized savings associations will find it increasingly difficult to come into compliance with the capital requirements as weak real estate markets reduce profitability, or increase losses, and prospective investors adopt a wait-and-see attitude."

As of the second quarter of 1990, there were 2,453 private sector thrifts in operation. The OTS has divided these thrifts into four categories, with the first group being the strongest in the industry and the fourth group expected to require government assistance as part of their resolution.

Group III savings associations, characterized by low earnings and poor capital include 350 thrifts holding $165 billion in assets while there are 244 institutions in Group IV. Ryan says the present economic climate will have a particular impact on the former.

"Group III institutions are highly vulnerable to adverse economic and financial conditions and many are showing signs of becoming prospective RTC candidates," Ryan told a House task force looking into the operations of the Resolution Trust Corp.

The RTC was created in 1989 to resolve failed thrifts and Ryan said there are 80 institutions in the weakest category which should be transferred as fast as possible to the RTC. He added third quarter figures to be released shortly will not show significant changes.

"There will be a movement from Group I to Group II, Group III to Group IV," Ryan said. "But the Group IV total won't go up because some thrifts in Group IV will have been transferred to the RTC."

STAMFORD, CT (DEC. 12) COMTEX - Wichita, Kan.-based Air Midwest Inc., (TICKER: AMWI) a regional air carrier, has agreed to sell the assets of its Trans World Express operations out of St. Louis, to Trans States Airlines Inc. the city's other Trans World Express operator, for $16 million.

The assets include 23 aircraft, spare parts, certain maintenance and ground station equipment, airport facilities, and hangar leases in 19 cities, according to a Securities and Exchange Commission filing.

Following the sale, Air Midwest will terminate the agreement with Trans World Airlines that has allowed it to operate as a feeder for TWA since 1986.

Air Midwest currently serves 36 cities and will cease service to 21 of those cities following the sale.

Air Midwest will continue to operate its Kansas City-based system and will become associated with USAir Inc. beginning Jan. 15, 1991.

The company's remaining fleet will consist of 16 aircraft.

This 8-k Filing was submitted to the Securities and Exchange Commission on

Dec. 11, 1990.

STAMFORD, CT (DEC. 12) COMTEX - Shareholders of U.S. Shelter Corp., (TICKER: USSS) the financially troubled Greenville, S.C., real estate and financial holding company that owns Malibu Savings Bank, will vote at a special meeting Dec. 31 on the proposed acquisition of the company by MetSouth Financial Corp. a company controlled by New York real estate investment banker Andrew L. Farkas.

Under the proposed deal, the new company will be 75-percent owned by a limited partnership controlled by Farkas, 10 percent owned by a subsidiary of Group Brussells Lambert, the Belgium investment bank which is a partial owner of Drexel Burnham Lambert Inc., and 5 percent by present shareholders of U.S. Shelter.

The company's current management will run the new company.

U.S. Shelter, which owns and manages residential and commercial property, also provides mortgage banking services.

The company recorded $68.5 million in losses since 1985 and is struggling to stave off bankruptcy, according to a Securities and Exchange Commission filing.

Malibu Savings, which is not in compliance with any of the new capital standards set under the recently enacted federal bank bailout bill, has been notified by state and federal regulators that it is operating in an ''unsafe and unsound'' manner.

Under the proposed acquisition, MetSouth will assume $18 million in liabilities and infuse $5 million into the company.

MetSouth has reached preliminary agreements to have $29 million of U.S. Shelter's $54 million in debt either forgiven or restructured.

MetSouth has been granted proxies from shareholders representing 32 percent of the company to aprove the deal.

U.S. Shelter leases offices in Newport Beach, Calif., Jacksonville, Orlando and Clearwater, Fla., Atlanta and Augusta, Ga., Paducah, Ky., Lanham, Md., Kansas City, Mo., Charlotte, Durham, Greensboro, and Raleigh, N.C., Cincinnati Columbus, and St. Clairsville, Ohio, Columbia and Charleston, S.C., Chatanooga, Tenn. and Arlington and Houston, Texas.

Its mortgage banking operation leases offices in Orlando and Tampa, Fla., Atlanta, Charlotte, N.C., Nashville, Tenn. and Richmond, Va.

This 8-k Filing was submitted to the Securities and Exchange Commission on Dec. 11, 1990.

TOKYO (DEC. 11) - Prime Minister Toshiki Kaifu on Tuesday said that the Japanese government would study providing emergency food aid to the Soviet Union.

Mr. Kaifu madey the remark at a Budget Committee meeting of the Diet (parliament), saying that the Japanese government would closely watch the situation in the Soviet Union.

"From a humanitarian viewpoint, Japan would study the issue (of a possible food aid to the Soviets) after collecting further information," he said.

Foreign Minister Taro Nakayama, meanwhile, told Japanese reporters at a press conference that despite a successful harvest, there were reports of food shortages in the Soviet Union due to hoarding and distribution problems.

"The Soviet Union is a large nation, so they should not say they don't have money (to buy food)," he said.

But Mr. Nakayama added that Japan would observe the situation in the Soviet Union and discuss the issue at working-level talks before the planned visit to Japan next April by Soviet President Mikhail Gorbachev.

WELLINGTON (DEC. 11) - The Soviet Union has agreed to repay a 115 million dollar (69 million U.S. dollar) debt to New Zealand for wool and dairy produce the New Zealand Press Association said Tuesday.

The agency quoted a statement from Trade Negotiation Minister Philip Burdon released in Moscow Tuesday following two days of negotiations on trade.

The agreement would clear the way for trading to resume between the two countries, the statement said. Contracts for the repayment of the debt would be signed by the end of the week.

The money would then be repaid by instalments over the next few months.

The New Zealand Dairy Board spokesman Neville Martin said it was a major comfort for the industry to know the debt would be repaid and the way cleared for further trade.

"The prospect of the Russians not being able to repay was one of the worst case scenarios the industry was facing and now that can be cast aside," he said in an interview.

Mr. Martin said the Soviets were in the market for a "very substantial quantity of butter."

New Zealand Wool Board spokesman John MacGibbon was sceptical about the Soviet agreement to repay the debt.

"They have made promises in the past which have fallen through. However, this appears to be a promising new development and we look forward to it."

#90345d3050 12/11/1990 ~French/German News Agency

SEOUL (DEC. 11) - French Secretary of State for Defense Gerard Renon said here Tuesday that he was more than surprised that South Korea had decided to buy a U.S.-made anti-submarine patrol aircraft over its French rival after a year-long bidding battle.

"We are more than surprised and we do not understand" the decision, Mr. Renon commented before concluding a two-day visit to Seoul during which he met with South Korean Defense Minister Lee Jong-Koo.

Mr. Lee announced Monday that President Roh Tae-Woo approved his ministry's decision to buy eight P3Cs from the U.S. Lockheed firm, worth 841 million dollars.

He said the U.S. aircraft was chosen over France's Dassault-Breguet Atlantique 2 as the price was 32 million dollars cheaper and the U.S. aircraft was better suited for joint operations with U.S. forces.

The South Korean Defense Ministry initially picked the French-made aircraft over the P3C in an international bidding a year ago after the U.S. firm failed to satisfy aircraft maintenance conditions.

However, U.S. defense officials lobbied hard, offering the latest model of P3C instead of the older type that the United States originally tried to supply.

The bidding battle caused Seoul to delay its purchase of the aircraft and lose several million dollars because of the subsequent devaluation of South Korea's won currency against the U.S. dollar, local press reports said.

DURBAN, SOUTH AFRICA (DEC. 11) - Environmentalists have persuaded South Africa's Law and Order Minister Adriaan Vlok to suspend aerial spraying of cannabis plantations, Earthlife Africa spokesman Chris Albertyn said late Monday.

Mr. Albertyn said that in a one hour meeting at the airport in this east coast port city Monday, environmentalists and officials from the South African Rivers Association "brought home the socio-economic implications of the spraying programme."

They had advised police they could face claims from neighbouring farmers whose crops could be wiped out by drifting chemicals, Mr. Albertyn said, suggesting that farmers growing cannabis could be persuaded to plant culinary and medicinal herbs instead.

#90345d3110 12/11/1990 ~French/German News Agency

TOKYO (DEC. 11) - Saudi Arabia has told Japanese trading houses and oil companies that it would suspend shipments of kerosene and gas oil from December for an unspecified period, industry sources said Tuesday.

The sources suspected a fire at Saudi Arabia's Ras Tanura Refinery and a breakdown at the Jubail refinery had forced the country to stop the exports, which account for 30-40 per cent of Japan's total imports of kerosene and gas oil.

The fire on November 30 has drastically cut production at the world's largest oil refinery from 530,000 barrels a day to 300,000. The refinery is expected to suspend operations completely later this month,.

Japan depends on imports for 20-25 per cent of its consumption of kerosene and gas oil.

#90345d3330 12/11/1990 ~French/German News Agency

TOKYO (DEC. 11) - Japan's Hitachi Ltd. and Toshiba Corp. on Tuesday announced breakthoughs in cutting the size of memory cells used in computer chips, paving the way for a new generation of more powerful semiconductors.

Hitachi, the country's biggest electric machinery maker, said it had developed the world's smallest cell for static random access memory (SRAM) chips measuring 5.9 square microns, or six thousandths of a square millimetre.

The new cell is a third of the size of those used in eight-megabit SRAM's and will enable the development of 16-megabit SRAM's, the company said.

SRAM chips can retain information longer and have a faster access time than the more widely-used dynamic random access memory (DRAM) chips.

Toshiba, which ranks second in production of electric machinery in Japan, meanwhile said it had developed a new cell for DRAM chips with an area of 1.53 microns, or about one-and-a-half thousandths of a square millimetre.

The area of the new cell, which incorporates the so-called trench structure, is less than 60 per cent of those used in four-megabit DRAM chips and "easily surpasses" that necessary to develop 64-megabit DRAM's, it said.

The announcements Tuesday coincided with an international meeting on electronic devices in San Francisco and followed disclosures Monday of related developments by Toshiba and Japan's biggest computer maker Fujitsu Ltd.

Toshiba said it had developed a new one-megabit SRAM chip with the world's fastest access time of 15 billionths of a second. The chip can also process 16 bits of information at the same time compared with existing one-megabit SRAM's which can process only one, four or eight bits of information simultaneously.

Fujitsu Ltd. meanwhile announced that it had developed a process to make 64-megabit DRAM chips by using a lithographic technique which had until now been confined to the production of 16-megabit DRAM's.

#90345d3410 12/11/1990 ~French/German News Agency

KAMPALA (DEC. 11) - Uganda's police chief was suspended and several senior police officers arrested after police shot dead two students at a rally on campus here, Ugandan state radio announced Tuesday.

President Yoweri Museveni has set up a committee to investigate Monday's shootings. The government described the killings as "criminal" and "fascist" and promised to punish those responsible in a statement read over the radio.

Two second-year students at Kampala's Makerere University, both young men, died when police opened fire on students meeting to discuss a week-old boycott of classes in protest at a shortage of textbooks and poor living conditions.

The killings raised a storm of protests from prominent Ugandans. Law Society president Edward Sempebwa condemned "police brutality" in breaking up a peaceful student rally and called for the prosecution of those responsible in a protest note to the interior ministry.

Mr. Museveni suspended police chief David Tsomgen and his deputy Kenneth Ojoro after a cabinet meeting Monday evening condemned the killings. He named Apollo Byekwaso acting police chief, and Zedekiah Etyang second-in-command.

The head of the Kampala police, Richard Nabudere, and an unknown number of top police officers have been arrested in connection with the killings, informed sources said.

The government statement ordered students to stay at home for two days as a sign of mourning, but warned that anyone failing to attend classes subsequently would be expelled from the university.

It said a supreme court judge would be appointed to head the investigating committee.

#90345d3440 12/11/1990 ~French/German News Agency

MOSCOW (DEC. 11) - Half a million Soviet citizens will have emigrated by the end of this year, Komsomolskaya Pravda reported Tuesday quoting KGB sources.

About half of these are understood to have left for Israel, according to observers here.

The youth daily, quoting specialists, also said another two to three million people intended to leave the country.

These would include a great many Jews and ethnic Germans who are given the automatic right to resettle in Israel and Germany respectively.

The United States was taking in some 50,000 to 60,000 people a year, U.S. Ambassador Jack Matlock told the paper.

The number of Soviets leaving the country on temporary exit visas was also up.

The U.S. Embassy here would deliver 120,000 tourist visas this year, "more per day than during the whole of 1981," Mr. Matlock said.

In Geneva, Nikolai Smirnov, a deputy head of the Soviet Foreign Ministry's

international humanitarian cooperation and human rights department said Moscow expected about half a million to emigrate each year after new legislation authoritizing free travel is adopted next year.

In 1989, 236,000 people emigrated, Mr. Smirnov also told the International Organization for Migration earlier this month.

A new liberal emigration law might be voted early next year, but would not come into effect before July at the earliest because of bureaucratic and transportation problems, according to Fyodor Burlatsky, head of a parliamentary committee drafting the legislation.

Soviet Labour Minister Vladimir Shcherbakov warned last month that up to three million Soviets might emigrate, at least temporarily to European Economic Community states, when they gain the right to travel freely.

Alexander Kolesnikov, a member of the Sociological Research centre attached to the party's central committee, told Interfax news agency recently that up to 16 per cent of the country's 286 million population might be considered potential emigrants.

Of these, 65 per cent were men and the vast majority were under 30, with a better than average education and little faith in the country's economic prospects.

#90345d3460 12/11/1990 ~French/German News Agency

DHAKA (DEC. 11) - Activists of Bangladesh's main opposition parties were poised Tuesday to return to the streets for three days as professional organisations joined calls for the arrest of ousted president Hussain Mohammad Ershad.

Processions and street-corner meetings were to take place here Tuesday and Wednesday and throughout the country Thursday, the alliance coordinating committee said late Monday.

The seven-party alliance headed by Begum Khaleda Zia's Bangladesh Nationalist Party (BNP), Sheikh Hasina Wajed's eight-party grouping under the banner of the Awami League and the five-party leftist grouping with a rotating leadership were all set to take part in the rallies.

Exultant victory demonstrations since the fall last week of Mr. Ershad, who seized power in a bloodless coup eight years ago, have begun to turn angry amid growing demands for his arrest and trial.

Activists also want the new government to appropriate the former president's assets and seize bank accounts here and abroad of Mr. Ershad, his wife and

"cronies."

The new demonstrations are aimed at "foiling conspiracies" against the democracy movement and consolidating its success so far, organisers say.

Late Monday, the Supreme Court Bar Association and several smaller political parties added their voices to the growing clamour as a group of activists of the BNP firebombed the house of Moudud Ahmed, vice president under Mr. Ershad.

There were no casualties in Monday's firebombing in the posh Gulshan district of Dhaka, seen as an attempt to emphasise demands that Mr. Ershad's associates also be brought to trial.

Student and youth groups Monday called on the military to oust Mr. Ershad from Dhaka's military cantonment area, where a senior army official said the deposed president has been living under "protective custody" in his house since announcing his resignation last Tuesday.

The youths were angered by Mr. Ershad's statement in an interview that he would try to make a political comeback and run again for the presidency if the situation permitted.

#90345d3630 12/11/1990 ~French/German News Agency

HYDERABAD, India (DEC. 11) - Indian army troops launched a house-to-house hunt in the old quarters of Hyderabad Tuesday as Hindu-Moslem violence in the southern city entered a fifth day after claiming more than 120 lives.

Ten army columns, or 1,000 men, backed by police and paramilitary troops systematically combed houses in the narrow lanes and byways of the curfew-bound walled city looking for suspects and weapons, witnesses said.

About two dozen armoured personnel carriers were touring the Moslem-majority area in a show of strength to deter rioters who have targeted Hindus for attacks with butchers' knives, swords, spears and acid bulbs.

In the relatively calm new city, two men were waylaid and fatally knifed before dawn Tuesday in suspected retaliation by Hindus, senior police sources said.

The new fatalities took the death toll to 123 in five days of unprecedented Hindu-Moslem violence in the city of four million people, capital of Andhra Pradesh state, the sources said.

Thirteen were knifed to death Monday and eight women badly burned by acid-throwers.

Scores have been wounded in the violence, linked to a raging Hindu-Moslem dispute over a 16th-century mosque in the northern town of Ayodhya, in Uttar Pradesh state.

The bloodshed, the worst witnessed by this 400-year-old city in half a century erupted a day after Hindu fundamentalists resumed a crusade in Ayodhya to demolish the mosque and replace it with a temple.

Sectarian violence has also swept the Uttar Pradesh towns of Aligarh and Kanpur, both of which were curfew-bound Tuesday. Sixty-eight people have died in Aligarh.

In Kanpur, where five people were killed in a sudden burst of communal violence Monday, security forces were searching houses after arresting 25 suspects, the Press Trust of India said. The town was calm Tuesday.

Colombo (DEC. 11) - Five soldiers were killed and four wounded when suspected Tamil rebels of the Liberation Tigers of Tamil Eelam (Ltte) ambushed an army vehicle in the Trincomalee district of the Eastern province Tuesday morning, military officials said.

One soldier was reported missing following the incident which took place at Morawewa, 60 kilometres southwest of Trincomalee town, officials said.

The rebels, fighting in the northwest of the country for an independent homeland for minority Tamils, seized communications equipment and weapons.

The soldiers, attached to the Morawewa camp, engaged the rebels in a gun battle before being killed and ''several'' rebels were reported to have been injured in the attack, military officials in Colombo said.

Reinforcements were rushed to the scene of the incident from nearby camps Tuesday afternoon, officials said.

WARSAW (DEC. 11) - Poland will drop visa requirements as of January 1 for all German nationals who travel to Poland for less than three months, according to a new foreign ministry ruling reported by the press Tuesday.

The Polish government "has taken into account the favorable development of relations with Germany and the announcement by Germany of its intention to remove the visa obligation for Polish nationals at the end of the year", the ministry statement said.

The foreign ministry "is acting on the conviction" that the German government will carry out its intention to end visas.

Dropping visa requirements has been one of Poland's key demands in its negotiations with the west.

#90345d3930 12/11/1990 ~French/German News Agency
Doha (DEC. 11) - Saudi Arabian Defence Minister Prince Sultan bin Abdel Aziz met here Tuesday with Qatar's ruler, Sheikh Khalifa bin Hamad al-Thani, to discuss the Gulf crisis, reports said.

Prince Sultan had arrived here earlier in the day at the start of a six-day tour of Saudi Arabia's partners in the six-nation Gulf Cooperation Council (Gcc). The other members are Kuwait, Bahrain, Oman and the United Arab Emirates (Uae).

The Qatar News Agency said the Saudi defence minister reviewed with Sheikh Khalifa ''all aspects of the Gulf crisis resulting from the treacherous Iraqi aggression against Kuwait''.

The two men also discussed joint moves by Gcc states concerning the Gulf crisis, as well as ways of boosting Saudi-Qatari relations in all fields, it added.

Gcc leaders, who are scheduled to hold a summit meeting in Doha on December 22 are expected to discuss, among other things, a new defence strategy to cope with the consequences of the Iraqi invasion of Kuwait on August 2.

The Gcc was set up in 1981 after the start of the Iraq-Iran war in a bid to coordinate economic and defence policies of the six oil-rich states.

#90345d3950 12/11/1990 ~French/German News Agency
UTRECHT, Netherlands (DEC. 11) - Dutch pacifists opposed to the transport through the Netherlands of U.S. military hardware for the Gulf, blocked rail traffic for two hours Tuesday using a hoax bomb.

The fake bomb which was "remarkably well made", according to police, was planted on a railway bridge near the central town of Utrecht on the line from Germany to Rotterdam.

Bomb experts worked for two hours before realising the device was harmless.

Most of the U.S. military equipment used in the Gulf troop deployment has been taken from American bases in southern Germany. It is moved by train through the Netherlands for shipment from Rotterdam.

The Netherlands has set aside 150 trains for the operation.

PARIS (DEC. 11) - The Arianespace rocket company is heading for a net profit of 130 million francs (6.5 million dollars) on sales of 3.9 billion francs (780 million dollars) in 1990, company president Charles Bigot said on Tuesday.

The company, which markets the Ariane rocket, was created 10 years ago and has paid dividends since 1984.

The company has orders to launch 36 satellites worth 16.2 billion francs (3.24 billion dollars) and representing work for four years, he told a conference to mark the 10th anniversary.

Since being founded, Ariansepace had signed 89 launch contracts with 90 per cent of world satellite operators, and held more than half of the world market for space transport, ahead of three U.S. competitors General Dynamics, Martin Marietta and Mcdonnell Douglas, and ahead of Chinese and Soviet companies.

SOFIA (DEC. 11) - The cost of living in Bulgaria at the end of November was 36.4 per cent higher than at the end of May, official figures showed on Tuesday.

During November prices rose by 4.9 per cent.

During the first 11 months of the year overall output fell by 10.4 per cent compared with the same period a year earlier. Industrial output fell by 12.5 per cent.

Forecasts by the statistical bureau, which published the figures, said that 1990 output would be 10 per cent below the 1989 level and that industrial output would fall by between 12 per cent and 13 per cent.

The bureau said that 93.8 per cent of the fall in output occurred in the industrial sector because of power cuts and strikes.

Compared with November 1989 consumers had increased difficulty in acquiring sugar, rice, meat, fish, oil, clothing, shoes, women's stockings and fuel. The prices of fruit and vegetables had doubled compared with November 1989.

Meanwhile the Bulgarian state issued bonds worth 217 million leva (70 million dollars at the official rate) carrying guaranteed interest of 44 per cent, the finance ministry said.

MOSCOW (DEC. 11) - France will take charge of the distribution of its humanitarian aid to the Soviet Union, a senior French government official said here Tuesday.

The French government plans to donate medecine and baby food that could be distributed in hospitals and homes for the aged, said Bernard Kouchner, secretary for humanitarian aid.

Mr. Kouchner was to meet with the deputy chairman of the Soviet committee for relief distribution later Tuesday.

Aid will be precisely targeted in the cities of Moscow, Kiev, Leningrad and Yerevan, Mr. Kouchner said, adding that France had also offered assistance to the Soviet "Association of Victims of Repression" which groups former political prisoners and people forced into psychiatric hospitals.

He stressed that France would not divert any aid originally destined to needy regions in Africa to east European countries.

"West European nations must help the Soviet people in their own land because the West cannot give a new home to millions of people tempted by emigration", Mr. Kouchner said.

#90345d4030 12/11/1990 ~French/German News Agency

LONDON (DEC. 11) - The British Ferranti International electronics group on Tuesday reported a pre-tax loss of 20.4 million pounds (about 40 million dollars) in the first half compared with a loss of 15.4 million pounds for the same period of last year.

Sales fell by 40 per cent to 251.2 million pounds from 419.2 million pounds.

Analaysts had forecast losses of between five million and 20 million pounds.

Ferranti, which last year had to launch a major restructuring operation following a massive alleged takeover fraud, said that it would not pay a dividend.

Ferranti shares were unchanged at 13 pence.

FREETOWN (DEC. 11) - About 300 Liberians arrived in Monrovia on Monday from Freetown aboard a Nigerian naval ship, Liberian radio reported Tuesday.

In a broadcast monitored here, the radio said most of the returnees were concerned about finding relatives and their homes abandoned during Liberia's brutal year-long civil war.

The Liberians left the Sierra Leone capital on Sunday. The radio said more Liberians were due to return home soon.

Meanwhile, officials of the Special Emergency Life Food program were investigating reports suggesting that food distributors in Monrovia had stolen more than 200 bags of rice.

Liberian radio quoted informed sources Tuesday saying that there had been many reports of rice theft in the capital which had until recently been cut off from the outside world after rebels seeking to overthrow the late president Samuel Doe arrived there in July.

"Impersonation, fraud and dishonesty are also rampant in the distribution process," the sources were quoting as saying.

Liberia's interim president Amos Sawyer expressed what the radio called "serious concern over the development as well as the slow process of food distribution."

Mr. Sawyer also announced that Monrovia central prison is to be renovated and that the West African country's magistrates' courts will be reopened soon.

The interim leader has also met with a visiting delegation from the

Geneva-based International Committee of the Red Cross, the radio said.

BRAZZAVlLLE (DEC. 11) - Congo's leader in 1977-79, General Joachim Yhombi-Opango, has formed a political party, the Movement for democracy and Development, with the aim of promoting private initiative and a mixed economy, reliable sources said here Tuesday.

He was freed in August after three years in jail without trial, having previously spent several years under house arrest in his native village of Owando because of alleged involvement in a plot against the government.

He was ousted early in 1979 by current president Gen. Denis Sassou-Nguesso, who has bowed to mounting political and trade union pressure and agreed to return Congo to multi-party politics after more than a quarter century of one-party rule.

Madrid (DEC. 11) - Sixteen seamen were missing feared drowned after a collision Tuesday between a Moroccan trawler and a South Korean freighter in the Atlantic Ocean off the northwest coast of Spain, officials said.

The accident happened during stormy weather near Cape Finisterre. The trawler Bnou i Shark, with a Moroccan-Korean crew, broke in two and the front half of the vessel containing the cabins sank.

Rescuers looking for survivors found no signs of life. The search was being happened by force eight gales and seven-metre high waves.

The freighter Hanjin bound for Le Havre from Singapore suffered only slight damage in the collision.

PARIS (DEC. 11) - France sent six more fighter aircraft - four Jaguar bombers and two Mirage 2000 fighters - to Saudi Arabia last month, military sources announed here Tuesday.

Before last month's arrivals 24 French aircraft - eight Mirage 2000, eight Jaguar and eight Mirage F1 CR reconnaissance aircraft - were stationed on Saudi military airbases.

The 29 fighter aircraft - seven Mirage F1 CR, 12 Jaguars, and 10 Mirages 2000 - are now stationed at the Houfouf airbase in eastern Saudi Arabia, according to the military sources. One Mirage F1 CR crashed last Friday.

President Francois Mitterrand announced last September that France would send some 30 aircraft to the Gulf as part of multi-national forces stationed in the region since Iraqi troops overran Kuwait on August 2.

#90345d4560 12/11/1990 ~French/German News Agency
Munich (DEC. 11) - Deutsche Aerospace (Dasa), the aviation and aerospace division of the Daimler-Benz concern, will likely show a loss in 1990 caused by the low value of the dollar, company officials said here Tuesday.

Dasa chief financial officer Manfred Bischoff said the company turnover volume which for the first time would include the Messerschmitt-Boelkow-Blohm (Mbb) figures, was expected to reach 12.6 billion marks (8.55 billion dollars), up from 7.8 billion in 1989.

Last year Dasa as a group produced a deficit of 185 million marks, although the parent stock company was in surplus by 45.8 million marks.

But this year, with the dollar hurting the results of the Airbus programme, in which Mbb is involved through its subsidiary Deutsche Airbus, Dasa can expect losses both for the group and for the parent company, Bischoff said. He did not give an estimate for the losses.

''The productivity success at Airbus cannot even out the effects of the dollar's rate,'' Bischoff said.

Through Mbb, Dasa has Airbus orders worth 21 billion marks. The value of the orders will have to be revised downward to reflect the lower dollar rate.

Dasa chairman Juergen Schrempp said that the revision would ''theoretically render Deutsche Airbus bankrupt''. He said new financial support models were being discussed with Bonn to help cover the losses.

Schrempp also said he welcomed the policy of disarmament despite the effects it was having on Dasa, which last year gained nearly half its turnover volume from defence contracts. He said a ''concept for a soft landing'' had to be worked out by the government and industry as the conversion is made towards civilian-sector production.

#90345d4580 12/11/1990 ~French/German News Agency

TOKYO (DEC. 11) - A growing rift within the Japanese government over the suspension of last week's GATT talks in Brussels widened Tuesday with Prime Minister Toshiki Kaifu siding with the Agriculture Ministry over farm policy.

"I want you to reaffirm that Japan will stick to its basic policy," Mr. Kaifu was quoted as telling a cabinet meeting, referring to the country's virtual ban on rice imports and its policy of self sufficiency in staple foods.

The prime minister then proposed that the government and the ruling Liberal Democratic Party hold joint talks on the issue in preparation for a resumed GATT meeting in Geneva next month.

Mr. Kaifu's remarks coincided with a reported clash between Agriculture Minister Tomio Yamamoto, who supports the policy, and International Trade and Industry Minister Kabun Muto who hinted earlier that it should be relaxed.

The trade minister told a news conference Monday that agriculture was Japan's "Achilles' heel" at the Brussels meeting and prevented the country from playing an active role in the talks.

"Now that the agriculture minister knows more about the world, he may be able to think of something new," he said.

Japan and South Korea were partly blamed for the suspension of the Brussels meeting which was supposed to have brought to an end the four-year Uruguay Round of talks under the General Agreement on Tariffs and Trade (GATT).

Both nations were reluctant to accept part of a Swedish compromise which would have required all countries to provide minimum market access of five per cent for all agricultural products whose imports are restricted.

ANKARA (DEC. 12) - The Turkish national grand assembly (parliament) began on Tuesday to debate a 37 billion dollar budget for 1991 based on projected inflation of 45 per cent.

The inflation rate in 1990 is expected to be between 65 per cent and 70 per

cent.

The budget forecast growth of 5.9 per cent and a record deficit of 20 per cent or 20,650 billion Turkish pounds (7.3 billion dollars) of the total of 104,780 billion pounds (37 billion dollars).

Of the total, 34.4 per cent was earmarked for salaries, while military expenditure was held steady at 12 per cent of the budget at 13,000 billion pounds in 1991 despite the Gulf crisis. Turkey has a common frontier with Iraq.

#90345d4610 12/11/1990 ~French/German News Agency

Hong Kong (DEC. 11) - Stung by charges that the Hong Kong government is to saddle the colony with unbearable debts as a result of its ambitious new infrastructure projects, the government Tuesday announced a downward revision of the costs for the new airport.

The government said the airport will only cost 79 billion Hongkong dollars (10 billion U.S. dollars), and suggested that the ports project should be financed entirely by the private sector.

The figure was well below that cited last year by Hong Kong governor Sir David Wilson when he unveiled a 127 billion Hongkong dollar plan to build a new airport and container ports.

However the government's efforts to play down the extent of the spending were quickly rebuffed by Lu Ping, the senior Chinese official responsible for Hong Kong affairs.

He said the revised estimate was merely playing with words and he accused the government of undermining the stability of the local currency by having to draw on its fiscal reserves, including the foreign exchange reserve, to meet the costs.

He stated that the exchange fund contained 30 billion Hongkong dollars (3.8 billion us dollars), a previously undisclosed figure. It is unclear here whether the figure came from official sources.

Hong Kong Treasury Secretary Hamish Macleod refused to comment on Lu's remarks.

LAGOS (DEC. 11) - Nigeria's military government last Friday took in Libyans evacuated from Chad by the United States as a "humanitarian gesture", Foreign Minister Ike Nwachukwu said here Tuesday.

Mr. Nwachukwu said the International Committee of the Red Cross (ICRS) had asked Nigeria to take in the Libyan prisoners-of-war (POWs), adding that the organization described them as "refugees".

The Libyans were still "in transit", and being accommodated at a location outside Lagos, the minister added before leaving Nigeria for Equatorial Guinea with President Ibrahim Babangida.

They would be flown to another country once their credentials had been checked Mr. Nwachukwu, a retired major-general, said. He did not name the country.

"The ICRS told us they were refugees, and under internationally recognised practice, it is our obligation to accept them. It is purely a humanitarian service rendered by Nigeria," he said.

The Libyans, captured during one of Chad's civil wars, were "turned" and trained in Chad by the U.S. Central Intelligence Agency (CIA) to carry out guerrilla operations against Colonel Moamer Kadhafi's regime.

The U.S. Air Force evacuated more than 600 of them on Friday and Saturday, following the arrival in power in Ndjamena of Libyan-backed Chadian former rebel leader Idriss Deby.

#90345d4810 12/11/1990 ~French/German News Agency

BANGKOK (DEC. 11) - Cambodian guerrilla leader Prince Norodom Sihanouk said Tuesday that a joint interim authority that would guide Cambodia through its peace process should have no head.

"There should be no more talk about the chairmanship and the vice chairmanship of the SNC (Supreme National Council)," he said in a statement in French circulated by his faction's office here. "Let us be satisfied with an SNC without a chairman or a vice-chairman.

"The SNC exists. It has 12 members. Let them work among themselves with an equal say, which is without chairmanship or vice-chairmanship," Prince Sihanouk said.

Various parties to the resolution of the conflict have called for him to head the body formed earlier this year with representatives of Cambodia's warring factions.

Prince Sihanouk, who is leader both of an anti-Phnom Penh guerrilla coalition and of one of the SNC's components, insisted that the warring factions accept the United Nations peace plan on Cambodia.

Phnom Penh's Vietnam-installed government has opposed key elements of the

peace blueprint put together by the five permanent members of the U.N. Security Council, saying it would not accept being dismantled.

And Hanoi has warned that it would not sign a peace settlement contravening the U.N. charter. It charges that parts of the plan, which gives sweeping executive powers to the world organization to administer Cambodia during a period before elections, do not adhere to the charter.

The guerrilla alliance fighting Phnom Penh's government comprises the powerful Beijing-backed Khmer Rouge and two smaller non-communist factions loyal to the prince and ex-prime minister Son Sann.

The Khmer Rouge and its partners have demanded that the 68-year-old former Cambodian monarch be appointed chairman of the SNC even though he is not a member of the body, which was formed in early September.

Phnom Penh has accepted on condition that it is given an extra seat on the SNC and that Cambodian Prime Minister Hun Sen be appointed vice-chairman.

#90345d5050 12/11/1990 ~French/German News Agency

NAIROBI (DEC. 11) - Three more Kenyan dissidents were charged with treason in court here Tuesday, bringing to seven the number of opposition figures who are to stand trial for treason.

All seven, who face the death sentence if convicted, appeared under heavy police guard in the Chief Magistrate's Court, where assistant deputy public prosecutor Alex Etyang for the first time detailed the accusations against them.

They were found in possession of arms and ammunition and had organised guerrilla training for the underground Kenya Patriotic Front, whose declared aim was "the overthrow, by unlawful means, of the government of Kenya," Mr. Etyang said.

The arrest in October of the front's leader, Koigi wa Wamwere, led Kenya to sever diplomatic ties with Norway, where Mr. Wamwere had been in exile.

Mr. Wamwere was charged with treason on October 19 with anti-government lawyers Rumba Kinuthia and Mirugi Kariuki, and Geoffrey Kuga Kariuki, although the grounds for the charge were never specified.

On Tuesday treason charges were also brought against another three dissidents - Rumba Kinuthia's brother Joseph Mwaura Kinuthia, James Hosea Gitau Mwara and Harun Thungu Wakaba.

Mr. Etyang said the defendants had acquired 10 AK 47 assault rifles, 1,000

rounds of ammunition and 10 grenades to be used to topple the government.

Mr. Wamwere was also accused of entering Kenya illegally from Uganda and being in possession of false identity papers.

#90345d5090 12/11/1990 ~French/German News Agency

TUNIS (DEC. 11) - The PLO wants the U.N. Security Council to vote on a draft resolution on the Israeli occupied territories that mentions the convocation of an international Middle East Peace conference, despite the threat of a U.S. veto, a senior Palestinian leader said here Tuesday.

A U.S. veto would "reveal to people in the Middle East and the whole world the duplicity of American policy," said Nayef Hawatmeh, head of the Democratic Front for the Liberation of Palestine, one of the PLO's main components.

It would also demonstrate to Washington's Security Council partners that while they supported the U.S. in its push for Gulf-related resolutions, the U.S. was not ready to make a single gesture to join them in a settlement of the Middle East conflict, he said.

He called on the other four permanent members of the council -- Britain, France, China and the Soviet Union -- to pressure the U.S. administration into voting for the resolution mentioning an international Mideast peace conference.

Britain, in a bid to avoid a U.S. veto, has proposed withdrawing the draft resolution to avoid a formal vote and downgrade it to a communique that would be issued by the Security Council's presidency -- currently held by Yemen, according to Mr. Hawatmeh.

The Security Council met Monday night but postponed its debate on the resolution until Wednesday at Washington's request and with Moscow's approval.

"A simple communique from the Security Council's presidency has no political value and does not entail any commitment on the part of the council," Mr. Hawatmeh said. He said he hoped the world body would submit the proposed resolution to a vote.

The draft resolution deals with the protection of Palestinians in the Israeli-occupied territories and includes a paragraph stating that a Middle East conference "would facilitate the achievement of a comprehensive settlement and lasting peace in the Middle East."

It sets no deadline, however, saying only that a conference should take place "at the appropriate time."

The United States wants to weaken the paragraph to avoid any linkage, as

demaded by Iraqi President Saddam Hussein, of the Palestinian question with the Gulf crisis.

A segment calling for the deployment of an international observer force in the occupied territories was eliminated at Washington's request, Mr. Hawatmeh said.

Israeli Prime Minister Yitzhak Shamir said late Monday he was certain U.S. officials would not shift to Iraq's position of linking the August 2 invasion of Kuwait to Israel's occupied territories.

LONDON (DEC. 11) - Britain and Argentina, in a further repair of bilateral ties, signed an agreement here Tuesday aimed at promoting and protecting investment in the two countries.

The accord, which will come into force "on completion of constitutional formalities" according to an official statement, was signed at a brief ceremony by British Foreign Secretary Douglas Hurd and his Argentine counterpart, Domingo Cavallo.

The accord "is a welcome new development in our bilateral relations" and "strengthens the framework for expansion of trade and economic contacts", according to a statement released by the Foreign Office.

British officials said the accord would provide a legal basis to help encourage bilateral investment and was a sign of London's support of British firms wishing to do business in Argentina.

By August of this year Britain had exported good worth 19.3 million pounds (40 million dollars) to Argentina, a 43-per cent increase on exports for all of 1989 and had imported goods from Argentina worth 98.4 million pounds (200 million dollars).

The two countries restored diplomatic relations last year after they were broken in 1982 when Britain and Argentina fought a short war in the south Atlantic over the Falkland Islands, or Malvinas as they are known in Spanish.

#90345d5340 12/11/1990 ~French/German News Agency

KIGALI (DEC. 11) - President Juvenal Habyarimana has named Denis Ntirugirimbabazi the new governor of the central Banque Nationale du Rwanda, and appointed other new senior civil servants, officials said here Tuesday.

Mr. Ntirugirimbabazi, a former finance minister, replaces Augustin Ruzindana.

Two new deputy governors were appointed: Gerard Niyitegeka, a former director of operations at the central bank, and Pierre Rwakayigamba, formerly head of the civil service in the president's office. They replace Joseph Habimana and Gaetan Rwabukumba.

Major-General Habyarimana also replaced Christophe Mfizi, who had headed the Rwandan Information Office (the equivalent of the ministry of information) since 1976. The new appointee is Ferdinand Nahimana.

No reasons for the changes were given.

#90345d5380 12/11/1990 ~French/German News Agency

THE HAGUE (DEC. 11) - The Dutch Government has allocated 10.5 million guilder (six million dollars) in emergency aid for Eastern Europe, the Foreign Ministry announced Tuesday.

The aid will go to five projects in Romania, Bulgaria and Hungary, spokesman Dig Istha said.

The Netherlands will contribute two million guilder to a U.N. programme in Romania, and 775,000 guilder will go to a U.N. project for looking after refugees in Hungary.

A further 3.75 million guilder will be used to buy animal feed in Bulgaria.

The remainder will go to two projects run by the Red Cross and by the humanitarian organisation Terre des Hommes.

The money is part of a budget of 87 million guilder (about 50 million dollars) for eastern Europe which the Netherlands included in its 1990 budget.

#90345d5430 12/11/1990 ~French/German News Agency

Moscow (DEC. 11) - The Soviet parliament approved legislation Tuesday to revamp the banking system in a further step in the country's transition to a market economy.

The law establishes the Soviet banking system on two levels, with the Soviet state bank on one and all credit institutes, to be called ''commercial banks'', on the other.

The state bank, along with those of the individual republics, serve as a central bank and controlling authority over the commercial banks.

In addition, the state bank will be an ''independent organ'' which will be

answerable solely to parliament, the agency Tass reported.

The legislation follows two bills approved by the parliament here Monday on establishing independent trade unions and on investments, also facets in the country's economic transition.

-30- 982

#90345d5540 12/11/1990 ~French/German News Agency

LONDON (DEC. 11) - Unemployment is set to climb steeply in 1991 as industry fails to control wage inflation, economic analysts in the City of London said Thursday.

One of London's major brokers is forecasting that unemployment will rise from 1.7 million currently to 2.25 million by the end of 1991.

In the view of City analysts it will take these levels of unemployment to curb British pay increases and allow inflation to converge on the European average as required by Britain's membership of the European Monetary System's Exchange Rate Mechanism (ERM).

The pattern of British pay increases has proved resilient in staying close to the rate of inflation. Average earnings rose by an average of 10.25 per cent in the year to October in spite of repeated warnings from government that industry would not be bailed out by the devaluation of the pound if it failed to control its costs.

But the government's message appears to be having little impact. Peugeot Talbot, the car manufacturer, announced Monday an agreement with unions which will give workers a guaranteed 11.5 per cent increase this year plus a 3.5 per cent profit-related bonus. British inflation is currently running at 10.9 per cent, with most analysts agreeing that it has peaked, and will start to decline.

Wage settlements, particularly in manufacturing, are traditionally influenced by the agreement at Ford. This benchmark settlement for 1990 was in fact decided in 1989 with a two-year settlement which guaranteed Ford workers the inflation rate plus 2.5 per cent, resulting in a headline grabbing 13.4 per cent.

-30- 1814

#90345d5720 12/11/1990 ~French/German News Agency

New York (DEC. 11) - Cancer causes one in four deaths in industrialised countries compared to one in five in 1968, a scientific study shows.

The increase can not only be explained by improved methods of diagnosis or higher life expectation.

Twenty-six scientists from 13 countries took part in the study by the New York Academy of Sciences. Their 345-page report says 30 to 40 per cent of all cancer cases are attributable to smoking.

Yet even without this factor, cancer deaths among males has grown by nine per cent since 1950. The rate among women is slightly lower.

The study concludes that environmental influences including occupational hazards may have contributed to the increase.

#90345d5850 12/11/1990 ~French/German News Agency

TEHERAN (DEC. 11) - A one-to-three million dollar reward for the killing of British author Salman Rushdie still stands, the Iranian charitable organization that made the offer nearly two years ago said here Tuesday.

The 15 Khorshad (June 5) Foundation renewed a pledge to pay some three million dollars to any Iranian who took the life of Mr. Rushdie in accordance with a death decree issued February 14, 1989 by the late Ayatollah Ruhollah Khomeini.

A non-Iranian who killed Mr. Rushdie would receive one million dollars.

Ayatollah Khomeini called for the death of the Moslem-born author on charges that his novel "The Satanic Verses" had blasphemed Islam.

The foundation said in a press statement that the validity of the ayatollah's fatwa, or religious decree, was confirmed last February by the present Iranian spiritual guide, Ayatollah Ali Khamenei.

The statement followed recent public appearances by Mr. Rushdie in Britain, where he is living in hiding under police protection. His brief appearances angered hardline Islamic militants here.

The 15 Khorshad foundation, which assists poor Iranians, was founded a decade ago by religious figures close to Ayatollah Khomeini.

Its name recalls a pro-Khomeini demonstration in 1963 that was brutally suppressed by security forces loyal to the former shah of Iran.

#90345d5960 12/11/1990 ~French/German News Agency

LONDON (DEC. 11) - The 12 regional electricity companies created by the British Government's privatisation of the national electricity network made their debuts on the London Stock Exchange Tuesday at prices averaging 54 per cent above their offer price.

Manweb, the new electricity company for the Manchester region was the most popular, with shares quoted at 177 pence compared with the 100 pence issue price of a restricted number of shares.

The privatisaton of the electricity network at 5.2 billion pounds (10.2 billion dollars) was the most successful in the Conservative government's series of selling off state-owned industries.

The offer was oversubscribed 10 times and Tuesday's first day of dealing showed that demand remained strong, noticeably from institutional investors who were only allowed to take up one-third of shares in the initial offer.

London Electricity showed the lowest profit in early dealings at 42.5 per cent over issue price.

Opposition Labour leader Neil Kinnock said the privatisation had cost the country three billion pounds in lost revenue, in view of the premiums being paid for shares.

But Prime Minister John Major described the entire operation as a huge success.

LILLEHAMMER, Norway (DEC. 11) - Nagano in Japan may already be the favourite of the six candiates to host the 1998 Winter Olympics, but the race is heating up.

Firmly in the running are Salt Lake City and Ostersund in Sweden, leaving behind less forceful bids from Aosta of Italy, Jaca in Spain and the Soviet resort Sodhi.

At the International Olympic Committee Executive Board meeting here, ferocious lobbying is going on and Nagano's early lead in the betting could have been eroded by some polished performances from other two contenders.

Having presented a professional case at the last Board, significantly for their own hopes in Tokyo, Nagano know they have a fight on their hands if they are to bring the Games to Japan for the first time since Sapporo in 1972.

The Japanese have used the campaign slogan "Beautiful Nagano -- We Bring the World Together" and emphasised the environmental friendliness of their bid and the easy access and compact nature of their sites. They also claiming "we will also contribute to the establishment of world peace."

But the Americans and Swedes have stepped up their respective challenges.

Tom Welch, who heads a slick bid from Salt Lake City complete with a video presentation calling the Rocky Mountains site 'the greatest snows on Earth',

points to the environment and especially to economics as the key factors that might turn the bid their way.

"Ours is a very environmentally friendly site and the people of Salt Lake City have already voted in a tax to pay for all installations even before the venue has been chosen," he says.

"That just shows the commitment of the community to bring the Winter Games here after we failed in 1966 and in 1974 when Denver pulled out."

LONDON (DEC. 11) - Three month zinc firmed in after hours kerb trading on the London Metal Exchange(LME), Tuesday.

A fall in LME stocks of 1,525 tonnes to 54,250 tonnes brought support to the metal which has recently been under pressure from concerns about the impact of a recession on industrial demand.

On the kerb three month metal was quoted at 1,290 dollars per tonne, up from 1,281 dollars on the afternoon ring, and 1,275 dollars at the close Monday.

Three month Aluminium prices staged a modest recovery on the kerb, having fallen earlier in the day. It was quoted at 1,549 dollars per tonne on the kerb, against 1,541 dollars on the afternoon ring and 1,563 dollars at the close Monday.

LME stocks of aluminium were unchanged at 308,625 tonnes.

HARARE (DEC. 11) - The financial viability of the Zimbabwean insurance industry is threatened by the upsurge in deaths related to AIDS, a survey conducted here has revealed.

According to the survey conducted by the local news agency, Ziana, claims arising out of AIDS-releated deaths were sharply increasing to "a point of deterioration of the insurance industry".

Insurance companies interviewed by Ziana said in future, they would insist on tests for the AIDS-causing HIV virus before granting any policy.

Faced with one of the worst epidemics in Africa, Zimbabwe is radically revising its approach to the incurable disease.

In the past the spread of the killer virus through the population was hidden behind a veil of official secrecy, which discouraged even the recording of an AIDS diagnosis on death certificates.

But recently Health Minister Timothy Stamps said doctors would be required by law to supply the names and addresses of living AIDS patients to local authorities.

Dr. Stamps says that around half a million people out of a population of some ten million are believed to be infected by the human immuno-deficiency virus (HIV).

Others put the figure much higher. A document prepared for the Confederation of Zimbabwe Industry (CZI) in July estimated that between 10 and 20 per cent of Zimbabwe's population was already infected with HIV.

The CZI report added that 90 per cent of the' country's work force could be dying of the disease 10 years from now.

PARIS (DEC. 11) - A consortium of Western banks will finance Cameroon's offshore oil production industry to the tune of 100 million dollars, consortium leader Credit Lyonnais of France announced here Tuesday.

The work is to be carried out by the Pecten Cameroon Company, in which Shell holds 80 percent of the shares, the remaining 20 percent being held by SNH, the national hydrocarbons company of Cameroon.

The loan announced Tuesday will enable Pecten to develop offshore oil fields in the Rio del Rey and Mokono-Abana areas. It will be repayable from the profits made from oil production.

The finance consortium includes nine banks in France, Germany, Switzerland, Britain and the United States.

DENVER, Colorado (DEC. 11) - A federal judge has set October 7,1991 as the date for a trial of a 200 million dollar civil suit against U.S. President George Bush's son Neil and other directors of the failed Silverado Banking Savings and Loan.

The suit was brought by the Federal Deposit Insurance Corp. (FDIC), which accuses Mr. Bush and the 12 other directors of "grossly negligent" management of the thrift.

Silverado collapsed in 1988, forcing a government bailout that could cost U.S. taxpayers as much as 1 billion dollars.

Court documents made public Monday showed that U.S. District Judge Sherman Finesilver scheduled the trial for October 7,1991.

Neil Bush, who is fighting separate charges of conflict of interest stemming from his Silverado service 1985 to 1988, is seeking dismissal of the FDIC suit on grounds that all transactions he voted on were approved by federal regulators.

#90345d6590 12/11/1990 ~French/German News Agency
LONDON (DEC. 11) - British Foreign Secretary Douglas Hurd suggested here Tuesday that sanctions may fail to dislodge Iraq from Kuwait and that the military buildup in the Gulf now provided the best hope for a peaceful resolution of the crisis.

"It must be questionable whether sanctions, even if applied over a long period will undermine the resolve of Saddam Hussein to keep his grip," Mr. Hurd said.

"With each day that passes the likelihood we will be able to restore Kuwait to its former position decreases," Mr. Hurd said in the House of Commons. "This accumulation of allied forces provides the strongest single hope for a peaceful outcome."

Mr. Hurd, speaking during Britain's first full-scale parliamentary debate on the Gulf crisis, said the tension could still be defused without bloodshed.

But he added: "The doctrine of peace at any price leads not to safety but danger."

His remarks marked a subtle departure from previous official statements from London which emphasised sanctions and Iraqi compliance with U.N. Security

Council resolutions as the likeliest hopes for a peaceful solution.

Echoing U.S. President George Bush, Mr. Hurd said it was still "worth going that extra mile" for peace and said Britain fully supported the U.S. initiative to receive Iraqi Foreign Minister Tarik Aziz and to send Secretary of State James Baker to Baghdad.

But he told MP's: "This country faces a risk of war. In that situation every MP is entitled to know on behalf of his or her constituency why that war is justified."

Mr. Hurd, speaking shortly after France announced it was sending an additional 4,000 troops to the Gulf, also rejected claims that the coalition of armies ranged against Iraq was disintegrating.

LONDON (DEC. 11) - A new English-language economic and financial service run jointly by Agence France-Presse and Extel Financial will be launched on February 1 next year, AFP director-general Claude Moisy said here Tuesday.

AFP-Extel News Ltd., based in the city of London, will produce the computerised service, to be named AFX, for the business and financial community. It will employ about 40 journalists based throughout Europe and in the United States and Japan.

Mr. Moisy, who spoke at a lunch-debate organised by the French Chamber of Commerce in Britain, said that setting up AFX was an important part of AFP's diversification programme.

Mr. Moisy earlier visited the new headquarters of AFP-Extel News Ltd.

BEIRUT (DEC. 11) - Lebanese customs officials on Sunday seized automatic weapons and ammunition bound for Soviet Armenia, informed sources disclosed here Tuesday.

They said 20 automatic weapons and supplies of ammunition were hidden in three cars that had been loaded aboard a cargo vessel in the northern Lebanese port of Tripoli and destined for residents of Armenia.

Customs officials refused to provide any further details on the seizure, including the registration of the ship.

Several hundred thousand Armenians live in Lebanon.

NEW YORK, United Nations (DEC. 11) - U.N. Secretary General Javier Perez de Cuellar asked the Security Council in a report made public Tuesday to renew the mandate of the U.N. peacekeeping force in Cyprus for six more months.

In extending the mandate of the United Nations Forces in Cyprus (UNFICYP), which expires December 15, Mr. Perez de Cuellar said he was convinced "that the continued presence of the force on the island remains indispensable to achieving the objectives set by the Security Council."

Those objectives were established by the Council in 1964 in Security Council Resolution 184, which says the mission of the U.N. force is "to use its best efforts to prevent a recurrence of fighting and as necessary to contribute to the maintenance and restoration of law and order and a return to normal conditions."

Since then -- with some changes following a 1974 cease-fire -- the U.N. forces have been deployed along a 180-kilometer-long (110-miles) line separating the Greek and Turkish communities.

The force is composed of 2,123 soldiers and costs about 28 million dollars a year to maintain. Contributions by member states have lagged behind the costs, however, and the UNFICYP has run a 172 million dollar deficit since December 1980.

U.N.-mediated talks between the factions in Cyprus have been stalemated since February.

#90345d6810 12/11/1990 ~French/German News Agency
MOSCOW (DEC. 11) - A Soviet-U.S. summit meeting will be held early next year even if delayed because of developments in the Gulf or slow progress in working out a treaty on strategic arms cuts, an official spokesman said here Tuesday.

The next meeting between U.S. President George Bush and his Soviet counterpart Mikhail Gorbachev has been scheduled for January in Moscow but government officials in Washington said recently they would not rule out a delay if a Strategic Arms Reduction Treaty (START) could not be ready for initialling in time.

The Soviet-U.S. treaty is to cut the number of strategic weapons held by the two countries by half.

Vitali Ignatenko, spokesman for Mr. Gorbachev, said a postponement would not imply that "insuperable obstacles" existed on the road to a START agreement.

"We must decide together when a summit will be most profitable", he added.

A decision on the exact date will be made after Soviet Foreign Minister Eduard Shevardnadze returns to Moscow from a current visit to the United States, Mr. Ignatenko said.

PARIS (DEC. 11) - A preliminary draft of a Cambodian peace plan drawn up by the five permanent members of the U.N. Security council gives the United Nations full powers to implement the terms of the accord, according to a copy of the confidential document obtained here Tuesday.

The agreement recognizes the Supreme National Council (SNC), which includes representatives of each of Cambodia's four warring factions, as the "unique legitimate body and source of authority" in Cambodia during a transitional period.

However, under the terms of the proposed accord, the SNC "delegates to the United Nations all powers necessary to insure the implementation" of the agreement.

Cambodia and Vietnam have recently emphasized that they opposed any dismantling of the Vietnamese-backed Cambodian government, and Vietnam has said that it will not sign any agreement which fails to respect Cambodian sovereignty.

The 48-page agreement was drawn up by the five permanent members of the U.N. Security Council -- the United States, the Soviet Union, Britain, France and China -- along with Indonesia on November 26.

France and Indonesia, which co-chair the Paris International Conference on Cambodia (PICC), have invited the SNC to meet here on December 19 to present it with the proposed agreement and to discuss how the SNC should function, French Foreign Ministry Spokesman Daniel Bernard said on Tuesday.

Indonesian Foreign Minister Ali Alatas said in Jakarta earlier Tuesday that the meeting would lead to the reconvening of the PICC, which was suspended in August 1989 after the four factions failed to agree on a power-sharing arrangement.

ATHENS (DEC. 11) - Romanian Foreign Minister Adrian Nastase appealed on Tuesday to the countries of the European Community (EC) to provide emergency food aid to his country.

At the end of a three-day official visit to Athens, Mr. Nastase told a press conference that Romania "needs as much food aid as possible, and particularly fruits, because the country is facing a very difficult period as it begins the winter.

"We need food, medicine, animal-feed, and milk for children," he said.

Mr. Nastase indicated that Greece had promised to send some food before Christmas, mostly citrus fruits such oranges and lemons, and juices.

He welcomed Greece's assistance and the Greek government's expression of its "solidarity" with the revolt which overthrow the late dictator Nicolae Ceausescu last December.

During his visit, Mr. Nastase met with Greek Foreign Minister Antonis Samaras and Prime Minister Constantin Mitsotakis.

DHAKA (DEC. 11) - Mahmudul Hasan, Bangladesh's home minister under ousted president Hussain Mohammad Ershad, has been placed under house arrest, police said Tuesday.

No official announcement was made but a police official said an extra police contingent was posted at Mr. Hasan's residence in the exclusive Dhaka suburb of Gulshan and entry to and that exit from the house had been prohibited.

The official at Gulshan Police station, who asked not to be identified, said the former minister and his family were in the house but he could give no reason for the police action, saying only that they acted on orders from higher authorities.

Mr. Hasan, a retired major general, could not be reached by telephone. The arrest, the first of a former Ershad minister since his fall a week ago, came as demonstrators returned angrily to the streets of the capital to press the interim government of President Shahabuddin Ahmed to arrest and try Mr. Ershad and his associates.

It also came one day after the Gulshan residence of Mr. Ershad's vice president, Moudud Ahmed, was firebombed by opposition activists.

Police raided the Dhaka homes of some 10 top figures including former ministers and ruling Jatiya Party leaders but found none of them in, the

private United News of Bangladesh agency said Tuesday.

#90345d7050 12/11/1990 ~French/German News Agency
MOSCOW (DEC. 11) - The Soviet communist party's central committee concluded here Tuesday a two-day plenary session devoted to the new union treaty proposed by President Mikhail Gorbachev, the official news agency Tass reported.

A majority of delegates in the central committee expressed the view that concluding the new union treaty was ''the paramount task'' of Soviet communists, Tass said. The treaty is designed to prevent the union of 15 Soviet republics from falling apart.

Earlier on Tuesday Boris Yeltsin, parliamentary president of the Russian republic and Gorbachev's opponent, had reiterated his warnings against a hasty signing of the new treaty.

The plenary session adopted a resolution on ''the concept of a union treaty and the tasks of the party structure'', Tass said.

Some 30 speakers took the floor before the vote was taken and none opposed the conclusion of a union treaty, Tass said. Several speakers expressed the view that ''the voice of separatists should not be misinterpreted as the voice of the people''.

In the same vein, the leader of the Moldavian communists had suggested that a referendum should be held to decide whether a republic wants to remain part of the union. Moldavia is a region with a strong movement for autonomy. More

AMMAN (DEC. 11) - Algerian President Chadli Benjedid began talks with King Hussein Tuesday ahead of a visit to Baghdad and Riyadh aimed at bringing Iraq and Saudi Arabia closer to a negotiated settlement of the Gulf crisis, official sources said.

The sources said Benjedid, who arrived earlier in the day, ''was expected to exchange views with King Hussein on ways to start an Arab-Arab dialogue to find a solution to the crisis.''

Diplomatic sources said the Algerian president, who leaves for Baghdad Wednesday for talks with Iraqi President Saddam Hussein and then heads for Riyadh for talks with Saudi King Fahd, would be trying to convince both leaders to meet to settle the crisis.

Benjedid's visit comes two days after King Hussein made an impassioned appeal for Arab-Arab dialogue to resolve the dispute in the Gulf away from foreign intervention.

''It is high time for countries who had not joined the war camp to come out and do something for the sake of peace,'' a Jordanian official said.

Diplomatic sources said the Algerian initiative was aimed at ''filling a political void created by the absence of dialogue between the Arab antagonists in the Gulf.''

#90345d7220 12/11/1990 ~French/German News Agency

MURUROA, French Polynesia (DEC. 11) - The French Navy on Tuesday halted a dinghy from the Greenpeace ship Rainbow Warrior II which crossed into territorial waters around France's nuclear testing site on Mururoa atoll and took the craft's five occupants ashore.

French sailors aboard a speedboat stopped the dinghy nine nautical miles from the atoll and transferred its five occupants -- clad in white jackets covered with slogans demanding an end to nuclear testing here -- to their boat.

Those arrested -- Greenpeace France president Alain Conan, U.S. scientist Norman Buske, activist Gaston Bernadino, Dutchman Martin Gotje, a New Zealand resident, and Tania Popp, a New Zealander -- were brought ashore at 8:30 a.m. (1730 GMT), watched by an AFP correspondent.

Mr. Conan said their detention had been carried out "very correctly."

The dinghy was being returned to the Rainbow Warrior II, sitting outside the territorial limits, officials said.

French ships shadowing the Greenpeace flagship had repeatedly broadcast warnings that anyone trying to land at Mururoa or crossing the 12 mile (20 kilometer) territorial limit faced arrest and possible imprisonment.

A Greenpeace dinghy which crossed the limit Monday was intercepted by French Navy and Foreign Legion commandos. Its occupants -- Mr. Conan, Mr. Buske and three Greenpeace activists -- were interrogated by police and then returned to the Rainbow Warrior II along with their dinghy.

"We were intercepted yesterday, and I announced clearly then that we would return," said Mr. Conan Tuesday. "Here we are ... "

He added that "We have our convictions, and we'll take them to the end."

The five Greenpeace members were then taken to the atoll's police station.

Rear Admiral Francois Querat, commander of France's armed forces in French Polynesia, warned on Monday that if the incident were repeated he might take "much more severe measures" against the Greenpeace ship.

French authorities have thus far avoided taking action against the ship itself.

The Greenpeace activists, who said earlier that they had found traces of radioactivity in water outside the territorial limits, have announced their intention to take samples from territorial waters and from the Mururoa lagoon in particular in order to test them for radioactivity.

France has conducted some 120 nuclear tests at Mururoa since it began underground testing in 1975, with devices ranging from 30 kilotons to around 100 kilotons.

#90345d7270 12/11/1990 ~French/German News Agency
BERLIN (DEC. 11) - A senior associate of Chancellor Helmut Kohl warned Tuesday that Germany would not back plans for European monetary union unless France scrapped its nationalistic security policy.

The warning was sounded by Alfred Dregger, chairman of the parliamentary group of Mr. Kohl's Christian Democratic Union (CDU).

It came only four days before the European Community (EC) launches conferences in Rome on monetary union and political union that will include debate on a joint security policy.

Mr. Dregger threw his weight behind British Foreign Secretary Douglas Hurd, who suggested Monday that the nine-nation Western European Union (WEU) be developed as a "European pillar" of the transAtlantic alliance.

It was a "positive" response to hopes for a European approach, Mr. Dregger

said. "The just-completed breakthrough in the tunnel between the Continent and Britain is yielding its first fruit."

But, he said in a communique, "the key to the success of this policy lies with France."

"France must end the ambivalence of its (national) security policy and identify with Europe," he said. "Then the way will be open for monetary union."

He asked: "How could Germany give up its sovereignty over the D-mark, the anchor of monetary stability in Europe, without seeing its security needs met through a European Security Union, which inevitably requires France?"

France has a hybrid status in the North Atlantic Treaty Organisation (NATO). It quit its integrated military command in 1966, in order to lead an independent defence policy and control over its nuclear weapons.

Mr. Dregger recalled last Friday's joint declaration by Mr. Kohl and Mr. Mitterrand, who said they would press the Rome conference to develop an "authentic policy of common security" by EC members that could eventually be transformed into "a common defence."

The two leaders suggested that there be a "clear organic relationship" between the EC policy and the WEU.

But Mr. Dregger, like Mr. Hurd, put the emphasis on the WEU, saying that by leaving it in charge of security matters, it would "help the European Community to open up to the new democracies in east and central Europe."

#90345d7300 12/11/1990 ~French/German News Agency

RIO DE JANEIRO (DEC. 11) - A rancher and his son go on trial Wednesday in a murder case symbolizing the battle between Brazil's poor farm workers and wealthy land owners as well as the fight to protect the Amazon.

The trial in the December 1988 killing of ecologist and union leader Chico Mendes is being called unprecedented in this sprawling nation where land disputes in remote areas are often settled by the gun.

Swarms of journalists and "seringueiros" - the rubber tappers which Mendes organized to fight for their livelihood - are expected to converge on Xapuri, a town of 5,000 people in northwestern Acre state, for the trial.

A virtual unknown in his own country until his death, Mendes had been hailed by international environmental groups and the United Nations for his defense of the rubber tappers and Indians who lived off the land, against developers who want to clear it for grazing, timber, or real estate speculation.

Rancher Darly Alves da Silva, 56, is charged with ordering the murder of Mendes while the landowner's 23-year-old son, Darcy, is charged with pulling the trigger.

A family with a long history of reputed violence, the Alves da Silvas reportedly zeroed in on Mendes after the rubber tappers prevented them from clearing a parcel of land to expand a farm. The Mendes-led union used the peaceful technique it became famous for - it surrounded the land with unarmed guild members, including women and children, and refused to budge.

Hounded by death threats, Mendes fled from his modest wooden home in Xapuri and went into hiding, but not before warning the press and law enforcement officials, including the federal police, that his life was in danger.

On a rainy afternoon three days before Christmas, Mendes, who was 44 when he died, snuck back into town to visit his wife and two daughters, knowing that the Alves da Silvas were waiting for their chance to strike.

His widow recalls that while she prepared dinner, peering out the window every now and then, the short and stocky Mendes got up to take a shower in the outhouse in their yard. He was shot in the chest when he opened the door to go outside.

The younger Alves da Silva, hoping to save his father, surrendered four days after the crime and confessed, although he later recanted. Worn out and hungry after living in a jungle hideout, the father surrendered several days after his son. A third suspect remains at large.

The case has now become high-profile for the Brazilians also. President Fernando Collor de Mello, a self-proclaimed environmentalist, is sending the chief of the federal police, Romeu Tuma, to represent him at the trial.

Land disputes such as this one are not uncommon in the Amazon; but convictions in cases such as the Mendes killing are.

Roman Catholic Bishop Moacir Grechi, of the Acre state capital Rio Branco, said more than 1,500 peasants have been murdered during the past 26 years over land disputes. "In more than 70 percent of these crimes there has not even been a trial," the bishop said, quoting a church report.

In Xapuri, six union leaders had been murdered before Menes, with none of the cases going to trial. But prosecutors in the upcoming trial appear confident. "All the evidence has been gathered to convict the two defendants," one of the prosecutors, Marcio Bastos, said. "Impunity for crimes committed for the sake of possessing land is over."

The defense, meanwhile, rather than challenge the arguments of the prosecution

has decided to attack Mendes' reputation. Defense lawyer Joao Lucena Leal, a former federal policeman, said he plans to try to persuade the 21-member jury that Mendes was "no saint..not at all."

The defendants have asked for permission to cover their faces with hoods during the proceedings in Xapuri's tiny courtroom. "I want to preserve the image of my clients, which has already been severely exploited in an effort to disparage them," said another defense attorney, Rubens Lopes Torres.

LONDON (DEC. 11) - South Africa will only be considered free from apartheid when all its segregation laws have been repealed, the Commonwealth Secretary-General, Chief Emeka Anyaoku, told MPs at Westminster here Tuesday.

The pressure on the South African government should be kept up until "fundamental change had been irreversibly secured", the chief told the Foreign Affairs Select Committee.

Sanctions should be lifted only when majority rule was firmly in place and it was clear there could be no going back to the old laws, the secretary-general added.

The former Nigerian foreign minister said the Commonwealth's overriding priority was to help advance the cause of negotiations and to contribute to the emergence of multi-racial democracy in South Africa.

WASHINGTON (DEC. 11) - A total of 509 American citizens want to remain in Iraq or Kuwait for family reasons, State Department spokesman Richard Boucher said Tuesday.

He said they either viewed the countries as their home or had relatives there

not entitled to exit visas because they are not U.S. citizens. For many, the decision was not easy, he added.

Boucher said 310 Americans - 215 children, 60 women and 35 men with dual citizenship - planned to remain in Iraq, and another 199 men with dual citizenship, 79 children and 40 women - had opted to stay in Kuwait.

The U.S. had done all it could to explain the situation and help them make their choice, he said.

The State Department expects that all Americans wishing to leave will have done so after the last special flight departs on Thursday. The Voice of America has broadcast repeated announcements, and flight information has also been passed on in other ways.

RIYADH (DEC. 11) - Saudi Arabia implicitly rejected Tuesday a new peace mission which Algerian President Chadli Benjedid was reported to have launched in an attempt to promote a peaceful solution to the Gulf crisis.

An official source quoted by the Saudi news agency Spa reiterated the Saudi government's stance that the key to a solution to the Gulf crisis was in the hands of President Saddam Hussein who needed only to order his troops out of Iraqi-annexed Kuwait.

Benjedid arrived in Amman Tuesday for talks with King Hussein ahead of similar visits to Baghdad and Riyadh.

Official sources in Amman said the Algerian president, who has taken a neutral stand on the Gulf crisis, would seek to convince Saddam Hussein and Saudi Arabia's King Fahd to meet to solve the crisis.

The Saudi source said no date has been set for the Algerian President's visit to the kingdom.

He was commenting on reports that Benjedid was planning to visit Riyadh to start a Saudi-Iraqi dialogue on the Gulf crisis, the Saudi Press Agency (Spa) said.

#90345d7600 12/11/1990 ~French/German News Agency

WASHINGTON (DEC. 11) - The United States might seek additional financial assistance from other countries for its military buildup in the Gulf, Defence Department spokesman Pete Williams said Tuesday.

He said the cost to date had not yet been determined, but that the Defence Department would present the necessary figures to Congress in February or thereafter.

Williams declined to comment on press reports putting the cost at between 20 and 37 billion dollars for the current fiscal year. He did say that the sum was greater than 15 billion dollars.

Congress has already approved 1.9 billion dollars for August and September. The Pentagon had requested 2.7 billion dollars.

Williams said that by year's end, other countries will have supplied about 6.5 billion dollars in funds or materiel. Kuwait has contributed 2.5 billion,

Japan 426 million, Germany 337 million -with a total of 1.5 billion promised by year's end - and the United Arab Emirates 250 million.

Saudi Arabia is paying for food, fuel, water, local transportation and other facilities. By the end of October, the cost of those services had reached about 1 billion dollars, Williams said.

Meanwhile, the State Department said Iraq sent 20,000 more troops to Kuwait and the southern border area during the last week, bringing the total to at least 500,000. They face more than 260,000 Americans and 220,000 troops from other countries.

WASHINGTON (DEC. 11) - Israeli Defence Minister Moshe Arens said Tuesday that Israel might resume deportations if the Palestinian uprising does not subside.

''I don't think that we would hesitate to use deportations,'' Arens said in a Cnn television interview, as they had been ''the most effective deterrent we have.''

Previous Israeli deportations of Palestinians have triggered protests by the United States and other western nations which consider them a violation of the Geneva Convention.

Arens acknowledged that the uprising had lately involved more lethal weapons, something he said might be due to a ''feeling of desperation,'' and the perception that stones were not doing the job.

Palestinian stone-throwers had been ''terrorizing'' the Israeli population, Arens said, but ''have no interest in the peace process at all.''

Asked how Israel would resume peace efforts, he said the focus would still be

on elections in the West Bank and Gaza strip to elect Palestinians with whom Israel could negotiate.

The Israeli army announced earlier in the day that it would seek tougher sentences for convicted Palestinian stone-throwers and post sentries at key intersections to prevent attacks on Israeli vehicles.

WASHINGTON (DEC. 11) - Lithuanian President Vytautas Landsbergis Tuesday said Tuesday he believed the United States would not stand by idly if the Soviet Union used force to quell the independence drive of his Baltic republic.

"I don't want to have such a bad opinion of the United States of America," Mr. Landsbergis said at a press conference at the Lithuanian legation in Washington. "Especially after my meeting with President (George) Bush yesterday, I have absolutely no basis to think that way."

The Lithuanian president, who met with Mr. Bush Monday, said his country faced a Soviet military threat and requested U.S. "political protection."

Mr. Landsbergis stated at the press conference that Lithuania was confronted with the possibility of a new Soviet economic blockade, and said, "I am convinced this winter is going to be a decisive one in our struggle."

"All forces and measures possible are going to be used in an attempt to destabilize the situation in Lithuania, to undercut the legitimately elected government and to force it to remain part of the Soviet Union," Mr. Landsbergis added. He said the Soviets believed this winter would play in their favor, but that Lithuanians would fend off the attack and emerge victorious.

Mr. Landsbergis noted he was not certain of the position Western countries would take in the event of another Soviet blockade. "We hope the assistance from the West will not be limited to the supply of medecine," he said.

The Lithuanian leader condemned the Soviet policy of ignoring the separatist demands of his country and the other Soviet Baltic states, Estonia and Latvia, and suggested so-called "three plus four" negotiations.

Such talks, inspired by the "two plus four" talks prior to German reunification, would bring together Lithuania, Latvia and Estonia for discussions with the Second World War's victors, the United States, France, Britain and the Soviet Union.

The three Baltic states were joined forcibly to the Soviet Union by Joseph Stalin in 1940, and most Western countries, including the United States, have never recognized their annexation officially.

WASHINGTON (DEC. 11) - President George Bush assured Israeli Prime Minister Yitzhak Shamir Tuesday that the United States would not resolve the Gulf crisis at Israel's expense and Mr. Shamir expressed his total support for U.S. policy against Iraq.

The two men, who met at the White House for the first time since Iraq's August 2 invasion of Kuwait, agreed that the Palestinian question must not be linked to the Gulf crisis, but that the Middle East peace process should be revived once the crisis is over.

Mr. Shamir, who opposes an Israeli-Palestinian dialogue advocated by the United States, apparently did not present Mr. Bush with any new ideas on how to advance the peace process.

The shooting deaths of 18 Palestinian protesters in East Jerusalem's Temple Mount October 8 and Israel's rejection of U.N. resolutions calling for an investigation of the incident were not taken up during the meeting, which lasted nearly two hours, said John Kelly, assistant secretary of state for Near Eastern affairs.

Both sides stressed the "friendly" atmosphere of the meeting, which comes at a time of tension in relations between the two strategic allies over Israeli intransigence.

Mr. Bush thanked Mr. Shamir for the "low profile" adopted by Israel during the Gulf crisis, promising to defend Israel in case of an Iraqi attack and pledging to continue to supply Israel with the arms it needs to maintain a qualitative edge.

The day before the meeting Mr. Shamir warned once again against linking the Palestinian question and the Gulf crisis, asserting that some countries were prepared to accept such a linkage.

"I trust the president," Mr. Shamir told reporters as he left the White House. "He said it several times and he said it to me now again that there will not be any deal at the expense of Israel."

HOUSTON, Texas (DEC. 11) - U.S. Secretary of State James Baker and Soviet Foreign Minister Eduard Shevardnadze are to meet in Washington on Wednesday with top officials from both the Angolan government and the U.S.-backed rebel force UNITA, officials said here Tuesday.

In a joint statement after their talks here, the two officials said Mr. Baker would confer with his Angolan counterpart Pedro de Castro Van Dunem while Mr. Shevardnadze would hold talks with Jonas Savimbi, leader of the Union for the Total Liberation of Angola (UNITA).

The communique, issued at the end of two days of talks here between Mr. Baker and Mr. Shevardnadze, said the two ministers would outline their common view of a peace settlement in Angola.

The proposed settlement calls for a ceasefire, participation of UNITA in Angola's political life, free and fair elections under international supervision and an end to all arms deliveries to the belligerents as soon as a ceasefire comes into effect.

Moscow is the main backer of the leftist Angolan Government, who has just announced the introduction of a multi-party system, while Washington provides military and political support to UNITA.

A communique from the UNITA office here said Mr. Savimbi would spend two days here from Wednesday at the request of Mr. Baker for consultations on the latest developments in the peace negotiations.

The official Angolan news agency ANGOP, in a dispatch monitored in Lisbon, said that Mr. van Dunem left Luanda on Tuesday for the talks in Washington.

The Angolan Government and UNITA have held several rounds of inconclusive peace talks this year.

LONDON (DEC. 11) - Britain may call up of some medically qualified armed forces reservists because of the Gulf crisis, Defence Secretary Tom King said here in Parliament here Tuesday.

Some anaesthetists, surgeons, doctors and nurses in the Territorial Army, the British reserve force, had already been approached and asked if they could take time off from their jobs, Mr. King said.

The minister said volunteers would not be sent to the Gulf themselves, but would take over the posts of full time service personnel, enabling them to go to the region.

Mr. King gave no indication of the numbers of people involved.

#90345d8350 12/11/1990 ~French/German News Agency
WASHINGTON (DEC. 11) - The Senate's approval of a treaty to cut conventional arms in Europe may be delayed for two months because of undercounting of Soviet weapons, sources said Tuesday.

The Soviet Union has been moving tanks east of the Ural Mountains, an area not covered by the treaty, making it possible that Moscow would be required to destroy few or no tanks, rather than the 10,000 to 20,000 envisioned by the accord, said congressional sources who spoke on condition of anonymity.

Administration sources said other weapons systems were also undercounted,

Soviet armored personnel carriers by 12,000, artillery by 10,000 and combat aircraft by 3,000.

The Conventional Forces in Europe (CFE) treaty was signed November 19 in Paris. Leaders from 22 Warsaw Pact and North Atlantic Treaty Organization (NATO) countries signed the document, which President George Bush praised as "the farthest-reaching arms agreement in history."

But Sen. Jesse Helms has complained in a letter to Mr. Bush that Moscow "may in fact be defeating the object and purpose (of the agreement) at the outset."

A White House source said the treaty came up during talks between Secretary of State James Baker and Foreign Minister Eduard Shevardnadze in Houston, Texas.

"We are pursuing that now," said a White House official, who declined further comment.

Democratic staff sources said the problems did not jeopardize Senate approval of the treaty.

WASHINGTON (DEC. 11) - Record wheat stockpiles around the world are pushing prices down and making it hard for U.S. farmers to sell abroad, the U.S. Agriculture Department said Tuesday.

In addition, projections for wheat harvests in Canada, Mexico and China were higher than a month ago, even though prospects for Brazil, South Africa and the European Community were lowered.

Projections for the average U.S. market price fell five cents a bushel from November, to between 2.50 dollars and 2.70 dollars for the marketing year that began June 1.

And exports were expected to fall to 1.075 billion bushels in 1990-1991,

against 1.233 billion last year.

Projections for corn and other grains were also up from last month. Still, corn use is expected to be higher than output, reducing corn stockpiles.

World oilseed production was also at record levels, with the price of soybeans expected to fall 10 cents to between 5.25 dollars and 6.25 dollars a bushel.

AMMAN (DEC. 12) - Algerian President Chadli Bendjedid met on Tuesday with Jordan's King Hussein for talks an Arab solution to the Gulf crisis, amid reports that the Algerian leader may seek to set up a meeting between Iraqi President Saddam Hussein and King Fahd of Saudi Arabia.

Mr. Chadli and King Hussein stressed the need to open an Arab dialogue to resolve the Gulf crisis and said there existed a link between all problems in the Middle East, according to officials here in the Jordanian capital.

Amman was the first stop in a tour which is also expected to take Mr. Chadli to Saudi Arabia, Iraq and Syria.

Informed sources here said he would seek to set up a Hussein-Fahd meeting and also to obtain an Iraqi pledge to withdraw from Kuwait, followed by the deployment there of an Arab force.

Both Mr. Chadli and King Hussein agreed that "all the problems in the Middle East were in the last analysis linked to one another and that demanded they be treated within the framework of principles and resolutions of international legality."

Present at the meeting between the two leaders were Crown Prince Hassan Ben Talal, Prime Minister Mudar Badran and Foreign Minister Marwan al-Kassem on the Jordanian side as well as Algeria's foreign minister, Ahmad Ghozali.

Mr. Chadli was to leave Jordan on Wednesday for another as yet undisclosed Arab capital.

Besides Saudi Arabia, Iraq and Syria, the Algerian President could also visit Yemen or another Gulf state.

LONDON (DEC. 12) - The Soviet Union's ambassador to Britain wrote to the Times newspaper here Wednesday to thank the British people for their "swift and generous response" to his appeal for help over his country's food crisis.

"I do thank most sincerely all those who sent their (financial) donations... and contributed in many other ways including food parcels and medicines," ambassador Leonid Zamyatin wrote.

"It goes without saying that the embassy will use all the money so far accumulated in this account to purchase in the U.K. milk powder and baby food mixes of which we have urgent need."

"In the next two days we expect a full planeload of this humanitarian cargo to be airlifted... to Moscow," the ambassador went on.

"Aid of this kind "not only helps those in real need but strengthens the human bonds of mutual sympathy and care that unite the peoples of our two countries," Mr. Zamyatin wrote.

SEATTLE, WASHINGTON (DEC. 12) - The Israeli airline El Al has ordered four Boeing aircraft and taken options on two more, Boeing Commercial Airplace Group confirmed Tuesday.

El Al has agreed to pay 425 million dollars for two twin-engined 757-200's and two 747-400's, a long-range, four-engined aircraft.

The airline took an option on two other 747-400s for a total of 264 million dollars.

The two 757's had been ordered earlier but no public announcement was made until Tuesday. One aircraft was delivered in November.

Since the beginning of the year, Boeing, the world's largest aircraft-builder, has announced orders for 502 commercial aircraft worth 44.7 billion dollars.

#90345d8830 12/11/1990 ~French/German News Agency

WARSAW (DEC. 12) - The Soviet Union expects to supply Poland with 4.5 million tonnes of oil next year, down from 13 million tonnes in previous years, the Polish news agency PAP reported on Tuesday.

The news agency, citing Soviet negotiators at the close of six days of talks with Polish authorities here, said Poland would have to pay for three million tonnes of the oil in hard currency.

The Soviet Union would accept to sell 1.5 million tonnes in counter-trade deals for Polish exports, mainly machine tools and ships, the officials said.

Beginning on January 1, trade between the Soviet Union and its former partners in the communist trading bloc COMECON is to be settled in dollars rather than roubles.

PAP also said the Soviet Union was preparing to sell Poland 6.6 billion cubic meters (230 million cubic feet) of natural gaz, less than the 8.1 billion sought by Warsaw.

The news agency said the projected oil and gas supplies fell far short of the quotas agreed upon during meetings between the two country's prime ministers.

Soviet negotiators, PAP said, told their Polish counterparts to begin negotiating directly with individual Soviet republics for supplementary deliveries of oil and natural gas.

Poland's oil consumption next year is expected to reach some 14 million tonnes. Its trade surplus for the current year, expected to reach four billion dollars, will be barely sufficient to pay its oil bill next year.

#90345d8920 12/11/1990 ~French/German News Agency

JAKARTA (DEC. 12) - Indonesian car production this year is expected to soar to an all-time high of 270,000 units, up 54 per cent from the 1989 level of 174,356, an industry spokesman said Wednesday.

The production figure was still below demand, which had unexpectedly surged to an estimated 300,000 units this year, said the spokesman for the Association of Car Sole Agents and Manufacturers (Gaikindo).

The jump in demand, prompted by rising incomes and a growing number of bank credit schemes, has pushed up prices and caused long waits for popular models.

The spokesman said the national automotive industry had an annual capacity of 424,300 units, but was unable to produce at full rate due to inadequate supplies of components and shortage of labour.

The previous record production was recorded in 1981 with 212,674 units before the economic recession the following year brought the level to as low as 139,000 units in 1985.

The local automotive industry still largely assembles imported kits, mainly for Japanese principals and a few European countries, although the country has begun producing and also exporting a number of components and parts.

#90345d8980 12/11/1990 ~French/German News Agency

TOKYO (DEC. 12) - Japan's Mitsubishi announced on Wednesday it had received an order from the Soviet private shipping company Sovcomflot for 18 cargo ships worth about 40 billion yen (307 million dollars) for delivery between 1991 and 1993.

The contract is the largest Soviet order for Japanese shipbuilders in the last few years, industry sources said.

Mitsubishi officials said Sovcomflot, privatized in July 1988, ordered 18 multi-purpose cargo ships, comprising eight 9,500 tonners and 10 6,100 tonners.

The payment will partly be made in the form of leasing contracts, they said.

Sovcomflot currently owns about 178 vessels or 3.5 million tonnes, but plans to increase the number of its fleet to 400 ships over the next few years.

The mass order reflected the Soviet Union's urgent need to modernize its merchant navy because the average vessel of its 2,800-ship fleet is more than 16 years old, the officials.

#90345d8990 12/11/1990 ~French/German News Agency

TOKYO (DEC. 12) - Japan Airlines Co. (JAL) has said it will join the German airline Lufthansa in acquiring shares in the world's top courier network DHL.

DHL International Ltd., DHL's Brussels-based global service, signed an agreement Monday to let JAL and Lufthansa each take a five per cent stake in it and its holding company Middlestown N.V., a JAL statement released here late Tuesday said.

Under the agreement, the Japanese trading company Nissho Iwai Corp. will also acquire a 2.5 per cent share each in DHL International and Middlestown.

The deal gives the airline companies the option to raise their stakes to 25 per cent each within 18 months and Nissho Iwai to increase its share to 7.5 per cent, the statement added.

The three partners will also acquire stakes in DHL's operation in the United States, DHL Corp., with JAL and Lufthansa holding one per cent each and Nissho Iwai 0.5 per cent.

The tie-ups will help establish an international network linking North America Europe and Asia to provide a "complete door-to-door courier service meeting the diversifying needs of clients with flexibility," the statement said.

#90345e0031 12/11/1990 ~Latin America New Agency
MADRID (DEC. 11) EFE - The number of Spaniards out of work in November stood at 2.3 million, or 15.6 per cent of the working population, according to figures released Tuesday by the Labor Ministry.

The figures showed 2,905 people had lost their jobs across the country last month.

An estimated 30 per cent of employed Spaniards have part-time or insecure jobs.

Spain has one of the highest unemployment rates in Western Europe, although analysts claim the true rate is actually lower due to a thriving underground economy.

Observers said a crisis in the tourism sector due to the falling number of foreign visitors had helped keep Spain's jobless rate high.

They said recent falls in production in the industrial and manufacturing sector, especially in the automobile industry, had also contributed.

Car sales in Spain plunged by 23.57 per cent in November, according to figures released this week by the car manufacturers' association, ANFAC.

ANFAC said the sector was in an +important recession+ which affected both production and exports. The assocation said the recession had started in August 1989 when the government moved to curb credits and raise interest rates.

Between January and November 1990, car sales dropped 11.24 per cent compared with the same period last year. This figure is expected to rise to 12 per cent by the end of the year.

The figures showed that companies worst hit by this year's falling demand for cars were the Renualt group, whose sales plunged by 23.07 per cent and the Opel firm which registered a 13.88 drop.

MUNICH (DEC. 11) EFE - More than half of young east Germans want to adapt to a western German lifestyle, but one in three fear they are not capable of doing so, a survey published Tuesday revealed.

Of 1,100 people between the ages of 14 and 25 in the five states of former East German polled by a Munich-based institute, 63 per cent said they felt a rapid adjustment to the higher west German standard of living was essential.

Thirty-four per cent thought it would be difficult to adapt while 30 per cent feared they were not equal to future challenges following German unification over two months ago.

Young Germans in the east see their western counterparts as self-assured, arrogant and pretentious whereas a survey in west Germany showed that the same age group views the easterners as easily influenced, obedient and modest.

The two Germanys unified on October 3 after 45 years of separation.-EFE

LOS ANGELES (DEC. 11) EFE - The widow of late Philippines president Ferdinand Marcos has agreed to return to the Manila government $400 million of state funds which the dictator illegally took out of the country after his overthrow in 1986.

Imelda Marcos signed an agreement with a Philippine government commission in Los Angeles Monday which puts the money under independent custody until an agreement is reached on all the cash allegedly smuggled out by the couple.

The $400 million is currently being held in five Hong Kong banks.

The commission's head, David Castro, said that it would continue pressing for some $5 billion from Marcos which the government of President Corazon Aquino claims belongs to the Philippine treasury.

Imelda Marcos said she hoped Monday's agreement would allow her to return to the Philippines from exile in Hawaii and bury Ferdinand, who died in 1988.

She was found not guilty by a U.S. court in July of conspiring to channel dlrs 200 million of Philippine treasury money to buy property, jewels and art in the United States and of defrauding several U.S. banks.

International arms dealer Adnan Kashoggi was found not guilty of fraud charges at the same trial.

Imelda Marcos became infamous for her numerous extravagant shopping trips to the United States during her husband's stay in power and she was reputed to have compiled the world's largest collection of shoes.

BEIRUT (DEC. 11) EFE - Two pro-Iranian guerrillas were wounded Tuesday when Israeli helicopter gunships strafed guerrilla bases with heavy machine-gun fire in eastern Lebanon, police said.

The helicopters attacked Hezbollah (Party of God) positions in the Bekaa valley, 50 km east of Beirut.

All Palestinian and Lebanese militia groups in Bekaa declared a state of alert after four Israeli warplanes and a reconnaissance aircraft flew over the

valley.

The attack is the latest in a series of skirmishes which have left six Israeli soldiers and 31 Lebanese or Palestinians dead in southern Lebanon in recent weeks.

The Bekaa valley is near Israel's self-declared security zone where most of the clashes have occurred.

The Israelis set up the 15-km-wide buffer enclave in 1985 to prevent guerrillas from reaching the border.

Arab sources say Israel has been concentrating its troops in the region to face the build-up of Lebanese militias, as well as Palestinian guerrillas.

Hezbollah and Syrian-backed Amal groups moved into the region after agreeing an accord with the Lebanese government for all militiamen to move out of Beirut.

#90345e0042 12/11/1990 ~Latin America New Agency

PRAGUE (DEC. 11) EFE - A U.S. Air Force C-5 transport plane flew Czech military chemical warfare specialists to the Gulf Tuesday, the first Eastern European troops to be deployed in the region, Czech authorities said.

The soldiers belonging to Czechoslovakia's anti-chemical warfare unit left for Saudi Arabia where they will train Saudis.

The first contingent of a 170-strong deployment, the troops are going at the invitation and expense of the Saudi government.

The detachment, whose transport planes will refuel at the U.S. Air Force base at Torrejon, Spain, is made up of three platoons of anti-chemical warfare experts, a medical team, and service and maintenance personnel.

The troops, described as "volunteers" by the commander of the expedition, Col. Jan Valo, are not expected to enter combat.

Instead they will instruct Saudi soldiers and civilians in basic methods of defense against a possible chemical weapons attack by Iraq.

TEHRAN (DEC. 11) EFE - An Ird for killing British author Salman Rushdie, days after Rushdie made his first public appearance since the late Ayatollah Ruhollah Khomeini sentenced him to death almost two years ago.

"There is still a price on Rushdie's head", the Fifteenth of Khordad Foundation said in an announcement published in Tehran newspapers.

It said it would still pay 200 million riales (more than dlrs three million) to any Iranian who killed Rushdie, or dlrs one million to any non-Iranian who killed the author.

The foundation noted that Khomeini's successor as Iranian spiritual leader, Ayatollah Ali Khamenei, in February ratified the death sentence against Rushdie.

In February, 1989, Khomeini called on Moslems to kill Rushdie to punish him for writing the book "The Satanic Verses", which the ayatollah said was blasphemous to Islam.

Rushdie went into hiding, and reappeared in public only days ago when he signed copies of his latest work, a collection of children's tales, at a London bookstore.

Britain's refusal to condemn Rushdie led Tehran to break diplomatic relations with London in March, 1989. The two countries restored diplomatic ties in September this year.

#90345f0491 12/11/1990 ~United Press International

CHICAGO (DEC. 11) UPI - Grain and soybean futures were mixed at the close Tuesday on the Chicago Board of Trade. The activity was choppy ahead of the supply and demand report scheduled for release later in the day.

Corn was moderately higher on a pick-up in export business. There were rumors that South Korea, Taiwan and Mexico were in the market for as much as 300,000 tons of corn.

December wheat was firm on news that China had been offered 1.5 million tons of export bonus wheat and the overnite sale of 100,000 tons to Algeria. However, the rest of the wheat was lower on positioning ahead of the USDA report.

Soybeans were narrowly mixed in quiet trading. Interior and Gulf basis levels were mixed early today.

At the close, corn was up 1/2 to 1 1/2, soybeans down 1 1/4 to up 2 1/4, wheat up 1 1/4 to off 1 1/2 and oats up 1/2 to down 1/2.

LAGOS (DEC. 11) XINHUA - NIGERIAN PRESIDENT IBRAHIM BABANGIDA LEFT HERE TODAY FOR A THREE-DAY STATE VISIT TO EQUA- TORIAL GUINEA.

DURING HIS VISIT, THE FIRST TO THE COUNTRY SINCE THE NIGERIAN PRESIDENT CAME TO POWER IN 1985, BABANGIDA IS EXPECTED TO HOLD TALKS WITH EQUATORIAL GUINEAN LEADER NGUEMA MBASOGO, WHICH WILL FOCUS ON THE PROMOTION OF ECONOMIC AND TRADE COOPERATION BETWEEN THE TWO COUNTRIES, PARTICULARLY IN THE AREAS OF AGRICULTURE, TELECOMMUNICATIONS AND OIL EXPLORATION.

NIGERIA'S ASSISTANCE TO EQUATORIAL GUINEA IN THE LAST FEW YEARS INCLUDED A 52-BED POLYCLINIC, A MODEL NIGERIAN SCHOOL, VARIOUS AGRICULTURAL VENTURES AND A CREDIT LINE OF MORE THAN ONE MILLION DOLLARS.

#90345h0038 12/11/1990 ~Chinese News Agency

GABORONE (DEC. 11) XINHUA - THE AFRICAN NATIONAL CONGRESS (ANC) WILL OPEN FRIDAY ITS FIRST CONFERENCE INSIDE SOUTH AFRICA SINCE IT WAS BANNED IN 1961 AND ABOUT 1,600 DELEGATES FROM 36 COUNTRIES ARE EXPECTED TO ATTEND THE MEETING.

ANC PRESIDENT OLIVER TAMBO WILL DELIVER THE OPENING ADDRESS TO THE CONFERENCE ON FRIDAY MORNING, AFTER WHICH DEPUTY PRESIDENT NELSON MANDELA WILL MAKE A POLITICAL STATEMENT.

THE CONFERENCE, WHICH WILL BE HELD AT NASREC, SOUTH OF JOHANNE- SBURG, WILL GO INTO CLOSED-DOOR SESSION UNTIL THE CLOSING CEREMONY AT MID-DAY ON SUNDAY.

MR. TAMBO IS TO RETURN TO SOUTH AFRICA THURSDAY MORNING FOR THE FIRST TIME SINCE HE WENT INTO EXILE IN 1960.

OBSERVERS FROM THE SOUTH AFRICAN COMMUNIST PARTY (SACP), THE CONGRESS OF SOUTH AFRICAN TRADE UNIONS (COSATU) AND THE UNITED DEMOCRATIC FRONT (UDF) WILL JOIN THE ANC DELEGATES IN DISCUSS- IONS ON SIX TOPICS: NEGOTIATIONS AND THE ARMED STRUGGLE, STRAT- EGY AND TACTICS OF THE ANC, VIOLENCE, BUILDING ORGANISATION, INT- ERNATIONAL ISOLATION, PROGRAM OF ACTION FOR 1991.

THE ANC HAS TERMED THE CONFERENCE A "CONSULTATIVE CONFERENCE" AND POSTPONED ITS FIRST NATIONAL CONFERENCE SINCE BEING BANNED, TO THE MIDDLE OF NEXT YEAR.

THE LAST CONSULTATIVE CONFERENCE WAS HELD IN KABWE, ZAMBIA, IN 1985. MR. TAMBO AND MR. MANDELA WILL ADDRESS A RALLY IN A FOOTBALL STADIUM NEAR SOWETO ON SUNDAY AFTERNOON ON THE OUTCOME OF THE CONFERENCE.

#90345h0039 12/11/1990 ~Chinese News Agency

GABORONE (DEC. 11) XINHUA - SOUTH AFRICA'S FEAR OF MASSIVE MAIZE AND WHEAT CROP FAILURES HAS NOW MATERIALISED AS THE WORST DROUGHT IN 60 YEARS CONTINUES TO BLIGHT THE COUNTRY, "THE STAR" NEWSPAPER OF SOUTH AFRICA REPORTED TODAY.

AGRICULTURAL SCIENTISTS IN SOUTH AFRICA BELIEVE THE LACK OF RAIN HAS RESULTED IN WORM DAMAGE.

UNLESS CONSISTENT AND SOAKING RAINS FALL THIS MONTH, THE HARVEST MAY BE HALF THAT OF LAST YEAR, AND SOUTH AFRICA WILL HAVE TO IMPORT, AT A COST OF MORE 1 BILLION RAND (ABOUT 0.4 BILLION U.S. DOLLARS), AT LEAST THREE MILLION TONS OF MAIZE, SAID THE PAPER.

THE PAPER SAID THAT ALL MAIZE EXPORTS HAVE BEEN STOPPED IN ORDER TO MEET DOMESTIC REQUIREMENTS BY THE SOUTH AFRICAN GOVERNMENT.

A SIMILAR SITUATION EXISTS IN THE COUNTRY IN REGARD TO THE WHEAT HARVEST, WHICH WAS OFFICIALLY ESTIMATED AT THE WEEKEND TO BE NO MORE THAN 1.9 MILLION TONS, A SHORTFALL OF 500,000 TONS ON DOMESTIC CONSUMPTION.

ONLY 50 PERCENT OF PLANTING HAS SO FAR TAKEN PLACE ON NORTHERN NATAL FARMS, 70 PERCENT IN THE EASTERN TRANSVAAL, 10 PERCENT IN THE FAR WESTERN TRANSVAAL AND

NORTHWEST FREE STATE, AND ALMOST NOTHING IN SOME OTHER AREAS OF THE PROVINCES.

#90345h0040 12/11/1990 ~Chinese News Agency

BUCHAREST (DEC. 11) XINHUA - ROMANIAN PRESIDENT ION ILIESCU TODAY AGREED TO MEDIATE BETWEEN THE GOVERNMENT AND UNION LEADERS IN AN EFFORT TO STAVE OFF A GENERAL STRIKE.

AFTER MEETING PRESIDENT ILIESCU THIS MORNING, LEADERS OF THE NATIONWIDE FRATIA LABOR CONFEDERATION ANNOUNCED THEY WILL HAVE A ROUND-TABLE MEETING WITH THE GOVERNMENT TOMORROW TOGETHER WITH OTHER UNIONS TO SOLVE PROBLEMS WHICH HAVE INCREASED TENSIONS AROUND BUCHAREST.

THE FRATIA LABOR CONFEDERATION AND THE DRIVERS' UNION HELD A RALLY THIS AFTERNOON IN THE CAPITAL'S HUGE AVIATORS' SQUARE AND DECLARED THE BEGINNING OF A DRIVERS' STRIKE.

DEMONSTRATORS DEMANDED THE RESIGNATION OF THE GOVERNMENT. UNION LEADERS THREATENED THAT IF NO AGREEMENT WAS REACHED TOMORROW BETWEEN GOVERNMENT AND THE UNIONS, THEY WILL CALL FOR A NATION-WIDE DRIVERS' STRIKE.

MEANWHILE,THE GOVERNMENT HELD SEVEN HOURS OF TALKS WITH THE ROMANIAN FREE TRADE UNION NATIONAL FEDERATION, ANOTHER LARGE TRADE UNION IN THE COUNTRY.

THE TWO SIDES REACHED A 15-POINT AGREEMENT, WHICH INCLUDES ALLOWING THE TRADE UNION TO JOIN THE INVESTIGATION TEAM LOOKING INTO ABUSE OF POWER AND CORRUPTION WITHIN THE GOVERNMENT, DISCUSSIONS TO ENSURE SOCIAL PROTECTION, AND MEASURES TO BE TAKEN BY THE GOVERNMENT TO CURB PRICE HIKES.

BEIJING (DEC. 11) XINHUA - CHINA EARNED 260 MILLION U.S. DOLLARS FROM TOBACCO EXPORTS IN THE FIRST TEN MONTHS THIS YEAR -- 62.5 PERCENT ABOVE THE QUOTA AND AN ALL-TIME RECORD.

AS A RESULT OF IMPORTED ADVANCED TECHNOLOGY AND EQUIPMENT AND BETTER QUALITY CONTROL OF TOBACCO AND CIGARETTES, THE COUNTRY'S EXPORT VOLUME OF CIGARETTES DURING THE PERIOD SURPASSED THE TOTAL EXPORT VOLUME OF THE PAST FIVE YEARS.

STATISTICS SHOW THAT THE COUNTRY'S EARNINGS FROM TOBACCO EXPORTS IN THE FIRST 10 MONTHS THIS YEAR WERE FOUR TIMES GREATER THAN IN 1985.

LAGOS (DEC. 11) XINHUA - WORKERS OF THE NIGERIAN RAILWAY CORPORATION HAVE

THREATENED TO GO ON A NATIONWIDE STRIKE IF THE GOVERNMENT FAILS TO MEET THEIR DEMAND FOR MEAL SUBSIDY, THE NEWSPAPER "NATIONAL CONCORD" SAID TODAY9

THE PAPER SAID THE NIGERIAN UNION OF RAILWAYMEN (NUR) HAS ISSUED A 14-DAY ULTIMATUM TO THE MANAGEMENT OF THE CORPORATION ASKING FOR PAYMENT OF WORKERS' MEAL SUBSIDY APPROVED BY THE FEDERAL GOVERNMENT TWO YEARS AGO.

SOURCES HERE SAID THAT THE POSSIBLE STRIKE ACTION BY THE UNION, WHOSE MEMBERS FORM THE BULK OF THE CORPORATION'S WORKFORCE, MAY HIT THE NATION'S ECONOMY AND AFFECT RAILWAY TRANSPORT DURING THE CHRISTMAS PERIOD.

NEW DELHI (DEC. 11) XINHUA - HALF OF HOUSEHOLDS IN INDIA FALL IN THE CATEGORY OF BELOW POVERTY, ACCORDING TO A LATEST STUDY PUBLISHED BY THE PRESS TRUST OF INDIA TODAY.

THE STUDY, CONDUCTED BY THE OPERATIONS RESEARCH GROUP (ORG), SHOWS THAT 61 PERCENT OF HOUSEHOLDS IN RURAL INDIA FALL UNDER "BELOW POVERTY CATEGORY" AGAINST THE NATIONAL AVERAGE OF LITTLE OVER 50 PERCENT.

TWO-THIRDS HOUSEHOLDS IN VILLAGES WITH POPULATION BELOW 1,000 HAVE MONTHLY INCOME LESS THAN 750 RUPEES (41.6 U.S. DOLLARS) AS AGAINST 16.1 PERCENT IN THE CASE OF CITIES WITH POPULATION OVER ONE MILLION.

IN FACT, 27.5 PERCENT OF HOUSEHOLDS IN RURAL INDIA IN 1990 CONTINUE TO BE THE POOREST OF THE POOR WITH A MONTHLY INCOME OF LESS THAN 350 RUPEES, WHILE ONLY 3.4 PERCENT OF HOUSEHOLDS IN RURAL INDIA HAVE A MONTHLY INCOME EXCEEDING 2,500 RUPEES (138.8 U.S. DOLLARS).

THE CORRESPONDING FIGURE IN CASE OF URBAN AREAS IS 17.1 PERCENT. ONLY 6 PERCENT OF HOUSEHOLDS IN URBAN INDIA HAVE A MONTHLY INCOME OF OVER 4,000 RUPEES (222 U.S. DOLLARS).

ACCORDING TO THE STUDY, THE CASE IS WORST IN THE EAST ZONE COMPRISING OF BIHAR WEST BENGAL, ORISSA AND ASSAM STATES, WHERE THE PERCENTAGE OF HOUSEHOLDS FALLING BELOW POVERTY IS 63 PERCENT.

THE STUDY WAS BASED ON A SAMPLE SURVEY COVERING OVER 83,000 HOUSEHOLDS SPREAD ACROSS THE COUNTRY, THE PRESS TRUST OF INDIA SAID.

KATHMANDU (DEC. 11) XINHUA - NEPALESE INDUSTRY AND COMMERCE MINISTER SAHANA PRADHAN CALLED HERE TODAY FOR A CAMPAIGN TO TREAT AND REHABILITATE LEPROSY PATIENTS IN THE KINGDOM.

SHE MADE THE CALL WHILE INAUGURATING A NATIONAL WORKSHOP FOR THE PREPARATION OF A PLAN OF ACTION FOR THE LEPROSY CONTROL PROGRAM WHICH WAS ATTENDED BY REGIONAL HEALTH DIRECTORS AND DISTRICT REPRESENTATIVES.

THERE ARE AN ESTIMATED 100,000 LEPROSY POSITIVE PEOPLE IN THE COUNTRY, AVERAGING ABOUT SEVEN PER 1,000 POPULATION. SOME 70,000 LEPERS HAVE REGISTERED WITH THE HEALTH MINISTRY.

LEPROSY IS NOT JUST A PHYSICAL DISEASE BUT ALSO CARRIES SOCIAL STIGMA. EVEN AMONG THE EDUCATED THE TENDENCY IS TO HIDE IT AND SEEK TREATMENT ONLY WHEN A STAGE OF PHYSICAL DEFORMITY IS REACHED, THE MINISTER NOTED.

"WHAT IS NEEDED THEREFORE IS A CHANGE IN POPULAR ATTITUDE THAT WILL MAKE TIMELY TREATMENT EASIER, THEREBY AVOIDING THE SORRY CYCLE OF DISFIGUREMENT, SOCIAL BOYCOTT AND IN THE END DESTITUTION AND BEGGING IN THE STREETS," SHE ADDED.

THE SEMINAR WILL REVIEW THE STATE OF LEPROSY ERADICATION AND TREATMENT, AND FOCUS ON FUTURE PROGRAMS AND THE ROLE OF GOVERNMENTAL AND NON-GOVERNMENTAL ORGANIZATIONS.

#90345h0071 12/11/1990 ~Chinese News Agency

BEIJING (DEC. 11) XINHUA - MR TAO, WHO IS 87 YEARS OLD, SAYS HE IS QUITE CONTENT NOW THAT HE HAS MOVED INTO ONE OF BEIJING'S NEW CARE CENTERS FOR THE ELDERLY.

THE CARE CENTER, LOCATED IN THE CITY'S CHAOYANG DISTRICT, IS ONE OF 12 SET UP IN BEIJING IN THE PAST TWO YEARS. THEY ARE DIFFERENT FROM THE "HOMES FOR THE AGED", WHICH RECEIVE ONLY CHILDLESS OLD PERSONS.

THE CARE CENTER IS A ONE-STORY HOUSE WITH SIX ROOMS. THERE IS A TV ROOM, A CLINIC AND A KITCHEN. THE NINE OLD PEOPLE ACCEPTED ARE ALL OVER 70 YEARS OLD AND A STAFF OF FOUR LOOKS AFTER THEM.

TAO SAID, "I CAN TALK TO MY FRIENDS HERE AND IT'S CONVENIENT TO GO OUT FOR WALKS. WE GET ALONG VERY WELL, JUST LIKE A FAMILY."

HE CONTINUED, "BEFORE I CAME HERE, MY CHILDREN WORRIED ABOUT ME STAYING ALONE AT HOME WHILE THEY WERE WORKING. NOW THEY CAN RELAX, BUT I ALWAYS GO TO SEE THEM AT WEEKENDS."

THESE CARE CENTERS WERE SET UP BY THE MUNICIPAL GOVERNMENT'S SUBDISTRICT OFFICES OR THEIR SUBORDINATE NEIGHBORHOOD COMMITTEES TO ALLEVIATE THE PROBLEM OF WORKING FAMILIES WITH ELDERLY PARENTS WHOM THEY HAVE TO LEAVE ALONE DURING THE DAYTIME.

DU RUNFANG, HEAD OF THE SANLITUN CARE CENTER, SAID, "SIX MONTHS AGO THE NEIGHBORHOOD COMMITTEE BUILT THIS CENTER WITH THE PROFITS MADE FROM RUNNING A SMALL HOTEL AND A RESTAURANT. THE STAFF ARE PAID BY THE COMMITTEE."

SHE EXPLAINED THAT THE OLD PEOPLE PAY 150 YUAN (ABOUT 30 U.S. DOLLARS) A MONTH FOR ROOM AND BOARD.

ACCORDING TO STATISTICS FROM THE BEIJING COMMISSION ON AGEING, THE CITY HAS 1.17 MILLION PEOPLE OVER 60 YEARS OLD, ACCOUNTING FOR 11 PERCENT OF THE CITY'S POPULATION.

BESIDES THE 12 CARE CENTERS FOR THE ELDERLY, 300 "HOMES FOR THE AGED", 30 GERIATRIC HOSPITALS, 24 UNIVERSITIES OR SCHOOLS AND 2,000 RECREATION CENTERS FOR SENIOR CITIZENS HAVE BEEN SET UP IN BEIJING DURING THE PAST FEW YEARS, AND MORE ARE PLANNED.

#90345h0072 12/11/1990 ~Chinese News Agency
BRUSSELS (DEC. 11) XINHUA - AGRICULTURE MINISTERS FROM THE 12 NATIONS OF THE EUROPEAN COMMUNITY (EC) REACHED AN AGREEMENT HERE TODAY FOR QUARANTINE PROCEDURES FOR LIVESTOCK PRODUCTS COMING FROM NON-EC MEMBERS AFTER THE SINGLE EUROPEAN MARKET IS ESTABLISHED IN 1992.

ACCORDING TO INSTRUCTIONS AGREED UPON BY THE MINISTERS, BEGINNING ON JANUARY 1 1993, THE 12 EC MEMBER NATIONS WILL PRACTISE A STANDARDIZED PROCEDURE FOR INSPECTING LIVESTOCK. PRODUCTS EXPORTED BY NON-EC MEMBERS TO THE EC MAY CIRCULATE FREELY ONLY AFTER THEY GO THROUGH A STANDARD INSPECTION PROCEDURE.

THE NEW RULES SUPPLEMENT ONES PASSED LAST YEAR BY THE EC WHICH ELIMINATED QUARANTINES BETWEEN THE PRODUCTS OF MEMBER COUNTRIES.

COORDINATING THE QUARANTINE STANDARDS AMONG EC MEMBERS IS A STEP TOWARD THE ESTABLISHMENT OF A SINGLE MARKET IN EUROPE.

#90345h0073 12/11/1990 ~Chinese News Agency
LHASA (DEC. 11) XINHUA - A 177.9 KILOMETER SECTION OF HIGHWAY LINKING CHINA WITH NEIGHBORING NEPAL OPENED TO TRAFFIC IN TIBET TODAY.

THE SECTION BEGINS IN QUXU COUNTY, NEAR THE CAPITAL CITY OF LHASA, AND ENDS IN DAZHU COUNTY NEAR XIGAZE, A LEADING INDUSTRIAL CENTER IN THE REGION.

COMPARED TO THE CIRCUITOUS HIGHWAY BUILT IN THIS AREA IN THE 1960S, THE NEW ROUTE HAS REDUCED THE HIGHWAY DISTANCE BY 100 KILOMETERS.

CONSTRUCTION OF THE NEW HIGHWAY REQUIRED FOUR YEARS AND AN INVESTMENT OF 100 MILLION YUAN, SAID A PROJECT OFFICIAL.

EXPERTS SAY THAT CONSTRUCTION OF THE HIGHWAY IN TIBET, A REGION WITH A VERY COMPLICATED GEOLOGICAL STRUCTURE, IS A BREAKTHROUGH IN THE HISTORY OF CHINA'S ROAD CONSTRUCTION.

THE HIGHWAY WILL MAKE IT POSSIBLE FOR VISITORS TO DRIVE FROM LHASA TO XIGAZE IN JUST FOUR HOURS, A QUITE REMARKABLE ACHIEVEMENT CONSIDERING THAT IN 1952 THE 10TH PANCHEN, ERDINI QOIGYI GYAINCAIN, SPENT 26 DAYS ON A TOUR FROM THE XIGAZE BASED ZHAXI LHUNBO LAMASERY TO LHASA.

RIO DE JANEIRO (DEC. 11) XINHUA - BRAZIL HOPES TO SIGNIFICANTLY INCREASE

BILATERAL TRADE FOLLOWING THE VISIT HERE OF AN ECONOMIC AND COMMERCIAL MISSION FROM IRAN.

THE LOCAL PRESS REPORTED TODAY THAT DURING BRAZILIAN INFRASTRUCTURE MINISTER OZIRES SILVA'S VISIT TO IRAN LAST MONTH, THE IRANI GOVERNMENT MADE A COMMITMENT TO PURCHASE 12 BILLION U.S. DOLLARS WORTH OF BRAZILIAN PRODUCTS OVER THE NEXT FIVE YEARS.

IRANI PETROLEUM VICE-MINISTER FOR ECONOMIC AND COMMERCIAL MEHDI KARBASSIAN ARRIVED IN BRAZIL MONDAY TO SIGN THE TRADE AGREEMENTS. THE IRANI ARE INTERESTED IN BRAZILIAN EQUIPMENTS FOR OIL EXPLORATION, TAPPING AND REFINING, IN THE STEEL AND METAL INDUSTRIES AND IN BRAZILIAN SUGAR CANE PROCESSING TECHNOLOGY.

IRAN IS BRAZIL'S THIRD OIL SUPPLIER, AND ITS CHOOSING OF THE SOUTH AMERICAN COUNTRY AS A PARTNER FOR ITS NATIONAL RECONSTRUCTION PROGRAM HAS CAUSED GREAT EXPECTATIONS HERE SINCE IRAN WILL NEED PLENTY OF EQUIPMENT AND TECHNOLOGY, ESPECIALLY FOR OFFSHORE PETROLEUM EXPLORATION AND TAPPING.

#90345h0090 12/11/1990 ~Chinese News Agency

PANAMA CITY (DEC. 11) XINHUA - THE GUATEMALAN FOREIGN MINISTRY TODAY REQUESTED THE PANAMANIAN AUTHORITIES TO GIVE SAFEGUARD TO THREE PANAMANIAN OFFICERS WHO HAVE SOUGHT THE PROTECTION OF THE GUATEMALAN GOVERNMENT.

CAPTAIN RAFAEL JURADO AND SUB-LIEUTENANTS CARLOS ALBERTO RUMBO AND DARIO CABEZAS WERE INVOLVED IN THE RECENT REBELLION HEADED BY FORMER CHIEF OF POLICE EDUARDO HERRERA AGAINST PRESIDENT ENDARA'S GOVERNMENT.

GUATEMALAN FOREIGN MINISTER ARIEL RIVERA INFORMED HERE TODAY THAT THE THREE PANAMANIAN OFFICERS WHO SOUGHT ASYLUM IN THE GUATEMALAN EMABSSY IN PANAMA ON DECEMBER 7 COULD PROCEED TO GUATEMALA OR TO ANOTHER COUNTRY OF THEIR CHOOSING.

HOWEVER, THE PANAMANIAN FOREIGN MINISTRY HAS NOT YET STATED ITS DECISION ON THE SAFEGUARD REQUEST.

ACCORDING TO OFFICIAL SOURCES, THE FOREIGN AFFAIRS MINSITRY WILL ASK THE PROCURATOR GENERAL'S OFFICE AND THE INTERIOR AND JUSTICE MINISTRY FOR A REPORT ON THE SITUATION OF THE REBEL POLICE OFFICERS.

#90345h0106 12/11/1990 ~Chinese News Agency

LAGOS (DEC. 11) XINHUA - MORE THAN 165,000 NIGERIANS HAVE BEEN KILLED IN ROAD ACCIDENTS IN THE COUNTRY DURING THE PAST 30 YEARS, THE NIGERIAN FEDERAL ROAD SAFETY COMMISSION HAS ANNOUNCED.

OPENING THE SECOND NATIONAL ROAD SAFETY WEEK IN MINNA YESTERDAY, A HIGH OFFICIAL OF THE COMMISSION, MR. AYODEJI OYEDOKUN, ALSO SAID THAT 560,000 OTHER NIGERIANS WERE INJURED IN ROAD ACCIDENTS NATIONWIDE IN THE SAME PERIOD.

HE DESCRIBED THE HIGH RATE OF DEATHS AND INJURY AS ALARMING, CALLING FOR CO-OPERATION OF ALL NIGERIANS TO REDUCE THE RATE.

HIGHLIGHTS OF ACTIVITIES MARKING THE SAFETY WEEK INCLUDE PUBLIC EDUCATION ON THE NEED TO MAINTAIN VEHICLES PROPERLY, VEHICLE INSPECTION ON HIGHWAYS AND IMPOUNDING UNWORTHY VEHICLES.

THE FIRST ROAD SAFETY WEEK WAS HELD LATE LAST YEAR WITH THE THEME "PHYSICAL AND MENTAL ALERTNESS FOR ROAD SURVIVAL."

HANOI (DEC. 11) KYODO - PREMIER HUN SEN OF CAMBODIA'S VIETNAM-BACKED GOVERNMENT ON TUESDAY MADE AN UNOFFICIAL VISIT TO HANOI, INFORMED SOURCES IN HANOI SAID.

IT WAS NOT IMMEDIATELY KNOWN HOW LONG HUN SEN WILL STAY IN HANOI. HE IS LIKELY TO HAVE TALKS WITH VIETNAMESE PREMIER DO MUOI AND OTHER NATIONAL LEADERS DURING HIS STAY IN THE VIETNAMESE CAPITAL, OBSERVERS SAID. THE SOURCES SAID HE CAME TO HANOI TO RECEIVE A MASTER'S DEGREE FOR HIS THESIS IN PHILOSOPHY IN A CEREMONY AT AN INSTITUTION OF HIGHER EDUCATION.

CHINESE PREMIER LI PENG IS SCHEDULED TO VISIT LAOS ON SATURDAY, THE FIRST VISIT TO LAOS BY A TOP-LEVEL CHINESE LEADER SINCE CHINA INVADED VIETNAM IN FEBRUARY 1979.

OBSERVERS IN HANOI SAID PREMIER LI MAY POSSIBLY HAVE TALKS WITH VIETNAMESE PREMIER DO MUOI IN VIENTIANE.

THE OBSERVERS SAID THAT THE MAIN PURPOSE OF HUN SEN'S SURPRISE VISIT TO HANOI MAY BE TO DISCUSS THE THORNY ISSUE OF THE CHAIRMANSHIP OF AN INTERIM SUPREME NATIONAL COUNCIL (SNC) BY THE FOUR RIVAL CAMBODIAN FACTIONS PRIOR TO LI PENG'S SCHEDULED VISIT TO VIENTIANE.

THE FOUR WARRING FACTIONS HAVE BEEN DEADLOCKED OVER THE QUESTION OF ADDING A CHAIRMAN TO THE ORIGINAL 12-MEMBER FORMULA IN FORMING THE SUPREME NATIONAL COUNCIL.

TOKYO (DEC. 11) KYODO - IDEMITSU PETROCHEMICAL CO. SAID TUESDAY IT WILL INVEST ABOUT 5 BILLION YEN TO EXPAND A PETROCHEMICAL FACTORY IN JOHOR,

MALAYSIA, TO MEET GROWING DEMAND FOR POLYSTYRENE IN THE COUNTRY.

THE COMPANY SAID THE EXPANSION PROGRAM, TO BE UNDERTAKEN BY ITS AFFILIATE PETROCHEMICALS MALAYSIA SDN BHD, CALLS FOR CONSTRUCTION OF A FACILITY WITH 60,000 TONS OF POLYSTYRENE A YEAR.

THE NEW FACTORY WILL START OPERATING IN DECEMBER 1992. COMPANY OFFICIALS SAID DEMAND FOR THE CHEMICAL HAS SOARED AS A RESULT OF SWIFT DEVELOPMENT OF THE DOMESTIC HOME APPLIANCES INDUSTRY.

THE CHEMICAL IS USED FOR THE EXTERIOR OF TELEVISION SETS AND RADIO CASSETTES, THE OFFICIALS SAID.

POLYSTYRENE PRODUCTION CAPACITY IN MALAYSIA NOW IS ESTIMATED AT 36,000 TONS, WITH PETROCHEMICALS MALAYSIA ACCOUNTING FOR 30,000 TONS.

DEMAND FOR POLYSTYRENE IN THE COUNTRY IS EXPECTED TO GROW TO 70,000 TONS A YEAR BY THE TIME THE NEW PLANT STARTS OPERATION, THE OFFICIALS SAID.

PETROCHEMICALS MALAYSIA, ESTABLISHED IN 1972, IS 49 PERCENT OWNED BY IDEMITSU AND SUMITOMO CORP., AND 51 PERCENT BY MALAYSIAN PARTNERS.

TOKYO (DEC. 11) KYODO - TWO MAJOR JAPANESE FOOD PROCESSING FIRMS SAID TUESDAY THEY WILL SOON START EXPORTING INSTANT CUP NOODLES TO THE SOVIET UNION AND EAST EUROPEAN COUNTRIES.

BOTH COMPANIES SAID THEY REGARD THE SOCIALIST NATIONS AS A PROMISING MARKET IN THE FUTURE.

TOYO SUISAN KAISHA LTD. SAID THE INITIAL CONSIGNMENT OF 200,000 PACKS OF CUP NOODLE MANUFACTURED BY ITS U.S. SUBSIDIARY MARUCHAN INC. OF LOS ANGELES WILL BE SHIPPED TO THE SOVIET UNION AND EAST EUROPEAN COUNTRIES BEFORE THE YEAR-END.

SHIPMENTS WILL BE CONTINUED NEXT YEAR AND THE VOLUME RAISED TO 15 MILLION PACKS IN 1992, THE COMPANY SAID.

THE COMPANY ALSO SAID IT PLANS TO EXPAND PRODUCTION LINES AT THE U.S. SUBSIDIARY IN THE FUTURE TO INCREASE EXPORTS TO THE SOVIET UNION TO ABOUT 80 MILLION PACKS.

NISSIN FOOD PRODUCTS CO. SAID ITS JOINT VENTURE IN INDIA WILL HANDLE EXPORTS TO THE SOVIET UNION AND EAST EUROPEAN COUNTRIES, STARTING EARLY NEXT YEAR.

THE VENTURE, INDO NISSIN FOOD, ESTABLISHED IN 1989, WILL USE SALES OUTLETS OF ITS PARTNER, BRITISH TEA MAKER BROOK BOND GROUP PLC, THE COMPANY SAID.

THE COMPANY SAID IT PLANS TO EXPORT FIVE MILLION PACKS IN THE INITIAL YEAR WITH THE VOLUME BOOSTED TO 10 MILLION PACKS IN THE NEAR FUTURE.

INSTANT NOODLE, KNOWN AS RAMEN, HAS GAINED POPULARITY OVERSEAS. ITS ANNUAL SALES IN JAPAN AMOUNT TO ABOUT 4.6 BILLION PACKS.

#90345k0093 12/11/1990 ~Japanese News Agency

TOKYO (DEC. 11) KYODO - RULING LIBERAL DEMOCRATIC PARTY (LDP) SECRETARY GENERAL ICHIRO OZAWA MAY MEET PRIME MINISTER TOSHIKI KAIFU THIS WEEK TO DISCUSS A POSSIBLE CABINET RESHUFFLE, PARTY SOURCES SAID TUESDAY.

OZAWA MET TUESDAY WITH OFFICIALS OF THE FIVE LDP FACTIONS AT THE PARTY'S HEADQUARTERS AND HEARD THEIR VIEWS REGARDING THE NEED FOR CHANGES IN THE CABINET LINEUP.

OZAWA TOLD FACTION OFFICIALS THAT HE PLANS TO MEET THE PRIME MINISTER IN THE NEAR FUTURE AND WILL CONVEY THEIR SENTIMENTS AT THAT TIME. HE ADDED KAIFU IS EAGER TO TACKLE PENDING DOMESTIC AND INTERNATIONAL ISSUES, LDP SOURCES SAID.

KOZO WATANABE FROM THE FACTION LED BY FORMER PRIME MINISTER NOBORU TAKESHITA, HIROSHI MITSUZUKA OF FORMER FOREIGN MINISTER SHINTARO ABE'S FACTION AND TOSHIO YAMAGUCHI OF FORMER FINANCE MINISTER MICHIO WATANABE'S FACTION WERE AMONG THOSE WHO MET OZAWA. THE THREE REITERATED THEIR BELIEF THAT A CONSENSUS EXISTS WITHIN THE PARTY REGARDING THE NEED FOR A CABINET RESHUFFLE BEFORE THE YEAR IS OUT. THEY ALSO RECOMMENDED THAT CHANGES BE MADE IN OTHER PARTY POSTS, LDP SOURCES SAID.

SHIGERU KASUYA, REPRESENTATIVE OF THE FACTION LED BY FORMER DEPUTY PRIME MINISTER KIICHI MIYAZAWA, WHICH HAS BEEN CAUTIOUS ON THE TOPIC, TOLD OZAWA THE FACTION WOULD FOLLOW THE MAJORITY'S OPINION.

FACTION OFFICIALS SAID THEY EXPECT OZAWA TO MEET KAIFU DECEMBER 17 OR 18, WHEN THE SUPPLEMENTARY NATIONAL BUDGET BILL IS LIKELY TO PASS THE DIET. BUT A SENIOR LDP OFFICIAL INDICATED THE MEETING COULD TAKE PLACE THIS WEEK IF OZAWA DEEMS IT NECESSARY.

REPRESENTATIVE TETSUO KONDO OF THE SMALL FACTION LED BY FORMER STATE MINISTER TOSHIO KOMOTO, TO WHICH KAIFU BELONGS, SAID THE DECISION REGARDING A CABINET RESHUFFLE SHOULD BE LEFT SOLELY TO THE PRIME MINISTER.

#90345k0105 12/11/1990 ~Japanese News Agency

KARACHI, PAKISTAN (DEC. 12) KYODO - PAKISTAN'S PRIME MINISTER NAWAZ SHARIF DECLARED AT A MAMMOTH PUBLIC MEETING IN THE PORT CITY OF KARACHI ON TUESDAY THAT PAKISTAN IS READY TO PAY ANY PRICE FOR ITS NUCLEAR PROGRAM AND WILL NEVER YIELD TO PRESSURE TO DISCONTINUE THE PROGRAM.

THE DECLARATION WAS LATEST IN A SERIES OF DENUNCIATIONS BY GOVERNMENT LEADERS DURING THE PAST WEEK OF THE SUSPENSION OF MILITARY AND ECONOMIC ASSISTANCE TO PAKISTAN BY THE UNITED STATES, WHICH SAID PAKISTAN IS ENGAGED IN THE MANUFACTURE OF A NUCLEAR DEVICE.

SHARIF TOLD THE MEETING THAT CERTAIN COUNTRIES HAVE OFFERED SIZABLE ECONOMIC AID TO PAKISTAN IF IT WOULD ACCEPT RESTRICTIONS ON ITS NUCLEAR PROGRAM, BUT THE GOVERNMENT HAS REJECTED THE OFFERS.

''WE WANT TO LIVE AS A SELF RESPECTING NATION. THE POLICY OF DEPENDING ON AID AND CHARITY SHOULD BE SHUNNED,'' HE SAID.

HE ASKED THE PEOPLE TO BE READY TO MAKE SACRIFICES AND LEAD SIMPLE AND AUSTERE LIVES.

PRESIDENT GHULAM ISHAQ KHAN HAD ALSO ASKED THE NATION MONDAY TO ''PUT SOME LEAD INTO THEIR KNEES TO STAND ON THEIR OWN FEET'' TO DO AWAY WITH THE AGONY OF LIVING ''AT THE MERCY OF SHIFTING MOODS AND CHANGING PRIORITIES OF THOSE WHO WERE SELDOM BOTHERED BY THE QUALMS OF CONSCIENCE IN DEMANDING THEIR POUND

OF FLESH.''

THE UNITED STATES WANTS PAKISTAN TO OPEN ALL ITS NUCLEAR FACILITIES TO INTERNATIONAL INSPECTION, BUT IT HAS REFUSED TO DO SO UNLESS INDIA ALSO AGREES TO DO THE SAME.

-30- 1617

#90345m0001 12/11/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (DEC. 11) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

IN THE NEWS:

The Nikkei posts its fifth straight gain, adding 172 points. ... In London the FTSE is up 6.5 points in the early afternoon. ... The rally continues in bonds - the long Treasury is up 4/32nds with the yield down to 8.11%. ... No trend is apparent in the dollar this morning. ... Crude oil is little changed at $27.83, off seven cents in overseas trading. ... LONE STAR INDUSTRIES filed bankruptcy proceedings yesterday. ... SECURITY PACIFIC CORP. in Los Angeles says it is setting aside $850 million to cover bad loans in a signal the problems hitting East Coast banks are showing up in California. ... AT&T easily lines up commitments for $6 billion in bank loans to finance its hostile bid for NCR. ... U.S. TRADE REPRESENTATIVE CARLA HILLS says there is only a 25% chance of reviving free-trade talks that collapsed last week. ... NORTHWEST AIRLINES announces plans to acquire 25% of HAWAIIAN AIRLINES as part of a $20 million deal that will let Northwest fly the Hawaiian carrier's Australian route. ... FORD says it is virtually eliminating rebates and low-interest financing, switching to dealer payments to help sell cars and trucks. claims pending against EAGLE-PICHER INDUSTRIES.

WHAT'S AHEAD:

By early 1992, "USA Today" will market its own line of casual wear. Parent company GANNET stock fell 1/4 on the news to 35 3/4.

FROM THE BULLS:

STEVEN SHOBIN at MERRILL-LYNCH says he feels "this interim bear market rally is still intact and healthy. ... The chance of a long- lasting collapse ... is minimal. Over time ... we are going to be very vulnerable, but not now." He looks for "a week or two of consolidation and then I think we'll rally into the early part of January and then I look for a little bit of a January correction, followed by a second wave on the upside." He sees more vulnerability after the end of the first quarter. "I think the longer term trend is still down, but the intermediate rally has more to go" -- perhaps to 2750 or 2800 on the Dow. (CNBC "Market Wrap-Up", 12/10)

FROM THE BEARS:

"I think we are in the midst of a bear market rally and they can be very confusing," says GAIL DUDACK of S.G. WARBURG & CO. "Bear market rallies are typically very dramatic. They have good breath. They typically have much better volume than what you had been seeing earlier in the bear market and they are great foolers." Ms. Dudack believes this rally has actually been rather weak. "One of the reasons I stay relatively negative on the market is that I think that it is pretty clear that we are in a recession and in a bear market, and I've never seen a cycle end where we've seen some of the key leadership stocks from the prior move - and I'm talking about the consumer growth sector - have such high relative P/E's relative to the market." Bear markets tend to narrow that spread and these consumer growth stocks will be the last ones to get in sync with the market. That needs to happen before the bear market ends, she says. (FNN "Midway Market Report", 12/10)

"There's another step down [for the market] that might take us closer to 2000 sometime in 1991," according to MERRILL LYNCH's ROBERT FARRELL. "I expect that you won't start a new bull market until the last half of the year." (FNN "Marketwrap", 12/10)

STOCK MARKET:

Expectations of lower interest rates are "going to continue to be favorable for both the equity market and also the bond market as well," says MARSHALL ACUFF of SMITH BARNEY. But he says the reason for lower rates, a weaker economy, will also cause some problems. "We're going to get some bumps along the way with disappointments in individual stocks," according to Acuff. He says his firm is buying selected cyclical stocks. (FNN "Marketwrap", 12/10)

"You hear a great deal of talk of the Fed easing monetary policy," says SURESH BHIRUD, chief market strategist for DEAN WITTER REYNOLDS, "but in the past week this market is starting to slow down dramatically and the rally has lost its momentum - particularly after IBM" fell 3 1/8 last Thursday on a weak earnings estimate. "Since then," he argues, "the perception is shifting that the Fed easing, even if there's some more, won't help because the economy is extremely weak and monetary growth is stagnant. Consequently, there'll be a great deal of focus on how bad earnings will be in the fourth quarter. What's changing is a shift back to fundamentals, how weak the economy is and how weak fourth-quarter corporate earnings could be." (NYT, 12/11)

"This continuing dichotomy between stocks and bonds is important in that it shows people as growing more fearful of corporate earnings problems during a recession," says MICHAEL METZ at OPPENHEIMER. PAUL KRONLOKKEN at PIPER JAFFRAY & HOPWOOD says, "I don't know exactly where the threshold is where a deep recession looms and bonds launch into a bull market while stocks are trashed. But we may be getting fairly close to that point." ("The Washington

Post", 12/11)

"Right now you're seeing the bright side of a weak economy, which is lower interest rates, and the glass most definitely looks half-full," says EDWARD KERSCHNER, chairman of the investment policy committee at PAINEWEBBER. "But by mid-January, you might see the darker side of a weak economy, which is weak earnings. At that point that same glass might look half-empty." Mr. Kerschner says the recent drop in rates has taken the interest-rate risk out of the stock market for the first time since the slide began in July. Neither short-term nor long-term rates are now so high as to make stocks unattractive. He cautions, however, that expectations for corporate profits are still too high and stocks remain vulnerable to earnings risk. He doesn't believe the bear market has hit bottom yet. (WSJ, 12/11)

ALAN BOND, portfolio manager for W.R. LAZARD & CO., is a bit cautious on the market at the moment expecting the sluggishness in the economy to continue for awhile longer. "As the volume starts to improve [and] we start seeing more stocks hitting new highs, fewer hitting new lows, there starts to be more interest in the stock market. That bodes very well for a goal of 2700 by year end." (CNBC "The Moneywheel", 12/10)

Stocks have been listless because "you have the possibility of lower interest rates, ... but on the other hand you have this situation in the Persian Gulf," according to HILDEGARD ZAGORSKI of PRUDENTIAL- BACHE SECURITIES INC. She says the market, with the exception of a few "shakeouts," should continue to move up, short-term, and in the longer-term will enter a trading range between 2450-3050. ("Investor's Daily", 12/11)

STOCK TIPS:

PRUDENTIAL-BACHE analyst RALPH ACOMPORA told his clients that in the near term they should take profits in APPLE COMPUTER, which has risen nearly 30% in the past month. Orders for Apple's personal computers have exceeded expectations, but the company's revenue might be curbed in the near future because it doesn't yet have the supply to meet the demand, says PRUDENTIAL-BACHE computer analyst RICK MARTIN. Mr. Martin says shares in the company will remain vulnerable in the short term, but he expects it to be "a great stock" during the next year. (WSJ, 12/11)

The primary trend in stocks will remain bearish but the Dow should launch a secondary rise by year's end, says GERALDINE WEISS at "Investment Quality Trends." A "trend running counter to the primary trend can last for many months, even years," says Weiss. She likes depressed retail stocks such as SEARS, K-MART and J.C. PENNY. Also on her undervalued list are EMERSON ELECTRIC and HOUSEHOLD INTERNATIONAL. (CNBC "World Business", 12/11)

"Until some obvious problems abate, no further significant rally is probable," say the editors at "United & Babson." However, with the Dow selling at around

11 times earnings, they believe there is a lot of good value around. They like some of the stronger airline stocks, including AMR, SOUTHWEST AIRLINES and U.S. AIR GROUP. (CNBC "World Business", 12/11)

"As investors start to focus less on the economic issues and more so on trying to find good companies to invest in for the long term" cash levels will start to decrease, says ALAN BOND, portfolio manager for W.R. LAZARD & CO. He says that as the market consolidates he is looking for companies that have good insights and that are in good businesses. "At the top of that list is U.S. SURGICAL" which has pioneered laproscopic surgical devices. "We like the medical industry. We like the drug industry and we are trying to reflect that to show a cautious, recessionary outlook. We are sticking with the food stocks: GENERAL MILLS and CPC on weakness. We still like the leadership we are seeing in technology and on the top of our list is COMPAQ." He sees his asset allocation moving from 50% equities to 60% equities by year's end with 35% to 45% in bonds and 5% in cash. (CNBC "The Moneywheel", 12/10)

Service industries will be 1991s hottest businesses, according to a survey by "Entrepreneur Magazine." "People are looking for convenience today - they have less time to spend and shop," says publisher JAMES FITZPATRICK, who looks for growth in both personal and business services. One hot new area will be recycling consulting. (CNBC "World Business", 12/11)

"The overwhelming majority of banks ... are adequately capitalized ... but there are some banks that are in trouble," says LAWRENCE LINDSEY, a special economic adviser to PRESIDENT BUSH. The New England banks face some very serious difficulties and "there is a good chance that one will fail there," according to Lindsey. ("Investor's Daily", 12/11)

#90345p1893 12/11/1990 ~PR Newswire

WABASH, IN (DEC. 11) PR NEWSWIRE - The Shirt Shed, Inc. (NASDAQ: SHRT), a leading designer, manufacturer and marketer of imprinted and leisure apparel, today reported first quarter sales and earnings for the three months ended Oct. 31, 1990.

Sales in the first quarter totaled $19,649,000, up 39 percent from $14,132,000 in the same period last year. Net income totaled $624,000, or $.09 per share, 2 percent higher than the $610,000, or $.10 per share realized in the first quarter last year.

Earnings were impacted by increased interest expense and an increase in the accounts receivable reserve due to the forecasted weak economy.

The investment firm of Walsh Greenwood and its affiliates including Signal Apparel, Inc. own shares and warrants which if fully converted will increase Walsh Greenwood's stake in Shirt Shed to 3.76 million shares of outstanding

common stock, on a fully diluted basis. In addition to these holdings, Signal holds a $6 million subordinated note which is, upon shareholder approval, convertible into shares of Shirt Shed's preferred or common stock.

Signal Apparel, an affiliate of Walsh Greenwood, is in discussions with Shirt Shed about the proposed acquisition of all remaining common stock for $4 a share.

MINNEAPOLIS (DEC. 11) PR NEWSWIRE - Cray Research, Inc. (NYSE: CYR) announced today that the Australian Bureau of Meteorology, Australia's weather agency, has installed a CRAY X-MP 14/se system. This is the first installation for Cray Research at the Australian weather bureau. The supercomputer, which was installed in July 1990 at the bureau's headquarters in Melbourne, was officially commissioned by the Australian government at a ceremony in Melbourne today.

"Acquisition of the new supercomputer will enable the bureau to run global, rather than hemispheric, models of the atmosphere, leading to a steady improvement in the accuracy of our weather and climate forecasts," said Ros Kelly, Australia's environment minister.

Kelly added that the CRAY X-MP system has enabled the Australian weather bureau to, for the first time, run operational weather forecasts. Operational forecasting refers to the ability to do production forecasting, which provides timely and accurate weather predictions that are broadcast to the public.

To help the bureau use supercomputing in its operational and research projects prior to the installation of the CRAY X-MP system, Cray Research provided significant computer time on local and remote Cray Research systems for code conversion and system preparedness. Approximately four months after the Cray Research system was installed, the bureau was able to conduct global operational weather forecasting.

According to Kelly, the CRAY X-MP system significantly strengthens Australia's ability to take on its part in tackling global problems like the greenhouse effect, an issue outlined as a critical objective by the World Meteorological Organization (a network of worldwide agencies that together study atmospheric issues on a global basis).

Cray Research has 258 systems installed worldwide, with 17 systems dedicated to environmental research and weather forecasting. The company said the environmental arena has become one of its fastest growing areas of application.

Cray Research, Inc. designs, manufactures, markets, and supports large-scale, high-performance computer systems for scientific and engineering applications.

#90345p1900 12/11/1990 ~PR Newswire

CLEVELAND (DEC. 11) PR NEWSWIRE - National City Corporation (NYSE: NCC) said today that it expects 1990's earnings to fall below the record levels of 1989 by as much as 10 percent due to a higher provision for loan losses. At that level, 1990 would be the second best year in the company's history.

In spite of the anticipated decline, National City expects to report a return on equity ratio for the year of 15 percent and a return on assets above 1 percent. These would be among the best returns of major bank holding companies in the country.

"We are increasing our fourth quarter provision for loan losses by approximately $35 million. Over half of the increase is attributable to a single non-performing commercial loan. The balance reflects continued deterioration of the commercial real estate markets," said Edward B. Brandon, chairman and chief executive officer of National City Corporation.

Brandon added, "This decision is being driven by our internal loan review and is not at the request of bank regulators. The additional provision is consistent with management's focus on a strong conservative balance sheet.

"For 1991 we expect the quarterly provision for loan losses to return to

levels more comparable to the third quarter of 1990. However, greater than expected deterioration in the economy or commercial real estate markets could affect this outlook."

Profile of National City Corporation National City Corporation is a $23 billion bank holding company headquartered in Cleveland, Ohio. The corporation's principal banking units include National City Bank, Cleveland; BancOhio National Bank, Columbus; and First National Bank of Louisville. Other member banks include National City Bank, Akron; First National Bank and Gem Savings Association, Dayton; CommerceNational Bank, Lexington; and Ohio Citizens Bank, Toledo. National City also has 10 community banks serving cities and towns throughout Ohio, Kentucky and southern Indiana.

National City's subsidiaries and divisions offer a wide range of financial services, such as credit card, retail payment and airline ticket processing, trust and investment management, leasing, merchant and mortgage banking, venture capital, small business and community investment, and credit life insurance. These units include Franklinton Financial Services, National Processing Company, First Kentucky Trust Company, National City Trust Company, NCC Merchant Banking, National City Mortgage Company, W. Lyman Case & Company, National City Community Development Corporation, National City Life Insurance Company, National City Public Finance, NC Investments and National Asset Management Corporation.

LAS VEGAS (DEC. 11) PR NEWSWIRE - Silicon Graphics Inc. (NYSE: SGI) announced today that it has signed a strategic OEM agreement with Accelr8 Technology Corp. marking the launch of Silicon Graphics' VAX(tm) Integration Program. Targeted at existing VAX/VMS(r) network users who need access to high performance parallel RISC systems, the VAX Integration Program provides the tools to integrate Silicon Graphics' project supercomputers into a VAX network.

Under the terms of the agreement, Acceler8's VMS Transparency Software will be sold by Silicon Graphics. In addition, Silicon Graphics and Acceler8 have jointly produced a software program called 4D/SUBMIT(tm), which allows Silicon Graphics' line of project supercomputers to act as servers for VMS clients via DECNet(tm) or TCP/IP. The Silicon Graphics system will be able to run Digital Command Language (DCL) batch jobs submitted from the VAX network under VMS.

"This program focuses on our server capabilities. With the VAX Integration Program, we are providing VMS users access to the inherent power of Silicon Graphics' parallel RISC systems," commented Thomas Jermoluk, vice president

and general manager of Silicon Graphics Advanced Systems Division. "Our customers tell us that they can add one of our project supercomputers to their VAX environment for less than what they would spend on a VAX upgrade."

"Our VMS environment and migration tools combined with Silicon Graphics' systems provides the best UNIX(r) platform for VAX integration," stated Robert Hickler, president of Accelr8 Technology Corp. "We are very excited to be partnered with Silicon Graphics." Silicon Graphics' VAX Integration Program is making its debut with the introduction of products at DEXPO West '90 in Las Vegas. In addition to 4D/SUBMIT, Accelr8's VMS Transparency Software packages will be available from Silicon Graphics in March 1991. Prices for 4D/SUBMIT begin at $995.

Silicon Graphics Inc. is the leading manufacturer of high performance graphics systems, servers and software for visual processing applications. The company's products, which range from advanced project supercomputers to low-end desktop models and PC graphics subsystems, are used by engineers, scientists and creative professionals in design, analysis, manufacturing and simulation.

DETROIT (DEC. 11) PR NEWSWIRE - Despite the current economic environment and business climate, plans to expand the number of General Motors (NYSE: GM) minority-owned and operated car and truck dealerships were jointly announced today by GM President Lloyd E. Reuss and Tony March, chairman of the GM Minority Dealer Advisory Council (MDAC).

"We intend to increase the total number of Black, Hispanic, Asian and American Indian dealers selling and servicing GM vehicles by 40 percent over the next three years," they said.

Reuss and March said GM and the MDAC are joining in the spirit of partnership to increase GM minority dealers in the U.S. from 192 in mid- 1990 to 268 by the end of 1993. The joint statement was finalized at the recent semi-annual meeting by GM management in Detroit and the 11-member MDAC, which represents all GM minority dealers. The MDAC members are: Ruben A. Baca, Baca Pontiac-Buick-GMC, Inc., Belen, N.M.; Edwin D. Biagas, Biagas Pontiac-Buick, Inc., Phoenixville, Pa.; James H. Bradley, Jim Bradley Pontiac-Cadillac-GMC, Ann Arbor, Mich.; William E. Gonzalez, Bill Gonzalez Buick, Inc., Burnsville, Minn.; Darrell R. Gordon, Gordon Buick, Inc., Philadelphia, Pa.; Charles H. Harrell, Harrell Chevrolet-Oldsmobile-Geo, Flat Rock, Mich.; Tony March, Tony March Buick, Inc., Hartford, Conn.; Cornelius A. Martin, Martin Oldsmobile-Cadillac, Inc., Bowling Green, Ky.; Jimmy R. McKay, McKay, Inc., Idabel, Okla.; Michael Padilla, Gateway Chevrolet Motor Co., La Mirada,

Calif.; Prat M. Parekh, Prat Buick, Inc., Detroit.

Reuss and March said that the GM Minority Dealer Steering Committee -- made up of representatives of the GM vehicle divisions, staffs, Motors Holding Division, GMAC, plus two GM minority dealers -- has been given added responsibility and resources.

#90345p1905 12/11/1990 ~PR Newswire

ARLINGTON HEIGHTS, ILL. (DEC. 11) PR NEWSWIRE - Motorola's Pan American Cellular Subscriber Group has presented a unique cellular call handling system called Narrow Advanced Mobile Phone Services (NAMPS) to the cellular industry. NAMPS multiplies cellular capacity more than threefold. Robert N. Weisshappel, senior vice president and general manager of the Group, made the announcement at an industry forum held in Arlington Heights and hosted by the Cellular Telecommunications Industry Association (CTIA). The session was attended by over 150 representatives of cellular manufacturing and service provider companies.

Motorola's field testing is expected to begin in January 1991 on this technique, which matches the increased system capacity offered by digital Time Division Multiple Access (TDMA) technology now under development by the Telecommunications Industry Association (TIA). If the testing proves successful, deployment during late 1991 is planned. The new technique allows for increased system call handling capacity, continued use of existing cellular portable and mobile telephones, and introduction of new models indistinguishable from current models in size, weight, power drain, and price. The trial is scheduled to be conducted with Centel Cellular in Las Vegas, Nev., one of the fastest growing and largest portable phone markets in the country, and in tests in Arlington Heights.

The Motorola technique reduces the amount of radio frequency spectrum required for cellular calls while maintaining original call quality.

NAMPS uses Narrow Channel-Frequency Division Multiple Access (NC-FDMA) technology. NC-FDMA employs sub-audible digital techniques to replace the supervisory signaling used to call management in today's cellular systems.

Motorola is one of the world's leading providers of electronics equipment, systems, components, and services for worldwide markets. Products include two-way radios, pagers, cellular telephone systems, semiconductors, defense and aerospace electronics, automotive and industrial electronic equipment, computers, data communications, and information processing and handling equipment.

Motorola is the world leader for cellular telephones, systems and services in use around the world. The company is the recipient of two Japanese quality awards -- the Nikkei Award and the MITI Award. Both are considered high honors for American companies doing business in Japan.

#90345p1906 12/11/1990 ~PR Newswire

WASHINGTON (DEC. 11) PR NEWSWIRE - Nine of the World's largest cellular telephone equipment manufacturers have formally embraced the industry's timetable for preparing digital phone gear for market, the president of the Cellular Telecommunications Industry Association (CTIA) announced today.

Under the timetable, prototype digital equipment made by the nine will be tested and "validated" by March 31, 1991, meaning they hopefully will be in position to start up production lines later next year, said CTIA President Robert W. Maher.

The nine companies have built prototype phones or switching gear utilizing a digital technology known as TDMA -- Time Division Multiple Access. TDMA is the first, and so far the only, digital technique for which national cellular standards have been completed.

"We have exceeded our goal for vendor participation in this process, which we call 'commercial lockdown,'" Maher commented. "And just as importantly, we are hewing to the time schedule that was set out more than two years ago; i.e., make digital equipment available to the industry by 1991.

"These vendors are to be applauded for their support of the cellular industry's needs. We need the capacity that digital offers to better serve the American public."

The nine companies are Motorola, AT&T, Ericsson, Audiovox, Mitsubishi, NovAtel OKI telecom, Sony and Uniden.

Under the lockdown process, which CTIA administers, the nine are divided for testing purposes between switching system vendors and mobile telephone vendors. One of the key goals of lockdown is to ensure that all digital phones made by suppliers work properly with the digital switches made by other companies.

Motorola is the only company participating both as a system vendor and a mobile vendor. It is joined by AT&T and Ericsson on the system vendor side, while the other firms are mobile vendors.

Motorola passed a digital milestone last week, became the first of the nine

TDMA participants to clear a lockdown testing hurdle.

All cellular systems operating in the United States today utilize so-called analog technology. This transmission technique, similar to that used by commercial radio, has brought the American public the most sophisticated form of mobile communications ever developed.

But cellular's remarkable growth -- estimated at nearly 5 million subscribers in just seven years -- has put an enormous strain on systems in the largest markets. And digital TDMA offers a more efficient way to use scarce radio frequencies.

STAMFORD, CT (DEC. 11) PR NEWSWIRE - Herbert Elish, chairman, president and chief executive officer of Weirton Steel Corporation (NYSE: WS) has been named chairman of Keep America Beautiful, Inc., KAB president Roger Powers announced today.

"We are delighted that the chief executive officer of Weirton Steel, one of KAB's leading supporters, will guide KAB over the next two years," said Powers.

"Mr. Elish brings hands-on solid waste experience, as former Commissioner of Sanitation and Administrator of the Environmental Protection Administration in New York City. His understanding of local decision-making in resolving environmental issues will be a valued asset to KAB and its local and state programs."

Elish has been chairman and CEO of Weirton Steel Corporation for three years. The company is the seventh largest steelmaker in the United States.

A Phi Beta Kappa graduate of Williams College, Elish also earned the LL.B. degree from Harvard Law School. In 1971, he became the Commissioner of Sanitation of New York City. Later in 1973, he was administrator of the Environmental Protection Administration of the City of New York. Elish was asked by Governor Hugh Carey to become the first executive director of the Municipal Assistance Corporation in 1975.

He has held several senior positions in business and industry and has been on the board of directors and executive committee of Keep America Beautiful, Inc. since December 1987. He belongs to many other civic and professional organizations and is married and has three children.

Keep America Beautiful, Inc. is a national, nonprofit, public education

organization dedicated to improving waste handling practices in American communities. Founded in 1953 by the private sector, today KAB is supported by 300 companies and is guided by a National Advisory Council of 75 civic and professional organizations and 14 federal agencies. KAB and its 460 certified affiliated communities offer practical grassroots solutions to the nation's solid waste and litter issues.

ROCKVILLE, MD (DEC. 10) PR NEWSWIRE - Holiday letters are reaching U.S. servicemen and women stationed in the Persian Gulf in a couple of days thanks to a free electronic mail message program, "Letters From Home," sponsored by GE Information Services.

The "Letters From Home" Program provides family members and friends with the opportunity to send mail, via home computer and the on-line computer service GEnie, directly to the U.S. Armed Forces in the Middle East.

"Our 'Letters From Home' program was successfully launched in November with cooperation from the U.S. Armed Forces, the Saudi-American General Electric Company, GE Rents and Pitney Bowes, Inc.," said Bill Louden, general manager for GEnie. "We want to encourage family and friends of those serving in the Persian Gulf to take full advantage of this free program, particularly now during the holiday season."

Letters are sent electronically via GE Information Services' worldwide teleprocessing network to facilities of Saudi-American General Electric Company (SAMGE) in Saudi Arabia. SAMGE is responsible for folding and inserting the letters in envelopes, using equipment provided by Pitney Bowes,

before they are given to the U.S. armed forces for delivery to a designated recipient.

To send a letter, subscribers must indicate the name, rank, social security number, unit or ship and APO or FPO of the recipient. Subscribers to the GEnie service need only type the word "Letters" at any menu prompt on the service. Non-subscribers can dial a local access telephone number or, if they are not near one of the more than 500 GE Information Services dial-up locations, access via a toll-free 800 number.

"Letters From Home" is a great way to communicate quickly with loved ones in the Persian Gulf," said Michael Quigley, mailing systems group vice president, sales and marketing, for Pitney Bowes, a multi-national manufacturing and marketing company that provides mailing and shipping equipment and supplies and other services.

"This program has a number of advantages. Most people can access it from the comfort of their own home and it's convenient and quick. It's the perfect way to communicate." For more information on the GEnie service and the free "Letters From Home" program, contact GEnie Client Services at 1-800-638-9636.

GEnie is an on-line information service available in the United States and Canada through GE Information Services, a division of General Electric Company (NYSE: GE). GE Rents is also a division of General Electric Company, U.S.A. An access directory is available by calling 1-800-638-9636.

#90345p1916 12/11/1990 ~PR Newswire

LA JOLLA, CALIF. (DEC. 11) PR NEWSWIRE - LIDAK Pharmaceuticals (NASDAQ: LDAKU) and GenPharm International, Mountain View, Calif., today announced details of an agreement between the companies to jointly develop animal models for the transplantation of human tissues for the study of AIDS and other immune system diseases.

GenPharm International will supply its proprietary transgenic immunodeficient (TIM(TM)) mice to LIDAK Pharmaceuticals which will test the animals using its proprietary hu-PBL transplantation technology.

LIDAK's current animal model uses SCID mice, a naturally occurring mutant strain with a partially deficient immune system. White blood cells from adult human donors are injected into the SCID mice where they re-create useful human immune system functions. The mice can then be exposed to viruses that only infect human cells, for example the AIDS virus, to provide an animal model of the disease that permits the testing of new drugs and vaccines.

GenPharm has designed its TIM mice to improve upon the naturally occurring SCID strain by providing a more nearly complete immunodeficient mouse. The expectation is that TIM mice will make the LIDAK system easier to use and provide an even better function of the transplanted human immune system.

Commenting on the collaboration, Dr. Robert Kay, GenPharm's vice president, U.S. Research and Development, said, "We are very interested in testing our TIM mice with the LIDAK system since it is a valid and easily used animal model for studying human disease." Dr. Donald Mosier,

LIDAK's vice president of Research and Development, said, "TIM mice should provide a significant refinement to our hu-PBL-SCID mouse technology."

LIDAK Pharmaceuticals utilizes its hu-PBL-SCID technology for the development and testing of its own proprietary drugs and engages in collaborative research programs with other pharmaceutical companies for the development and testing of their drugs and vaccines. GenPharm International Inc. is commercializing transgenic animal technology for pharmaceutical, veterinary and nutritional applications.

HOUSTON (DEC. 11) PR NEWSWIRE - CRS Sirrine Engineers, Inc., a subsidiary of CRSS Inc., (NYSE: CRX), has been awarded the design engineering and construction management contract for the $100-million expansion of Corning Incorporated's Wilmington, N.C., optical fiber plant.

The design phase of the project is currently underway, and construction is scheduled to begin in January 1991. The 60,000 square-foot addition will enable the Wilmington facility, already the world's largest producer of optical fiber, to increase its capacity by 50 percent by 1993. Start-up is anticipated in early 1993.

Corning is a long-time client of CRS Sirrine Engineers, Inc. CRS Sirrine Engineer's Greenville, S.C. office will be responsible for procurement of equipment for the project, in addition to providing engineering and construction services.

According to Corning officials, the expansion is being driven by an increase in worldwide demand for optical fiber. In North America, this market growth is primarily due to telephone companies' increased use of fiber-optic cable in the feeder portions of their networks, and cable television systems' increased use of fiber.

CRSS Inc., through its subsidiaries, is a diversified design and construction services company and is involved in the independent power/cogeneration industry. CRSS has also expanded, through its interest in NaTec Resources,

Inc., into the acid rain pollution control market.

#90345p1923 12/11/1990 ~PR Newswire

DALLAS (DEC. 11) PR NEWSWIRE - Recognition Equipment Incorporated (NYSE: REC) today reported a net loss for the fiscal year ended Oct. 31, 1990, of $29,258,000 or $2.86 primary loss per share of common stock, compared to a net loss of $38,803,000, or $3.78 primary loss per share in 1989. Revenues for the year were $230,618,000 compared to $255,874,000 in 1989.

Net loss for the fourth quarter ended Oct. 31, 1990, was $14,380.00 or $1.41 primary loss per share of common stock, compared to a net loss of $34,449,000, or $3.37 per share in the corresponding period last year. Revenues for the fourth quarter were $51,789,000 compared to $67,880,000 in 1989. Prior year revenue includes amounts from units divested during the third and fourth quarters of 1990.

The company said that approximately $12 million of the fourth quarter loss was primarily the result of restructuring charges for losses incurred from the sale of certain non-image related assets and to provide for severance and other costs associated with downsizing the company's operations.

In a joint statement, Thomas Hurley and Robert Vanourek, co-chief executive officers, noted that, with the sale of the Wand Products Division in November 1990, the company substantially completed its previously announced sale of non-image related assets and has strong cash balances. The company is now focused on the expanding image market. During the fourth quarter, due to the uncertain state of the economy and signs of a coming recession, the company took further actions to resize the company to match expenses with current revenue projections. The financial impact of restructuring and downsizing is reflected by charges in the fourth quarter and for the year.

At the end of the fiscal year, the company's total backlog of orders believed to be firm was $37,502,000, compared to $64,883,000 at Oct. 31, 1989. The backlog for businesses held at the end of 1990, which would exclude backlog from the divested units and the terminated currency systems contract with the Federal Reserve Banks previously disclosed in the second quarter, was up approximately 10 percent from the prior year.

Recognition, headquartered in Dallas, and its wholly owned subsidiary, Plexus Software, Inc., manufacture, sell and service image and data capture hardware and software systems for customers throughout the world.

MIAMI (DEC. 11) PR NEWSWIRE - Crest Industries, Inc. (NASDAQ: CRII), a designer, manufacturer and national distributor of home improvement products, today acquired an 80 percent interest in International Vertical Systems, Inc., a manufacturer of track systems for vertical blinds, announced Ron Kepes, Crest president.

Kepes said the company will operate as a separate Crest subsidiary to be known as Crest Vertical Systems, Inc. Mike Castillo and William Angerami will retain a 20 percent interest and will continue to manage the subsidiary, he said. Founded in 1980, Miami-based International Vertical Systems had annual sales of $4 million in 1990.

"International Vertical Systems is a solid company which provides the highest-quality track systems to vertical blind manufacturers on an OEM basis " Kepes said. "Acquisition of the company fits Crest's long-term strategy of steady growth, as well as our goal in terms of developing more diversified products manufactured in the U.S."

This acquisition marks a diversification for Crest, which supplies ceiling fans, room air conditioners, track and recessed lighting products, plumbing fixtures and other consumer home improvement products to retailers across the country. With customers such as Home Depot, Macy's and J.C. Penney, Crest had annual sales of $55 million in fiscal 1990.

Crest Industries, Inc. is a public company with shares traded on the NASDAQ over-the-counter system.

CINCINNATI (DEC. 11) PR NEWSWIRE - Eagle-Picher Industries, Inc. (NYSE: EPI) announced yesterday that United States District Judge Jack B. Weinstein issued an order preliminarily certifying a nationwide class of holders of all present and future asbestos-related personal injury claims against the company.

In connection with his order, Weinstein also stayed all claimants from commencing or continuing any asbestos-related personal injury litigation against Eagle-Picher, and he enjoined all claimants from enforcing any judgments entered after Dec. 10, 1990. Weinstein's order does not affect any settlements or judgments entered into prior to Dec. 10, 1990.

Commenting on the involuntary bankruptcy petition filed against Eagle-Picher yesterday, Weinstein stated that the involuntary filing was fraudulent on its

face and constituted a fraudulent attempt to deny jurisdiction to his court in these proceedings. Weinstein also stated that the filing was in bad faith and, in his opinion, a "nullity."

PITTSBURGH (DEC. 11) PR NEWSWIRE - H.J. Heinz Co. (NYSE: HNZ) announced today an 11.5 percent increase in net income and a 10.6 percent increase in earnings per share for the quarter ended Oct. 31, 1990, compared with the same period last year.

Net income for the second quarter was $139,770,000, compared with last year's $125,395,000. Earnings per share increased to 52 cents from 47 cents for the same period last year.

Consolidated net sales for the second quarter were $1,644,580,000, a 7.4 percent increase over last year's total of $1,531,078,000. The increase in sales came from price increases and the favorable effect of translation of strengthening foreign currencies against the U.S. dollar. Prices increased for nearly all major product categories.

Net income for the six-month period was $283,007,000, up 12.3 percent from last year's total of $251,941,000. Earnings per share were $1.06 for the current year, an increase of 11.6 percent from the 95 cents recorded in the same period last year.

Sales for the first six months of the year increased 7.4 percent to $3,203,823,000 from last year's $2,983,027,000. The sales growth for the period to date also came from price increases and the translation of strengthening foreign currencies against the U.S. dollar, while volume remained stable.

Anthony J.F. O'Reilly, Heinz chairman, president and chief executive officer, said, "Despite the intense competitive environment in some of our food categories in the U.S.A., we remain confident that we will achieve satisfactory full-year growth and continue to build for future growth in the 1990s."

DENVER (DEC. 11) PR NEWSWIRE - Western Gas Resources Inc. (NYSE: WGR) announced today that, through its 52 percent owned subsidiary Western Gas Processors Ltd. (NYSE: WGP), it acquired a 50 percent interest in the Katy Gas Storage and Exchange Facility by purchasing all of the stock of TOGCO Gas Storage Corp. ("TOGCO"). TOGCO owned 50 percent of the rights to the Katy Gas Storage Project and Alcorn Natural Gas Inc. owns the other 50 percent interest. The Storage and Exchange Facility, located at Katy, Texas, will be developed by Western in conjunction with Alcorn and will be operated by Western. The Storage Facility is expected to store up to 20 billion cubic feet (Bcf) of natural gas with peak deliverability of more than 350 million cubic feet of gas per day and will be in full operation in 1992.

Firm storage service will be provided to accommodate both seasonal and utility storage requirements and will include firm peaking capabilities. In addition, the Facility will develop and operate a hub to provide an exchange service among the numerous pipelines in the Katy area. The hub is expected to begin operation in 1991. The Storage and Exchange Facility will be built and operated as an intrastate facility.

The acquisition of the rights to, and the subsequent development and operation of the Katy Facility is another step in Western's continued growth into areas with potential significant future growth and with high potential to enhance its marketing efforts.

DALLAS (DEC. 11) PR NEWSWIRE - Grace Energy Corporation (NYSE: GEG) today announced that its offshore drilling subsidiary, Grace Offshore Company, has purchased two offshore rigs from subsidiaries of the Blystad Group PLC, a publicly traded British corporation, for $22.9 million. One of the rigs is a 200-foot cantilever, mat-supported jackup rig, and the other is a 250-foot slot, mat-supported jackup rig.

The two rigs will be operated by Grace Offshore Company's Huthnance Division, which is responsible for its offshore drilling operations. In addition to these two rigs, the Huthnance Division operates three platform drilling rigs, four 200-foot cantilever, mat-supported jackup rigs and one 300-foot cantilever jackup rig. The acquisition of the two rigs is in line with Grace Offshore's strategy of expanding its drilling fleet and providing a full range of equipment to meet its customers' requirements.

Grace Offshore Company is headquartered in New Orleans. Through its Booker Division, it also operates 26 platform workover rigs in the Gulf of Mexico.

Grace Energy Corporation, headquartered in Dallas, is a diversified energy

company whose subsidiaries are engaged in supplying services and equipment to the petroleum industry, in the exploration for and development of oil and natural gas; and in coal mining.

NORWOOD, MA (DEC. 11) PR NEWSWIRE - Microcom, Inc. (NASDAQ: MNPI) a PC and workstation connectivity company, today announced strategic partnerships with several well-known two-tier value-added distributors, including Tech Data and Costa Distributing. The newly signed distributors will resell Microcom's PC-based Microcom LAN Bridge(tm) (MLB(tm)) series, as well as selected models of Microcom's line of Protocol Modems(tm).

"Connecting networks of networks is the current challenge facing many network managers," stated Peter Brumme, Microcom's senior vice president of North American Sales and Marketing. "Effectively marketing these internetworking products is the challenge facing the networking industry. We are pleased to rely on the expertise of these newly signed distributors to develop new markets for our Microcom LAN Bridge family."

Tech Data and Costa will also offer Microcom Protocol Modems such as the QX/4232hs(tm), bundled with Microcom software packages like Carbon Copy Plus(tm) and RELAY Gold(R), to provide complete connectivity solutions to their customers.

Microcom selected Tech Data to serve as their exclusive distributor on the national level. Microcom will augment this national effort by Tech Data with west coast regional distribution by Costa; other regional distributors will be added in the coming months.

Microcom plans a number of reseller seminars commencing in January 1991 in over 30 cities across the United States and Canada. The "road shows" will focus on the internetworking market, indentifying sales opportunities for Microcom and its distributors, and explaining how these opportunities fit into their current marketing strategies.

The newly signed distributors are a key component of Microcom's new two-tiered channel marketing strategy. In previous announcements, Microcom unveiled a new pricing strategy for its Microcom LAN Bridge and repackaged the MLB in "starter kits" consisting of software, LAN and WAN cards. The starter kits enable the distributor to integrate the MLB with the hardware platform of the VAR's choice and tailor the MLB to best serve the VAR's customer base.

Microcom is a PC and workstation connectivity company headquartered in Norwood Mass.; with offices in Danbury, Conn.; Wilmington, Del.; Durham, N.C.; Caguas

Puerto Rico; and international offices in France, Hong Kong, and the United Kingdom. Principal products lines include Protocol Modems; LAN bridging products; Carbon Copy Plus(tm), RELAY Gold(R), Virex(R), and Microcom 911 Utilities(tm) software packages; and ISDN products.

MINNEAPOLIS (DEC. 11) PR NEWSWIRE - Medtronic, Inc. (NYSE: MDT) announced today that U.S. clinical evaluation of the Medtronic Wiktor(TM) coronary stent has begun at three medical centers.

The device, invented by a former patient, is being evaluated to help solve the problem of suboptimal angioplasty results as well as restenosis -- or reclosing -- of a coronary artery after it has been cleared of constrictions or blockages with an angioplasty procedure. Restenosis occurs in about a third of angioplasty cases.

Evaluations of the Wiktor stent are underway with patients at Oschner Foundation Hospital, New Orleans; St. Elizabeth's Hospital of Boston; and at St. Joseph's Heart Institute, Tampa, Fla.

The tiny tube-shaped device is formed of tantalum wire designed to flex easily to facilitate movement of the compressed stent through the twisting pathways of the arterial system and then provide strength to hold an expanded shape indefinitely. It is being evaluated in three diameters: 3, 3.5, and 4 mm. All are approximately 17 mm. in length.

In use, the stent is compressed tightly over the balloon of a coronary catheter, maneuvered through the heart's arterial system, and expanded by inflating the balloon at the lesion site. It is designed to tack back any loose flaps of tissue and remain precisely in place to keep the vessel open after the balloon is deflated and withdrawn.

The stent was invented by Dominik M. Wiktor, a Cranford, N.J., engineer, after he underwent surgery in 1984.

European evaluations of the device began in January. Medtronic, Inc., headquartered in Minneapolis, is a leading developer and manufacturer of biomedical devices for improving cardiovascular and neurological health.

#90345p1947 12/11/1990 ~PR Newswire

LOWELL, MA (DEC. 11) PR NEWSWIRE - Taking another step forward in its commitment to industry standards and innovative technologies, Wang Laboratories, Inc. (AMEX: WAN) today announced the Wang Local Office Connection for Windows (WINLOC) Release 3.0, a Microsoft(R) Windows 3.0-compliant software package.

WINLOC is used in conjunction with the Wang Local Office Connection or Micro Channel Local Office Connection option boards, which allow industry-standard architecture (ISA) and Micro Channel architecture (MCA) PCs to function as workstations on Wang VS mid-range computers as well as OIS and Alliance text processing systems.

With WINLOC, users can access VS applications, such as data processing or text editing, by running VS terminal emulation in a PC Window while having PC applications, such as a spreadsheet program, active in other windows on their PC screen. WINLOC Release 3.0 is a new version that brings the full range of Windows 3.0 features to users who need VS terminal emulation and access to Windows-based PC applications simultaneously. Available immediately, WINLOC Release 3.0 is priced at $200. Existing WINLOC 2.0 users can upgrade to the new version for $50.

WINLOC 3.0 can be run in Microsoft Windows Real mode, Standard mode, or 386 Enhanced mode. Real mode is commonly used to run older Windows applications that do not work in protected mode. Standard and 386 Enhanced modes exploit the protected mode of 80286 and 80386 processors, freeing Windows applications from memory constraints.

WINLOC 3.0 provides users with the standard Microsoft Windows user interface. As a result, users can copy and paste text between the VS window and PC applications. For example, text can be copied from an EXCEL spreadsheet running in a PC window and pasted into a VS WP Plus document in the VS window. The VS window can be sized, reduced to an icon, and closed like any other PC window. While the VS window is reduced to an icon, a color change in the icon alerts users every time the screen is updated, for example when a new electronic mail item is received.

Pull-down menus are available for a full range of features, including terminal emulation functions. While users can continue to use traditional Wang program function keys to perform VS data processing and WP Plus word processing functions, they also have the option of using pull-down menus for these operations. In addition, users can activate most VS terminal emulation functions by clicking with their mouse on the desired entry in a function key list displayed on their screen.

WINLOC takes advantage of the Microsoft Windows 3.0 Help facilities, providing users with such information as how to use the mouse, options, and switch settings. Online facilities allow users to select and save any available

fixed pitch fonts and customized color settings. Users can choose from up to 16 colors. A simple mouse click on a Save Window Position command allows users to save their preferred window size and location and have it reappear the next time they start a WINLOC session.

CONTACT: Hanne Herwick of Wang Labs, 508-967-6405.

#90345p1949 12/11/1990 ~PR Newswire

WHITE PLAINS, N.Y. (DEC. 11) PR NEWSWIRE - Every 16 seconds someone suffers a head injury and many of those result in cognitive impairment or memory loss (see Note A). The inability of persons with cognitive impairments to recall their family and friends or to recognize common household items can cause great difficulty in their daily lives.

IBM today introduced THINKable (see Note B), a multimedia software program operating on the Personal System/2(Note B). THINKable is a state-of-the-art multimedia solution for cognitive impairment that therapists can use in treating the some 12 million people in the U.S. who suffer memory loss resulting from injury, developmental disabilities, substance abuse, degenerative disease and neurological disorders.

"THINKable helps a cognitively impaired person sharpen memory skills through the innovative use of computer," says Juan M. Sabater, IBM corporate director of community programs. "IBM developed THINKable as part of an ongoing commitment to help individuals with disabilities achieve greater personal and professional independence through the use of technology."

THINKable enables psychologists, occupational therapists, speech/language pathologists and doctors to assist the patient or client in working independently. The sense of the client's personal accomplishment is heightened and clinicians are able to work with more than one client at a time.

THINKable uses multimedia technology on the PS/2(Note B), including animation, photos and natural voice to prompt users through clinical practice sessions that help improve memory, attention, discrimination and sequencing. Sample tasks that can be performed using THINKable include responding to specific images that appear on screen, identifying pairs of images that are similar or dissimilar, and recalling the order in which images appear.

For example, voice and/or text can prompt the user to touch a target image like a chair and on the next screen to identify images that are different, say an ice cream cone or flowers.

(A) -- From Interagency Head Injury Task Force Report compiled by the National Institute of Neurological Disorders and Stroke, and the National Institutes of Health.

(B) -- Indicates trademark of the International Business Machines Corporation.

WHIPPANY, NJ (DEC. 11) PR NEWSWIRE - Personal Diagnostics, Inc. (NASDAQ: PERS) reported net income for the fiscal year ended Sept. 30, 1990 declined approximately 35 percent to $757,000 or $.17 per share compared with net income of $1,164,000 or $.35 per share for the preceding year. Revenues for the year increased slightly to $10,779,000 from $10,762,000 for the previous year. For the full year average shares outstanding increased to 4,455,000 from 3,353,000 in the prior year. For the 1990 fourth quarter the company reported net income declined to $12,000 or $0 per share, compared to $303,000 or $.09 per share in the 1989 period.

In commenting on the company's performance, John H. Michael chairman and president of Personal Diagnostics, Inc. noted that the results for the full year and particularly the fourth quarter reflected an increasingly competitive operating environment and difficulty in attracting instrumentation development business to replace completed projects. He added that he expects this pressure on margins and profits to continue into 1991.

Personal Diagnostics, Inc. is a fully integrated medical technology company with specialized capabilities for precision design, engineering and manufacture of instrumentation for the health care industry.

PHILADELPHIA (DEC. 11) PR NEWSWIRE - Consolidated Rail Corp. (NYSE: CRR) announced today it has selected The Anderson Group of Albany, N.Y., to develop its National Customer Service Center in North Fayette Township, Allegheny County, Pa.

The site is located about four miles east of Greater Pittsburgh International Airport at the Park West development property of the Regional Industrial Development Corporation (RIDC).

Conrail announced on Nov. 8 that it would establish a National Customer Service Center in the Pittsburgh area to replace existing centers in six states. Customer Service employees process customers' shipping instructions for freight cars and rail freight service. Conrail worked closely with the Governor's Response Team and local officials in selecting the Pittsburgh area as the site for the center.

Conrail will lease the entire 90,000-square-foot, three-story structure The Anderson Group will build on the RIDC property. About 30,000 square feet will be ready for occupancy in August 1991, at which time Conrail will begin to phase in operation of the National Customer Service Center. Customer Service Department employees currently based in Pittsburgh will be among the first to move into the new building, with employees from other centers transferring in stages. Conrail expects the consolidation of customer service operations to be complete in 1993.

Tom Foerster, chairman of the Allegheny County Commissioners, said: "I am delighted that Conrail selected Allegheny County as the location for its national customer service center. Conrail's decision demonstrates that Allegheny County is a great place to do business."

Conrail operates a rail freight transportation network in 14 Northeastern and Midwestern states, the District of Columbia, and the Province of Quebec.

WINSTON-SALEM, NC (DEC. 11) PR NEWSWIRE - R.J. Reynolds Tobacco Co. and its fellow members of the Tobacco Institute today announced new initiatives to discourage young people from smoking.

"We don't want young people to smoke, and we don't market our products to young people," said James W. Johnston, chairman and chief executive officer of R.J. Reynolds Tobacco Co. "The Tobacco Institute's new program will make it more difficult for children to have access to cigarettes, and we support it wholeheartedly," he said.

The new initiatives expand the system of voluntary restraints the tobacco industry has adhered to for nearly 20 years. The new initiatives include:

- A national program to help retailers observe and enforce state laws prohibiting tobacco sales to youth. The store signage and education campaign's theme is, "It's the Law."

- Industry support for passage of new state laws setting a minimum age of 18 for cigarette sales in those states without a minimum age law or one lower than 18.

- Industry support for new state laws requiring supervision of cigarette vending machines located in places frequented by minors.

- Sharp new limitations on the distribution of product samples and premiums; requirements that billboard cigarette advertisements be at least 500 feet away from schools and playgrounds; and other new guidelines that supplement current industry codes.

- Support materials for parents to use in encouraging their children to resist peer pressure to smoke. The materials will be promoted through a multi-million dollar advertising campaign.

"Time and again, studies have shown that young people cite the influence of friends and family as the reason they began smoking," Johnston said. "The Tobacco Institute's new programs will help parents counter those influences, and will make it more difficult for children to buy cigarettes.

"They will also demonstrate what we as an industry have said for years: that we don't market to children, we don't advertise to children and we're willing to put into place voluntary programs that will help keep children from smoking " Johnston said.

#90345p1973 12/11/1990 ~PR Newswire

BOULDER, CO (DEC. 11) - Synergen Inc. (NASDAQ:SYGN) announced today that researchers at Tufts University in Boston and two Italian universities have released results of an experiment showing that Synergen's interleukin-1 receptor antagonist (IL-1ra) significantly reduces proliferation of cells taken from acute myelogenous leukemia patients.

The results of these experiments were presented recently at the American Society of Hematology Conference and were also published as an abstract in the Nov. 15 issue of the scientific journal Blood.

The researchers found that leukocytes from patients with AML produce elevated levels of interleukin-1 (IL-1), which, in turn, induces proliferation of these cells. Synergen's IL-1ra blocks IL- 1 binding to the IL-1 receptor molecule, thus stopping proliferation of these leukemia cells.

Plans are under way to start a clinical study in patients with chronic myelogenous leukemia early next year at the M.D. Anderson Medical Center in Houston, Texas.

Synergen is a biotechnology company developing products to treat inflammatory diseases, vascular disorders and neurological conditions, using recombinant DNA technology and the latest advances in molecular and cellular biology.

HOUSTON (DEC. 11) PR NEWSWIRE - Compaq Computer Corporation (NYSE: CPQ) has captured six awards from three publications, including the Hardware Manufacturer of the Year award from Systems Integration magazine.

Compaq took four first place awards at the Systems Integration Products of the Year awards ceremony in Las Vegas, the site of this Fall's 1990 Comdex, the computer industry's mega-trade show. The Compaq SystemPro emerged as the best product in both the File Server and Multi-User System categories and the Compaq LTE/286 won in the Portable/Laptop category.

The editors of PC Magazine also named the Compaq SystemPro winner in the Personal Computer category of PC Magazine's 1990 Awards for Technical Excellence. Additionally, the Compaq DeskPro line of products received Reseller Management magazine's Readers' Choice Awards for "Best-to-Sell Product for 1990" in the Desktop category.

"These awards further demonstrate confidence in the quality and reliability of Compaq products according to magazine editors, who independently evaluate our products; resellers, whose business success depends on satisfied customers; and users, whose needs ultimately determine our product strategy," said Kevin Bohren, director of corporate communications, Compaq Computer Corporation.

"This positive feedback is in line with Compaq's 1990 survey conducted by Millward Brown indicating that nine out of ten end users rate their experience using Compaq PCs an eight, nine, or ten on excellence using a ten-point scale " said Bohren.

The Systems Integration awards were based on votes from readers who recommended products in 47 categories that best served their needs during the last year.

"Compaq has clearly established a strong foothold among systems integrators, the quintessential builders of multi-vendor, multi-user networked systems," said Susan Chouinard, Systems Integration's publisher.

Systems Integration is read by more than 110,000 value-added resellers (VAR)/third-party integrators, original equipment manufacturers (OEM) and in-house systems integrators.

PC Magazine's Awards for Technical Excellence are based on editors' opinions of those products that advanced the state of the art during the past year. At the annual awards ceremony, PC Magazine editors credited Compaq with playing a leading role in the industry trend toward downsizing from minicomputers and mainframes.

#90345p1975 12/11/1990 ~PR Newswire

PENNSAUKEN, NJ (DEC. 11) PR NEWSWIRE - MEDIQ Inc. (AMEX: MED), a provider of healthcare and financial services, today reported revenues and net income for the fiscal year ended Sept. 30, 1990.

Revenues for fiscal 1990 were $373,516,000, an increase of 10 percent over 1989 revenues of $338,965,000. Net income was $6,675,000 or 28 cents per share in 1990 compared with net income of $10,528,000 or 44 cents per share in 1989. Revenues and net income for the fourth quarter of fiscal 1990 were $100,946,000 and $542,000 or 2 cents per share, respectively, compared to $87,121,000 and $2,394,000 or 10 cents per share for the fourth quarter of fiscal 1989.

Bernard J. Korman, president and chief executive officer of MEDIQ, stated that results for the fourth quarter of fiscal 1990 were adversely affected by the performance of the company's owned and operated psychiatric hospitals, its home care group and an increase in the allowance for bad debts at Copelco Financial Services Group Inc., the company's financial services subsidiary. The increase in the allowance for bad debts is reflective of the company's assessment of the recession's impact on the company's commercial and industrial lease portfolio.

MEDIQ Inc., whose shares (MED and MED.Pr) and debentures (MED.C) are traded on the American Stock Exchange, provides products and services to hospitals, nursing homes, healthcare professionals and consumers through its subsidiaries. MEDIQ's businesses include diagnostic imaging and testing; maintenance of diagnostic equipment; pharmaceutical packaging; medical equipmental rental; healthcare facility planning, design and project management; management and ownership of psychiatric units; utilization review of medical claims made to insurance companies, and financial services.

ROCHESTER, MINN. (DEC. 11) PR NEWSWIRE - IBM (NYSE: IBM) today announced the largest distribution from its $25 million IBM Funds for Dependent Care Initiatives since the program was introduced last year.

The company announced awards totaling more than $3.5 million to help finance 21 child care and elder care projects in nine cities across the country where its employees live and work.

In Rochester, IBM is awarding $308,500 to two agencies to assist them further improve both the quality and quantity of infant and toddler day care in the community.

Child Care Resource and Referral, Inc., will receive a grant of $300,000, enabling the agency to purchase land and construct a free-standing child care center, increasing the supply of infant/toddler care spaces in Rochester by 30.

The agency will construct the center, which they will own. Child Care Resource and Referral will lease the center to a local not-for- profit child care provider who will operate and manage it. The operator selected must be accredited by the National Association for Education of Young Children.

"We believe this is a unique partnership between business and the community," said Joanne McCree, IBM Rochester Personnel Manager. "While this new center will be built with funds from IBM, it is a community facility, with space available for children whose parent or parents do not happen to work at IBM.

"To our knowledge, this is the first center available to the general public that has been funded totally by a corporate contribution."

The Children's Home Society Child Care Center in Rochester will receive $8,500 to be used to purchase basic infant and toddler furniture, equipment and supplies, such as high chairs, strollers and some toys.

HOUSTON (DEC. 11) PR NEWSWIRE - Enron Corp. (NYSE: ENE) announced today that John A. Urquhart has been elected to the corporation's board of directors. With Urquhart's election, the number of Enron directors now stands at 16.

"Jack will bring significant contributions to all of our business units, but we are particularly pleased to be able to benefit from his extensive background in power generation," said Kenneth L. Lay, chairman and chief executive officer of Enron.

Urquhart is senior vice president of General Electric Company and formerly headed General Electric's Industrial and Power Systems, the world's largest manufacturer that designs, produces, sells, constructs and services equipment and systems for the generation, transmission and distribution of electric power. General Electric builds or designs about half of the gas turbines used around the world.

Urquhart joined General Electric in 1949 and served in a number of assignments in the company's gas turbine, power generation sales, delivery, construction and engineering services businesses. He was named senior vice president and group executive of construction and engineering services in 1981 and executive vice president with responsibility for General Electric's international operations in 1982. He became executive vice president with responsibility for the power systems sector in 1985 and was named senior vice president with responsibility for GE Industrial and Power Systems in 1986.

Enron Corp., America's leading natural gas company with approximately $11 billion in revenues and $9 billion in assets, operates the nation's largest natural gas transmission system; markets natural gas, gas liquids, crude oil and refined products nationally and worldwide; owns 84 percent of Enron Oil & Gas Company, one of the country's largest independent (non-integrated) natural gas exploration and production companies; and also is one of the largest independent producers of electricity in the United States, with extensive experience in combined heat and power installations.

BIRMINGHAM, AL (DEC. 11) PR NEWSWIRE - Energen Corp. (NYSE: EGN) today announced that Alagasco, its natural gas utility, has accepted an order of the Alabama Public Service Commission (APSC) extending for three years its progressive rate-setting methodology.

The new Rate Stabilization and Equalization (RSE) order also includes a temperature adjustment provision.

Established in 1983, RSE replaced the traditional utility rate case with quarterly adjustments designed to give Alagasco an opportunity to earn a return on equity within a specified range.

Under the APSC's order, the allowed return on equity range remains the same at 13.15 percent to 13.65 percent. A temperature adjustment provision included in the renewal order will reduce the impact of warmer-than-normal and colder-than-normal temperatures on Alagasco's earnings.

Any rate increases will be implemented once a year, on Dec. 1, rather than in quarterly increments, and any needed decreases in rates will continue to be made on a quarterly basis. As a result, Alagasco's opportunity to earn a return on equity within the allowed range will be enhanced since the regulatory lag inherent with quarterly increases will be significantly reduced. Annual rate increases cannot exceed 4 percent of revenues for the latest 12-month period.

One of several cost containment provisions in the order requires Alagasco to keep its operations and maintenance (O&M) expenses per customer within 1.25 percent over or under the Consumer Price Index for all Urban Customers (CPI-U). Should O&M expenses exceed the limit, customers' rates will be reduced; if O&M expenses fall below the limit, Alagasco and its customers will share the benefits. The order extending RSE also stipulates that Alagasco's actual equity at Sept. 30 cannot exceed 60 percent of its total capitalization.

"RSE has truly been a win-win situation for Alagasco and our customers, and we are very pleased that it has been extended for three years," said Alagasco President Wm. Michael Warren Jr. "The temperature adjustment and annual rate increase mechanism, along with RSE itself, are excellent examples of progressive ratemaking."

Energen Corp. is a diversified energy company engaged primarily in natural gas distribution and oil and gas exploration and production.

NEW YORK (DEC. 11) PR NEWSWIRE - Hughes Aircraft Company, a unit of GM Hughes Electronics (NYSE: GMH), today announced its entry into the multibillion dollar cellular communications market with new digital cellular products and services expected to revolutionize the way people communicate when away from their homes and offices.

The new venture, to be executed by Hughes Network Systems, Inc. (HNS), a Hughes subsidiary, includes:

-- New Cellular telephones capable of handling both analog and digital transmission.

-- New, state-of-the-art digital cellular networking and switching equipment that increases network capacity fifteenfold virtually banishing the three major problems which have plagued mobile telephone transmission to date -- static, loss of signal in passing from cell to cell, and failure to get a connection because of jammed relays.

-- Creation of a nationwide cellular services network providing "one-stop shopping" for purchasers of new cars and trucks from General Motors, parent company of GM Hughes Electronics.

"The systems announced today represent a significant step towards realizing the concept of Personal Communications Networking wherein individual users on a network can send and receive both voice and data transmissions by way of personal communication devices that recognize a 'personal' code number," Hughes Chairman and CEO Malcolm Currie said.

Pradeep Kaul, Executive Vice President of Hughes Network Systems, noted that the innovations announced exceed the new industry-wide goals recently approved which call for tripling the capacity of existing cellular networks. He said HNS' new proprietary technique called "Extended Time Division Multiple Access (E-TDMA)" which will increase capacity by a factor of 15 instead of only three will be introduced in 1991. Unlike other approaches under development, the HNS technique is fully compatible with the new digital cellular AMPS-D standards recently adopted by the industry. Working within the industry standards process, HNS intends to move the current digital standards forward to incorporate the E-TDMA technique.

Hughes Network Systems is the world's leading supplier of TDMA equipment, the core of the new AMPS-D digital standard approved by the Cellular Telecommunications Industry Association, and has more than 20 years experience as a major supplier of digital telecommunications networks.

HOUSTON (DEC. 11) PR NEWSWIRE - Tenneco Inc. (NYSE: TGT) today announced that its Tenneco Minerals unit has donated more than 100,000 acres of mineral rights to The Nature Conservancy, a non-profit organization dedicated to the protection of lands and water needed to preserve plants, animals, and natural communities representing the diversity of life on Earth.

Included in the donation were 81,000 acres of mineral rights on the Conservancy's Gray Ranch Preserve in southern New Mexico, and 20,000 acres of mineral reserves on the Sycan Marsh in Oregon. Both preserves were acquired by the Conservancy for their ecological importance.

The Gray Ranch is one of the most biologically diverse places in the United States. Flat grassland prairies of the Chihuahuan desert surround the forested watersheds of the Animas Mountain range, home to several imperiled species including the Ferruginous hawk, golden and bald eagles, pronghorn, and the ridge-nose rattlesnake.

The Sycan Marsh property in Oregon is waterlogged year round and provides habitat for migratory birds on the Pacific flyway as well as a number of native Oregon plant species. Areas such as Sycan Marsh are particularly important to protect because wetlands are diminishing at a rate of 400,000 acres a year.

"Tenneco is pleased to be able to support the efforts of The Nature Conservancy with this donation," said David R. Delling, president of Tenneco Minerals Company, at a ceremony at the Conservancy's headquarters in Arlington Va.

"We're sensitive to the environmental issues raised by our activities and we place a high priority on striking a realistic balance between our business operations and the expectations of society. It was a pleasure to have the opportunity to work with the Conservancy on guaranteeing the preservation of these two special habitats."

Tenneco acquired the Gray Ranch assets in 1967 through the Kern County Land Company acquisition. The Oregon properties were acquired through various transactions over an extended period of time.

"We applaud Tenneco's leading role in exploring new ways for the business and environmental communities to work together," said John C. Sawhill, president of The Nature Conservancy and past energy secretary under the Nixon, Carter, and Ford administrations.

"The job of protecting the country's natural areas is bigger than any one sector of society can undertake. Tenneco is proving that partnerships among

these sectors are the key to success."

HOUSTON (DEC. 11) PR NEWSWIRE - NaTec Resources, Inc. (NASDAQ: NATC) has announced an agreement in principle for the sale of the assets of AER-X, Inc. to a new subsidiary of Energy Management Associates, Inc. of Atlanta. NaTec would receive 10 percent ownership in the new subsidiary, plus additional compensation for which terms were not disclosed. The sale is subject to completion of due diligence and the negotiation and execution of definitive acquisition documents. AER- X is a wholly-owned subsidiary of NaTec and is the nation's foremost company specializing in emission credit trading.

In announcing the sale, Soc Christopher, chairman and CEO of NaTec, stated that, "The association with Energy Management Associates will allow AER-X to remain on the leading edge in the emission credit trading market while continuing to give NaTec access to the market and participation in its growth."

Energy Management Associates is the leading provider of planning software to the electric and natural gas utility industry and a highly regarded regulatory consulting firm. Energy Management Associates' PROMOD III(R) and PROSCREEN II(R) systems are used by electric utilities that comprise over 70 percent of the installed U.S. generating capacity. The company provides consulting services and the expert testimony necessary to support operational decisions and resource strategies before regulatory bodies and financial rating agencies.

NaTec is committed to the control of pollutants commonly associated with acid

rain. The company provides consulting engineering, injection system installation, operations and maintenance services, and processed sorbent supply. Primary markets are utility, industrial power generation, pulp and paper, refining and municipal solid waste.

PHILADELPHIA (DEC. 11) PR NEWSWIRE - Celutel Inc. (AMEX: CLU) announced today its operating results for its second fiscal quarter ended Oct. 31 1990.

Consolidated Second Quarter Results: During the company's second quarter ended Oct. 31, 1990, total operating revenue was approximately $1,898,500, a 201 percent increase over the 1989 corresponding quarter. For the first six months ended Oct. 31, 1990, total operating revenue was approximately $3,488,900, a 145 percent increase over the same period of 1989.

The net loss for the three months ended Oct. 31, 1990, was $2,174,600, a 4 percent increase compared to approximately $2,095,300 during the corresponding second period of 1989. For the first six months ended Oct. 31, 1990, the net loss was approximately $4,416,300, an approximate 41 percent increase over the same period of 1989. These increases reflect continued start-up expenses associated with the commencement of cellular operations in the Jackson, Biloxi and Pascagoula, Miss., systems. The Pascagoula cellular system became operational on Nov. 29, 1990.

Celutel Inc. develops and operates non-wireline cellular telephone systems serving market areas in the Rio Grande Valley of south Texas and in the states of Mississippi and West Virginia/Ohio.

NUTLEY, N.J. (DEC. 11) PR NEWSWIRE - Eighteen months after setting a target to reduce air emissions by 90 percent at its production facilities in the state by the end of 1992, Hoffmann-La Roche Inc. has made significant progress toward that goal, according to data the company filed with the U.S. Environmental Protection Agency (EPA) and the New Jersey Department of Environmental Protection (NJDEP).

Meanwhile, the New Jersey Chapter of the Sierra Club and the New Jersey Department of Environmental Protection praised Roche's efforts to achieve dramatic reductions in a short period of time

"The dramatic results are a testament to the company's commitment to reduce our impact on the environment by employing cost-effective and responsible initiatives in lowering emissions and exceeding the requirements of the Right-To-Know Law," said Irwin Lerner, president and CEO of Hoffmann-La Roche Inc., an indirect subsidiary of Roche Holding Ltd., the worldwide pharmaceutical and health care group based in Basle, Switzerland.

The reports filed with the U.S. EPA and NJDEP under the requirements of the Federal Superfund Amendments and Reauthorization Act (SARA), or Emergency Response and Community Right-To-Know Law, show a 64 percent decrease in fugitive emissions and a 48 percent decrease in vent-permitted emissions between 1987 and 1989 at the company's Nutley-Clifton manufacturing complex. Meanwhile, at the company's vitamin plant in Belvidere, one of the largest in the world, Roche reduced fugitive emissions by 79 percent.

As a result of the 90 percent air emissions reduction initiative, Roche Corporate Environmental & Safety Affairs last year established the Internal Nutley Emissions Reduction Team, or INERT, to tackle the vexing problem of fugitive emissions.

The Hoffmann-La Roche Nutley production facility produces a number of pharmaceuticals, vitamin intermediates, vitamins, beta carotene and biotechnology products.

Headquartered in Nutley, N.J., Hoffmann-La Roche is widely known for original research and development in the health care field. The company has produced numerous important prescription drugs and is a leader in biotechnology. Roche provides a wide range of diagnostic products and clinical laboratory services and is a major producer of pure bulk vitamins and medicinal products used in the food, pharmaceutical, cosmetic and animal health fields. In addition, the

company recently launched a new business that provides home infusion therapy for patients who can be treated outside of the hospital.

#90345p2023 12/11/1990 ~PR Newswire

SEATTLE (DEC. 11) PR NEWSWIRE - Orders by El Al Israel Airlines for four jetliners valued at about $425 million have been confirmed by Boeing Commercial Airplane Group, the company said today. The four include two 747-400s and two 757-200s. In addition, the airline has taken options on two more 747-400s.

These will be the airline's first 747-400s. Largest, most modern and longest-range of the Boeing family of jetliners, the 747-400 boasts technical advances in aerodynamics, structural materials and avionics plus passenger-pleasing interior designs. Capable of ranges up to 8,400 statute miles (13,518 km), the new aircraft consume 11 percent to 15 percent less fuel than 747-300s. To date, 31 airlines have placed 399 firm orders for the 747-400.

Moshe Katsav, Israeli Minister of Transport, said, "the Israeli government is pleased that El Al Israel Airlines has chosen the 747-400 to complement its existing Boeing fleet of airplanes." The airline currently operates four models of Boeing aircraft: the 737, 747-200, 757 and 767.

The two 757s made public today have been on order for some time. One was delivered in mid-November. In confirming the order and recent delivery, Rafi Harlev, president of El Al, said, "the Boeing 757 has become an important asset in El Al's fleet, having demonstrated maximum reliability and economy through daily performance. The acquisition of our fourth and fifth 757s backs up our confidence in this aircraft and expresses the satisfaction of our passengers who fly with El Al between Tel Aviv and European destinations."

The Boeing 757s are large, twin-engined, medium-to-long-range jetliners, capable of carrying from 176 to 230 passengers. They are unsurpassed in fuel efficiency and are amone? quietest airplanes flying. Total orders for the 757 are now 715 from 34 customers.

#90345p2029 12/11/1990 ~PR Newswire

CHICAGO (DEC. 11) PR NEWSWIRE - In a case certain to have significance for foreign companies doing business in the United States, Japanese-owned Quasar Company has been found guilty of discrimination against American employees by a U.S. District Court and ordered to pay nearly $2.5 million plus costs and attorney's fees to three former employees, it was announced today by Holleb & Coff attorneys for the plaintiffs. This is one of the first known cases where a Japanese company has been found guilty of discrimination of this kind.

Quasar Company, based in Franklin Park, Ill., is a division of Japanese-owned giant Matsushita Electric Corporation of America. Matsushita distributes consumer electronic goods and home appliances in the United States under the Quasar, Panasonic, and Technics brand names, and recently purchased MCA, Inc., a Hollywood production studio.

The court order, returned late last Friday, is the result of a civil case filed by Chicago-based law firm Holleb & Coff in 1987 charging discrimination on the basis of age and national origin.

Previously, in a 1988 ruling, a federal court jury returned a verdict for the plaintiffs and against Quasar for nearly $2 million because of Quasar's willful violation of the Age Discrimination in Employment Act (ADEA). The court doubled a portion of that award because of the willful nature of that discrimination.

"This is a significant decision for the business community. It sends a clear message for foreign-owned firms doing business in the U.S. that our markets are open to them, but they can't come here and discriminate against Americans " says Michael A. Reiter, a litigation partner at Holleb & Coff.

The recent judgment found Quasar in violation of Title VII of the Civil Rights Act of 1964 which makes it unlawful for an employer "to limit, segregate, or classify its employees...in any way...because of such individual's national origin."

Plaintiffs John Fortino, Carl Meyers and F. William Schulz were fired from their jobs at Quasar's Franklin Park facility in 1986 as part of a reorganization and 50 percent work force reduction.

Prior to this reduction, Quasar reportedly had 89 managerial employees (80 American and nine Japanese). Following the reorganization, Quasar employed 23 managerial staff (14 Americans and nine Japanese). While 57 American

managerial employees lost their jobs, none of Quasar's nine Japanese managers were terminated. The evidence showed that non-Japanese managerial staff were excluded from management meetings to discuss the reorganization.

#90345p2038 12/11/1990 ~PR Newswire

BLOOMINGTON, MINN (DEC. 11) PR NEWSWIRE - Allercare (NASDAQ: ALLR) announced today that revenues for the first half of fiscal 1991 increased 11 percent to $3,840,137, up from $3,450,732 for the same period last year. Revenues for the second quarter ended Oct. 27, 1990 were $1,253,470 down from $2,140,037 for the second quarter of last year. The decrease was due to a number of reasons including the sale of the PROTEX condom business, relocation of the business to Minnesota, cashflow constraints, and an unusual level of returns and allowances.

Allercare also announced a net loss in the first half of fiscal 1991 of $575,912, or $.14 per share versus a net loss last year of $306,313, or $.08 per share. The net loss for the second quarter was $582,833, or $.14 per share versus a net loss last year of $89,108, or $.02 per share. The loss was caused by decreased revenues, an increased provision for obsolete inventory, and higher than normal marketing expenses.

Allercare is presently waiting for a verdict in the antitrust action brought by a competitor seeking to reverse the sale of its condom business to Schmid Laboratories. The sale was completed on Sept. 21, 1990. However, the $3.8 million sale proceeds remain in escrow until the antitrust action is resolved.

Allercare returned its offices to Minnesota in October 1990. As previously announced, Sigfred W. Peck was recently elected president and CEO following the resignation of Steven E. Elliott. Peck was previously CFO.

CHICAGO (DEC. 11) PR NEWSWIRE - JG Industries Inc. (NASDAQ: JGIN) announced today that net sales for its third quarter ended Oct. 27, 1990 were $47,221,000, as compared with $52,819,000 in the prior year. Stores which were sold or closed accounted for this decline, as same store sales increased .8 percent. The net loss for the quarter was $54,000 versus net income of $666,000 in the prior year. Prior year results include a $3.3 million gain from the sale of the Barker Bros. division, while current year results include

a gain from debt restructuring of $1 million. The loss applicable to common stock (after preferred stock dividends) was $.06 per share in the current year while income was $.11 per share in the prior year.

The year to date net loss of $1,136,000 compares with the prior year net loss of $2,698,000. The net loss applicable to common stock was $.35 per share in the current year and $.46 per share in the prior year.

Year-to-date net sales were $144,886,000 as compared with $179,371,000, in the prior year. Comparable store sales increased 5.2 percent, as stores which were sold or closed accounted for the overall decline.

JG Industries Inc. is a Chicago-based retailing concern that operates through its various subsidiaries 11 Goldblatt's department stores in Illinois and Indiana, 10 Huffman Koos furniture stores in New Jersey and New York, and 137 speciality retail shoe stores nationally.

#90345p2042 12/11/1990 ~PR Newswire

NORWOOD, Mass. (DEC. 11) PR NEWSWIRE - Analog Devices (NYSE: ADI) today announced sales of $485.2 million for the year ended Nov. 3, 1990, an increase of 7.0 percent over fiscal 1989. Sales for the fourth quarter were $138.5 million, including $20.1 million in revenues from the Precision Monolithics Division (PMD), which was part of Analog Devices for the last 12 weeks of the fiscal year.

The company reported a net loss of $12.9 million for the year, compared to the previous year's net income of $27.9 million. The loss per share was 28 cents vs. earnings per share of 58 cents for fiscal 1989. The fourth quarter's net loss of $23.6 million included an $18.5 million restructuring charge and a previously-announced $12 million reserve taken against the ADE venture capital portfolio that reduces the carrying value of that portfolio to a level the company believes approximates its near-term liquidation value.

Gross margin for the fourth quarter for Analog Devices without the Precision Monolithics Division was 50.8 percent of sales, essentially the same as that achieved for the first three quarters of fiscal 1990. Consolidated gross margin of 47.0 percent was negatively impacted by PMD's gross margin ratio, which absorbed a nonrecurring $3.0 million inventory valuation adjustment resulting from the acquisition. Analog's overall gross margin is expected to recover in the first quarter as cost-cutting measures from the restructuring begin to take effect.

The operating expense ratio for the fourth quarter, exclusive of restructuring charges, was 44.4 percent, vs. the third quarter's 45.1 percent. This

included a $1.3 million adverse impact on operating expenses from the weakening dollar.

Operating profit for the fourth quarter was 4.8 percent of sales, exclusive of the $3.0 million inventory adjustment and the $18.5 million restructuring charge. With these nonrecurring charges included, Analog posted a $14.8 million dollar operating loss for the quarter.

Joseph Hinchey, senior vice president-finance, said, "At the time we acquired Precision Monolithics in August we indicated that restructuring charges and other nonrecurring expenses in the fourth quarter would likely total $12 to $15 million. To accommodate the costs associated with our recently-announced organizational changes and other downsizing actions we increased that charge to $18.5 million. We believe that all of the restructuring costs associated with both the integration of PMI and other organizational restructuring that will occur in fiscal 1991 are included in the fourth quarter charge.

"The savings to be realized from the actions anticipated by the fourth quarter restructuring charge will be seen both in fixed manufacturing -- which will benefit gross margin -- and in operating expenses. We expect that the overall favorable impact on operating profit will reach an annual level of about $24 million when fully implemented in mid-fiscal 1992.

"I would like to emphasize," concluded Hinchey, "that Analog remains in very strong financial condition. Our debt-to-equity ratio at year end was 10 percent, even after the $60.5 million cash purchase of Precision Monolithics and the purchase of $14 million of Analog Devices common stock over the course of the year."

Analog Devices is a leading manufacturer of precision high-performance integrated circuits used in analog and digital signal processing applications. The company also manufactures board-level products used in computerized data acquisition and measurement and control applications. The company employs approximately 5,700 people worldwide, and has manufacturing facilities in Massachusetts, California, North Carolina, Ireland, Japan, the Philippines and the United Kingdom.

MOUNTAIN VIEW, CALIF. (DEC. 11) PR NEWSWIRE - Silicon Graphics Inc. (NYSE: SGI) announced today that the company's IRIS POWERVISION(TM) 4D/340VGX was used to interpret and visualize data during the Galileo Earth flyby that took place on Dec. 8, 1990.

Bound for a Jupiter arrival in 1995, Galileo is a NASA spacecraft mission designed to study the planet's atmosphere, satellites and surrounding magnetosphere. In order to reach Jupiter, Galileo is employing a series of gravity assists, one by Venus and two by Earth (Dec. 8, 1990 and 1992). These gravity-assist encounters provide the opportunity for scientists to gather data from the Earth and the Earth-Moon system from deep space.

During the Earth flyby, scientists will use Silicon Graphics' 4D/340VGX to help visualize their research. Specifically, the Earth's magnetosphere data will be transmitted from Galileo to the 4D/340VGX and overlayed on a 3D spherical image of the Earth for realistic representation of the data. The advanced capabilities of the Silicon Graphics graphics system, which includes full scene anti-aliasing and texture mapping, will enable more precise interpretations of the data gathered.

"NASA was our first customer years ago and is a leading edge Silicon Graphics user. Our goal is to continue to partner with top research and development groups, such as NASA, and remain an important part of data-gathering experiments like the Earth flyby," stated Tom Jermoluk, vice president and general manager, Silicon Graphics Advanced Systems Division.

The Galileo Project is managed for NASA's Office of Space Science and Applications by the Jet Propulsion Laboratory. The Galileo Project mission is to reach Jupiter in December 1995, send a scientific probe (provided by NASA Ames Research Center) into the planet's atmosphere, and observe Jupiter, its satellites and magnetosphere from a series of orbits for nearly two years.

Silicon Graphics Inc. is the leading manufacturer of high performance graphics systems, servers and software for visual processing applications. The

company's products, which range from advanced project supercomputers to low-end desktop models and PC graphics subsystems, are used by engineers, scientists and creative professionals in design, analysis, manufacturing and simulation.

IRIS is a registered trademark and IRIS POWERVISION is a trademark of Silicon Graphics Inc.

ALEXANDRIA, VA (DEC. 11) PR NEWSWIRE - Industry veteran Robert E. Pickeral has joined J.E. Robert Companies as senior vice president and regional manager announced Donald W. Crocker, president and chief operating officer. Pickeral will oversee J.E. Robert Companies' eastern operations, based out of the Alexandria headquarters.

"Bob brings a strong background in the management and disposition of troubled assets to the J.E. Robert Companies' team," said Crocker. "We are excited to have him on board, and expect his experience and skills to immediately impact our burgeoning East Coast operations."

Pickeral served for over 30 years with Riggs National Bank in Washington before leaving earlier this year to form his own real estate consulting firm.

With Riggs National Bank, Pickeral rose to executive vice president in charge of commercial real estate. In this capacity at Riggs, Pickeral was responsible for approximately $2 billion in commitments and assets.

Pickeral's career with Riggs saw him rise from a senior officer trainee through middle management positions before culminating in his executive vice president position. He was directly responsible for the construction lending function of the bank for over 25 years, managing strategic planning, marketing economic analysis, and risk assessment, while setting policy and procedures for the division.

Pickeral holds a bachelor of arts degree in economics from the University of Virginia and has continued graduate studies in international economics at George Washington University. He has served on the National Loan Committee of the Minority Contractors Assistance Project; as a director of the Washington Urban League, and as a director of the District of Columbia Housing Industry Corporation. Pickeral serves or has served on legislative committees for the D.C. Bankers Association, the Washington Board of Realtors, the Metropolitan Washington Mortgage Bankers Association, and the Metropolitan Washington Board of Trade. Pickeral is married with two children and currently resides in McLean, Va.

J.E. Robert Companies is one of the largest asset workout companies in the country and is currently responsible for the management or oversight of nearly $10 billion in assets. Headquartered in Alexandria, the firm has regional offices covering every major national market.

NEW YORK (DEC. 11) PR NEWSWIRE - Pfizer Inc. (NYSE: PFE) announced today that it has acquired Strato Medical Corporation of Beverly, Mass., a maker of vascular access products. Terms were not disclosed.

Strato, founded in 1984 and privately owned, develops, manufactures, and markets plastic and metal infusion ports and external catheters used to deliver chemotherapy, antibiotics, and other drugs, primarily for cancer and AIDS patients.

Pfizer also announced that Strato Medical Corporation will report to Richard J. Meelia, president of Infusaid Inc. Infusaid, a subsidiary of Pfizer's Hospital Products Group, based in Norwood, Mass., makes implantable pumps that regulate drug flow.

Meelia said Strato's "physician preference products are experiencing strong growth and fit well with Infusaid's strategic goals." Strato, which markets

its products to hospitals, also "brings a significant research and development component to Infusaid," Meelia said.

Pfizer Inc. is a diversified research-based company with businesses in pharmaceuticals, hospital products, animal health, consumer products, specialty chemicals and specialty minerals. The company reported sales of approximately $5.7 billion for 1989.

HEWLETT, NY (DEC. 11) PR NEWSWIRE - In a move that further bolsters Anchor Savings Bank's commitment to become a prime provider of residential mortgages and consumer loans, Chairman and CEO James M. Large, Jr. today announced the appointment of Charles W. Sewright, as president and CEO of Anchor Mortgage Services, Inc., the bank's wholly owned mortgage banking subsidiary based in New Jersey.

Since 1987, Sewright has served as president and CEO of Marine Midland Mortgage Corporation with division responsibilities for Marine Midland's residential mortgage banking business nationwide, including the origination, servicing and secondary marketing activities for retail and wholesale first and second mortgage products. Under Sewright's leadership, Marine Midland was ranked as the largest wholesale mortgage bank in the United States as of December 1989 and the 14th largest mortgage servicer among all mortgage banking firms nationwide.

In announcing Sewright's appointment, Large stated, "In this, Anchor's 'Year of the Loan', we are very excited that Chuck Sewright has decided to come aboard. His outstanding record of achievement at Marine Midland and his broad management experience will provide Anchor with the lending expertise and leadership necessary, if we are to reach our expressed goal of being the preeminent provider of financial services to the consumer."

A contributing author in the first "Asset Securitization Handbook," Sewright holds a B.S. in accounting and an M.B.A. from California State University at Long Beach.

Sewright is a member of the board of trustees of Medaille College in Buffalo; a member of the Fannie Mae National Advisory Board; a member of the Mortgage Bankers of America Board of Governors and Legislative Committee; and vice chairman of the Mortgage Bankers of America State and Local Liaison Committee.

Anchor Savings Bank (NASDAQ: ABKR) is among the 25 largest thrift institutions in the nation with deposits of more than $8.6 billion. It operates branches

in metropolitan New York/New Jersey, upstate New York, Georgia and Florida.

ALEXANDRIA, VA (DEC. 11) PR NEWSWIRE - Richard O. Haase has joined J.E. Robert Companies as vice president and senior review appraiser, announced Donald W. Crocker, president and chief operating officer, today. Haase will be responsible for all facets of the companies' appraisal division, J.E. Robert Valuation Services, Inc., and will be based out of J.E. Robert Companies' Alexandria headquarters.

Haase comes to J.E. Robert Companies from the Holladay Corporation, a real estate management concern which operates and manages approximately 3,500 apartment units and a number of commercial properties in five states and the District of Columbia. Haase served as a vice president with Holladay, and was responsible for the acquisition of a wide range of commercial properties in addition to appraisal consultation activities for Holladay clients.

Prior to joining the Holladay Corporation in 1983, Haase served the Reagan Administration as Commissioner of Public Buildings Service for the General Services Administration. Haase was responsible for the oversight and management of over 8,600 federally owned and leased buildings throughout the country. Haase administered an annual budget in excess of $2 billion, and

testified regularly before both the Senate and House Public Works Committees.

Previously, Haase headed up his own appraisal and consultation firm, Richard O. Haase, Inc., specializing in real estate investment and appraisal consulting services to a wide range of major financial institutions.

Haase received a bachelor of science degree from the United States Naval Academy, and served with the Strategic Air Command, attaining the rank of captain. He is a member of the American Institute of Real Estate Appraisers, the Washington Board of Realtors, and the National Association of Realtors. Haase resides in the District of Columbia.

J.E. Robert Companies is one of the largest asset workout companies in the country and is currently responsible for the management or oversight of over $10 billion in assets. Headquartered in Alexandria, the firm has regional offices covering every major market in the nation.

PITTSBURGH (DEC. 11) PR NEWSWIRE - Directors of Consolidated Natural Gas Company (NYSE: CNG) today raised the quarterly dividend to 47 cents a share from 46 cents a share and approved a capital budget of $501 million for 1991, up from projected 1990 spending of approximately $390 million.

The increase in the dividend, to an annual rate of $1.88 a share, marks the 26th consecutive year in which CNG has raised its payout to shareholders. The new dividend is payable Feb. 15, 1991, to shareholders of record on Jan. 15, 1991.

Included in the $501 million of planned expenditures are $131 million for exploration and production programs, $207 million for interstate gas transmission and storage projects, and $162 million for gas distribution projects. Subject to federal regulatory approval, CNG will begin construction in 1991 on the first phase of a two-year program to expand pipeline capacity by 350 million cubic feet a day from Lebanon, Ohio, on the western edge of Consolidated's interstate transmission system, to the Leidy storage field in central Pennsylvania, where CNG connects to pipelines serving the East Coast. Construction will also begin in 1991 on a 120-mile intrastate pipeline to be operated by CNG's Virginia Natural Gas, Inc., subsidiary that will connect the CNG system west of Washington, to the Richmond and Norfolk areas.

Consolidated Natural Gas Company is one of the country's largest producers, transporters and distributors of natural gas. Its primary marketing areas for natural gas are in Ohio, Pennsylvania, Virginia, West Virginia, New York and other states in the Northeast. The company explores for and produces gas and oil throughout the United States and in Canada.

WICHITA, KAN. (DEC. 11) PR NEWSWIRE - Fourth Financial Corp. (NASDAQ: FRTH) Chairman Jordan L. Haines announced today that he will retire from the company on June 30, 1991. The influential Kansas banker has been a leader in shaping the state's banking industry while building the BANK IV franchise. Fourth Financial, a $4.2-billion multi-bank holding company, is Kansas' largest financial services company.

Darrell G. Knudson, vice chairman and director of the Minneapolis-based First

Bank System Inc., was elected vice chairman of Fourth Financial by the company's board of directors today, effective Dec. 31, 1990. The 53-year-old executive was also named to the board of directors. Knudson will become chairman and chief executive officer upon Haines' retirement.

As chairman of the board of Fourth Financial and BANK IV Wichita for over seven years, Haines' name is synonymous with Kansas banking and civic leadership. A native Kansan, Haines began his banking career in 1957 with the First National Bank of Arizona. He joined BANK IV Wichita in 1962 as vice president and manager of the Business Development Department. After holding several management positions, Haines was elected president of Fourth Financial and BANK IV Wichita in 1969. In 1983, he was elected chairman of the board. Since 1969, the BANK IV holding company has grown from a $290-million one-bank holding company to a $4.2-billion 12-bank holding company. After his retirement, Haines will remain a member of the holding company's board of directors and executive committee.

Knudson's 32-year banking career with First Bank System Inc., a $20-billion bank holding company with over 9,000 employees serving a seven-state region, began with First Bank in South Dakota in 1958. He is a graduate of the University of Michigan's Management program and the Harvard Business School's Advanced Management program. The South Dakota native attended Augustana College in Sioux Falls.

Headquartered in Wichita, Fourth Financial owns and manages the BANK IV network of commerical bank subsidiaries throughout Kansas. The company's nonbank subsidiaries include a consumer lending company and a credit life insurance company. Its common stock is traded in the national over-the-counter market. The NASDAQ symbol is "FRTH."

TOPEKA, KS (DEC. 11) PR NEWSWIRE - The Kansas Power and Light Company (NYSE: KAN) and the Kansas Gas and Electric Company (NYSE: KGE) today jointly filed an application with the Federal Energy Regulatory Commission (FERC) to approve their merger.

The completion of the merger is subject, among other things, to obtaining all necessary governmental and regulatory approvals and consents for merger. KPL previously filed an application with the Missouri Public Service Commission on Nov. 21, 1990, and KPL and KG&E jointly filed with the Kansas Corporation Commission on Nov. 20, 1990, to approve the merger. Approval of the merger by the KG&E shareholders and approval for an increase in authorized common shares by KPL shareholders are also necessary.

Under the terms of the merger agreement, unanimously approved by the boards of both companies, each share of KG&E common stock will be converted to $32 in cash or approximately $32 in value of KPL common stock pursuant to a cash election merger. KG&E will operate as a wholly owned subsidiary of KPL and maintain its Wichita, Kan., headquarters.

KPL provides natural gas service throughout much of Kansas, western Missouri, and northeastern Oklahoma and electric service to northeast and central Kansas. It has about 1.06 million gas customers and 300,000 electric customers. It employs 4,600 people and is headquartered in Topeka. KG&E, an electric utility employing 1,330 people, serves more than 250,000 customers in southcentral and southeast Kansas.

#90345p2097 12/11/1990 ~PR Newswire

WILKES-BARRE, PA (DEC. 11) PR NEWSWIRE - In keeping with plans announced in November, First Eastern Corp. (NASDAQ: FEBC) today announced it will make a $38 million special provision for loan losses in the fourth quarter.

This provision will result in a loss after tax credits of $16 million or between $1.60 and $1.75 a share for the fourth quarter. That loss will bring results for the year into a range of a profit of approximately $.05 to a loss of approximately $.10 per share.

The need for this special provision, announced Nov. 21, is the result of a combination of factors. These include a reappraisal of First Eastern's loan portfolio in the light of the national downturn in the economy, an accelerating decline in Pocono real estate values and tighter regulatory standards as revealed in a regularly scheduled examination by the office of

the Comptroller of the Currency conducted from October to early December.

"The Comptroller's examination surprised us with its tougher standards and severity," said Richard M. Ross, Jr., chairman and chief executive officer of First Eastern Corp. "But after considering the general economic climate and the situation in the Poconos, we decided to make an even larger special provision than the $30 million that the examiners requested. This decision will put us in a stronger position going forward into 1991."

The additional $8 million will be used to write down nonaccrual loans which will equal about $75 million after the write down. Loan loss reserves should equal about 2 percent of loans outstanding at year end. This is a considerable increase from the 1.11 percent at year end 1989.

Despite disappointing results in 1990, First Eastern Corp. remains a strongly capitalized, conservatively managed company, according to Ross. Equity to assets is projected to be 6.7 percent at the end of the quarter. The total risk based capital will be just under 10 percent and Tier 1 capital will be 8.3 percent. All of these ratios are substantially higher than proposed regulatory requirements and are considered favorably comparable to peer averages.

First Eastern expects to return to profitability in the first quarter of 1991. While earnings will be under pressure because of the economic outlook and the level of nonperforming assets, measures taken to control operating costs, many of which were initiated before the special provision was requested, will help.

First Eastern Corp. is a $3 billion bank holding company which owns two banks, First Eastern Bank and Peoples First National Bank and Trust Company, Hazleton with a total of 64 offices all located in northeastern Pennsylvania. It also owns several relatively small subsidiaries which provide related financial services operating either within the same service area or in locations which are closely adjacent to it.

#90345p2101 12/11/1990 ~PR Newswire
MINNEAPOLIS (DEC. 11) PR NEWSWIRE - A Minnegasco affiliate, Arkla, Inc., has been recommended by the University of Minnesota finance and physical plant staff to generate steam heat for the University for the next 25 years.

If approved by the Board of Regents, the project would replace the present coal-fired equipment with boilers burning natural gas. The conversion and upgrading of the heating plants would take three years and be completed in 1994.

The proposal guarantees fuel prices for 15 years and guarantees capital costs

for 25 years, limiting the University's risk of uncertain future fuel costs and construction cost overruns.

The conversion and operation of the plants will be managed by Minneapolis Energy Center, Inc. (MECI), which manages the Minneapolis Energy Center. That district heating plant supplies steam heat to three-quarters of the downtown Minneapolis core, or 30 million square feet of commercial and office space.

(The proposal the staff recommended was originally submitted by Diversified Energies, Inc. (DEI), then Minnesgasco's parent company. Since a Nov. 29 merger, MECI became a subsidiary and Minnegasco became an operating unit of Arkla, Inc. (NYSE: ALG), of Shreveport, La., one of the nation's largest diversified energy companies.)

The result of the conversion to natural gas, according to University and Arkla officials, would be cleaner air, the elimination of coal- storage piles at both campuses and of the necessity of burying coal ash in already overburdened landfills.

The University's three coal-fired plants -- two on the Minneapolis river bank and one on the St. Paul campus -- have boilers with an average age of 35 years. A new natural gas system will increase fuel efficiency while greatly reducing such air pollutants as nitrogen dioxide, sulfur dioxide, carbon monoxide, lead and particulate matter. Arkla estimates that carbon dioxide and sulfur dioxide emissions -- those responsible for the greenhouse effect and acid rain -- will be cut by more than half over the old plants.

CONTACT: Kristine Sundberg of Minnegasco, 612-342-4833; or Bruce Benidt of Mona, Meyer & McGrath, 612-339-6368, for Minnegasco

#90345p2102 12/11/1990 ~PR Newswire

PLAINS, PA (DEC. 11) PR NEWSWIRE - Children's Discovery Centers of America Inc. (NASDAQ: CDCRA) and Magic Years Child Care and Learning Centers Inc. (NASDAQ: KIDS), two leading providers of child care services, today announced that they have executed a merger agreement pursuant to which Magic Years will become a wholly owned subsidiary of CDC.

Subject to obtaining stockholder approvals and the satisfaction of certain other conditions, the merger is expected to be consummated in the latter part of the first quarter of 1991. As a result of the merger, each share of Magic Years common stock and preferred stock (on a common stock equivalent basis) will be exchanged for .4925 of a share of CDC Class A common stock.

CDC operates 59 day care centers, with the majority located in California, the Midwest and New England. Its revenues for the year ended Dec. 31, 1989, and nine months ended Sept. 30, 1990, totalled approximately $15,720,000 and

$12,904,000, respectively.

Magic Years currently operates 33 child care centers, which are located principally in Pennsylvania and also in other mid-Atlantic states. It is a leader in employer-based child care services, with particular emphasis on furnishing day care for hospital employees. Its revenues for the year ended Dec. 31, 1989, and the nine months ended Sept. 30, 1990, totalled approximately $7,830,000 and $5,993,000, respectively.

Richard A. Niglio, president and chief executive officer of CDC, said, "The merger makes a great deal of sense strategically and should substantially enhance CDC's prospects for growth and profitability by enabling both CDC and Magic Years to achieve substantial cost efficiencies. In addition, the merger will accelerate CDC's acquisition program into the Magic Years' markets, which are proximate to CDC's growing base in the Northeast. Also, the merger will significantly reinforce CDC's competitive position in the important emerging market for employer-subsidized child care centers."

The merger agreement contemplates that, immediately following consummation of the merger, CDC will distribute to the stockholders of CDC (including stockholders of Magic Years who exchange their shares pursuant to the merger) rights to purchase additional shares of CDC Class A common stock on a pro rata basis at a price not to exceed $1.50 per share. The maximum net proceeds which CDC is seeking to raise from this rights offering is $5 million. The rights will be exercisable for a period not to exceed 45 days after issuance. Certain of CDC's institutional stockholders, as well as Magic Years' largest stockholder, have committed to purchase an aggregate of $1,350,000 of CDC stock through exercise of the rights.

Paul J. Reilly, president and chief operating officer of Magic Years, said, "The merger and subsequent rights offering will give Magic Years' shareholders ownership in a company with the human resources and capital necessary for continued growth in the employer-related child care market."

In addition, CDC announced today that is has completed the sale of its wholly owned subsidiary, Mary Moppet's Day Care Schools Inc., to American Child Care Centers Inc., a privately owned operator of child care centers in Los Angeles. The sale, which had been authorized by the CDC board of directors in July of this year in response to continuing losses incurred by the subsidiary, provides for payment of the purchase price in a combination of cash and a note.

BALTIMORE, MD (DEC. 11) PR NEWSWIRE - A Hackensack, N.J. businessman was sentenced to two years imprisonment and two years of supervised parole for his role in an international conspiracy to export and divert a radar tracking system used by the U.S. military to Czechoslovakia. The WJ-38000 ELINT radar system is used to identify and locate enemy aircraft.

U.S. Customs Special Agent in Charge of the Baltimore office, Donald G. Turnbaugh and Baltimore U.S. Attorney Breckenridge L. Willcox announced that Saul M. Lieberman, 54 years old, was sentenced on Friday, Nov. 18, 1990 by the Honorable John R. Hargrove in Baltimore, Md.

In addition, Herbert Hoffman, a German citizen and Lieberman's co-conspirator, was today given the same sentence.

In a plot that began in October 1988, Lieberman and Hoffman attempted the export and diversion of the radar system. Customs special agents learned of the plot and worked undercover for 18 months to stop it.

HOLLAND, MICH (DEC. 11) PR NEWSWIRE - Donnelly Corporation (AMEX: DON) of Holland, and Optical Shields, Inc. of Menlo Park, Calif., today announced that they have reached agreement on a joint venture to commercialize surface mode liquid crystal technology for eye protection.

The new joint venture will be named OSD Envizion Company. It will be a long-term venture which will ultimately be owned on a 50/50 basis by both parent companies. The venture will initially operate from a part of the Optical Shields' facility in Menlo Park.

OSD Envizion has begun producing sophisticated electronic welding helmet lenses which will automatically darken in response to the flash of a welding arc in only a few millionths of a second. The lens utilizes surface mode LCD technology. This new patented technology allows these lenses to respond about 1,000 times faster than electronic welding lenses based on conventional twisted nematic liquid crystal technology and effectively protects the eyes of the welder without having to flip the helmet down over the eyes before beginning to work. The lens will also lighten immediately after welding work is completed.

Donnelly has been working closely with Optical Shields for a number of months to assess the market for welding helmet lenses and to develop this agreement. The world market for electronic welding helmet products is currently estimated in excess of $50 million and is growing rapidly. The new venture has already received orders for lens components and has begun manufacturing and supplying

product.

Donnelly Corporation is an international company dedicated to serving customers around the world with high-quality fabricated, molded and coated glass products for the transportation and electronics markets. The company has been based in Holland, Mich., since 1905, and today operates from 12 separate facilities in western Michigan.

Donnelly is publicly held and is also recognized as a leader in the application of participative management practices.

Optical Shields is the leading innovator of liquid crystal-based light control systems. The company was founded in 1987 by James L. Fergason to commercialize his pioneering work in high-speed surface mode liquid crystal cells and to undertake additional research and development activities involving liquid crystal-based optical protection devices.

TUCSON, ARIZ. (DEC. 11) PR NEWSWIRE - Delta Air Lines (NYSE: DAL) set two all-time boarding records at Tucson International Airport during the month of November.

More passengers boarded Delta flights at Tucson during November than any other month in its history of service here. The 17,663 passenger total surpassed the old monthly record set in March 1990 by over 400 passengers.

Delta also set a new daily boarding record on Sunday, Nov. 25, as 1,045 passengers flew Delta from Tucson. That broke the old record of 935 passengers set just a month earlier on Oct. 28, 1990.

"These new records continue to demonstrate that the community is not only aware of Delta's expanded schedule here, but also has discovered our unique style of passenger service," pointed out Steve Tipsword, Delta's district marketing manager. "We also recognize the impact area resorts have had as they worked with Delta in establishing Tucson as a premier resort destination."

Tipsword noted that Delta set the new records during a period when the airport's overall boardings were down.

NEW YORK (DEC. 11) PR NEWSWIRE - Peter T. McHugh, a veteran of 25 years in the airline business, has been elected chief operating officer of Pan American World Airways, Thomas G. Plaskett, chairman and chief executive officer of Pan Am and its parent company, Pan Am Corporation (NYSE: PN), said today.

McHugh, formerly executive vice president-marketing and sales for Pan Am, will retain his position as executive vice president-office of the chairman at the parent company.

In his new position with the airline, McHugh will be responsible for all passenger and cargo marketing, sales reservations, airline planning and scheduling, field services, inflight and dining services, flight operations, aircraft maintenance and engineering, and properties and facilities.

"The naming of Peter as chief operating officer will allow us to better coordinate all of the activities involved in the day-to-day operations of the airline, and to accelerate the progress we have made in the past few years in improving the marketing and operations of the company," said Plaskett. "Peter's many years of experience in the industry make him well qualified for this challenge," Plaskett added

Also reporting to McHugh are Pan Am Corporation's two other airline subsidiaries, Pan Am Shuttle and Pan Am Express. He serves on the boards of directors of both.

McHugh, 43, first joined Pan Am in March 1988 as senior vice president-marketing. He previously worked for more than 20 years at Trans World Airlines in various positions, including that of senior vice president-marketing and sales.

McHugh joined TWA in 1965 as a part-time reservations agent and continued to work part-time while he completed his education and served in Vietnam in the U.S. Army Infantry as a first lieutenant. He became a full-time employee at TWA as a reservations procedure analyst.

He later held positions in yield management, travel agent marketing, airline planning and passenger services. In 1980, he was elected vice president-passenger service planning and later served as vice president-passenger marketing, vice president-international division and senior vice president-marketing and sales. In October 1986, he was named to develop and implement the concept of a 24-hour cable television network focused on worldwide travel.

NEW YORK (DEC. 11) PR NEWSWIRE - Angio-Medical Corp. today announced the signing of a license agreement granting Difa Cooper S.p.A., a pharmaceutical company based in Italy, rights to manufacture and market skin care products utilizing Angio's patented O.L. Complex in the European Economic Community, Switzerland and Austria. Terms of the agreement were not disclosed.

As a result of a serious working capital problem, the company's business activities are limited to:

1 -- Selling raw material to Amway and Synchronal Corp. for the manufacturing and distribution of the company's hair product; and

2 -- Seeking additional working capital through the negotiation of license agreements.

The company's entire staff, which has been reduced to three people, devotes its full time to these efforts.

The company has ceased activities related to any new product development. Due to the company's lack of sufficient funds, it has been unable to satisfy the reporting requirements under the Securities Exchange Act of 1934. If additional financing is not obtained, the company will not be able to continue operations beyond March 1, 1991.

DENVER (DEC. 11) PR NEWSWIRE - AMDURA Corp. (NYSE: ADU), which recently filed a proposed plan of reorganization under Chapter 11 of the Bankruptcy Code, today announced a net loss of $214.6 million for its fiscal year ended Dec. 31 1989, including a loss from discontinued operations of $156.4 million and a loss from continuing operations of $58.2 million. The loss from continuing operations includes nonrecurring expenses of $19.4 million, interest expense of $35 million, with all interest expense being allocated to continuing operations, and all corporate expenses for the consolidated business, offset

by operating profits of $10.3 million from the company's 100-percent owned manufacturing businesses. The loss from discontinued operations includes a write-off of intangibles of $125 million. AMDURA's continuing businesses reported total revenues of $160.2 million for the period. For the fiscal year ended Nov. 30, 1988, AMDURA had net income of $6.6 million in total revenues of $130.7 million.

AMDURA's 100-percent owned manufacturing businesses, The Crosby Group Inc. ("Crosby") and The Harris Waste Management Group Inc. ("Harris"), reported operating profits of $10.3 million in 1989, before corporate, non-recurring and interest expenses, and have been operating profitably in 1990, although at reduced levels from comparable 1989 results.

AMDURA's 57-percent owned subsidiary, Vac-Tec Systems Inc. ("Vac-Tec"), reported a net loss of $3.3 million in 1988 and $2.7 million in 1989. Vac-Tec has reported a net loss of $917,000 for the first three quarters of 1990.

The company's results of operations for the year ended Dec. 31, 1989, have been adversely affected by, among other things, 1990 events, which under Generally Accepted Accounting Principles, are required to be reflected in AMDURA's 1989 consolidated financial statements.

On April 2, 1990, AMDURA Corp. and its hardlines distribution subsidiaries, including AMDURA National Distribution Co. and Coast to Coast Stores Inc., which was acquired in December 1988, filed for protection under Chapter 11 of the federal bankruptcy code in the United States Bankruptcy Court, Denver. AMDURA's manufacturing subsidiaries, The Crosby Group, The Harris Waste Management Group and Vac-Tec Systems, were not included in the filing and are not in bankruptcy.

In order to realize the value of its hardlines distribution businesses, Coast to Coast Stores and AMDURA National Distribution, subsequent to the bankruptcy filing in April 1990, the company announced its decision to dispose of these businesses. AMDURA sold significant portions of their assets in August and October, 1990, respectively.

On Nov. 30, 1990, AMDURA filed a plan of reorganization with the United States Bankruptcy Court in Denver, under which it proposes to emerge from Chapter 11 and be reorganized in a manner allowing it to retain Crosby, Harris, Vac-Tec and certain other assets.

With the filing of the proposed plan of reorganization, Crosby, Harris, and Vac-Tec have been reclassified and are shown as continuing operations. The company previously had contemplated the divestiture of all these units and had shown them as discontinued in its financial statements for the third quarter of 1989.

The Crosby Group, headquartered in Tulsa, Okla., is a leading manufacturer of

fittings for wire rope and chain. The Harris Waste Management Group, headquartered in Minneapolis, is a leading manufacturer of equipment for the recycling and waste management industry. Vac-Tec Systems, headquartered in Boulder, Colo., manufactures equipment used to apply decorative and industrial coatings.

MIAMI (DEC. 11) PR NEWSWIRE - Robert L. Gould, a pilot with more than 25 years experience in airline operations, was today named president and chief operating officer of Eastern Airlines.

The appointment of Gould, 52, was made by Eastern Chief Executive Martin R. Shugrue Jr. Gould was introduced to Eastern's senior management today and assumed his new responsibilities immediately.

Gould comes to Eastern from Pan American World Airways where he was senior vice president, operations.

At Pan Am, Gould had senior responsibility for the airline's maintenance and engineering operations, logistics, inventory management, flight operations, purchasing, system control and environmental affairs.

Throughout his career at Pan Am, which began as a line pilot in 1965, Gould achieved a number of "firsts" in the airline industry.

Having been elected head of the pilots union at Pan Am in 1982, Gould successfully structured and implemented the first employee stock ownership plan (ESOP) in the industry. As a result of this accomplishment, Gould was named to serve on Pan Am's board of directors, the first labor representative to hold such a position in the airline industry.

After taking a management position with Pan Am in 1986, Gould was named senior vice president Airline and Strategic Planning in 1987. In this capacity, he developed Pan Am's first comprehensive long range strategic plan that, among other things, led to the first-ever utilization of fuel efficient, twin engine aircraft on trans-Atlantic and South American routes.

Gould served five years in the U.S. Marine Corps and received a bachelor's degree in economics from Yale University in 1965. He is married and has seven children.

#90345p2145 12/11/1990 ~PR Newswire

OSAKA, JAPAN (DEC. 11) PR NEWSWIRE - A consortium whose lead members are The

Austin Company of the United States and Kawasaki Heavy Industries of Japan announced today that it had been selected to provide the baggage-handling system at Kansai International Airport, now under construction on a manmade island in Osaka Bay.

The baggage-handling project comprises design, engineering, procurement, fabrication, construction and installation of the system.

A significant proportion of the equipment for the baggage-handling system will be procured from U.S. manufacturers, the consortium said.

In confirming the award, the Kansai International Airport Company Ltd., the development authority, estimated that the project would cost approximately U.S. $50 million.

The award signals the largest civil construction project in which an American company is participating since the U.S.-Japan construction agreement was reached on May 25, 1988.

Under that agreement, the Japanese government said it would ensure that American companies would be able to compete for construction of public works, such as airport projects.

Formed five years ago, the consortium, in addition to The Austin Company and Kawasaki Heavy Industries, includes Beumer Machinenfabrik KG of Beckum, Germany.

The Austin/Kawasaki/Beumer team is planning a state-of-the- technology system that will be one of the largest baggage-handling installations in the world.

The advanced system will have four principal components serving, respectively, international arrivals, international departures, domestic arrivals and domestic departures.

Baggage for international departures will be checked in at a counter on the third level of the passenger terminal. It will then be conveyed down to the first level by a vertical conveyor, using the automatic sortation system to direct it to its build up station and final destination.

The award of the baggage handling system to the Austin/Kawasaki/ Beumer consortium reflects recognition of the special expertise that each member will contribute to the program, according to officials of the Kansai International Airport Company.

The Austin Company is a global pacesetter in the design, engineering and construction of airport-support facilities. Austin is also recognized worldwide as a leader in logistics, materials handling, distribution and systems integration.

Kawasaki Heavy Industries, headquartered in the Kansai region, is a 112-year-old manufacturer of material-handling equipment, with worldwide experience in applications of technology to transportation by air, land and sea.

The Austin Company is an international organization of consultants, designers, engineers and constructors. Austin serves industrial, commercial, governmental and institutional markets. Headquartered in Cleveland, where it was founded in 1878, the company operates through 40 offices in North America, Europe, Australia and Japan. Austin has maintained an office in Tokyo for 18 years, and has completed some 75 contracts for Japanese clients worldwide. Austin is also associated with companies in Brazil and Italy.

Kawasaki Heavy Industries, Ltd., established in 1878, heads one of the largest and most diversified industrial groups in Japan.

KHI is active in such business segments as aircraft, plant engineering, machinery, small engines and motorcycles.

The company has 16 manufacturing plants in Japan and 13 plants overseas, including those of subsidiaries and affiliates.

Beumer, founded in 1935 in Beckum, Westphalia, Germany, specializes in transport equipment, mining machinery and iron and sheet metal work. It is regarded as one of the leading manufacturers of conveying, loading, palletizing, packaging and distributing equipment.

CHICAGO (DEC. 11) PR NEWSWIRE - Kemper Capital Markets (KCM) today announced the formation of an executive committee at the firm. The announcement was made by KCM President James Fitzgerald.

"The Kemper Capital Markets Executive Committee will be responsible for managing KCM as an entity, and for providing direction and focus for the firm " Fitzgerald said. "This committee represents our senior management team at KCM," he said. "I am pleased and excited to be promoting these individuals to this important assignment."

The KCM Executive Committee includes Fitzgerald and Robert Davis Jr., Peter Lahti, Richard Morton, Thomas Reedy, and J. Douglas Casey. Fitzgerald said in conjunction with the announcement, three of the members named had been promoted from senior vice president to executive vice president, and given expanded responsibilities at the firm.

Robert Davis Jr., a senior vice president who was co-director of the municipal bond department, was promoted to executive vice president and manager of that department. Peter Lahti, KCM senior vice president and taxable fixed-income group national sales manager, was promoted to executive vice president and manager of all institutional sales and trading for taxable fixed-income products. KCM Senior Vice President Richard Morton, who had been responsible for corporate bond trading, assumed the post of executive vice president with responsibility for all retail fixed-income trading, sales and marketing.

Kemper Capital Markets is a division of Kemper Securities Group, Inc. (KSG). KCM supports the retail and fixed-income sales efforts of the five regional KSG brokerage divisions (Bateman Eichler, Hill Richards, based in Los Angeles; Blunt Ellis & Loewi, based in Milwaukee; Boettcher & Co., headquartered in Denver; Lovett Underwood Neuhaus & Webb, headquartered in Houston, and Prescott, Ball & Turben, based in Cleveland) through the distribution of taxable and tax-exempt fixed products to this brokerage network. Kemper Capital Markets also manages institutional fixed-income sales activities for KSG, and supports those distribution efforts with extensive research and investment banking capabilities.

CLEVELAND (DEC. 12) PR NEWSWIRE - Christmas came early for Cleveland school youngsters -- with Ford Motor Company (NYSE: F) playing the role of Santa Claus.

Ford today announced it will donate $300,000 over three years to the Cleveland Initiative for Education's School-to-Work program.

The Cleveland Initiative for Education was designed by the Greater Cleveland Roundtable and the city's Public Schools to improve the quality of education and increase the number of graduates.

In a ceremony at the Roundtable's annual meeting, a check for $100,000 -- the first installment of the $300,000 -- was presented to school officials by Gifford M. Brown, a member of Ford's Cleveland Community Relations Committee, who also is manager of Ford's Engine Plants in Brook Park.

"Ford is pleased to be able to contribute these funds for the School-to-Work program to help provide a better education for students and make their livelihoods more secure when they enter the working world," said Brown. "It's another case of Ford Motor Company returning something to a community of which Ford is proud to be a part."

The School-to-Work program, operated by Youth Opportunities Unlimited, is a partnership between the Cleveland Public Schools and employers from both the private and public sectors. Under the plan, students can go directly into the work force after graduation or defer post-secondary education.

The program increases employment opportunities available to qualified graduates; provides Cleveland-area employers and qualified students with a centralized employment service that matches students with appropriate jobs, and improves the work readiness of academically qualified graduating seniors, including their ability to interview successfully, pass employment tests, and relate well to others in the workplace.

Ford Motor Company is Cleveland's largest private-sector employer, with about 17,000 employees at five Cleveland-area plants.

WEST LAFAYETTE, IND. (DEC. 11) PR NEWSWIRE - Emerson Kampen, chairman, president and chief executive officer of Great Lakes Chemical Corporation (NYSE: GLK) announced that the company today completed the previously reported acquisition of Bio-Lab, Inc. This action follows the government's favorable review of the transaction under the provisions of the Hart Scott Rodino Act.

Formerly owned by Lonza Inc., Bio-Lab is a leading supplier and formulator of products for swimming pools and spas. Terms of the purchase include cash plus future considerations tied to performance over the next several years.

"Bio-Lab nearly quadruples the revenues of our recreational water treatment business to total well over $200 million," Kampen stated. "Completing this purchase will have an immediate impact across a wide range of activities. Bio-Lab's extensive distributor network opens new, critical geographical market areas that will lead to not only higher sales of swimming pool/spa chemicals and equipment, but will also enhance manufacturing and distribution efficiencies."

He continued, "Taking full advantage of the well established brand names,

customer base, dynamic sales force and other assets of both Bio-Lab and our wholly owned subsidiary, Hydrotech Chemical Corporation, provides an extensive foundation from which to expand bromine's water-related uses, and integrate into other types of speciality chemicals."

He went on to say, "Aside from the benefits relating to the water treatment business, this move will pay dividends for some time to come in other areas. For instance, we have formed strategic supply relationships with Lonza Inc. for a period of years which we anticipate will be beneficial to both companies."

Headquartered in Decatur, Ga., Bio-Lab currently employs approximately 775 people. The company's swimming pool and spa business span the United States, Canada and Australia. Bio-Lab markets its products through more than 2,000 authorized dealers and a wholesale distribution network consisting of 26 outlets in nine primarily sunbelt states.

Great Lakes Chemical Corporation, a Fortune 500 company, is the world's leading producer of bromine, brominated chemicals and furfural derivatives for such applications as flame retardants, agriculture, oil and gas well completion fluids, water sanitizers and other speciality applications. The stock of the company is traded on the New York Stock Exchange.

DETROIT (DEC. 11) PR NEWSWIRE - General Motors will form a single, powertrain-focused organization, the GM Powertrain Division, made up of the GM Engine Division (GMED) and Hydra-matic Division (HMD), GM President Lloyd E. Reuss announced today.

Effective immediately, Richard M. Donnelly is appointed general manager for the new division, which will report to Reuss. Donnelly was GMED general manager. Headquarters for the new division will be in Pontiac, Mich.

The new division builds on the successful integration of GM's engine operations into one division this year, as well as the close working relationship that has developed between GMED and HMD, Reuss said.

Other benefits include expanding the development of electronics technology and applications in powertrains, leveraging critical technical skills to meet stringent state and federal regulations regarding exhaust emissions and fuel economy, reducing variation in products and processes through the use of common methods, cost savings from elimination of redundancy and expanding cooperation and teamwork.

Donnelly began his GM career in 1961 as a student of the GMI Engineering and Management Institute under the sponsorship of Chevrolet Motor Division in Buffalo, N.Y. After graduating in 1966, he spent five years there serving in various manufacturing positions, before being transferred to Chevrolet's Detroit Central Office as product planning administrator in 1971. Beginning in 1974, he held production management positions for Chevrolet in Warren and Flint, Mich., and was named plant manager at the Flint engine plant in 1980.

Donnelly was promoted to director of manufacturing for GMOC-Japan and elected to the Isuzu Motors Board of Directors in 1983. In 1984, he joined C-P-C as a car program manager, responsible for the Chevrolet Corsica and Beretta. He was appointed manufacturing manager for the C-P-C engine and components plants in 1985, and was assigned to the GM Production System Task Team as executive director a year later.

He was named product manager of B-O-C Powertrain in 1988 and GMED general manager in March of this year.

Born July 13, 1943, Donnelly received a bachelor of science degree in electrical engineering from GMI and an MBA from New York State University at Buffalo, N.Y.

LONDON (DEC. 11) PR NEWSWIRE - Representatives from INSPEC and University Microfilms International (UMI) today announced an agreement in principle to offer one of the technical community's most highly regarded databases in CD-ROM format. The announcement was made at a news briefing in conjunction

with the 14th International Online Information Meeting in London.

INSPEC Ondisc is the result of combining the highly regarded INSPEC database with UMI CD-ROM technology. The INSPEC database, which was first computerized in 1969, currently contains more than 3.75 million records in English and is used by researchers all over the world. INSPEC Ondisc will offer abstracts and indexing for more than 4,200 technical journals, of which approximately 750 are indexed cover-to- cover. More than 1,000 conference proceedings, books, and reports are now on convenient CD-ROM. The product will contain the full INSPEC database from 1989 forward -- more than 750,000 records in all.

The coverage of the database focuses on three main subject areas: physics, electrical engineering and electronics, and computing. Within this overall coverage, the database provides a major information resource for a wide range of high-tech fields including: biophysics, laser technology, artificial intelligence, computer-aided design and analysis, control engineering, avionics, robotics, and personal computing, to name just a few.

In conjunction with the upcoming release of INSPEC Ondisc, UMI is introducing its new version of search software. This enhanced system includes a dedicated thesaurus for precise subject definition, a library-holdings facility, word and phrase inverted indexes, and a search option which takes into account differences in American and British spellings.

Based on the high demand for scientific and technical data worldwide, INSPEC Ondisc is expected to appeal to a broad base of users.

INSPEC Ondisc is the 10th CD-ROM database product offered by UMI. Other UMI databases include Dissertation Abstracts Ondisc, ABI/INFORM, and Business Periodicals Ondisc. Founded in 1938 in Ann Arbor, UMI is a leading provider of information in print, online, microform, and CD-ROM to educational institutions and businesses around the world.

HOUSTON (DEC. 11) PR NEWSWIRE - The Tenneco Inc. (NYSE: TGT) board of directors today elected Kenneth W. Reese, currently an executive vice president and member of the board, to the new position of vice chairman of Tenneco Inc. The board also elected Allen T. McInnes, an executive vice president, to membership on the board of directors.

Additionally, the board elected James K. Ashford, currently president and chief executive officer of J I Case, an executive vice president of Tenneco Inc. and a member of the board of directors. Ashford joins Ketelsen, Reese and

McInnes as a member of the corporate office.

All the elections are effective immediately. Reese, McInnes and Ashford will continue to report to James L. Ketelsen, chairman and chief executive officer. Their executive responsibilities will not change.

Reese, 60, will remain responsible for Tenneco's pipelines, shipbuilding, automotive products and minerals businesses. McInnes, 53, will continue to be responsible for the packaging, chemicals and land businesses as well as operations technologies and international development. Ashford, 53, will remain responsible for J I Case, Tenneco's largest division which produces agricultural and construction equipment. Ashford will continue to be located at Case headquarters in Racine, Wis., for the present time.

Reese joined Tenneco as senior vice president and chief financial officer in 1975 from Firestone Tire and Rubber Co. He was named executive vice president in 1978 and was elected to the board of directors in 1983. He graduated from the University of Houston in 1954 with a bachelor of business administration degree. Both the University and the College of Business Administration have recognized him with their respective distinguished alumni awards. He is a member of the College of Business Administration Dean's executive advisory board. Reese is a director of Texas Commerce Bancshares, Fleming Companies Inc., the Texas Medical Center, the Cotton Bowl Athletic Association, The Forum Club of Houston and the National Jewish Center for Immunology and Respiratory Medicine.

MONTVALE, NJ (DEC. 11) PR NEWSWIRe - Federal Paper Board Company, Inc. (NYSE: FBO) today announced that it has signed letters of intent to sell five of its eight folding carton plants to two separate buyers.

Subject to the execution of definitive agreements, any necessary regulatory approvals and final approval by the boards of directors of each company, Manville Forest Products Corporation will buy Federal's plant at Wilmington, N.C., and its mechanical packaging group and Field Container Corporation will acquire the company's plants at Palmer, Mass.; Versailles, Conn.; York, Pa.; and Marseilles, Ill.

Two other folding carton plants located at Thomaston, Ga., and Hendersonville, N.C., will also be sold.

"Federal will retain its Durham, N.C., plant, which is engaged solely in the production of cigarette cartons made from bleached paperboard. The Durham plant and our recently acquired paper cup operations, with their continued

growth potential, fit better with our direction of increasing bleached board capacity than our present folding carton plants," stated John R. Kennedy, president.

Annual sales for the plants to be sold are approximately $180 million and represent about 13.5 percent of Federal's total sales.

Kennedy noted, "We hope that once we reach an agreement regarding the plants at Thomaston, Georgia and Hendersonville, North Carolina, that the sale of the seven facilities will generate more than $100 million before taxes. The proceeds will be used to reduce debt."

Federal Paper Board Company, Inc. manufactures and sells solid bleached paperboard, bleached market pulp, recycled paperboard, folding cartons, paper cups, lumber, and in the European market, uncoated free- sheet paper. The company operates two bleached kraft paperboard and pulp mills, one recycled paperboard mill, eight folding carton plants, six paper cup converting plants, five wood products mills, and one uncoated free-sheet mill in the United Kingdom. Federal has approximately 7,700 employees.

MINNEAPOLIS (DEC. 11) PR NEWSWIRE - Despite a brief and mild recession, there are plenty of opportunities for investors in the stock and bond markets, a panel of experts from IDS Financial Services Inc. said yesterday.

The economy will emerge from its recession in the first quarter of 1991, said William Melton, IDS vice president and chief economist. Melton cited declining interest rates and inflation, tightly controlled business inventories, and an improving U.S. trade balance as factors in resuscitating the economy.

Historically, now is an excellent time to invest in the stock market, Melton said. In the nation's last seven recessions, the stock market rallied during the four months prior to full economic recovery. During these periods, the S&P 500 has averaged a 68 percent total investment return on an annualized basis.

Peter Anderson, president of IDS Advisory Group, said another reason why the stock market will do well despite the recession is that approximately 55 percent of S&P 500 is comprised of companies that are insulated from the current economic pressures. These stocks fall into three sectors: energy, utility and consumer staples, such as food, drug and tobacco companies.

As a result, corporate profits, on an operating basis, will be flat instead of declining, Anderson said. In addition, as institutional investors begin reinvesting the large amounts of cash they've hoarded since the Kuwait invasion, the market will rise dramatically.

Anderson currently recommends buying stocks of companies in the financial services industry, those that export much of their products and companies that will benefit from capital spending, both on facilities and infrastructure. (Following is a list of Anderson's top 10 stock picks for 1991.)

The stock market isn't the only area where IDS sees investment opportunities in 1991. Fixed-income investments also will be attractive. However, the watchword is quality, according to William Westhoff, IDS senior vice president fixed-income investments.

IDS Financial Services Inc. is a Minneapolis-based subsidiary of American Express. IDS is the nation's leading financial planning firm, with some 6,000 financial planners nationwide and nearly $50 billion in assets owned or under management.

MINNETONKA, MN (DEC. 11) PR NEWSWIRE - Santa's workshop has moved from the North Pole to the North Woods this year and Santa's sleigh is bigger than ever -- large enough to hold eight semi-truckloads of toys on their way to the Marine Corps Toys for Tots warehouses around the country.

The toys will arrive before Christmas for distribution to needy children throughout the United States and Puerto Rico compliments of Fingerhut Companies, Inc. (NYSE: FHT), one of the nation's largest direct-mail marketers. Throughout the week, Fingerhut will be dispatching semi-trucks loaded with toys to the Marine Corps Toys for Tots drop-off locations in Columbus, Ohio; Dallas; Indianapolis, Ind.; Minneapolis; Philadelphia; San Diego; and Springfield, Mo.

As part of a renewed emphasis on community involvement, the Minnetonka, Minn.-based company has donated more than $1 million worth of toys to the U.S. Marine Corps Toys for Tots program, making it the largest corporate donor in the country.

"Many children may go without gifts this year," said Ted Deikel, chairman and CEO of Fingerhut Companies, Inc. "Fingerhut sales have remained very steady, and we wanted to share our good fortune with those who need some cheer this holiday season."

According to Betty Bothereau, Fingerhut director of business relations, the company has participated in the Toys for Tots program since 1988, but is increasing its merchandise donation this year to $1 million. Bothereau attributes the increase to the company's new management, which has identified community involvement as a priority for Fingerhut Companies.

Thousands of toys, including bikes, radio-controlled cars, racing sets, plush stuffed animals, science laboratory kits, game tables, and electronic games, will be shipped from the Fingerhut distribution center in St. Cloud, Minn., to

the Marine Corps Toys for Tots warehouses throughout the United States.

This year's collection is falling slightly behind the 1989 total. Horihan says the significant contribution from Fingerhut should help the Marine Corps exceed last year's collection total of nearly 8.5 million toys.

The Marine Corps Toys for Tots program, which began in 1947 in Los Angeles as a way to help orphans of soldiers who lost their lives in World War II, grew into a national effort with corporate, media and celebrity sponsors.

"It's good to see that the U.S. Marine Corps has been able to continue this program in light of the turmoil in the Persian Gulf," said Fingerhut's Deikel, who is also a former Marine. In a separate corporate giving effort, Fingerhut Companies recently donated 51,000 audio tapes and 20,000 pairs of sunglasses to U.S. soldiers deployed in Operation Desert Shield.

Fingerhut Companies, Inc., with headquarters in Minnetonka, Minn., in 1989 recorded annual revenues in excess of $1 billion and is the fourth largest direct-mail marketer of consumer products sold in the U.S. The company's stock is listed on the New York Stock Exchange under the symbol FHT.

NEW YORK (DEC. 11) PR NEWSWIRE - SunResorts N.V. (NASDAQ: RSTAF) and Divi Hotels N.V. (AMEX: DVH) announced today that they have entered into a letter of intent with respect to the acquisition by SunResorts of the Divi chain of resorts in the Caribbean. Pursuant to the proposed terms of the acquisition, it is contemplated that the shareholders of Divi will receive approximately 600,000 shares of SunResorts and that the holders of Divi's outstanding $110 million unsecured subordinated indebtedness will receive a package of cash and securities with an estimated value of approximately $35 to $40 million.

Consummation of the acquisition is subject to a due diligence review by SunResorts, the obtaining of required financing, entry into definitive agreements, the approval of Divi's shareholders and holders of subordinated indebtedness, the absence of any material adverse change and other closing conditions.

SunResorts is the largest employer on the island of St. Maarten engaged in resort, timeshare, and car rental operations. Divi has a chain of hotel and timeshare properties on most major Caribbean islands.

Hushang Ansary, chairman of SunResorts, and Walter Wiggins, chairman of Divi, stated that the Divi resorts enjoy an excellent reputation all over the

Caribbean. They have a high rate of repeat guests. This transaction aims at improving the financial position of the Divi hotels, achieving savings and improving earnings from combined operations.

BELLEVUE, WA (DEC. 11) PR NEWSWIRE - The board of directors of Momentum Distribution Inc. (OTC: MMDI), a national distributor based in Bellevue, today announced the promotion of three executives. Patsy R. Turnipseed has been named senior vice president and chief financial officer. The presidents of two of Momentum's subsidiaries, John H. Goddard of Momentum Graphics and Sanford Lee Van Dyke of VWR Textiles & Supplies, also were promoted to corporate senior vice president.

Turnipseed has been with the company since its formation, and prior to that was vice president and treasurer of its parent, VWR Corp. She was part of the management team that led VWR through its formation in a spinoff from Univar Corp. in 1986; she had been Univar's vice president, Taxes and Regulatory Affairs. A native of Oklahoma, Turnipseed is a graduate of the University of Washington, and is involved in a number of professional organizations concerned with financial, accounting and tax matters.

Goddard joined Momentum Graphics in 1987, from an executive-level career in marketing and sales at 3M. A graduate of Rutgers College, he is an active member of the RIT Advisory Committee and the Graphic Arts Suppliers Association.

Van Dyke has been with the company and its predecessor for more than 17 years, beginning as field sales manager and culminating in 1987 as president of VWR Textiles & Supplies, which is headquartered in Hickory, N.C. A graduate of Appalachian State University, he is an active member of American Furniture Manufacturing Association's suppliers group and the International Sleep Products Association.

In other business, the board of directors also announced that Momentum Textiles President John Wilkinson has also been named corporate vice president. Wilkinson has been with the subsidiary and its predecessors for more than 20 years, and has been president of Momentum Textiles since 1987. A native of Texas, he is a graduate of University of Texas - Austin and has a graduate degree in business from Arizona State University.

Momentum Distribution Inc. distributes supplies and equipment to printers, furniture and bedding manufacturers, and related businesses throughout the United States.

NEW YORK (DEC. 11) PR NEWSWIRE - The Cooper Companies, Inc. (NYSE: COO) elected Joseph C. Feghali, former president and chief executive officer of Security Pacific International Bank, to the board of directors, it was announced today.

Feghali currently serves as the chairman of the board of International Consulting and Investment Technologies, Inc., a worldwide financial services group based in Santa Ana, Calif. ICIT provides a range of monetary, operational and strategic consulting services to corporate treasuries and commercial, merchant and investment banks, in particular.

"Joe Feghali adds important credentials to Cooper at a time when banking expertise is exceptionally valuable to growth-minded corporations such as Cooper," said Gary A. Singer and Bruce D. Sturman, co-chairmen of The Cooper Companies, Inc., in a jointly issued statement.

Feghali will be a member of the board's compensation committee. He has 35 years of banking and business experience, having begun his career in finance as a management trainee at Bank of America, International. He also served as chairman, Security Pacific Bank of Canada; director, Security Pacific Overseas Investment Corporation; and director, Security Pacific Export Trading.

Feghali, a resident of Arcadia, Calif., is a past member of the board of directors of Santa Teresita Hospital of Duarte, Calif.

He received a bachelor of arts degree in economics from the University of Maryland and a master of business administration degree from New York University.

Feghali becomes Cooper's 10th director and its seventh non-employee member.

Current management directors include Singer and Sturman, and Executive Vice President and Chief Administrative Officer Steven G. Singer.

Cooper's non-employee directors include Arthur C. Bass, Frederick R. Adler, Ralph H. Thurman, Warren J. Keegan, Brad C. Singer and Moses Marx.

Bass is the chairman and chief executive officer of Emery Worldwide; Adler is managing general partner of Adler & Company, co-managing general partner of Adler & Shaykin and partner of Fulbright Jaworski & Reavis McGrath; and

Thurman is president of Rorer Pharmaceutical Corporation and executive vice president of Rhone-Poulenc Rorer. In addition, Keegan is president of Warren Keegan Associates, professor of international business and marketing and executive director of the Institute for Global Business Strategy at Pace University; Brad C. Singer is president of Jetmar Construction Corporation; and Marx is partner of United Equities Company, partner of United Equities Commodities Company and president of Momar Corporation.

The Cooper Companies, based in New York City (and no longer in Palo Alto, Calif.), is predominantly a health care company with three business units (CooperVision contact lenses, CooperSurgical cryosurgical instruments and CooperVision Pharmaceuticals).

MINNETONKA, MN (DEC. 11) PR NEWSWIRE - Advance Circuits, Inc. (NASDAQ: ADVC), Minnetonka-based manufacturer of printed circuits, announced today net income of $.07 per share for its first quarter ended Nov. 24, 1990.

For the quarter, the company reported sales of $19,230,000 and a net income of $384,000 or $.07 per common share. This represents an 11.2 percent decrease from sales of $21,650,000 for the first quarter in fiscal 1990 which resulted in net income of $2,426,000 or $.43 per common share. The first quarter of fiscal 1990 included $400,000 of life insurance proceeds on the life of a former officer of the company.

Robert W. Heller, president and CEO, commented that the decrease in first quarter sales over the first quarter of fiscal 1990 was the result of a significant slowdown in its commercial division demand caused by the Middle East turmoil and the budget problems in Washington. The commercial demand is currently showing signs of recovery. The military division continued its strong operating trend from fiscal 1990. Sales order backlog decreased to $40,738,000 from $41,509,000 at the end of fiscal 1990.

The company's common stock is traded on the NASDQ National Market System under the symbol -- ADVC.

#90345p2223 12/11/1990 ~PR Newswire

CHICAGO (DEC. 11) PR NEWSWIRE - UNR Industries, Inc. (NASD: UNRI) announced today that it has received a favorable ruling from United States District Judge Marvin E. Aspen on appeals from last year's Bankruptcy Court orders approving its Plan of Reorganization, and enjoining suits against the reorganized company by future asbestos-disease claimants.

The District Court ruled that the appealing parties, former workers at a Unarco asbestos plant in Bloomington, Ill., which was sold in 1970, lacked standing to appeal from the injunction's prohibition of suits by future asbestos-disease claimants against reorganized UNR.

The District Court also dismissed as moot the former factory workers' appeal from the order confirming UNR's Plan of Reorganization, ruling that it was no longer possible to unwind the Plan. In order to determine how the appealing parties will receive any compensation under UNR's Plan of Reorganization, the District Court remanded to the United States Bankruptcy Court a portion of the former factory workers' appeal from the confirmation order for a determination of whether the workers fall into the class of workmen's compensation claimants rather than into the class of asbestos-disease claimants.

William F. Andrews, president and chief executive officer of UNR, stated, "We are extremely pleased with Judge Aspen's decision. We look forward to continuing our efforts to expand our business and increase our profits for the benefit of our shareholders, the majority of whom are asbestos-disease

claimants."

Malcolm Gaynor, senior partner of Schwartz, Cooper, Kolb & Gaynor Chartered, UNR's reorganization counsel, stated, "These rulings represent a significant victory to UNR and completely vindicate the strategy which we developed for allowing the company to continue its operations while making a fair and equitable settlement with its creditors."

Gaynor stated that while further appeals from the injunction confirmation orders are possible, he is confident that higher courts will agree with Judge Aspen's decision.

COLUMBIA, MD (DEC. 11) PR NEWSWIRE - The board of directors of RAC Income Fund, Inc., (NYSE: RMF) today announced several management changes. These changes are a result of the relocation of the operating office of the fund's manager, Ryland Acceptance Advisers. The office has been moved from Florham Park, N.J., to Richmond, Va., which is the headquarters location for the other mortgage trading and investing activities within the Ryland organization.

Thomas H. Potts, 41, formerly an executive vice president and director for RAC Income Fund, was elected president. James R. Fratangelo, 31, and William H. "Hance" West, Jr., 27, were elected vice presidents.

Potts replaces John K. Darr as president of RAC Income Fund, but Darr will remain a member of the board of directors. Also, Richard E. John has resigned from his position as senior vice president but will continue to serve the fund in a consulting capacity.

Potts joined the Ryland organization in 1984 and has been a director and executive vice president of the fund since its inception. He serves in various other capacities within Ryland's financial entities including treasurer, the Ryland Group, Inc.; vice president, Ryland Mortgage Company; executive vice president, Ryland Acceptance Corporation; and president, RAC Mortgage Investment Corporation.

Fratangelo has been with the Ryland organization since 1984 and most recently has served as a vice president of Ryland Mortgage Company. In that capacity, he manages the mortgage loan warehouse position for both Ryland Mortgage Company and RAC Mortgage Investment Corporation. He has extensive technical and practical knowledge of the mortgage securities market and has been responsible for the issuance of over $1 billion in mortgage-backed securities.

West has been a financial and systems analyst for Ryland Acceptance Corporation since 1988. In this capacity, he has been involved in the issuance and structuring of $6 billion of mortgage-backed bonds and security transactions.

"The investment strategies of the fund will remain unchanged," said Potts. "The management team will continue to work to maintain a high level of portfolio performance and focus on achieving a dividend yield of 150 to 200 basis points over intermediate-term U.S. treasury securities, while maintaining a stable net asset value."

RAC Income Fund is managed by Ryland Acceptance Advisers, Inc., a wholly owned subsidiary of Ryland Acceptance Corporation. Ryland Acceptance Corporation is an indirect subsidiary of the Ryland Group, Inc. (NYSE: RYL).

SAN FRANCISCO, CALIF. (DEC. 11) PR NEWSWIRE - Phoenix Network Inc., (NASDAQ: PHXN) and Comdial Corp. (NASDAQ: CMDL) today announced a three-year marketing agreement for the purpose of providing long distance network management services to Comdial dealers and their customers. This will enable Comdial to offer the networks of the major long distance carriers at substantial discounts with value-added services. The program will be marketed under the name of Comdial Network Services (CNS).

As a leading manufacturer of business telephone systems, Comdial currently sells telephone and related equipment through their nation-wide dealer network of 600 interconnect companies and national accounts.

"We feel that this opportunity represents a tremendous benefit to our current customers and potential clients. We can now take care of all aspects of a company's communications needs," said Steve Ayers, vice president of sales for Comdial.

Marc Goyette, president of Phoenix Network, said "Comdial is a perfect match for Phoenix Network. Their focus is on the small- to medium-sized business which is completely synchronous with our products and philosophy."

Comdial Network Services will be offered through their dealer network to complement Comdial Business Telephone Systems and Comdial Voice Processing.

Phoenix Network Inc., based in San Francisco, is the innovator of the telecommunications network management industry.

#90345p2244 12/11/1990 ~PR Newswire
CISCO, TEXAS (DEC. 11) PR NEWSWIRE - Golden Triangle Royalty & Oil, Inc. (NASDAQ: GTRO) today announced a favorable judgment in a royalty lawsuit against 29 oil companies.

Golden Triangle holds an overriding royalty interest in Queensland, Australia, concession ATP 299P, where there are 24 successful, producing oil wells. Production started in 1984, but GTRO had to file suit against 29 oil companies in order to receive its correct amount of royalty payments.

The Supreme Court of Queensland issued a judgment ordering that back royalty payments, plus interest, costs and damages, be paid to the plaintiffs in the lawsuit, including GTRO. GTRO estimates that GTRO's share of these payments will be approximately $370,000; a partial cash payment of $111,307.04 has been received and deposited in the company's account in a Cisco, Texas, bank, and the remainder of the money is expected to follow.

Of great importance to GTRO is the fact that regular royalty checks from production on ATP 299P will be received by the company. Cash flow from this source (and management estimates that ATP 299P is only 10 percent drilled up), plus royalty payments from any future production on 19 other concessions in Queensland where GTRO holds overriding royalty interests, plus royalty payments from 143 oil and gas wells in the United States where GTRO holds small royalty and working interests, should show a marked increase in 1990 and in future years.

TULSA, OKLA. (DEC. 11) PR NEWSWIRE - T/SF Communications Corp. (AMEX: TMC) has determined to amend and extend its currently pending "Dutch Auction" issuer tender offer, for its 10 cents per value common stock. The tender offer is being amended to narrow the range of prices at which the company will accept tendered stock. The amended prices are not less than $2.125 and not greater than $3 per share.

The company also indicated that by reason of the amendment it will extend the tender offer until Dec. 28, 1990. By so limiting the range of prices, the company has, in effect, raised the lowest price at which it is willing to accept tendered shares.

Shares which have been validly tendered pursuant to the company's original tender offer at a price at or below $2.125, shall be deemed to have been tendered at the amended minimum price of $2.125, unless such shares are properly withdrawn or are validly retendered. Shares which have been validly tendered pursuant to the original offer at a price in excess of $2.125 per share, but at or less than $3 per share, shall continue to be deemed tendered at the specified price unless properly withdrawn or validly retendered.

T/SF Communications Corp.'s shares closed on Dec. 11 at $2.375.

CINCINNATI (DEC. 11) PR NEWSWIRE - Frank Gardner has been named vice president, news, for Scripps Howard Broadcasting Company, it was announced today by Richard J. Janssen, president and chief executive officer. The appointment is effective Jan. 1, 1991.

Gardner, who has served as vice president and general manager of television station WCPO in Cincinnati since April 1988, is a highly respected broadcast veteran whose accomplishments have included directing top-rated CBS news operations in New York, Chicago and Los Angeles, where he also served as general manager of KCBS-TV.

In this newly created position, Gardner will work with the management of Scripps Howard's television stations to coordinate the continued enhancement and expansion of news programming. Quality local news has long been one of the most defining aspects of Scripps Howard Broadcasting's service to its communities.

"Frank Gardner's passionate belief in the quality and integrity of broadcast news, coupled with a strong desire to win, match up perfectly with Scripps Howard Broadcasting's future goals," Janssen said. "We are delighted that Frank's considerable talents will be utilized at each of our television stations, and his appointment is further proof that Scripps Howard Broadcasting intends to remain at the forefront of broadcast news development in each of our markets."

Gardner began his broadcast career as a reporter and producer at WAGA-TV in Atlanta in 1968. He moved in 1972 to WCBS-TV in New York as a reporter, and later became local programming executive producer for Pittsburgh's PBS station WQED. From 1976 to 1981 he was news director at Scripps Howard's WMC-TV in Memphis. His CBS assignments followed. He then became general manager of KBAK-TV in Bakersfield, Calif., and an executive of its parent, Burnham Broadcasting Co. In 1988, Gardner was named general manager of WCPO.

Gardner and his wife, Pamela, have two sons and live in Symmes Township near Cincinnati.

Scripps Howard Broadcasting, an 80.4 percent-owned subsidiary of The E.W. Scripps Company (NASDAQ: EWSCA), operates nine television stations, five radio stations and cable television systems with 257,000 basic subscribers.

#90345p2256 12/11/1990 ~PR Newswire

CINCINNATI (DEC. 11) PR NEWSWIRE - J.B. Chase has been named general manager of WCPO, Scripps Howard's CBS-affiliated television station in Cincinnati, it was announced today by Richard J. Janssen, president and chief executive officer of the Scripps Howard Broadcasting Company.

Since 1986, Chase has been assistant general manager and general sales manager at WCPO. The 35-year broadcasting veteran was involved in advancing WCPO's marketing efforts and developing one of the midwest's strongest TV news operations.

"J.B. Chase is an example for broadcasters who seek to make quality service their number-one goal," said Janssen. "His commitment to Cincinnati's viewers and advertisers has been key to WCPO's success in this commuity."

Chase's promotion is effective today, Janssen said. Chase replaces Frank Gardner, who will join Scripps Howard Broadcasting's corporate operation as vice president, news, on Jan. 1, 1991.

Chase began in 1955 at KOCO-TV in Oklahoma City, where he focused his career on television sales. He became general sales manager of KOCO in 1964 and general manager in 1971. Chase joined WCPO in 1972 as local sales manager, and was promoted to national sales manager in 1973 and to general sales manager in 1985.

Under his direction WCPO recently commissioned a comprehensive market data study by the Leigh Stowell organization. The study is being widely used by Cincinnati advertisers in their efforts to achieve the greatest results from their media dollars. Since 1987, he has served as executive producer of many of WCPO's local entertainment programs.

Chase and his wife, Helen, live in Anderson Township, near Cincinnati, and have two grown children and two grandchildren.

Scripps Howard Broadcasting, an 80.4-percent owned subsidiary of The E.W. Scripps Company (NASDAQ: EWSCA), operates nine television stations, five radio

stations and cable television systems with 257,000 basic subscribers.

#90345p2262 12/11/1990 ~PR Newswire

SAN ANTONIO (DEC. 11) PR NEWSWIRE - San Antonio-based 50-OFF Stores Inc. reported a continued upward trend in revenue and income for the third quarter of its 1991 fiscal year ended Nov. 2, 1990. The company reported revenue of $18,605,648 for the quarter ended Nov. 2, 1990 compared to revenue of $12,955,897 for the quarter ended Nov. 3, 1989, an increase of approximately 43.6 percent. Income before preferred stock dividends and extraordinary credit was $346,642 compared to $69,709 for last year's period. Both primary and fully diluted income per common share before extraordinary credit was $.06 for the current period versus break-even for the prior comparable period.

The off-price apparel retailer also reported revenue of $49,334,196 for the 39-week period ended Nov. 2, 1990 compared to revenue of $37,621,244 for the same period last year ended Nov. 3, 1989, an increase of about 31.1 percent. Income before preferred stock dividends and extraordinary credit was $1,093,998 for this year's 39-week period against $570,558 for last year's comparable period, an increase of approximately 91.7 percent. Fully diluted income per common share before extraordinary credit was 20 cents for the current period compared to 13 cents for the prior comparable period.

For the quarter and 39 weeks ended Nov. 3, 1989, the extraordinary credit, a tax benefit resulting from the utilization of operating loss carryforwards, was $36,000 and $294,000, respectively. The company no longer has operating loss carryforwards.

Charles Siegel, president and chief executive officer of the 46- store chain, affirmed that third quarter revenue and income continued to exceed the company's budgeted expectations. "As reported at the end of our second quarter, we had strong August sales in connection with our back-to-school selling season, and this contributed greatly to our successful third quarter," Siegel stated. He also said that the third quarter outcome was also largely due to higher company sales resulting from additional store openings and improved sales-per-store performances. Comparable store sales for the quarter increased 9.6 percent.

Siegel also announced that leases have been signed for two new stores in the Houston area, the company's first stores in southeast Texas, and that leases are nearly finalized for two more new stores in the Dallas-Fort Worth area and a first store in Albuquerque, N.M. All of these new stores are planned to open in early March 1991.

DENVER (DEC. 11) PR NEWSWIRE - VenturesTrident II, L.P., a Denver-based limited partnership, today filed suit against Eastmaque Gold Mines Ltd., a Vancouver-based company, to block the conversion of the preferred shares it holds in Eastmaque. The suit claims that Eastmaque has instituted a plan whereby it is forcing the conversion of the 1,022,500 Series "A" 8 percent Convertible Preference Shares which represents 36 percent of the issued and outstanding preferred shares. The lawsuit, which has been filed in the Supreme Court in British Columbia, alleges that the plan implemented by Eastmaque is merely a scheme to improve Eastmaque's balance sheet at the expense of the preferred shareholder. VenturesTrident II, will vigorously oppose any attempt to arbitrarily convert its shares.

The Honorable Mister Justice Catliff of the Supreme Court of British Columbia issued an order today blocking Eastmaque from converting the preferred shares until the Court has had the opportunity to conduct a further hearing concerning the transaction. A subsequent hearing is scheduled for Dec. 17, 1990. Paul A. Bailly, president of Fulcrum Management Inc., VenturesTrident II's partnership manager, said "VenturesTrident II, is reluctant to initiate court proceedings; however, we believe these proceedings are necessary to protect our rights as a significant holder of Preference Shares in the capital of Eastmaque. Such precipitous, unwarranted, and oppressive action can only be explained as an extraordinary and unauthorized attempt by Eastmaque's management to further their own interests as holders of Eastmaque common shares, and threatens not only VenturesTrident II, but the integrity of all Eastmaque shares." The VenturesTrident II, suit also alleges that the Eastmaque board of directors may attempt to convert the shares before the dispute can be heard in court. Eastmaque shares are traded on the Vancouver Stock Exchange, the Toronto Stock Exchange, and on NASDAQ. Bailly said, "These unfortunate circumstances have caused VenturesTrident II to question the wisdom of its investment in Eastmaque."

VenturesTrident II, is a venture capital parntership funded by major institutions which, in addition to providing venture capital to development projects and companies worldwide also provides managerial, legal, and technical assistance to its portfolio companies. VenturesTrident II, has been providing technical and managerial assistance to Eastmaque as well as to other Canadian, Australian, and U.S. companies.

MOSCOW (DEC. 11) TASS - PROVISION OF MOSCOW RESIDENTS WITH FOODSTUFFS HAS RECENTLY BECOME AN EXTREMELY ACUTE PROBLEM. EMPTY COUNTERS AND LONG LINES HAVE BECOME USUAL.

OFFICIALS RESPONSIBLE FOR FOOD SUPPLIES TO THE CITY GIVE VARIOUS REASONS FOR THE FOOD CRISIS. FIRST DEPUTY CHAIRMAN OF THE MOSCOW CITY COUNCIL SERGEI STANKEVICH SAYS THE SITUATION CAN BE EXPLAINED BY THE ECONOMIC CRISIS IN THE COUNTRY.

AT THE SAME TIME, HE BELIEVES THERE ARE POLITICAL GROUNDS, AS ALMOST SIMULTANEOUSLY NINE REGIONS BORDERING ON MOSCOW, DECIDED TO REDUCE OR STOP ALTOGETHER MILK SUPPLIES TO MOSCOW. STANKEVICH SAID MOSCOW HAS RECEIVED SOME 100,000 TONNES OF MILK LESS THAN EXPECTED.

QUOTING THE RUSSIAN TRADE MINISTRY AND THE MOSCOW TRADE DEPARTMENT, THE SOVETSKAYA ROSSIA NEWSPAPER WRITES THAT THE DELIVERY OF SOME FOODSTUFFS TO MOSCOW WAS EVEN "GREATER THAN EXPECTED", INCLUDING MEAT DELIVERIES. THE CRISIS RESULTED FROM "MISMANAGEMENT" BY THE MOSCOW AUTHORITIES THEMSELVES, THE NEWSPAPER WRITES. ACCORDING TO THE NEWSPAPER, THERE ARE HUNDREDS OF CARS WITH FOOD AT MOSCOW RAILWAY STATIONS.

THE SELSKAYA ZHIZH NEWSPAPER BELIEVES FOODSTUFFS, INCLUDING MEAT, ARE MOVED FROM STATE SHOPS TO COOPERATIVES.

THE FACT THAT THE SOVIET KGB HAS SET UP HEADQUARTERS TO COMBAT ECONOMIC SABOTAGE PROVES THAT THE COUNTRY'S LEADERSHIP IS SERIOUSLY WORRIED WITH THE PROBLEM. ACCORDING TO THE SOVIET PROCURATOR'S OFFICE, THE STATE LOSES OVER FOUR BILLION ROUBLES A YEAR BECAUSE OF EMBEZZLEMENTS, DAMAGE AND MISAPPROPRIATION OF MATERIAL VALUES.

OVER 136,000 FACTS OF EMBEZZLEMENT AND ABUSE OF OFFICE, INCLUDING 13,000 ON A LARGE SCALE, WERE DETECTED IN THE SECOND HALF OF 1988 AND IN 1989. THIS YEAR, THE NUMBER OF LARGE SCALE EMBEZZLEMENTS HAS GROWN BY OVER 23 PERCENT.

WESTERN EXPERTS BELIEVE THERE IS NO FOOD CRISIS IN THE SOVIET UNION. THE COUNTRY SUFFERS FROM DISORDER IN ITS SUPPLY SYSTEM.

KIEV (DEC. 11) TASS - THE UKRAINIAN GOVERNMENT HAS BEEN INSTRUCTED TO WORK OUT BILLS ON THE STATUS OF VICTIMS OF THE CHERNOBYL DISASTER, THE STATUS OF ECOLOGICAL DISASTER ZONE AND THE CONCEPT OF SAFE RESIDENCE OF PEOPLE IN RADIOACTIVE CONTAMINATION AREAS.

DURING ITS MEETING ON MONDAY, THE PARLIAMENTARY HEALTH PROTECTION COMMISSION INSTRUCTED THE GOVERNMENT TO PREPARE THE BILLS IN THE NEAREST FUTURE AND SUBMIT THEM TO THE REPUBLICAN PARLIAMENT.

THE COMMISSION NOTED THAT SOME 1.5 MILLION PEOPLE, INCLUDING 460,000 CHILDREN, ARE STILL LIVING IN AREAS CONTAMINATED WITH RADIATION AS A RESULT OF THE CHERNOBYL NUCLEAR DISASTER. SOME 93,500 PEOPLE HAVE BEEN EVACUATED AFTER THE DISASTER. IT IS PLANNED TO MOVE 40,000 PEOPLE MORE TO A NEW PLACE OF RESIDENCE.

WORK HAS BEEN DONE TO DECONTAMINATE THE TERRITORY. A NETWORK OF SPECIAL MEDICAL INSTITUTIONS HAS BEEN SET UP. THE MEDICAL CONTROL PROGRAMME IS BEING IMPLEMENTED. THESE MEASURES HELPED LESSEN THE INFLUENCE OF IONISING RADIATION ON PEOPLE BY 50 PER CENT.

RESEARCH HAS SHOWN THAT THE SITUATION IN RADIOACTIVE CONTAMINATION AREAS REMAINS COMPLICATED, PARTICIPANTS NOTED. THE HEALTH OF PEOPLE WHO SUFFERED FROM RADIATION IS WORSENING. COMPARED TO 1988, SICKNESS RATE HAS GROWN BY 45 PERCENT AND DEATH RATE BY 25 PERCENT.

THE NUMBER OF DISEASES OF BLOOD AND BLOOD-GENERATING ORGANS, THYROID GLANDS HYPERPLASIA AND VARIOUS DISTURBANCES IN THE ENDOCRINE SYSTEM HAS SHARPLY GROWN.

KISHINEV (DEC. 12) TASS - A THREE-DAY TERM HAS EXPIRED, DURING WHICH THE SOVIET INTERIOR MINISTRY'S TROOPS SHOULD LEAVE MOLDAVIA'S SOUTHERN DISTRICTS AND RETURN TO THEIR PERMANENT RESIDENCE. THE TROOPS ARE BEING WITHDRAWN AT THE REQUEST OF THE MOLDAVIAN PARLIAMENT.

BY TUESDAY, 80 PER CENT OF TROOPS AND EQUIPMENT HAVE BEEN PULLED OUT, MOLDAVIAN INTERIOR MINISTER MAJOR-GENERAL ION KOSTASH TOLD MOLDOVA-PRES. HE NOTED THAT THE REMAINING TROOPS WILL LEAVE MOLDAVIAN TERRITORY "AS SOON AS THEIR PROBLEMS WITH FUEL DELIVERY ARE RESOLVED".

ON DECEMBER 6, THE MOLDAVIAN PARLIAMENT HAS LIFTED THE STATE OF EMERGENCY AND A SPECIAL RULE IN FOUR SOUTHERN DISTRICTS OF THE REPUBLIC, THAT HAVE JOINED THE "GAGAUZ SOVIET SOCIALIST REPUBLIC".

THE STATE OF EMERGENCY WAS INTRODUCED ON OCTOBER 26, WHEN THE MOLDAVIAN PARLIAMENT DECLARED THE GAGAUZ REPUBLIC ILLEGAL AND ASKED SOVIET INTERIOR MINISTRY TROOPS TO ENTER MOLDAVIA'S SOUTH.

THE SOCIAL AND POLITICAL SITUATION IN SOUTHERN MOLDAVIA HAS CALMED DOWN. AT THE SAME TIME, THE GAGAUZ REPUBLICAN AUTHORITIES ARE BEING FORMED THERE.

ON DECEMBER 10, THE FIRST SESSION OF THE GAGAUZ REPUBLICAN PARLIAMENT OPENED IN KOMRAT. THE SESSION HAS ADOPTED DECLARATIONS ON SOVEREIGNTY AND ON PRINCIPLES FOR THE GAGAUZ REPUBLIC JOINING THE RENOVATED SOVIET UNION, SESSION PRESS CENTRE HEAD MARIYA MARUNEVICH SAID.

THE GAGAUZ AND THE DNIESTER REPUBLICAN PARLIAMENTS HAVE ALSO PASSED A JOINT DECLARATION. THE REPUBLICS, DECLARED ILLEGAL BY THE MOLDAVIAN PARLIAMENT, STATED THAT THEY ARE UNITING IN A FEDERATION AND CALLED ON THE MOLDAVIAN PARLIAMENT TO JOIN THE FEDERATION.

#90345u0002 12/11/1990 ~United Press International
OAKLAND, Calif. (DEC. 11) UPI - The Oakland Athletics, looking to add stability to their off-season pitching concerns, announced Tuesday they had signed veteran free agent Eric Show to a two-year contract.

The pact, reportedly in the $2 million dollar range, also includes incentives that could add another $500,000.

Show, the all-time career winningest pitcher in Padres history, struggled in his comeback attempt from back surgery last season. He lost five of his first six starts and was removed from the rotation May 14. He pitched in relief, winning his first game July 4 and rejoined the rotation July 16.

The veteran went 2-2 in his next starting assignments, but ended up in the

bullpen in long relief the latter part of the season. Because of his difficulties, the Padres lost faith in him and decided to pay him $250,000 to buyout his option year making him a free agent.

However, Show's history was enough to convince Sandy Alderson, the A's vice president of baseball operations, to take a chance.

''We are extremely pleased that Eric will be with us for the next two years,'' Alderson said. ''His versatility gives us options in both the bullpen and the starting rotation.''

Dave Duncan, the A's pitching coach, said that Show's role with the squad would be dictated by the team's ability to resign free agent pitchers Bob Welch and Scott Sanderson. Welch, the Cy Young winner, is very much a question mark with both the Boston Red Sox and the Chicago White Sox interested in signing him.

''We're not sure the circumstances around Bob Welch and Scott Sanderson,'' Duncan said. ''And of all of the people out there, he (Show) was interested in us, and we were interested in him.

''It's hard to put in ink what role he'll play for us, but I expect that he will be a member of the starting rotation.''

Show, 35, was 6-8 with a 5.76 ERA in 39 games both as a starter and a reliever last year. Overall, the righthander has a 100-87 record with a career ERA of 3.59.

To make room for Show, the A's gave righthander Joe Law his unconditional release.

WASHINGTON (DEC. 11) UPI - The Treasury Department said Tuesday that U.S. banks are still finding barriers to doing business in several foreign markets despite progress in reducing those obstacles.

"Progress in reducing barriers abroad is occurring at a varied pace, but generally not as rapidly as we would like," Treasury Secretary Nicholas Brady wrote in a report submitted to Congress.

"Significant improvements have been made in Canada and in many European countries. Only modest progress has been made in many Asian economies.

Numerous Latin American countries still maintain restrictive financial systems " Brady wrote.

Although the United States has one of the world's most open and competitive financial markets, most major U.S. banks do not enjoy the same access abroad. The report said "important strides" have been made in opening and liberalizing Japanese financial markets since a similar study was released in 1986. "Despite modest improvements, a variety of factors have kept the Japanese banking market difficult to penetrate," the report said.

The Treasury also noted that the slow pace of liberalization and deregulation in Japan has given Japanese banks "an unfair competitive advantage over foreign banks both in Japan and globally."

In other Asian markets, namely the newly industrialized economies of Korea and Taiwan, only modest progress has been attained in recent years, the report said. "The Treasury Department has encouraged liberalization in financial market talks particularly with counterparts in these two reports," the report said.

The report said improved access has been promised by Korean officials next year. But in the meantime, U.S. banks continue to face "serious discriminatory restrictions."

A lack of progress to open Latin American markets to U.S. banks continues to be a disappointment, the Treasury Department said. Treatment of foreign banks has regressed with respect to entry in Brazil and significant restrictions remain in Venezuela.

#90345u0075 12/11/1990 ~United Press International

(DEC. 11) UPI - Larry Bird struggled with his shooting during a three-game trip through Texas, but he made the baskets that counted against the Houston Rockets.

Bird, the usually reliable outside shooter for the Boston Celtics, entered Monday night's game in Houston having hit just 7 of 28 shots in games against Dallas and San Antonio. The result was 17 points in two contests, well below his average of 19.8 points per game.

He was only slightly better against the Rockets, sinking 8 of 23 from the field, but he drilled eight straight points, including two three- point jumpers, to spark a 15-0 run in the final five minutes that carried the

Celtics to a 107-95 victory.

''I've had nights were I haven't shot well,'' said Bird, who finished with 21 points, 10 rebounds and seven assists. ''I go through these (slumps) every year. This whole trip I've had opportunities. A lot of those shots I thought were good shots.''

Brian Shaw scored 26 points and Kevin McHale finished with 23 for the Celtics, who outscored Houston 17-4 over the final five minutes to seal the victory, Boston's 12th in its last 14 games.

''He's been struggling,'' Boston Coach Chris Ford said of Bird. ''But he steps up and takes the shots that need to be taken. The only way to get out of a shooting slump is to keep shooting the ball.''

Vernon Maxwell led Houston with 24 points, Akeem Olajuwon scored 18 and Buck Johnson added 17 for the Rockets, who lost their third home game of the season.

Houston led 79-78 entering the final period, and was still up 91-90 after a three-point jumper by Maxwell with five minutes left.

The Celtics then ran off 15 consecutive points over the next 4:42, including eight straight by Bird on two three-point jumpers and two free throws, for a 105-91 lead.

Houston finally broke the skid on a short jumper by Olajuwon with 18 seconds left. Boston outscored Houston 17-4 over the final five minutes.

''We decided to play straight up for a few minutes,'' Ford said. ''Our small lineup rebounded well and put pressure on them.''

Houston Coach Don Chaney was displeased to again see his team fail to do the job down the stretch.

''We have to learn how to execute when it counts,'' he said. ''We were too impatient.''

Houston turned the ball over four times in the final period, and hit just 6 of 25 from the field (24 percent) and three free throws. Olajuwon was held scoreless in the third quarter, and scored nine of Houston's 16 fourth-quarter points.

''That is a championship team,'' Olajuwon said of Boston. ''This year they have a tough team. You can't make mistakes against a team like that because of their experience. We were running out offense, but we just didn't knock the shots down.''

In the only other NBA game, New Jersey nipped Charlotte 121-115.

Nets 121, Hornets 115

At East Rutherford, N.J., Chris Morris scored 10 points during a crucial New Jersey run in the fourth quarter, leading the Nets to victory. Reggie Theus led the Nets with 26 points, Sam Bowie added 22 and Jack Haley, replacing the injured Derrick Coleman, contributed 18 points and a career-high 18 rebounds. Rex Chapman had 24 points, Johnny Newman 19 and Armon Gilliam and J.R. Reid added 18 apiece for the Hornets, who dropped their fourth straight.

#90345u0076 12/11/1990 ~United Press International

WASHINGTON (DEC. 11) UPI - Drug companies are bribing doctors with free trips, gifts and cash to encourage them to prescribe their product, even if the drug has not received appropriate government approval, a Senate panel was told Tuesday.

The Senate Labor and Human Resources Committee also released a survey showing spending by 18 drug companies on such promotional activities as symposiums held at plush resorts, gifts and reminder items to doctors increased from about $40 million in the 1970s to about $165 million in 1988.

''Doctors who accept lavish industry gifts are jeopardizing their objectivity and compromising the trust of their patients,'' said Sen. Edward Kennedy, D-Mass., committee chairman.

''The drug companies and the doctors whom they bribe are classic examples of white-coated and white-collared crime,'' charged Sidney Wolfe, director of Public Citizen Health Research Group.

''We have the majority of drug companies involved in criminal activity of some sort,'' he said, adding the Food and Drug Administration has never prosecuted a bribery case involving pharmaceuticals.

Under federal law, drug companies cannot promote a product for an unapproved use and cannot offer anything of value to induce the purchase of items that are reimbursed under Medicare and Medicaid, federal health insurance programs.

The cost of marketing activities are usually buried in the cost of a drug's research and development, Wolfe and other witnesses said, and then passed on to patients in the form of higher drug prices.

A former public affairs executive at CIBA-GEIGY and Abbott Laboratories testified he finally left the drug industry because ''what I saw was untenable.''

''The price of prescription drugs is clearly determined by what the market

will bear. Pain, suffering and desperation will support a high price, indeed '' David Jones said.

Wolfe cited several examples of what he called bribery, which came to his attention through his consumer group's doctor-bribe hotline.

He said Connaught Laboratories offered purchasers of its vaccine package a certain number of ''points,'' redeemable for personal computers or television monitors.

Also, he questioned Sandoz's use of Sandimmune, its brand name for the immune-suppressing drug cyclosporine, approved to prevent organ rejection.

Sandoz sent letters to doctors offering $100 to read an article and answer questions about using the drug for psoriasis, an unapproved use.

Sen. Orrin Hatch, R-Utah, objected to Wolfe's assessment of industry practices.

''You're using isolated examples to tar an entire industry,'' Hatch said, doubting that doctors are ''dumb'' enough to fall prey for just $100.

''Hundreds of drugs are involved and a majority of companies. So I don't think it's isolated,'' Wolfe said, adding surveys have found many doctors indeed prescribe the drugs for which they have received inducements.

Kennedy said the following drug companies declined to testify at the two-day hearings: Abbott Laboratories, Hoffman-LaRoche, Wyeth-Ayerst and CIBA-GEIGY.

In testimony to be delivered Wednesday, the Pharmaceutical Manufacturers Association said drug promotion is essential.

''If physicians are not adequately informed about the availability of an important new therapy and kept current about its uses, patients are poorly served,'' said association President Gerald Mossinghoff.

WASHINGTON (DEC. 11) UPI - All state insurance departments are not equal and some provide consumer services far better than others, a national study by consumer and insurance industry groups concluded Tuesday.

The study, which looked only at consumer services, such as providing information and handling complaints, concluded that overall state insurance departments are improving, but the quality of those services vary widely from

state to state.

A summary of the study showed insurance departments in Delaware, Florida, Kansas, New York, Texas and Wisconsin were judged ''strongest'' in providing consumer services, but the report did not rate the 44 state departments that cooperated with the study from best to worst.

''The good news is that most departments offer many services to consumers,'' said Stephen Brobeck, executive director of the Consumer Federation of America. ''The bad news is that a number of departments offer few services and no state meets all the criteria of the model program,'' which included 26 criteria for providing consumer services.

Brobeck said New Mexico, Rhode Island and South Dakota particularly offer ''very few consumer services,'' but noted the low populations in those states are likely contributing factors.

The study was prepared by the Consumer Insurance Interest Group, the National Association of Professional Insurance Agents, the American Insurance Association and the American Council of Life Insurance.

Harold Birchfield, chairman of the Professional Insurance Agents group's communications committee, said the ''key areas'' probed were how well the departments provided consumer information and education and handled complaints.

''Many departments are clearly making efforts to respond to rising consumer demand for insurance information and for help in solving problems,'' Birchfield said, noting that since 1989 consumer service budgets in the state offices rose an average of 12 percent.

The report showed half of the reporting states distribute price information on insurers, 43 percent provide information on insurer solvency and 41 percent offer consumers complaint ratios on insurance companies.

While the study failed to rank each of the states according to how well they provide consumer services, some key findings were telling, according to officials of the study groups.

For instance, Delaware's proportionate budget for consumer services was highest at $712 per 1,000 population, while Michigan's, at $38 per 1,000 people, was lowest. Other states ranking well above the $230 per 1,000 average were Florida, Montana, Colorado, Washington and Kansas. Those well below the average included Illinois, New Jersey, Massachusetts, New Hampshire, Missouri and Michigan.

Another key yardstick, according to the experts, was the number of information requests received, with those states receiving proportionately more requests judged to be more effective. The study showed Oregon received the highest

number of information requests at 29. 1 per 1,000 population, followed by Texas, 28.2; Arizona, 28; Florida, 24.3; and Utah, 21.3.

Michigan was again lowest with 0.2 requests per 1,000, followed by New Jersey, Massachusetts, Hawaii and Kentucky, all with 0.1 per 1,000 of population.

Likewise, the study considered a high ratio of complaints received as evidence of an effective alternative for consumer redress on insurance issues. Overall, the 42 states reporting this information received 689, 992 insurance complaints in 1989.

Georgia ranked highest on this criteria, receiving 18.55 complaints per 1,000 population, followed by Delaware, 12.45; California, 5.53; Maryland, 5.09; and Florida, 4.22. The lowest number of complaints, considered undesirable by the study group, was received by Hawaii at 0. 60 per 1,000 population, followed by Alaska and Michigan at 0.72; Utah, 0.74;and Indiana, 0.79 per 1,000 population.

Alabama, Connecticut, Maine, Wyoming and the District of Columbia failed to respond to the surveyers and were not included in the study, and Minnesota and Ohio resonded too late to be included in Tuesday's report.

KOKOMO, IN (DEC. 11) UPI - A watchdog organization founded by Ralph Nader has dubbed a transmission built by Chrysler Corp. in Kokomo, Ind., as the "world's most defective transmission." Chrysler spokesman Jason Vines said the allegations are "grossly exaggerated" and "completely without merit."

The Center for Auto Safety, based in Washington, issued a statement saying Chrysler should recall 500,000 vehicles equipped with the Ultradrive transmission. The four-speed automatic transmission is used on some of Chrysler's most popular models.

An article in this week's Automotive News, a weekly industry newspaper, said service managers for several auto dealers and fleet owners reported failure rates of up to 25 percent on the Ultradrive transmission.

The allegations surprised the president of United Auto Workers Local 685, which represents workers at the Kokomo plant. "Twenty-five percent of them failed? That's just unbelievable," Kenny Hill said.

Hill said workers would have been asked to remain on overtime if a such a high failure rate actually happened. He said there were some early problems with a seal in the transmission, but refinements were made to correct the situation.

The Center for Auto Safety cited a seal problem and also said some failures were caused by electronic components. Chrysler said it had some problems with

transmissions in 1989 models, but notified owners.

Automotive News said a Chrysler engineer said the replacement rate for the transmission was cut from about 3.8 percent in 1989 to .8 percent in 1990. Vines, meanwhile, said Chrysler replaced 19,000 transmissions but said it was a small percentage of the one million produced through September.

Chrysler in a statement said the transmission "is now fully competitive from reliability and durability standpoints and ahead of the competition in many other areas."

PITTSBURGH (DEC. 11) UPI - The Pittsburgh Penguins Tuesday traded defensemen Jim Johnson and Chris Dahlquist to the Minnesota North Stars for defensemen Larry Murphy and Peter Taglianetti.

Johnson, 28, a native of New Hope, Minn., had no goals and five assists in 24 games. He was in his sixth season with the Penguins.

Dahlquist, 27, of Fridley, Minn., had one goal and two assists in 22 games. He also was in his sixth year in Pittsburgh.

Murphy, 29, scored four goals and 11 assists in 31 games. An offensive defenseman, he is in his 11th year in the NHL and previously played for Los Angeles and Washington.

Taglianetti, 27, had no goals and one assist in 16 games. He also played in the NHL with Winnipeg.

The Penguins were 2-8-1 in their last 11 games entering Tuesday night's home contest with Chicago.

#90345u0137 12/11/1990 ~United Press International
WASHINGTON (DEC. 11) UPI - Here is the text of President Bush's message on the occasion of Hanukkah 1990:

I am delighted to send greetings to Jews in this country and around the world as you celebrate the festival of Hanukkah.

The Jewish religion is rich with tradition, and this special holiday is one of both teaching and joy. It commemorates the faith and the perseverance of Judah Maccabee and his followers, who were able to defeat their oppressors and rededicate the Temple in Jerusalem. According to tradition, even though the Maccabees could find enough purified oil in the Temple to keep the sacred menorah burning for only one night of celebration, the oil lasted for eight days and eight nights.

This story of abiding trust in the mercy and justice of the almighty continues to be a source of inspiration to Jews around the world. The miracle of the lights illustrates that the power of the Lord can overcome what seem to be impossible obstacles and that working together to achieve common objectives can make the world a brighter place for all.

Barbara and the entire Bush family join with me in sending our best wishes for a memorable Hanukkah.

-30- 1337
#90345u0149 12/11/1990 ~United Press International
VANCOUVER, BRITISH COLUMBIA (DEC. 11) UPI - Joe Sakic scored at 4:05 of overtime to lead the Quebec Nordiques to a 3-2 victory over the Vancouver Canucks in the NHL's only scheduled game Monday night.

After taking a pass from Mike Hough, Sakic broke hard to the net and deked Vancouver goalie Kirk McLean before flipping a backhander over McLean's stick.

It was Sakic's 19th goal of the season and his third in his last five games. He was forced to leave the ice in the third period after being cut by a teammate's stick.

Quebec goalie Ron Tugnutt was spectacular for the Nordiques, stopping 43 shots including several in the final minutes of the third period.

The Canucks trailed 2-1 in the third period before Steve Bozek's ninth goal of the season at 7:23 forced overtime. Bozek took a feed from Trevor Linden at the top of the left circle and sent a 40-foot slap shot over Tugnutt's right shoulder.

The Nordiques had taken a 2-1 lead in the second period with a pair of early goals.

Bryan Fogarty scored a power-play goal at 2:30 on a slap shot from the blueline that beat Vancouver goalie Kirk McLean. Steven Finn added his third of the season less than a minute later at 3:14, when his shot from in close beat McLean and trickled across the goal line.

Brian Bradley gave the Canucks a 1-0 lead in the first period by taking a pass from Robert Nordmark, skating in alone and lifting the puck past a sprawled Tugnutt at 17:39.

-30- 1628
#90345u0151 12/11/1990 ~United Press International
WASHINGTON (DEC. 11) UPI - Pentagon accountants are scrambling to figure the cost of Operation Desert Shield so Congress can work on a special request for money - some guess $30 billion or more - when it returns next year.

Pentagon spokesman Pete Williams said Tuesday the various branches of the armed services are calculating what they think a full year of the operation will cost and forwarding those estimates to the agency's comptroller. But he said there is no firm guess yet within the building on what the figures may add to.

Published estimates range from $30 billion to $39 billion.

The amount that the operation will cost, exclusive of any combat costs, will to some extent be offset by the cash and in-kind contributions being made by several nations, including the $2.5 billion in cash that the exiled Kuwati government has contributed. Saudi Arabia also has contributed nearly $1 billion in cash and goods and services.

A major component of the estimate will have to be the costs of activating National Guard and reserve units. So far nearly 122,000 of the authorized 188,000 reservists and guardsmen have been called up. If the entire authorized number were called up - and no more - their payroll costs alone as active duty personnel would be about $4.5 billion.

Meanwhile, Williams reported that Iraqi forces in the Kuwaiti theater now number more than 500,000, up about 50,000 in the past few weeks. More than half the forces are in Kuwait itself.

And the number of U.S. personnel in the region was raised by at least 10,000 since last Thursday, to more than 260,000.

The forces of other allies in the region, including Saudi Arabia, are now estimated at more than 220,000, putting the total allied force at at least 480,000, with perhaps another 150,000 U.S. forces due to pour in before the Jan. 15 deadline for military action set by the United Nations.

Williams said that when the Pentagon seeks its supplemental spending bill shortly after the regular budget is due in February it will also seek to change a statute passed in the closing days of the last Congress limiting the Pentagon to being able to spend only $1 billion in the current fiscal year from the Defense Cooperation Account, the pot into which allied contributions are tossed to help defray Desert Shield costs.

So far, he said, the Pentagon has been able to avoid hitting that mark by transferring money from other accounts to cover Desert Shield expenses.

Allies have promised about $6.5 billion in contributions in cash and of goods and services, the largest being Kuwait's contribution.

The United Arab Emirates has put up $280 million, including $250 million in cash, against a promise to provide $1 billion in calendar 1990. South Korea has promised about $95 million and so far delivered about $4 million.

Germany has put up $272 million in cash and $65 million in an in-kind contribution against a promise to put up a total of $1.5 billion.

Japan has promised about $2 billion in help and has so far provided $376 million in cash and $50 million in goods and services.

In Saudi Arabia, he said, that government is providing food, fuel, water and internal transportation to U.S. forces, along with areas for base camps.

He said the United States ''probably will'' start asking allies for additional financial help in the new year.

#90345u0155 12/11/1990 ~United Press International

CHICAGO (DEC. 11) UPI - New York Daily News Publisher James Hoge met with directors of The Tribune Co. Tuesday and said there were no plans to fold or sell the strikebound newspaper.

Hoge met with The Tribune Co. board at Tribune Tower while union members and supporters staged a noisy demonstration outside the building, chanting, ''Settle or sell.''

He emerged from the board meeting with a statement that directors had no intention of selling or closing the paper - and that he will continue efforts to settle the violent, six-week strike.

''The board of directors expressed continued strong support of the Daily News management,'' he said.

''They are confident that the course we are following, which is to reach a responsible collective bargaining agreement while reducing costs - is the right course,'' Hoge said.

''We are successfully rebuilding our distribution despite the continued violent intimidation against newstand dealers and small retail store owners,'' he said.

He also said the newspaper has increased the number of distribution outlets to nearly half the pre-strike number of 12,000.

Circulation, which dropped from around a million to 200,000 shortly after the strike began, is up to 580,000, and will reach 600,000 this week, Hoge said.

''Simultaneously, the Daily News is making every effort to achieve fair and reasonable collective bargaining settlements with the assistance of the Federal Mediation Service,'' he said.

But he said the union contracts must eliminate featherbedding and allow management to determine the size and composition of its staff.

''The strike is expensive byut it is not as expensive as continuing with all these excessive (labor) costs,'' he said.

He denied any timetable has been set for settling the strike and said there was no discussion of a target date for selling or folding the Daily News if negotiations failed to achieve a settlement.

Some 150 union representatives from Chicago and New York, joined by several Chicago aldermen, marched outside Tribune Tower during the board meeting, accusing The Tribune Co. of forcing the strike in a bid to break the newspaper's unions.

Members of nine unions walked off the job six weeks ago to protest labor practices. Contract negotiations had been under way since January.

''The Tribune Co. has forced a strike in New York just as they did in Chicago five years ago,'' said Jerry Minkkinen, executive director of the Chicago Newspaper Guild, referring to a walkout by union printers over jurisdictional matters.

''But it appears this time the Tribune Co. has bitten off more than it can chew.''

Some 6,500 supporters of the Daily News strikers turned out to hear Gov. Mario Cuomo and the Rev. Jesse Jackson Monday evening as they declared their support for strikers at a rally in front of the News building in New York.

The governor promised the crowd he would propose new laws to make it illegal to hire replacement workers, a practice the News has utilized.

The current strike laws are ''destructive of equity bargaining,'' Cuomo said.

Jackson also denounced the practice of hiring replacement workers, calling the use of non-union members, ''immoral, illegal and wrong.''

Cardinal John O'Connor stood among those who supported the strike action.

The News, once the nation's largest circulation newspaper with a reach of almost 2 million a decade ago, dropped to about 1 million circulation before the Oct. 25 strike. That loss has cost the Tribune Co. an estimated tens of millions of dollars.

Sen. Howard Metzenbaum, D-Ohio, arranged hearings Tuesday in New York on his bill to outlaw the hiring of permanent replacements during strikes. The News has been able to continue publication by hiring hundreds of personnel to replace the strikers.

News management and union officials will meet Wednesday with the director of the Federal Mediation and Conciliaton Service, Bernard DeLury.

SAN SALVADOR, EL SALVADOR (DEC. 11) UPI - Rebels damaged a helicopter Tuesday in a second day of fighting in rural areas of El Salvador that has left 44 dead and 50 wounded, the armed forces said.

The army said 38 rebels of the Farabundo Marti National Liberation Front, or FMLN, and six soldiers have been killed in rural combat since Monday.

Rebels launched a stepped up military campaign three weeks ago with attacks on four major military installations and various cities in the interior of the country, followed by more frequent confrontations in rural areas where the rebels traditionally operate.

Government and diplomatic sources estimate that more than 200 people, including soldiers, rebels and civilans, have died since the limited offensive began Nov. 20.

This week's fighting has been centered in the provinces of Chalatenango in the north, and San Miguel in the east.

''A total of 27 rebels and three soldiers from the Arce battalion were killed in fighting (Monday) in Chinameca, San Miguel,'' the army said. Another 25 soldiers were reportedly wounded in Chinameca, 60 miles east of the capital.

In the mountainous province of Chalatenango, rebels seriously damaged a helicopter in fighting that left five guerrilas dead, the army said. A machine gunner in a Huey UH-1H helicopter was killed and the two pilots were among the 19 soldiers wounded in the fighting.

Rebels killed a helicopter pilot in Usulutan province Saturday and have knocked down at least one helicopter, a jet and an armed cargo plane since launching their new military campiagn.

Analysts say U.S.-supplied planes and helicopters are the army's biggest advantage over the mobile guerrila forces in more than decade of civil war. But they said the army has been thrown off balance in recent weeks by increased use of ground-to-air missiles.

Another two soldiers and six rebels were reportedly killed Tuesday near the town of Concepcion Batres, 60 miles southeast of San Salvador, in Usulutan province.

The army said one civilian was killed and another wounded in a rebel grenade attack in Cacaopera, 74 miles east of San Salvador in Morazan province.

Residents of Cacaopera contacted by United Press International said a young man was found dead of a bullet wound but that no one knew who did it. They

said they had not heard a grenade blast or noticed a rebel attack in the small town.

''Everything has been quiet here,'' one resident said.

The independent human rights commission of El Salvador, which often slants its reports in favor of the rebels, recently accused the army of falsely blaming civilian deaths on the rebels in an attempt to receive more military aid from the United States.

#90345u0159 12/11/1990 ~United Press International

VIENNA (DEC. 11) UPI - Iran called on OPEC Tuesday to reduce its oil production by 400,000 barrels a day, but the cartel's secretary-general admitted the organization could not reimpose national output quotas at the moment.

Iranian Oil Minister Gholamreza Aghazadeh made his proposal in remarks to reporters as the once-powerful 13-nation cartel prepared for its semi-annual meeting that officially opens Wednesday. But the issue was not discussed at a brief session of OPEC's Monitoring Committee.

OPEC was not expected to make any concrete decisions on oil pricing or production at the year-end meeting because Iraq's invasion of fellow cartel member Kuwait has thrown the world oil market into turmoil.

The Organization for Petroleum Exporting Countries Secretary-General Subroto said there had been no problem between the Iraqi and Kuwaiti delegates, who sat adjacent to each other at one end of the long table used for the committee meeting at OPEC headquarters. "The Kuwaiti and Iraqi delegations sat at the meeting. Everything was peaceful," Subroto said.

He admitted the gulf crisis made it impossible to restablish the production quotas for each OPEC member that were abandoned in August after Iraq invaded Kuwait or set prices, but he denied the cartel was becoming impotent.

"We're not meeting because we want to make a public relations stunt to show that the organization is still alive," he responded testily when asked what would be accomplished at the session.

Subroto told the Monitoring Committee that world oil demand next year will be 51.90 million barrels a day, just 50,000 barrels a day more than the 51.81 million barrels consumed this year.

He said oil requirements by the industrialized countries belonging to the Organization for Economic Cooperation and Development is expected to decline to 37.08 million barrels a day from 37.54 million barrels a day during the

fourth quarter of the current year. "There will be a need for OPEC to be very prudent and cautious regarding supply and demand in the second quarter of 1991 " Subroto said.

World oil demand is expected to stagnate because the global economy is projected to grow by 2.2 percent next year compared with a 2.6 percent growth rate in 1990, raising fears among OPEC members that prices will plummet again once the gulf crisis is settled.

Apparently reflecting that sentiment, Aghazadeh said OPEC should immediately cut its production of heavy crude by 400,000 barrels a day and concentrate on managing production better. "The most important topic I would like to discuss is production management," he said. "There is a lack of balance in OPEC production at the moment."

Since OPEC suspended its 22.5 million barrel-a-day production ceiling in August following the Iraqi invasion of Kuwait, Saudi Arabia has increased its daily output to 7.9 million barrels from 5.6 million barrels a day before the crisis.

Venezuela has raised its production to 2.3 million barrels a day from 2.1 million during the third quarter, while Iran pumped 3.3 million barrels a day last month compared with 2.9 million barrels a day in October.

Subroto said the average price for petroleum was $22.05 a barrel during the first 11 months of the year, compared with $17.31 for all of 1989 and just $14.24 in 1988. He said the basket of oil prices as measured by OPEC was $30.78 in November, down from $34.32 the previous month.

Subroto said demand for OPEC oil will be 23.19 million barrels a day during the first quarter next year, 21.35 million in the second quarter and 22.54 million in the third quarter. World oil requirements are expected to be 52.44 million barrels a day in the first quarter and 50.51 million barrels a day during the second quarter.

Non-OPEC producers should pump 29.25 million barrels a day in the first quarter of 1991 and 29.16 million barrels a day during the second quarter, Subroto added.

The ministers spent most of the day consulting among themselves behind closed doors. They refused to make any comment as they emerged from the Monitoring Committee meeting.

#90345u0169 12/11/1990 ~United Press International

KANSAS CITY, MO (DEC. 11) UPI - Heavy trading in IBP Inc. stock Tuesday reflected speculation Occidental Petroleum Corp. would sell its controlling

interest in the world's largest producer of fresh beef and pork, analysts said.

Investors think the death of Dr. Armand Hammer, chairman of Occidental, will lead to the sale of parts of Occidental, including its stake in IBP, as Occidental officers seek a clearer focus for the company. Hammer died Monday night at the age of 92.

"They're an oil company, they're not a meat company or a food company, but an oil company," said John McMillin, food industry analyst for Prudential Bache Securities in New York.

Late in Tuesday's trading session, the price of IBP stock was up $2.50 to $18.875 a share on the New York Stock Exchange. Occidental stock was the most heavily traded issue, followed by IBP. Although it has not lost money from its investment in IBP, Los Angeles-based Occidental has not reaped large gains.

"Because they own 51 percent, they only get the dividends of cash flow," said investment analyst William L. Roberts of Sioux Falls, S.D. "They only get the same dividend public shareholders do."

Occidental acquired IBP, then a publicly held company, in 1981 but reduced its interest in the company to that of majority stockholder via a 1987 public stock offering.

McMillin said IBP is an attractive company because of its dominant position in beef processing and its growing presence in the hog market. IBP holds a 35 percent share of the fed cattle market and 15 percent of the hog market. "Dominant companies tend to attract buyers," he said.

McMillin said he expects IBP to be sold within 12 months, possibly to Japanese investors. IBP, based in Dakota City, Neb., reported 1989 earnings of $35.3 million on revenues of $9.1 billion.

#90345u0172 12/11/1990 ~United Press International
TORONTO (DEC. 11) UPI - Citing deflationary forces in the economy, the Bank of Montreal Thursday dropped its prime lending rate .25 percentage points to 13 percent.

"Deflationary forces currently dominate the economic scene, leaving room for a further reduction in interest rates," said Lloyd Atkinson, chief economist at the bank. Virtually all economic indicators, from increasing unemployment to a drop in housing starts, reflect a pervasive weakness in the economy, Atkinson said.

Atkinson said further downward pressure on the Canadian economy is coming from the slowdown in the United States, which if not already in a recession, is on the brink.

Atkinson said he expects the Bank of Canada to react to the worsening economic outlook by cutting its key rate, currently at 12.16 percent, by up to 15 basis points on Thursday.

Atkinson also said he expects the central bank to accelerate its easing of a tight monetary policy that it has used for the past year to fight against inflation. The policy has resulted in using high interest rates, which peaked at 14.75 percent earlier this year, to slow consumer spending.

Atkinson said as the economy continues to slow, inflationary pressures will decrease and interest rates will fall. The Bank of Montreal is forecasting a no-growth 1991 for Canada's economy, with a slow recovery beginning in 1992.

In cutting its prime rate, the Bank of Montreal has separated itself from Canada's other major banks which currently have their prime rates pegged at 13.25 percent.

#90345u0175 12/11/1990 ~United Press International
EDWARDS AIR FORCE BASE, Calif. (DEC. 11) UPI - Despite dust-clogged computers and a stopped up sewage system, the shuttle Columbia came through its launch and landing in good condition with only a handful of minor problems, officials said Tuesday.

Columbia and its seven-man crew glided to a flawless nighttime landing Monday on a concrete runway at Edwards Air Force Base to close out a weather-shortened nine-day flight to study the most violent stars and galaxies in the universe.

Engineers stood by Tuesday to gain access to the shuttle's cargo bay so they

could remove priceless film from one of Columbia's four telescopes for a charter flight back to the Goddard Space Flight Center in Greenbelt, Md., where scientists waited to develop and study the ultraviolet images.

Columbia's crew - commander Vance Brand, 59, co-pilot Guy Gardner, 42, John ''Mike'' Lounge, 44, Robert Parker, 53, Jeffrey Hoffman, 46, and civilian astronomers Ronald Parise, 39, and Samuel Durrance, 47 - planned to fly back to the Johnson Space Center in Houston later in the day Tuesday.

The 38th shuttle mission was marred by a variety of technical glitches, including a broken data recorder, two payload computers that overheated and burned out and a clogged sewage system that forced the crew to briefly use diaper-like ''urine collection devices'' instead of the ship's toilet.

Bascom Murrah, the Kennedy Space Center engineer in charge of Columbia's ground processing, said technicians would not be able to get to the bottom of the sewage problem until after the spaceplane is ferried back to Florida late this week or early the next.

''The orifice is very, very small and it doesn't take much to block it,'' Murrah said of the clogged line used to dump waste water overboard into space.

One of the most significant problems encounted by Columbia's crew was the failure of two critical computers needed to operate three of the four telescopes making up the Astro-1 payload.

The astronauts found dust and lint clogging critical ventilation ducts, apparently causing the computers to overheat and burn out. The failures forced the astronauts to rely on ground controllers to initially aim their telescopes by remote control.

Murrah said the payload computers were part of the Astro-1 Spacelab observatory and that any dust or debris inside likely was there when the units were shipped to the Kennedy Space Center for installation aboard Columbia.

Otherwise, less than 100 heat-shield tiles were dinged to the extent that repairs will be needed and the shuttle's brakes appeared to work properly during the ship's high-speed touchdown.

NASA originally intended to launch nine shuttle missions in 1990, but the space agency had to settle for six because of crippling hydrogen fuel leaks that grounded Columbia for six months and delayed a flight by the shuttle Atlantis from July to November.

But the National Aeronautics and Space Administration closed out the year on a high note by safely launching three shuttles in just 57 days, a post-Challenger record.

Columbia is not scheduled to fly again until about May 7, when four men and three women are set to spend nine days in orbit on a Spacelab life science mission to learn more about how weightlessness affects physiology.

After the May mission, Columbia is scheduled to be shipped back to a Rockwell International factory in Palmdale, Calif., for five months of overhauls and modifications to permit the ship to routinely fly long- duration missions.

The veteran spaceplane is not scheduled to fly after that until June 1992.

#90345u0176 12/11/1990 ~United Press International

WASHINGTON (DEC. 11) UPI - An almost empty U.S.-chartered Boeing 707 flew out of Baghdad Tuesday, evidence that the evacuation of all American hostages in Kuwait is probably complete.

But because of the remote possibility that some Americans may still be in hiding or had not had access to the Voice of America short-wave announcements about the freedom flights, another charter will be sent to Kuwait and Baghdad on Thursday.

That final flight may carry the last of the American diplomats in the beleagured American Embassy in Kuwait, Ambassador Nathaniel Howell and four others, after which the embassy compound will be effectively closed down.

On Monday, a Boeing 747 with 156 Americans returned to Andrews Air Force Base in suburban Washington, D.C., after some four months as hostages.

As the State Department and White House went through the final accounting, it appeared that all the Americans who wanted to leave or could leave Kuwait and Iraq will be out on the final flight.

Left behind are somewhere around 500 people entitled to American passports, many of them foreign-born children in families where one of the spouses is an American citizen.

In some cases, according to the State Department, parents decided that they belonged in Iraq or Kuwait and chose to stay.

In others, Kuwaiti or Iraqi-born husbands with dual nationality could not get exit visas from the Iraqi government and their families chose to remain behind with them.

As the 707 flight left Kuwait, no Americans were aboard, but there were three unidentified Europeans who served as ''wardens,'' keeping the American citizens in Kuwait informed about events, and keeping tab on them.

As the plane landed in Baghdad after a brief stop, about 13 Americans came on board for the flight to Frankfurt, Germany. Four other American citizens were expected to leave aboard a British chartered flight Tuesday from Kuwait.

According to State Department figures, 2,520 American citizens were evacuated on U.S. chartered flights. Another 200 Americans escaped from Iraq and another 600 made their way into Saudi Arabia across the Kuwaiti desert.

In all the confusion, the State Department was given the names of about 30 people by friends or realtives, but it now appears those 30 people had never been hostages.

Just in case, the Voice of America is broadcasting the names of the 30, asking them to show up at Kuwait's airport Thursday for the final flight out.

Spokesman Richard Boucher said, ''We want to be sure we're going through every means possible to ensure that all American citizens in Kuwait are accounted for.''

He said, ''Maintaining accurate accounting under these circumstances has been impossible. However, we believe that all Americans who have desired contact with an American official have found ways to get in touch.''

The exact cost of the 13 chartered flights has not been totaled, but the cost for a 747 to Kuwait and back to the United States is around $200,000. A Boeing 707 would be less.

With the apparent end of the hostage crisis, the focus of U.S. government efforts moved toward maintaining the pressure on the Iraqi government through economic and potential military measures.

The State Department said that the U.S. acting ambassador in Baghdad, Jopseph Wilson, met Tuesday with deputy Foreign Minister Nizar Hamdoub, but there still is no agreement on a date for a trip to Baghdad by Secretary of State James Baker.

#90345u0180 12/11/1990 ~United Press International

MOSCOW (DEC. 11) UPI - The Georgian Parliament abolished a rebellious region Tuesday and placed it under the direct control of the southern republic's government.

The Tbilisi legislature took the step two days after the South Ossetian Autonomous Region, one of three main subdivisions of Georgia, held unsanctioned elections to form its own parliament, the independent Interfax news service said.

The new parliament in South Ossetia voted Monday to withdraw from Georgia and to declare its sovereignty within the Soviet Union as the newly named South Ossetian Soviet Democratic Republic, the official Tass news agency said.

''Ossetian separatism was fanned by the Georgian Parliament's radical national policies and its plans to break from the Soviet Union,'' Tass said. ''According to the (Ossetian) ethnic minority, these plans could infringe on their rights in the future.''

Nationalists gained control of the Tbilisi assembly in elections last month and the legislature has already stated that it will not sign the new union treaty promoted by Soviet President Mikhail Gorbachev as the basis of a reconstituted country.

Interfax reported earlier that the Georgian Parliament imposed a state of emergency in South Ossetia but corrected its dispatch to say the deputies only amended the Georgian Constitution to allow the republic to take such a step.

Maj. Gen. Genrich Malyshkin, deputy chief of Soviet Interior Ministry troops, told the Tbilisi legislature he had just visited South Ossetia and urged deputies to impose a state of emergency there, Interfax said.

In a domino effect sparked by the weakening of central authority, all but one of the Soviet Union's 15 republics have declared sovereignty or outright independence this year, only to see their own smaller regions wage sagebrush rebellions.

Two parts of the Moldavian republic, the Gagauz and Dniester regions, held unsanctioned elections last month, prompting clashes with ethnic Moldavians oppposed to the separatist moves.

Just as the Moldavian Parliament censured the breakaway areas, the Tbilisi legislature in its measure Tuesday said the rebels in South Ossetia had ''ignored decisions by Georgia's bodies of state authority . .. and infringed upon (its) territorial integrity.''

South Ossestia was the site of ethnic violence in November last year, when fighting between Georgians and Ossetians left three people dead and about 140 injured.

Geogia's 170,000 Ossetians make up just 3.2 percent of the republic's 5.3 million people but about half of them live in South Ossetia, where they form the majority of the autonomous province's population of 100,000.

In the clashes late last year, Georgian nationalist groups sent vigilantes to South Ossetia to protect ethnic Georgians they claimed were threatened by Ossetians, whose native tongue is similar to Iran's Persian language.

The Ossetians demanded that their province be removed from Soviet Georgia and joined with the Russian Federation's North Ossetia Autonomous Region across the border. Most Ossetians in the northern province are Sunnite Moslems, while the majority in the southern region are Orthodox Christians.

#90345u0195 12/11/1990 ~United Press International

FORT LAUDERDALE, Fla. (DEC. 11) UPI - Three Irish men were convicted Tuesday of conspiring to buy a U.S. Stinger missile and other weapons to use against British troops in Northern Ireland.

After five days of deliberations, the federal court jury found Kevin McKinley, 33; Seamus Moley, 30, and Joseph McColgan, 39, guilty of two counts each - conspiracy and attempting to receive an explosive device through interstate commerce.

U.S. District Judge Jose Gonzalez scheduled sentencing for Feb. 2. The men face up to 15 years apiece in prison.

They were found innocent of licensing violations, violating the Neutrality Act and attempting to export missiles for use against foreign aircraft.

Prosecutors alleged that the three were members of the Irish Republican Army and planned to use the Stinger shoulder-to-air missile to shoot down a British helicopter.

Undercover agents posing as arms dealers testified that the men paid $50,000 to buy the missile. The agents secretly recorded negotiations in which the defendants discussed buying the Stinger, grendade launchers, . 50-caliber sniper rifles and C-4 plastic explosives.

McKinley, Moley and McColgan, all of whom are Irish nationals, were arrested in January in West Palm Beach. They did not deny having talked to the agents about the weapons. But defense lawyers tried to convince the jury the defendants were improperly lured into the deal.

Defense Attorney Fred Haddad, who represented McKinley, said he would appeal on grounds that Gonzalez failed to instruct jurors about entrapment.

''During the deliberations they sent out a message asking him to instruct them on entrapment because they felt there was entrapment. He wouldn't do it,'' Haddad said.

The jurors should have been told they could find the men innocent if they believe the idea to commit a crime originated with the government, he said.

''There were indications that had entrapment instructions been given the jury would have reached a different verdict,'' Haddad said.

The IRA is battling British troops in Northern Ireland in an effort to win control of the territory and unite it with the Irish Republic.

#90345u0196 12/11/1990 ~United Press International

PONTIAC, MI (DEC. 11) UPI - The Los Angeles Raiders are a big-play team, but it was the little things that carried them to victory Monday night.

Jay Schroeder threw third-quarter touchdown passes of 10 yards to Mervyn Fernandez and 3 yards to Tim Brown, rallying the Raiders to a 38- 31 victory over the Detroit Lions.

''I think we have a second-half team,'' Los Angeles Coach Art Shell said after his team's second straight win. ''We made some adjustments and were able to rally around them.

''I told the team that if we play 60 minutes we'd endure. They threw everything at us, but we held our ground.''

The triumph enabled Los Angeles, 9-4, to stay tied with Kansas City atop the AFC West Division and also improved its Monday night record to an NFL-best 29-6-1.

The game also featured five former Heisman trophy winners, Bo Jackson, Marcus Allen and Tim Brown for the Raiders and Barry Sanders and Andre Ware for the Lions.

''We knew it was going to be a struggle,'' said Schroeder, who completed 12 of 19 passes for 195 yards and three touchdowns. ''(The Lions' run-n-shoot) offense is something we only see once or twice a year.''

Schroeder gave the Raiders their first lead of the game, 28-24, at 6:49 of the third quarter when he connected on a 10-yard TD pass to Fernandez, who ran a

hook pattern to the right corner of the end zone. The veteran quarterback set up the score with two passes for 34 yards and a 12-yard scramble on third and 11.

''When you make a third down and long, it's a big momentum builder,'' Schroeder said. ''You try and stay out of those situations, but it's something you work on all year.''

Schroeder moved the team 46 yards on its next possession before capping the drive at 13:09 with a 3-yard TD pass to Brown, who made a one-handed grab as he crossed the goal-line.

''I scored, then I think (Detroit's) Barry (Sanders) scored, and then Bo (Jackson),'' Allen said. ''I walked over to Tim Brown and said, 'Tim, I know you are going to score too. I think it's Heisman night.'''

The Raiders dominated the third quarter, holding the ball for 11:01 and allowing the Lions only 21 yards offense.

Detroit pulled within 35-31 at 6:24 of the fourth quarter on quarterback Rodney Peete's 6-yard scoring run. Sanders - who rushed for 176 yards on 25 carries - ran 6 times for 47 yards on the drive.

The Lions regained the ball with 6:08 left, but turned it over on Peete's fumble following a fourth down scramble near midfield.

''I think we played well to score 31 points against a defense like the Raiders','' Peete said. ''We had other opportunities, but had turnovers. You can't turn the ball over against a good team. Those things are frustrating.

''It's not like we're getting blown out. We just have to find ways to win the close ones.''

Peete's fumble led to Jeff Jaeger's 37-yard field with 1:55 left.

''I'm very disappointed because our team played good enough to win,'' said Detroit Coach Wayne Fontes. ''I will not say a word about the officiating, nothing.''

The game started on a wild note with three touchdowns being scored in the first 3:47.

Mel Gray returned the opening kickoff 49 yards to set up the Lions' first score. Four plays later, Sanders ran 35 yards for his first TD.

Schroeder evened the score, 7-7, 26 seconds later on the Raiders' first play from scrimmage when he connected on a 68-yard TD pass to Willie Gault, who fell as he caught the ball, rolled twice at the Detroit 15, got up and ran

past Bennie Blades and LeRoy Irvin for the score.

The Lions took a 14-7 edge using two plays, the last on Sanders' 5- yard TD run at 3:47. Sanders had 122 yards rushing in the first half, including 65 in the first quarter. The drive started with Peete's 51- yard pass to Jeff Campbell, which placed the ball at the Raiders' 5.

Cornerback Terry McDaniel helped Los Angeles tie it 14-14, when he intercepted Peete's pass and returned it 15 yards to the Detroit 6. Jackson ran 4 yards and then Marcus Allen bulled across the goal-line for his 11th TD of the year at 8:23. Officials originally ruled that Allen did not score, but a replay reversed their decision.

Peete put the Lions ahead 21-14 at 12:17 on a 7-yard pass to Campbell, who was breaking from right to left in the back of the end zone.

The 35 points were the second-most points scored in the first quarter of an NFL game. Only the 42 scored between Green Bay and Cleveland on Nov. 12, 1967 bettered Monday's output.

Detroit raised the margin to 24-14 at 5:45 of the second quarter on Eddie Murray's 47-yard field goal. The Lions marched the ball 50 yards in 11 plays, consuming 5:32.

The Raiders responded on the ensuing possession, using three plays before Jackson rumbled 55 yards for a touchdown at 7:21.

#90345u0199 12/11/1990 ~United Press International
LOS ANGELES (DEC. 11) UPI - Dr. Armand Hammer, head of Occidental Petroleum, died Monday at 92 and the nation's 16th largest industrial company immediately announced his hand-picked successor would take over.

Dr. Ray R. Irani, president and chief operating officer of Occidental, was named late Monday to succeed Hammer as chairman and chief executive officer.

Hammer died at his Los Angeles home after a brief illness.

Irani, 55, was named pursuant to a resolution adopted by Occidental's board of directors in February at Hammer's request. Irani has been president of Occidental since 1984.

He joined Occidental in 1983 as chairman and chief executive of its chemical subsidiary, Occidental Chemical Corp. and had been president of Olin Corp.

After a career as a research scientist, Irani helped create and develop commercial products and processes at Monsanto and Diamond Shamrock. He was born in Beirut, Lebanon and has a degree in chemistry from the American

University and a Ph.D. in physical chemistry from the University of Southern California.

Hammer's greatest single American business achievement was the rescue of Occidental. He already considered himself retired in 1957 when he took the reins of the company, then a small wildcat oil drilling firm worth an estimated $34,000. Ten years later it was worth $779 million. By 1982 it was the 10th largest oil company in the world, worth more than $8 billion.

Grateful stockholders, some of whom became millionaires on small investments thanks to Hammer's skills, created what a few dissidents complained was a ''cult of personality.''

They held their annual meeting on Hammer's birthday. Rising to their feet in elegant hotel ballrooms, they serenaded him with ''Happy Birthday, Dear Chairman'' and presented him with home-baked birthday cakes. Dissidents who tried to question his leadership, including his business links to communist nations, were shouted down.

In 1976 he was fined $3,000 and put on probation for making illegal contributions to Richard Nixon's 1972 presidential campaign. That black mark on his reputation was removed in 1989 when he was pardoned by President Bush.

In 1982 he masterminded the Occidental Petroleum takeover of Cities Service Co. for $4 billion.

Hammer also was known for having one of the greatest personal art collections in the world. To house the vast collection valued at between $250 million and $400 million, Hammer decided to build the $86 million Armand Hammer Museum of Art and Cultural Center in the Westwood section of Los Angeles. The plans embroiled him in a dispute with stockholders, who felt he was spending too much company money on charities.

He met with Soviet leaders on a personal level perhaps never reached by heads of state, and said the United States and the Soviet Union could and probably would co-exist, that both were led by pragmatic men with a justifiable fear of nuclear war.

After a lifetime of friendly involvement in the economic life of Communist nations, Hammer, whose parents were communists, prophetically told an interviewer in 1982 that ''socialism will be replaced in time by more private ventures ... because communism just doesn't work.''

He predicted that communism would be replaced by ''a sort of hybrid, a mix of government undertakings and private enterprise.''

At 15 Hammer borrowed $165 from an older brother, bought a used car and got a job delivering candy. Within two weeks he paid off his brother - with interest

- and owned the car. He made a vow he would be a millionaire before he was old enough to vote, and reached his goal by running a small chemical company owned by his physician father while attending Columbia University Medical School.

Fresh out of medical school in 1921, waiting for an internship, he heard Herbert Hoover, then American relief administrator, call for help to aid famine victims in the Soviet Union.

The 23-year-old Hammer bought a complete hospital from the government and went to Russia. The sight of peasants starving to death in the aftermath of the revolution convinced him food was a greater need.

At a historic meeting in 1921 with Vladimir I. Lenin, founder of the Soviet state, Hammer talked him into trading Russian furs for American wheat - which Hammer knew was a glut on the market at home - ending a breakdown of trade between the two nations.

Years later, Hammer said that Lenin ''told me frankly that Communism wasn't working ... We want foreign capitalists to come here.''

He moved to Moscow to develop asbestos mines, the first foreign trade concession by Russia since the Bolsheviks overthrew the czar.

His career as an international trader took off. He talked Henry Ford, reluctant to deal with Moscow because of his opposition to communism, into giving him a monopoly on the sale of Ford cars and tractors to Russia.

He made money in Angus cattle, building the largest herd in the world. He invested in a small distillery in the war years, got the jump on the vodka boom with the help of a Russian friend, and within several years owned the second largest distilling enterprise in the United States. In 1956, with his third wife, he retired to Los Angeles.

But Hammer grew bored with retirement and took over Occidental Petroleum when its stock sold for $3 a share. He built it to a high of $100 before it sagged. Under Hammer's guidance, Occidental consistently outmaneuvered such giants as Standard Oil, Texaco and Shell in international deals.

#90345u0201 12/11/1990 ~United Press International

LOS ANGELES (DEC. 11) UPI - A federal jury Tuesday acquitted one of nine defendants charged with participating in an international scheme to launder $350 million in drug profits through downtown jewelry stores.

The jury's verdicts absolving jeweler Peniamin Masheredjian, 35, was the first acquittal in the case, though the judge had previously dismissed charges against a tenth defendant for lack of evidence.

After delivering its verdicts, the jury continued deliberations for the remaining defendants, including Raul Vivas, an Argentine gold dealer who was convicted on two counts in earlier deliberations and is charged with numerous others.

Masheredjian, of Glendale, owns A & P Jewelers and accepted deliveries of cash prosecutors claim was drug profits on behalf of the neighboring Andonian Bros. Manufacturing Co. over a five-day period in 1988.

Masheredjian, a brother-in-law of the Andonians, claimed during a six-month trial that he had no knowledge the deliveries, a series of packages, contained cash and denied involvement in the money-laundering conspiracy.

''We defended on the basis that he had no guilty knowledge of any conspiracy concerning money laundering and was not involved in the intent to money launder or (drug) trafficking,'' defense attorney Ted Flier said.

''The government overeached (in its prosecution) of my client and other defendants in the case,'' Flier said.

Prosecutors refused comment on the verdicts.

The government alleged that Vivas orchestrated the money-laundering ring through a currency exchange in Uruguay and that Nazareth and Vahe Andonian oversaw the laundering of hundreds of millions of dollars from 1985 and 1989.

The case is part of a massive investigation dubbed ''Operation Polar Cap,'' which has spawned two other multi-defendant indictments still pending trial.

Defense attorneys in the case have maintained that like Masheredjian, the Andonians had no knowledge the money they were handling was drug profits and that they typically dealt with large volumes of cash as part of their business's legitimate operations.

#90345u0206 12/11/1990 ~United Press International

SEOUL, South Korea (DEC. 11) UPI - North Korean Prime Minister Yon Hyong-muk arrived in Seoul Tuesday voicing skepticism over the scheduled talks with his South Korean counterpart on how to bring the 45-year division of Korea to an end.

Yon arrived at Shilla Hotel in Seoul shortly before noon after an hour drive from the truce village of Panmunjom 35 miles north of Seoul where he crossed the border accompanied by six other delegates, 33 support personnel and a 50-member press corps.

In an arrival statement read by a spokesman, Yon said his group came to Seoul ''with a heavy heart'' because a series of talks and contacts between the two sides have produced no results that can be presented to the entire Korean people.

Yon said there were ''roadblocks in our way to Seoul this time'' but his delegation decided to come ''taking everything with patience and magnanimity.''

Yon was taking issue with the arrest on Nov. 30 of three Seoul dissidents who returned home after attending a North Korea-sponsored meeting in Berlin seeking to push a ''pan-national union for national reunfication.'' The government had banned them from the meeting.

''To be frank, the time has past when reunification discussions were monopolized by certain people and when reunification movements were regarded heretical,'' Yon said.

''Who is going to benefit from this situation where authorities can travel between the two capitals unpunished while others face legal crackdown for meeting each other even in a foreign country?''

Still, Yon promised that he will present in Seoul ''forward-looking proposals of epochal significance'' for peace and peaceful reunification of the two Koreas divided since August 1945.

Yon and South Korean Prime Minister Kang Young-hoon will get together in an open session Wednesday morning at the hotel and meet again the next day behind closed doors to continue effort to hammer out a firm accord assuring peaceful coexistence of the South and the North.

The unprecedented high-level talks opened in Seoul in September, and a second round followed in the North Korean capital of Pyongyang in October.

At the past two rounds of talks, the two sides differed over what step to take first to bring about rapprochement. The South proposed a broad basic agreement for improved relations and the North offered a nonaggression declaration putting priority on military aspects.

The South said both sides must first recognize and respect each other as a political entities and on that basis build up mutual trust through active exchanges and cooperation. A mere nonaggression declaration was not dependable without mutual trust, the South said.

The North said a nonaggression declaration was the key to mutual trust and could solve all the troubles created by a state of military consrontation between the two sides.

A source close to the prime ministers talks said North Korea is expected to

persist in its stand and insist again on a nonaggression declaration while at the same time offering a parallel agreement on exchanges and cooperation.

The South plans to persuade the North to accept a broad basic agreement first and then move on to discussion of a nonaggression declaration and other military matters including possible arms reduction, the source said.

Yon and his party will return to the North on Friday.

#90345u0222 12/11/1990 ~United Press International
WASHINGTON (DEC. 11) UPI - The government approved Tuesday a manufacturer's plan to warn about 23,000 North Americans that artificial heart valves implanted in their chests are potentially defective.

Shiley Inc. of Irvine, Calif., a subsidiary of Pfizer Inc. of New York, decided to notify all patients with Bjork-Shiley ''convexo- concave'' heart valves in response to concerns raised by the Food and Drug Administration and Public Citizen Health Research Group.

The valve was voluntarily withdrawn from the market in November 1986, about five years after the first reports of life-threatening fractures in the mechanical valves surfaced. However, thousands of patients still have the devices and reports of fractures continue.

About 82,000 people worldwide - 23,000 in the United States and Canada - were implanted with the valve. As of July, 395 of the valves had fractured, resulting in 252 deaths. However, Public Citizen said the death toll may be as high as 750 because not all the deaths have been officially reported.

''When one of these valves fracture, the patient's life can sometimes be saved if the valve is replaced quickly. That's why it is important for .. patients to ask their doctors how to recognize early signs of valve fracture and what to do should it occur,'' FDA Deputy Commissioner James Benson said.

The FDA estimates fractures strike about seven of 10,000 patients per year, a risk of about 0.1 percent. Shiley officials have said that replacing valves already in patients would be foolhardy because the death from replacement surgery would be about 5 percent.

Public Citizen, founded by consumer activist Ralph Nader, had petitioned the FDA and filed a lawsuit attempting to force the valve maker to warn all patients with the potentially defective valves. The group claimed the manufacturer's previous warning letters, sent only to doctors, downplayed the valve's risks.

About 2.1 million Americans suffer disease or deformity of the heart valves, and about 40,000 patients undergo heart valve replacement surgery each year. Without surgery, many patients would die in a short period of time.

Bob Dreyfuss, a spokesman for Public Citizen, Tuesday said his group was ''very pleased'' with the new notification plan, but added that the hard-won victory underscores the need for improving the government's current system of regulating medical devices.

Under the plan, operated for Shiley by the non-profit Medic Alert foundation, all heart specialists and hospital administrators will be asked to identify patients with Bjork-Shiley 60-degree convexo-concave valves. Doctors will then be sent an information kit for each of those patients.

Shiley will also offer to enroll the patients for free in an international implant registry run by Medic Alert. Patients in the registry will receive identification cards and a bracelet or necklace saying that they have a Bjork-Shiley valve. They also will receive the most current information about their valves through Medic Alert and can call the registry for assistance 24 hours a day.

A plan is also being developed to notify foreign governments about the U.S.

program.

#90345u0230 12/11/1990 ~United Press International

UNIVERSITY PARK, Pa. (DEC. 11) UPI - A sagging U.S. economy should lead to boom times for ice cream sellers, a Penn State food scientist said Tuesday.

''In a recession, sweet foods such as ice cream and candy generally do well,'' said Dr. Arun Kilara, professor of food science in the school's College of Agriculture.

''In times when people don't have much money to spend, an ice cream cone or a candy bar becomes a big treat,'' Kilara said.

Economy and regular brand ice creams each share one-third of the market, while super premium ice creams have a 20 percent share. Frozen yogurt, no-fat ice cream and other dairy desserts make up the rest of the market, Kilara said.

The ice cream market will be among topics to be discussed at Penn State's 99th annual Ice Cream Short Course, set for Jan. 7-17, with participants from the United States and several countries.

#90345u0251 12/11/1990 ~United Press International
EDWARDS AIR FORCE BASE, Calif. (DEC. 11) UPI - The Columbia astronauts wrapped up a shortened but successful nine-day astronomy mission with a flawless nighttime landing, closing out 1990 with a ''resounding success,'' officials said Tuesday.

Despite a string of technical glitches and a day-early landing Monday, scientists were elated with the results of Columbia's ''Astro-1'' astronomy mission, hailing it as a major milestone in humanity's understanding of the violent universe.

''Words cannot convey our elation,'' said mission scientist Ted Gull. ''We are exuberant about the data that this mission has produced. The science that is going to come out of this data is going to be tremendous and we know we're going to help re-write textbooks.''

Technicians stood by Tuesday to remove precious film from one of the four telescopes in Columbia's cargo bay. The undeveloped ultraviolet film was to be flown back to the Goddard Space Flight Center in Greenbelt, Md., for processing to find out what secrets it might contain.

''I think we've had a resounding success on the mission,'' said William Lenoir NASA's associate administrator for space flight. ''There's no question ... we have added to the state of our knowledge. It's been a great boon.''

With commander Vance Brand and co-pilot Guy Gardner at the controls, Columbia dropped out of a pitch-black sky after a fiery, hourlong plunge back to Earth,

settling to a smooth touchdown on concrete runway 22 at 9:54 p.m. PST Monday to close out a nine-day 141-orbit mission covering 3.7 million miles.

Landing at Edwards Air Force Base originally was scheduled for Tuesday night, but with a cold front sweeping toward the Mojave Desert, NASA managers decided to order the astronauts home one day early to wind up the year's sixth and final shuttle flight, the second by Columbia.

''Houston, before we go off the air, the crew ... would just like to thank all the mission control teams for just a great job when we had hardware failures and so forth, recovering everything so we could keep going,'' Brand radioed before leaving the shuttle. ''We're really glad to be back and to know that it was a team effort.''

Brand, 59, Gardner, 42, and their crewmates - John ''Mike'' Lounge, 44, Robert Parker, 53, Jeffrey Hoffman, 46, and civilian astronomers Ronald Parise, 39, and Samuel Durrance, 47 - planned to fly back to the Johnson Space Center late Tuesday.

The goal of the flight was to study the most violent stars and galaxies in the universe with a $150 million battery of four telescopes sensitive to X-rays and ultraviolet light from deep space that cannot penetrate Earth's atmosphere.

Despite the early landing and a variety of problems in orbit, officials said data from Columbia's flight will revolutionize knowledge about the structure and evolution of exploding stars, especially violent galaxies and enigmatic quasars. It may also help prove the existence of as-yet-unseen black holes.

''I consider this mission as nothing less than a total success,'' said Lennard Fisk, NASA's associate administrator for space science and applications.

But few missions have had as many ups and downs.

Running six months late because of crippling hydrogen fuel leaks, Columbia finally blasted off at 1:49 a.m. EST Dec. 2 on its fifth launch try since May 30. Right off the bat, the astronauts ran into problems getting their Spacelab observatory up and running.

After working around glitches with a $50 million European-built telescope pointing system, the second of two critical telescope control computers overheated and burned out, leaving the crew with no way to aim three ultraviolet telescopes at their targets.

But in a remarkable display of teamwork and ingenuity, flight controllers and the astronauts improvised a plan allowing engineers on the ground to radio commands to the shuttle to aim the telescopes in the general direction of a given target.

After that, the astronauts, using a joystick hand controller, were able to zero in on the target and keep it centered in the telescopes' field of view as the shuttle raced along through space. Scientists said the new operating procedure was almost as effective as the original.

NEW YORK (DEC. 11) UPI - Domestic demand for natural gas, touted as an alternative to oil for political and environmental reasons, is expected to rise 2.6 percent in 1991 while its price will rise about five percent, gas industry officials said Tuesday. But its price differential relative to electricity and oil will remain the same, The American Gas Association said in its year-end statement.

The AGA quoted government figures predicting that natural gas prices to residential customers are expected to be 35 percent less than heating oil and 75 percent less than electricity. However, demand slipped 2.1 percent in 1990 due to warm weather and the economic slowdown, the AGA said.

By the end of the decade, the AGA said it expects an increase in domestic consumption of about 25 percent, with the biggest rise coming from residential commercial and electric utility use.

Domestic conversions to natural gas heating are expected to rise to 250,000 in 1990 from 181,000 in 1989, while the commercial market gained this year by the entrance of three major air conditioning manufacturers - Carrier, Trane, and York, to the natural gas cooling market.

In a bullish forecast, AGA officials argued that gas is a preferable

alternative to oil because of its substantial domestic reserves and its cleaner-burning qualities in cars and other uses.

"For some time, the natural gas industry has emphasized the national benefits associated with expanded natural gas use in markets such as vehicles, cooling, co generation and co-firing with coal in electric generation to help attain energy security, clean air and economic goals," said AGA president Michael Baly III at a news conference.

Baly said the industry's prospects brightened in 1990 with a renewed public policy focus on natural gas; the enactment of amendments to the clean Air Act; the completion of several major pipelines, and the approval of two more major pipeline projects. As a result, the industry now has a "three-to-five-year window of marketing opportunity" through which it can increase its market share.

Baly said the AGA anticipated an increased federal commitment to clean air, including promotion of natural gas vehicles, to be stated in President Bush's State of the Union speech early next year.

AGA chairman William McCormick called for the formulation of a federal energy policy. "It's important that the administration come forward with an energy policy. We must be one of the few industrial nations that does not have one," he said.

Baly added that General Motors will start production in 1991 of its first gas-powered pickup trucks and that there are about 300 natural gas filling stations now in operation nationwide, about 50 of which are open to the public. He also cited agreements by UPS and Federal Express that they will outfit and test portions of their fleets with natural gas.

McCormick said the United States has natural gas reserves to last at least 50 years.

CHICAGO (DEC. 11) UPI - Manufacturers of sparkling fruit drinks are counting on health concerns to help keep the economic downturn from eating into their

segment of the beverage market, a spokesman said Tuesday.

"We're obviously concerned about the condition of the economy," said William H. Brown, spokesman for New Era Beverage Co. of Dallas, producers of Sundance Juice Sparklers. "We're a premium-quality product, with 70 percent fruit juice content, and therefore a premium-priced product.

But, he said, some of the same qualities that make sparkling juice more expensive than other beverages also give it a marketing leg up on some of its competition.

"The average consumer of today is aware he or she should eat and drink sensibly," Brown said. "Not that they should be the health fanatics of the 1970s but that they know they shouldn't be eating red meat every day, should be watching their consumption of alcoholic beverages and things like that."

As a blend of fruit juice and sparkling water, without additives, Sundance and its kin are a perfect compromise, Brown said. "It speaks to the common desire for something that tastes good and is good for you," he said.

That trend in the industry, Brown said, has analysts predicting double-digit growth for sparkling fruit beverages through the next five years, despite overall questions about the economy. The category, which Sundance pioneered in 1986, currently has an estimated $115 million in annual sales.

Brown, visiting Chicago for a food brokers' convention, said Sundance is changing its labeling to target the health market. The new labels boldly feature on a neck wrap the statement, "70 percent fruit juice."

"Our research indicated that consumers were not surprised to find we were 70 percent juice, but that they just weren't as aware of it as we thought they might be," he said.

He said the brand also is working with the restaurant and foodservice segment of the industry to introduce sparkling fruit drinks in appropriate niches there.

For example, he said, a popular rib house chain recently featured sparkling fruit drinks in a successful campaign to increase its female clientele. College and university foodservice operations also have successfully featured the product.

"We think the traditional white-tablecloth restaurant probably will continue to feature wines with dinner," he said. "But our product might be an attractive alternative - for the designated driver, for example."

New Era Beverage is owned by a joint partnership including British brewing giant Guinness PLC. New Era is Guinness' first venture outside the alcoholic

beverage field, Brown said. Sundance is produced in Buena Park, Calif., St. Louis, and in Maryland along the Chesapeake Bay.

WARSAW, POLAND (DEC. 11) UPI - Former presidential candidate Stanislaw Tyminski was given permission to leave Poland Tuesday after posting $100,000 bail to ensure his return to face charges he insulted Prime Minister Tadeusz Mazowiecki during the presidential campaign.

Tyminski, a businessman with Canadian and Peruvian passports who returned to

Poland to run for president, was summoned to the prosecutor's office in the capital.

Following a four-hour hearing, he told reporters the prosecutor allowed him to go ahead with plans to fly to Toronto Wednesday.

''I paid $100,000 and three people guaranteed my return by Jan. 5,'' he said. Tyminski said his return was guaranteed by two senators and Andrzej Zoll, chairman of the election commission.

Tyminski said he received a prosecutor's summons to report to the court of Nowy Sacz, southern Poland, on Dec. 17, hours after he booked plane tickets to fly to Toronto.

On Nov. 17, in the southern mountain resort of Zakopane near Nowy Sacz, he accused Mazowiecki of ''betrayal of the nation'' because Mazowiecki's economic program resulted in a 40 percent drop in the standard of living in 14 months.

Following his hearing, he said he did not retract his accusation and was ready to stand trial on his return.

''I cannot change the words I used,'' said Tyminski, who looked tired and whose voice was hoarse. ''I expect to stand trial.''

His Peruvian wife, Graziella Tyminski, said she would return with her husband.

Authorities apparently agreed to hold a hearing in Warsaw so as not to disrupt his travel plans.

Tyminski outpolled Mazowiecki in the six-way race in the first round of the presidential elections Nov. 25, but lost to Solidarity leader Lech Walesa in the runoff Sunday. He collected 25 percent of the vote to Walesa's 75 percent.

He showed a summons to reporters which referred to Article 270, Paragraph 1 of the Polish Penal Code which says it is a crime to slander the nation or insult top authority in office such as the prime minister or president. Conviction carries a prison sentence of between six months and eight years in prison.

Tyminski said the code dates back to the Stalinist period and noted that in the West, such a charge would be inadmissible.

''What I said about Mr. Mazowiecki would be normal in Western democracies,'' he said.

Tyminski returned to Poland after 21 years and his appearance on the political scene attracted millions of people disappointed with Mazowiecki's reforms. Despite the immense popularity of Walesa, Tyminski drew 4 million votes on Sunday.

''I am a symbol of hope for millions of Poles,'' he said. ''My duty is to stay in the country.''

#90345u0308 12/11/1990 ~United Press International

SAN FRANCISCO (DEC. 11) UPI - The all-male Olympic Club Tuesday ended its 130-year ban on women members with an historic settlement of a 1987 discrimination suit brought by the city.

The board of the 6,000-member club agreed to admit its first woman within 60 days, adopt an non-discrimination policy that includes minorities and keeps in place an existing court order barring discrimination.

In exchange, the city agreed to drop its lawsuit and give the club an option to buy 17 acres of city land, part of which contains three holes of the club's championship golf course.

The city is also considering the alternative of exchanging the property for several hundred acres of watershed land in Alameda County, according to City Attorney Louise Renne.

Renne said at a press conference to announce the agreement, ''This is absolutely historic. We achieved just what we wanted to achieve.''

She said, ''I hope it sends a message to all private clubs to stop discriminating against women.''

Robert Kane, attorney for the club said, ''The board of directors felt it was in the best interests of the club to settle... it will benefit the club and the city.''

Although the agreement does not set a specific number of women to be admitted, Kane said the club had no intention of reneging on the agreement.

''We are going to live up to the agreement,'' he said.

Renne said if the city feels the club is violating any terms of the agreement, she will go back to court to seek a contempt of court order against the club.

''We will not have to file a new lawsuit,'' she said. ''The existing injunction will remain in force in perpetuity.''

The pricey club with a downtown clubhouse, as well as the two 18-hole country club courses has a $25,000 initiation fee for golf privileges, according to the membership office.

Non-golf memberships cost $4,500 for members over 35 years old.

The dues are $96 a month for members over 35. The cost does not include the price of greens fees.

Private clubs have come under increasing attack in California and across the

country for discriminatory policies.

Some states have begun challenging property tax exemptions, business expense deduction claims and liquor licenses. A number of corporations have eliminated policies of reimbursing executives for the price of club memberships.

The club currently leases the 17 acres of city land that forms three holes of the course. If the club sells any portion of its 354-acre golf facility in the next 50 years, the city will receive a 6 percent share of the proceeds.

Club directors and the board of supervisors met separately to consider the terms Monday night and agreed to the settlement, according to Renne.

Club directors rach a tentative accord with the city in 1988 but that collapsed when an opposition vote by members resulted in the contin ued refusal to admit women.

Directors voted agin in March to pursue a settlement with the city.

The city lawsuit charged the club violated California's Unruh Civil Rights Act which bars all business establishments from discriminating.

The city also maintained the all-male status violated a local city ordinance barring discrimination.

#90345u0313 12/11/1990 ~United Press International

NORTHERN SAUDI ARABIA (DEC. 11) UPI - From A-rations to T-rations and MREs, desert dining for U.S. soldiers is an alphabet soup of menu options that too often spells yechh!

That's why even at breakfast, when the troops open their eyes to a choice between strawberry oatmeal and meatballs with barbeque sauce held over from the night before, spicy, tastebud-numbing Tabasco sauce is always present at the table.

''It's not great, but it's usually edible,'' said Lt. Col. Dennis Hardy, 41, of Spokane, Wash., picking through a plate of cheesy lasagna on a dinner break from reconnaissance duty not far from the Kuwaiti border.

The lasagna, piping hot and known to soldiers taking part in Operation Desert Shield as a MORE, or Meal Ordered Ready to Eat, is the Army's latest innovation in mess-tent cuisine. It is essentially the same as the packaged meals hyped in ads lately as more convenient and superior to frozen TV dinners.

Whether they are tastier than Swanson's is debatable but for soldiers used to the standard service grub, the new meals are a godsend. At Sunday night dinner the lasagna was accompanied by Campbell's beef noodle soup, Del Monte's vanilla custard, fresh fruit and Milk Duds. M'mmm good.

But from there the dining options go decidedly downhill. As always, the Army tries to give its soldiers at least one hot meal a day when they are at a camp with proper kitchen facilities. These are known as A- rations. But soldiers say the veal patties and meat loaf supreme slopped on their plate by men on KP duty do not compare favorably with home.

When the ovens and spatulas are not at hand, military cooks prepare the next best thing - or worst, depending on one's palate - known as T- rations. These are dishes packed similarly to the MOREs but containing 20 to 30 portions each.

In classic style, soldiers pass through the mess tent where the food, warmed in a vat of boiling water, is poured onto their trays. Opinions are not overwhelmingly hostile to this dining choice.

The most familiar and despised eating option available is the MRE, which was introduced experimentally three years ago to substitute for the notorious C-ration and stands for Meal Ready to Eat.

Troops like to argue over which of the vacuum-packed dishes packed in mud-brown plastic bags is the worst but newcomers are charitably warned to avoid the chicken a la king. ''It tastes like dead rats in glue sauce,'' said one uniformed critic.

Happily, the Army tries to provide its soldiers with plenty of fresh fruit at every meal and offers massive quantities of bottled water, although it has also been trying to get them used to purified Persian Gulf water that tastes awful and arrives in thousand-gallon bladders aboard flatbed trucks.

Whenever possible, troops can enjoy Coca-Cola or Saudi-produced imitations such as Sport Cola or Dr. Joe's. Candy and cookies are also generously provided at nearly every meal.

But watch out for the chocolate-chip cookies. Rumor has it each one contains several chips of Ex-Lax, designed to insure that American soldiers of the 90s continue to make up a regular army. A U.S. military spokesman said the rumor is probably not true.

#90345u0316 12/11/1990 ~United Press International

WASHINGTON (DEC. 11) UPI - A brief episode that ruffled the usually smooth relations between the United States and Sweden was declared closed Tuesday, but not before sharp words were exchanged over policy differences in the Persian Gulf.

The flap, widely and prominently reported in the Swedish press, began on Nov. 22 when Swedish Prime Minister Ingvar Carlsson wrote a letter to Iraqi President Saddam Hussein to express his ''feeling of deep worry and concern'' about the possibility of hostilities in the gulf and, in particular, his concern about foreign hostages.

Carlsson wrote, ''I hereby wish to direct a strong appeal to you to let the foreign nationals who wish to return home to their countries do so.''

At that time, there were 76 Swedish nationals held in Iraq. He appeared to be asking for special treatment for the Swedish hostages by pointing out Sweden's tradition of neutrality and recalling the work done for peace by such statesmen as Count Bernadotte and Dag Hammarskjold.

U.S. feelings were further inflamed when Carlsson linked the gulf crisis to the Palestinian issue, in a way that the United States had been trying to avoid. What ruffled U.S. feelings was the fact that Sweden appeared to separate itself from the United Nations condemnation of the Iraqi invasion of Kuwait.
